*** RELATED DATA ITEMS ***

DATA ITEM NAME

EITHER NONREIMBURSABLE ISSUE WAS NOT AUTHORIZED OR, IF AUTHORIZED, WAS NOT SPECIFIED IN THE REQUISITION

ACCESSORIAL CHARGE WAS AUTHORIZED, REQUESTED AND FURNISHED

MATERIEL EITHER WAS NOT BACK ORDERED OR WAS ISSUED FOLLOWING NOTIFICATION OF BACK ORDER

REQUESTED ADJUSTMENT, NOT RELATED TO A DISCREPANCY REPORT, IS LESS THAN THE MINIMUM DOLLAR VALUE PRESCRIBED FOR ADJUSTMENT

PRESCRIBED RECORD RETENTION PERIOD HAS ELAPSED

ADJUSTMENT WAS ISSUED UNDER BILL NUMBER SHOWN IN THIS TRANSACTION

REQUISITION OR EXCESS REPORT DID NOT SPECIFY BILLING UNDER NONINTERFUND PROCEDURES

COPY OF BILL SHOULD BE REQUESTED FROM THE DEFENSE AUTOMATIC ADDRESSING SYSTEM CENTER (DAASC)

DISCREPANCY REPORT REQUIRED THE RETURN OF THE DISCREPANT OR DEFICIENT MATERIEL AND CREDIT CANNOT BE PROVIDED UNTIL THE MATERIEL IS RECEIVED BY THE DEPOT

REQUEST WAS NOT RECEIVED WITHIN ALLOWABLE TIME FRAMES

CANCELLATION REQUEST EITHER WAS NOT RECEIVED OR WAS RECEIVED BUT NOT CONFIRMED

LONG DELAY IS ANTICIPATED AND ESTIMATED SHIPPING DATE IS
CITED. ITEM IDENTIFIED WHICH IS NOT AN
AUTOMATIC/COORDINATE SUBSTITUTE, CAN BE FURNISHED. THE
PRICE OF THE SUBSTITUTE ITEM IS PROVIDED. IF DESIRED,
SUBMIT A CANCELLATION FOR THE ORIGINAL REQUISITION AND
SUBMIT A NEW REQUISITION FOR THE OFFERED SUBSTITUTE.

REQUISITION DELAY

BD

REQUISITION IS DELAYED DUE TO NEED TO VERIFY REQUIREMENTS
RELATIVE TO AUTHORIZED APPLICATION, ITEM IDENTIFICATION, OR
TECHNICAL DATA. REQUISITION FOR GOVERNMENT FURNISHED
MATERIAL (GFM) IS DELAYED PENDING VALIDATION WITH THE
MANAGEMENT CONTROL ACTIVITY (MCA). UPON COMPLETION OF
REVIEW, ADDITIONAL STATUS WILL BE PROVIDED.

NO SUPPORTING DOCUMENTATION FOR
MATERIEL RELEASE ORDER (MRO)

BE

DEPOT/STORAGE ACTIVITY HAS A RECORD OF THE MRO BUT NO
SUPPORTING TRANSACTION/RECORD OF THE ACTION TAKEN.
(DEPOT/STORAGE ACTIVITY RESPONSE TO INVENTORY CONTROL POINT
(ICP) REQUEST FOR MRO STATUS.)

NO RECORD OF TRANSACTION

BF

NO RECORD OF YOUR DOCUMENT FOR WHICH YOUR FOLLOWUP OR
CANCELLATION REQUEST WAS SUBMITTED. 1. IF RECEIVED IN
RESPONSE TO A CANCELLATION REQUEST, SUBSEQUENTLY RECEIVED
REQUISITIONS WILL BE RETURNED BY THE SUPPLY SOURCE WITH BF
STATUS. DEOBLIGATE FUNDS AND, IF ITEM IS STILL REQUIRED,
SUBMIT REQUISITION USING NEW DOCUMENT NUMBER. 2. IF
RECEIVED IN RESPONSE TO A FOLLOWUP REQUEST, SUPPLY SOURCE
ACTION TO PROCESS SUBSEQUENTLY RECEIVED TRANSACTIONS WILL
CONTINUE UNDER REGULAR PROCEDURES. 3. IF RECEIVED IN
RESPONSE TO FOLLOWUPS FROM DEFENSE REUTILIZATION AND
MARKETING SERVICE (DRMS), USED BY SHIPPING ACTIVITIES TO
INDICATE NO RECORD OF GENERATING A SHIPPING NOTICE OR OF
MAKING A SHIPMENT TO A DEFENSE REUTILIZATION AND MARKETING
OFFICE (DRMO).

MULTIPLE CHANGES

BG

ONE OR MORE OF THE FOLLOWING FIELDS HAVE BEEN CHANGED:
1. STOCK NUMBER (AS THE RESULT OF A FORMAL CATALOG
CHANGE). A. REQUISITIONED NSN HAS BEEN REPLACED

CREDIT ACTION IN PROCESS

TW

FINANCIAL TRANSACTION IS FORTHCOMING.

FINANCIAL TRANSACTION ACCOMPLISHED

TX

BILL NUMBER OF CREDIT TRANSACTION IS PROVIDED.

REPLY TO FOLLOWUP FOR CREDIT

TY

THE MATERIEL RECEIPT STATUS TRANSACTION GENERATED ON CITED DOCUMENT NUMBER INDICATED NO CREDIT AUTHORIZED FOR RETURN.

OMR HAS BEEN CHANGED BY DAAS

TZ

YOUR CUSTOMER DATA REPORT HAS BEEN CHANGED BY THE IDENTIFIED DAAS FACILITY. EXAMINE FOR POSSIBLE FSC CHANGE AND TO DETERMINE IF THE TRANSACTION HAS BEEN ROUTED TO ANOTHER ACTIVITY.

MATERIEL RECEIVED

T1

NO CREDIT ALLOWED BECAUSE THE STOCK NUMBER WAS CHANGED FROM A STOCK FUND TO AN APPROPRIATION FINANCED ITEM. FOR INTRA-SERVICE USE ONLY.

OFFERED MATERIEL NOT REQUIRED

T2

THE OFFERED MATERIEL IS NOT REQUIRED AT THIS TIME. THIS CODE IS ONLY TO BE USED IF THE OMR CONTAINED ADVISE CODE 3R.

SHIPMENT STATUS RECEIVED

T3

MATERIEL HAS NOT BEEN RECEIVED. MATERIEL SHOULD BE SHIPPED, TRACER ACTION INITIATED, OR CANCELLATION SUBMITTED, AS APPROPRIATE.

MATERIEL NOT RETURNABLE

T4

QUANTITY INDICATED IS EXCESS INDUSTRIAL PLANT EQUIPMENT (IPE) AND MUST BE REPORTED TO DEFENSE INDUSTRIAL PLANT EQUIPMENT CENTER (DIPEC) UNDER DLAM 4215.1 ET AL.

NOT RETURNABLE

T5

THE IMM DOES NOT REQUIRE THE REPORTED QUANTITY AT THIS TIME; HOWEVER, RETAIN ITEMS IN PLACE AND REPORT AGAIN IF THE QUANTITY IS STILL EXCESS AFTER THE DATE INDICATED IN THE 2/DTM/240 LOOP OF THE MRSS.

OMR ROUTED TO ANOTHER ACTIVITY

T6

FORWARD ALL FUTURE TRANSACTIONS TO THAT ACTIVITY.

DATA ITEM NAME

SERVICEABLE (ISSUABLE WITH
QUALIFICATION)

CODE

EXPLANATION

B

NEW, USED, REPAIRED OR RECONDITIONED MATERIEL WHICH IS
SERVICEABLE AND ISSUABLE FOR ITS INTENDED PURPOSE BUT
WHICH IS RESTRICTED FROM ISSUE TO SPECIFIC UNITS, LIMITED
ACTIVITIES OR GEOGRAPHICAL AREAS BY REASON OF ITS LIMITED
USEFULNESS OR SHORT SERVICE LIFE EXPECTANCY. INCLUDES
MATERIEL WITH 3 THROUGH 6 MONTHS SHELF-LIFE REMAINING.

C

ITEMS WHICH ARE SERVICEABLE AND ISSUABLE TO SELECTED
CUSTOMERS BUT WHICH MUST BE ISSUED BEFORE CONDITION A AND
B MATERIEL TO AVOID LOSS AS A USABLE ASSET. INCLUDES
MATERIEL WITH LESS THAN 3 MONTHS SHELF-LIFE REMAINING.

D

SERVICEABLE (TEST/MODIFICATION)

SERVICEABLE MATERIEL WHICH REQUIRES TEST, ALTERATION,
MODIFICATION, TECHNICAL DATA MARKING, CONVERSION OR
DISASSEMBLY. THIS DOES NOT INCLUDE ITEMS WHICH MUST BE
INSPECTED OR TESTED IMMEDIATELY PRIOR TO ISSUE.

E

UNSERVICEABLE (LIMITED RESTORATION)

MATERIEL WHICH INVOLVES ONLY LIMITED EXPENSE OR EFFORT TO
RESTORE TO SERVICEABLE CONDITION AND WHICH
IS ACCOMPLISHED IN THE STORAGE ACTIVITY WHERE THE STOCK IS
LOCATED. MAY BE ISSUED TO SUPPORT AMMUNITION
REQUISITIONS CODED TO INDICATE ACCEPTABILITY OF USABLE
CONDITION E STOCK.

F

UNSERVICEABLE (REPARABLE)

ECONOMICALLY REPARABLE MATERIEL WHICH REQUIRES REPAIR,
OVERHAUL, OR RECONDITIONING. INCLUDES REPARABLE ITEMS,
WHICH ARE RADIOACTIVELY CONTAMINATED. EXCLUDES REPARABLE
ASSETS WHICH ARE COVERED UNDER CONTRACT WARRANTY.

G

UNSERVICEABLE (INCOMPLETE)

MATERIEL REQUIRING ADDITIONAL PARTS OR COMPONENTS TO
COMPLETE THE END ITEM PRIOR TO ISSUE.

H

UNSERVICEABLE (CONDEMNED)

MATERIEL WHICH HAS BEEN DETERMINED TO BE UNSERVICEABLE AND
DOES NOT MEET REPAIR CRITERIA. INCLUDES
CONDEMNED ITEMS WHICH ARE RADIOACTIVELY CONTAMINATED, TYPE
I SHELF-LIFE MATERIEL THAT HAS PASSED THE EXPIRATION
DATE, AND TYPE II SHELF-LIFE MATERIEL THAT HAS PASSED

DATA ITEM NAME

CODE

EXPLANATION

PRODUCT QUALITY DEFICIENCY REPORTS. EXHIBITS REQUIRE
TECHNICAL OR ENGINEERING ANALYSIS TO DETERMINE CAUSE OF
FAILURE TO PERFORM IN ACCORDANCE WITH SPECIFICATIONS.

SUSPENDED (RECLAIMED ITEMS,
AWAITING CONDITION DETERMINATION)

R ASSETS TURNED IN BY RECLAMATION ACTIVITIES WHICH DO NOT
HAVE THE CAPABILITY (E.G. SKILLS, MANPOWER OR TEST
EQUIPMENT) TO DETERMINE MATERIEL CONDITION. ACTUAL
CONDITION WILL BE DETERMINED PRIOR TO INDUCTION INTO
MAINTENANCE ACTIVITIES FOR REPAIR/MODIFICATION.

UNSERVICEABLE (SCRAP)

S MATERIEL THAT HAS NO VALUE EXCEPT FOR ITS BASIC MATERIEL
CONTENT. NO STOCK WILL BE RECORDED AS ON HAND IN CONDITION
CODE S. THIS CODE IS USED ONLY ON TRANSACTIONS INVOLVING
SHIPMENTS TO DEFENSE REUTILIZATION AND MARKETING OFFICE
(DRMO). MATERIEL WILL NOT BE TRANSFERRED TO CONDITION CODE
S PRIOR TO TURN-IN TO DRMO'S IF MATERIEL IS RECORDED IN
CONDITION CODE A THRU H AT THE TIME MATERIEL IS DETERMINED
EXCESS. MATERIEL IDENTIFIED BY NSN WILL NOT BE IDENTIFIED
BY THIS CONDITION CODE.

UNSERVICEABLE (WARRANTED REPARABLE)

W MATERIEL UNDER CONTRACT WARRANTY WHICH REQUIRES REPAIR,
OVERHAUL, RECONDITIONING, OR REPLACEMENT. INCLUDES
REPARABLE ITEMS WHICH ARE RADIOACTIVELY CONTAMINATED.

FUELS APPLICATION

FUELS.

B

INCLUDES MATERIEL WITH 3 THROUGH 6 MONTHS SHELF-LIFE
REMAINING. THIS CODE IS ASSIGNED TO STOCKS FAILING TO
MEET THE APPLICABLE SPECIFICATION QUALITY CRITERIA BUT ARE
WITHIN THE DETERIORATION LIMITS CONTAINED IN CURRENT
REVISONS OF MILITARY HANDBOOK (MIL-HDBK) 200.

J

INCLUDES PRODUCT WHICH IS OFF SPECIFICATION AND OUTSIDE THE
DETERIORATION LIMITS, THAT HAS BEEN SUSPENDED FROM
SHIPMENT PENDING RECLAMATION OR DISPOSITION INSTRUCTIONS.
THE SUPPLY CONDITION WILL NOT BE CHANGED UNTIL RECLAMATION
ACTION HAS BEEN IMPLEMENTED.

CLSSA REQUISITION LEAD TIME

CODE

2

EXPLANATION

THE LEAD TIME NECESSARY FOR THE SUPPLY SOURCE TO AUGMENT U.S. STOCKS TO SUPPORT THE CLSSA AGREEMENT HAS NOT PASSED OR THE COUNTRY HAS OPTED TO HAVE THIS REQUIREMENT PROCESSED AS AN UNPROGRAMMED REQUIREMENT. THE REQUISITION WILL BE PROCESSED AS A BACKORDER UNTIL THE NECESSARY LEAD TIME HAS ELAPSED OR BE PLACED ON PROCUREMENT.

CLSSA TERMINATION/DRAWDOWN
REQUISITION OR PASSING ORDER

A

THE COUNTRY DESIRES THE INTEGRATED MATERIEL MANAGER (IMM)/INVENTORY CONTROL POINT (ICP) TO ABSORB THE MATERIEL. IF THE IMM/ICP CANNOT ABSORB THE INVENTORY BASED ON THEIR CURRENT REQUIREMENTS, THE COUNTRY DESIRES DELIVERY OF THE FOREIGN MILITARY SALES ORDER (FMSO) I QUANTITY IN EXISTING SERVICEABLE OR REPARABLE CONDITION. (TO BE USED ONLY ON TRANSACTIONS FOR DEPOT-LEVEL REPARABLE OR OTHER REPARABLES DESIGNATED AS NONCONSUMABLE INVESTMENT ITEMS. DEMAND CODE WILL BE P.)

CLSSA TERMINATION/DRAWDOWN
REQUISITION OR PASSING ORDER

B

THE COUNTRY DESIRES THE IMM/ICP TO ABSORB THE MATERIEL. IF THE IMM/ICP CANNOT ABSORB THE INVENTORY BASED ON THEIR CURRENT REQUIREMENTS, THE COUNTRY DESIRES DELIVERY OF THE FMSO I QUANTITY IN SERVICEABLE CONDITION. (RESTORE REPARABLES TO SERVICEABLE CONDITION PRIOR TO SHIPMENT.) (TO BE USED ON TRANSACTIONS FOR BOTH DEPOT-LEVEL NONCONSUMABLE INVESTMENT ITEMS AS WELL AS CONSUMABLE EXPENSE ITEMS. DEMAND CODE WILL BE P.)

CLSSA TERMINATION/DRAWDOWN
REQUISITION OR PASSING ORDER

C

THE COUNTRY DESIRES THE IMM/ICP TO ABSORB THE MATERIEL. IF THE IMM/ICP CANNOT ABSORB THE INVENTORY BASED ON THEIR CURRENT REQUIREMENTS, THE COUNTRY DESIRES DELIVERY OF ONLY SERVICEABLE ASSETS. THE IMM/ICP SHOULD TAKE DISPOSITION ACTION ON THE UNSERVICEABLE ASSETS IN ACCORDANCE WITH APPLICABLE SERVICE/AGENCY REGULATIONS. (TO BE USED ONLY ON TRANSACTIONS FOR DEPOT-LEVEL REPARABLE OR OTHER REPARABLES DESIGNATED AS NONCONSUMABLE INVESTMENT ITEMS. DEMAND CODE WILL BE P.)

REQUISITION OR PASSING ORDER

CODE

EXPLANATION

D

THE COUNTRY DESIRES THE IMM/ICP TO ABSORB THE MATERIEL.
THE COUNTRY DESIRES THAT NO DELIVERY OF SERVICEABLE OR
UNSERVICEABLE ASSETS BE MADE. IF THE IMM/ICP CANNOT ABSORB
THE INVENTORY BASED ON THEIR CURRENT REQUIREMENTS, THE
COUNTRY DESIRES THE IMM/ICP TO TAKE DISPOSITION ACTION ON
ALL ASSETS REGARDLESS OF CONDITION IN ACCORDANCE
WITH APPLICABLE SERVICE/AGENCY REGULATIONS. (TO BE USED ON
TRANSACTIONS FOR BOTH DEPOT-LEVEL NONCONSUMABLE INVESTMENT
ITEMS AS WELL AS CONSUMABLE EXPENSE ITEMS. DEMAND CODE
WILL BE P.)

CLSSA TERMINATION/DRAWDOWN
REQUISITION OR PASSING ORDER

E

COUNTRY DESIRES DELIVERY OF THE MATERIEL, EVEN IF NEW
PROCUREMENT IS REQUIRED. DELIVER IN SERVICEABLE
CONDITION. (TO BE USED ON TRANSACTIONS FOR BOTH
DEPOT-LEVEL NONCONSUMABLE INVESTMENT ITEMS AS WELL AS
CONSUMABLE EXPENSE ITEMS. DEMAND CODE WILL BE P.)

CLSSA TERMINATION/DRAWDOWN
REQUISITION OR PASSING ORDER

F

COUNTRY DESIRES DELIVERY OF THE MATERIEL IF MATERIEL IS ON
HAND OR ON ORDER, AND IS IN SERVICEABLE CONDITION;
OTHERWISE, CANCEL. (TO BE USED ON TRANSACTIONS FOR
DEPOT-LEVEL NONCONSUMABLE INVESTMENT ITEMS AS WELL AS
CONSUMABLE EXPENSE ITEMS. DEMAND CODE WILL BE P.)

DATA ITEM NAME

CODE

A

EXPLANATION

THE GOVERNMENT'S RIGHTS TO USE DATA IN ITS POSSESSION IS QUESTIONABLE. THIS CODE IS ONLY APPLICABLE AND FOR AS LONG TO PARTS UNDER IMMEDIATE BUY REQUIREMENTS AND FOR AS LONG THEREAFTER AS RIGHTS TO DATA ARE STILL UNDER REVIEW FOR RESOLUTION AND APPROPRIATE CODING. THIS CODE IS ASSIGNED ONLY AT THE CONCLUSION OF LIMITED SCREENING, AND IT REMAINS ASSIGNED UNTIL THE FULL SCREENING PROCESS RESOLVES THE GOVERNMENT'S RIGHTS TO USE DATA AND RESULTS IN ASSIGNMENT OF A DIFFERENT ACQUISITION METHOD SUFFIX CODE (AMSC). IF ONE SOURCE IS AVAILABLE, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES EXIST, OR IF THE DATA IS ADEQUATE FOR AN ALTERNATE SOURCE TO QUALIFY IN ACCORDANCE WITH THE DESIGN CONTROL ACTIVITY'S PROCEDURES, AMC'S 1 OR 2 ARE VALID.

QUALIFIER CODE: AH

*** RELATED DATA ITEMS ***

DATA ITEM NAME

CODE

EXPLANATION

B THIS PART MUST BE ACQUIRED FROM A MANUFACTURING SOURCE(S) SPECIFIED ON A SOURCE CONTROL OR SELECTED ITEM DRAWING AS DEFINED BY THE CURRENT VERSION OF DOD-STD-100. SUITABLE TECHNICAL DATA, GOVERNMENT DATA RIGHTS, OR MANUFACTURING KNOWLEDGE ARE NOT AVAILABLE TO PERMIT ACQUISITION FROM OTHER SOURCES, NOR QUALIFICATION TESTING OF ANOTHER PART, NOR USE OF A SECOND SOURCE PART IN THE INTENDED APPLICATION, ALTHOUGH, BY DOD-STD-100, DEFINITION, ALTERED AND SELECTED ITEMS SHALL HAVE AN ADEQUATE TECHNICAL DATA PACKAGE. DATA REVIEW DISCLOSES THAT REQUIRED DATA OR DATA RIGHTS ARE NOT IN GOVERNMENT POSSESSION AND CANNOT BE ECONOMICALLY OBTAINED. IF ONE SOURCE IS AVAILABLE, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES EXIST, AMC'S 1 OR 2 ARE VALID.

C THIS PART REQUIRES ENGINEERING SOURCE APPROVAL BY THE DESIGN CONTROL ACTIVITY IN ORDER TO MAINTAIN THE QUALITY OF THE PART. EXISTING UNIQUE DESIGN CAPABILITY, ENGINEERING SKILLS, AND MANUFACTURING KNOWLEDGE BY THE QUALIFIED SOURCE(S) REQUIRE ACQUISITION OF THE PART FROM THE APPROVED SOURCE(S). THE APPROVED SOURCE(S) RETAIN DATA RIGHTS, MANUFACTURING KNOWLEDGE, OR TECHNICAL DATA THAT ARE NOT ECONOMICALLY AVAILABLE TO THE GOVERNMENT, AND THE DATA OR KNOWLEDGE IS ESSENTIAL TO MAINTAINING THE QUALITY OF THE PART. AN ALTERNATE SOURCE MUST QUALIFY IN ACCORDANCE WITH THE DESIGN CONTROL ACTIVITY'S PROCEDURES AS APPROVED BY THE GOVERNMENT. THE COGNIZANT GOVERNMENT ENGINEERING ACTIVITY, THE QUALIFICATION PROCEDURES MUST BE APPROVED BY THE GOVERNMENT ENGINEERING ACTIVITY HAVING JURISDICTION OVER THE PART IN THE INTENDED APPLICATION. IF ONE SOURCE IS APPROVED, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES ARE APPROVED OR IF DATA IS ADEQUATE FOR AN ALTERNATE SOURCE TO QUALIFY IN ACCORDANCE WITH THE DESIGN CONTROL ACTIVITY'S PROCEDURES, AMC'S 1 OR 2 ARE VALID.

D THE DATA NEEDED TO ACQUIRE THIS PART COMPETITIVELY IS NOT PHYSICALLY AVAILABLE, IT CANNOT BE OBTAINED ECONOMICALLY, NOR IS IT POSSIBLE TO DRAFT ADEQUATE SPECIFICATIONS OR ANY OTHER ADEQUATE, ECONOMIC DESCRIPTION OF THE MATERIAL FOR A COMPETITIVE SOLICITATION. AMC'S 3, 4, OR 5 ARE VALID.

DATA ITEM NAME

CODE	EXPLANATION
E	(RESERVED)
F	(RESERVED)
G	THE GOVERNMENT HAS RIGHTS TO THE TECHNICAL DATA, THE DATA PACKAGE IS COMPLETE, AND THERE ARE NO TECHNICAL DATA, ENGINEERING, TOOLING OR MANUFACTURING RESTRICTIONS. (THIS IS THE ONLY AMSC THAT IMPLIES THAT PARTS ARE CANDIDATES FOR FULL AND OPEN COMPETITION. OTHER AMSC'S SUCH AS K, M, N, Q, AND S MAY IMPLY LIMITED COMPETITION WHEN TWO OR MORE INDEPENDENT SOURCES EXIST YET THE TECHNICAL DATA PACKAGE IS INADEQUATE FOR FULL AND OPEN COMPETITION.) AMC'S 1 OR 2 ARE VALID.
H	THE GOVERNMENT PHYSICALLY DOES NOT HAVE IN ITS POSSESSION SUFFICIENT, ACCURATE, OR LEGIBLE DATA TO PURCHASE THIS PART FROM OTHER THAN CURRENT SOURCE(S). THIS CODE IS APPLICABLE ONLY TO PARTS UNDER IMMEDIATE BUY REQUIREMENTS AND ONLY FOR AS LONG THEREAFTER AS THE DEFICIENCY IS UNDER REVIEW FOR RESOLUTION AND APPROPRIATE RECODING. THIS CODE IS ONLY ASSIGNED AT THE CONCLUSION OF LIMITED SCREENING, AND IT REMAINS ASSIGNED UNTIL THE FULL SCREENING PROCESS RESOLVES PHYSICAL DATA QUESTIONS AND RESULTS IN SOURCE IS ASSIGNMENT OF A DIFFERENT AMSC. IF ONE SOURCE IS AVAILABLE, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES EXIST, AMC'S 1 OR 2 ARE VALID.
J	(RESERVED)
K	THIS PART MUST BE PRODUCED FROM CLASS 1 CASTINGS AND SIMILAR TYPE FORGINGS AS APPROVED (CONTROLLED) BY PROCEDURES CONTAINED IN CURRENT VERSION OF MIL-STD-2175. IF ONE SOURCE HAS SUCH CASTINGS AND CANNOT PROVIDE THEM TO OTHER SOURCES, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES HAVE SUCH CASTINGS OR THEY CAN BE PROVIDED TO OTHER SOURCES AMC'S 1 OR 2 ARE VALID.

QUALIFIER CODE: AH

*** RELATED DATA ITEMS ***
 DATA ITEM NAME

CODE	EXPLANATION
L	<p>THE ANNUAL BUY VALUE OF THIS PART FALLS BELOW THE SCREENING THRESHOLD BY DOD COMPONENTS AND FIELD ACTIVITIES. HOWEVER, THIS PART HAS BEEN SCREENED FOR ADDITIONAL KNOWN SOURCES, RESULTING IN EITHER CONFIRMATION THAT THE INITIAL SOURCE EXISTS OR THAT OTHER SOURCES MAY SUPPLY THE PART. NO ADDITIONAL SCREENING WAS PERFORMED TO IDENTIFY THE COMPETITIVE OR NONCOMPETITIVE CONDITIONS THAT WOULD RESULT IN ASSIGNMENT OF A DIFFERENT AMSC. THIS CODE SHALL NOT BE USED WHEN SCREENING PARTS ENTERING THE INVENTORY. THIS CODE SHALL BE USED ONLY TO REPLACE AMSC O FOR PARTS UNDER THE ESTABLISHED SCREENING THRESHOLD. IF ONE SOURCE IS AVAILABLE, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES EXIST, AMC'S 1 OR 2 ARE VALID.</p>
M	<p>MANUFACTURE OF THIS PART REQUIRES USE OF MASTER OR COORDINATED TOOLING. IF ONLY ONE SET OF TOOLING EXISTS AND CANNOT BE MADE AVAILABLE TO ANOTHER SOURCE FOR MANUFACTURE OF THIS PART, AMC'S 3, 4, OR 5 ARE VALID. WHEN THE AVAILABILITY OF EXISTENT OR REFURBISHABLE TOOLING IS AVAILABLE TO TWO OR MORE SOURCES, THEN AMC'S 1 OR 2 ARE VALID.</p>
N	<p>THIS ITEM REQUIRES SPECIAL TEST AND/OR INSPECTION FACILITIES TO DETERMINE AND MAINTAIN ULTRA-PRECISION QUALITY FOR THE ITEMS FUNCTION OR SYSTEM INTEGRITY. SUBSTANTIATION AND INSPECTION OF THE PRECISION OR QUALITY CANNOT BE ACCOMPLISHED WITHOUT SUCH SPECIALIZED TEST OR INSPECTION FACILITIES. IF THE TEST CANNOT BE MADE AVAILABLE FOR THE COMPETITIVE MANUFACTURE OF THE PART, THE REQUIRED TEST OR INSPECTION KNOWLEDGE CANNOT BE DOCUMENTED FOR RELIABLE REPLICATION, OR THE REQUIRED PHYSICAL TEST OR INSPECTION FACILITIES AND PROCESSES CANNOT BE ECONOMICALLY DOCUMENTED IN A TDP, VALID AMC'S ARE 3, 4, OR 5. IF THE FACILITIES OR TESTS CAN BE MADE AVAILABLE TO TWO OR MORE COMPETITIVE SOURCES, AMC'S 1 OR 2 ARE VALID.</p>
O	<p>THE PART WAS NOT ASSIGNED ACQUISITION METHOD SUFFIX CODE (AMSC) WHEN IT ENTERED THE INVENTORY, NOR HAS IT EVER COMPLETED SCREENING USE OF THIS CODE IN CONJUNCTION WITH ACQUISITION METHOD CODE (AMC) 0 IS SOMETIMES NECESSARY BUT DISCOURAGED. MAXIMUM EFFORT TO DETERMINE THE APPLICABILITY OF AN ALTERNATE AMSC IS.</p>

QUALIFIER CODE: AH

DATA ITEM NAME

CODE	EXPLANATION
	THE OBJECTIVE. ONLY AMC 0 IS VALID.
P	THE RIGHTS TO USE THE DATA NEEDED TO PURCHASE THIS PART FROM ADDITIONAL SOURCE(S) ARE NOT OWNED BY THE GOVERNMENT AND CANNOT BE PURCHASED, DEVELOPED, OR OTHERWISE OBTAINED IT IS UNECONOMICAL TO REVERSE ENGINEER THIS PART. THIS CODE IS USED IN SITUATIONS WHERE THE GOVERNMENT HAS THE DATA BUT DOES NOT OWN THE RIGHTS TO THE DATA. IF ONLY ONE SOURCE HAS THE RIGHTS OR DATA TO MANUFACTURE THIS ITEM, AMC'S 3, 4, OR 5 ARE VALID. IF TWO OR MORE SOURCES HAVE THE RIGHTS OR DATA TO MANUFACTURE THIS ITEM, AMC'S 1 OR 2 ARE VALID.
Q	THE GOVERNMENT DOES NOT HAVE ADEQUATE DATA, LACKS RIGHTS TO DATA, OR BOTH NEEDED TO PURCHASE THIS PART FROM ADDITIONAL SOURCES. THE GOVERNMENT HAS BEEN UNABLE TO ECONOMICALLY BUY THE DATA OR RIGHTS TO THE DATA, ALTHOUGH THE PART HAS BEEN UNDERGOING FULL SCREENING FOR 12 OR MORE MONTHS. BREAKOUT TO COMPETITION HAS NOT BEEN ACHIEVED, BUT CURRENT CONTINUING ACTIONS TO OBTAIN NECESSARY RIGHTS TO DATA OR ADEQUATE REPROCUREMENT TECHNICAL DATA INDICATE BREAKOUT TO COMPETITION IS EXPECTED TO BE ACHIEVED. THIS PART MAY BE A CANDIDATE FOR REVERSE ENGINEERING OR OTHER TECHNIQUES TO OBTAIN TECHNICAL DATA. ALL AMSC Q ITEMS ARE REQUIRED TO BE REVIEWED WITHIN THE TIMEFRAMES CITED IN E-203(B). IF ONE SOURCE IS AVAILABLE, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES EXIST, AMC'S 1 OR 2 ARE VALID.
R	THE GOVERNMENT DOES NOT OWN THE DATA OR THE RIGHTS TO THE DATA NEEDED TO PURCHASE THIS PART FROM ADDITIONAL TO BUY SOURCES. IT HAS BEEN DETERMINED TO BE UNECONOMICAL TO BUY THE DATA OR RIGHTS TO THE DATA. IT IS UNECONOMICAL TO REVERSE ENGINEER THE PART. THIS CODE IS USED WHEN THE GOVERNMENT DID NOT INITIALLY PURCHASE THE DATA AND/OR RIGHTS. IF ONLY ONE SOURCE HAS THE RIGHTS OR DATA TO MANUFACTURE THIS ITEM, AMC'S 3, 4, OR 5 ARE VALID. IF TWO OR MORE SOURCES HAVE THE RIGHTS OR DATA TO MANUFACTURE THIS ITEM, AMC'S 1 OR 2 ARE VALID.
S	ACQUISITION OF THIS ITEM IS RESTRICTED TO GOVERNMENT QUALIFIER CODE: AH

CODE

EXPLANATION

APPROVED SOURCE(S) BECAUSE THE PRODUCTION OF THIS ITEM INVOLVES UNCLASSIFIED BUT MILITARILY SENSITIVE TECHNOLOGY (SEE FAR 6.3). IF ONE SOURCE IS APPROVED, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES ARE APPROVED, AMC'S 1 OR 2 ARE VALID.

T ACQUISITION OF THIS PART IS CONTROLLED BY QUALIFIED PRODUCTS LIST (QPL) PROCEDURES. COMPETITION FOR THIS PART IS LIMITED TO SOURCES WHICH ARE LISTED ON OR ARE QUALIFIED FOR LISTING ON THE QPL AT THE TIME OF AWARD (SEE DFARS PART 9 AND DFARS PART 209). AMC'S 1 OR 2 ARE VALID.

U THE COST TO THE GOVERNMENT TO BREAKOUT THIS PART AND ACQUIRE IT COMPETITIVELY HAS BEEN DETERMINED TO EXCEED THE PROJECTED SAVING OVER THE LIFE SPAN OF THE PART. IF ONE SOURCE IS AVAILABLE, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES EXIST, AMC'S 1 OR 2 ARE VALID.

V THIS PART HAS BEEN DESIGNATED A HIGH RELIABILITY PART UNDER A FORMAL RELIABILITY PROGRAM. PROBABILITY OF FAILURE WOULD BE UNACCEPTABLE FROM THE STANDPOINT OF SAFETY OF PERSONNEL AND/OR EQUIPMENT. THE COGNIZANT ENGINEERING ACTIVITY HAS DETERMINED THAT DATA TO DEFINE AND CONTROL RELIABILITY LIMITS CANNOT BE OBTAINED NOR IS IT POSSIBLE TO DRAFT ADEQUATE SPECIFICATIONS FOR THIS PURPOSE. IF ONE SOURCE IS AVAILABLE, AMC'S 3, 4, OR 5 ARE VALID. IF AT LEAST TWO SOURCES ARE AVAILABLE, AMC'S 1 OR 2 ARE VALID.

W (RESERVED)

Y THE DESIGN OF THIS PART IS UNSTABLE. ENGINEERING, MANUFACTURING, OR PERFORMANCE CHARACTERISTICS INDICATE THAT THE REQUIRED DESIGN OBJECTIVES HAVE NOT BEEN ACHIEVED. MAJOR CHANGES ARE CONTEMPLATED BECAUSE THE PART HAS A LOW PROCESS YIELD OR HAS DEMONSTRATED MARGINAL PERFORMANCE DURING TESTS OR SERVICE USE. THESE CHANGES WILL RENDER THE PRESENT PART OBSOLETE AND UNUSABLE IN ITS PRESENT CONFIGURATION. LIMITED ACQUISITION FROM THE PRESENT SOURCE IS ANTICIPATED PENDING CONFIGURATION CHANGES. IF ONE SOURCE IS AVAILABLE, AMC'S 3, 4, OR 5 ARE VALID. IF TWO SOURCES ARE AVAILABLE, AMC'S 1 OR 2 ARE VALID.

MISIDENTIFIED/MIXED MATERIEL

J

ASSETS IN STORAGE LOCATION WERE IDENTIFIED BY
INCORRECT/MULTIPLE STOCK NUMBER, UNIT OF ISSUE, SUPPLY
CONDITION, SHELF LIFE, TYPE OF PACK, LOT NUMBER, OR
OWNERSHIP/PURPOSE.

DUPLICATE PHYSICAL PROCESSING

K

TRANSACTION UPDATED THE PROPERTY ACCOUNTABILITY RECORD ONCE
BUT MATERIEL PHYSICALLY PROCESSED MORE THAN ONCE.

WRONG MATERIEL SELECTED

L

MATERIEL SELECTED DID NOT MATCH TRANSACTION WHICH UPDATED
THE PROPERTY ACCOUNTABILITY RECORD (I.E., WRONG STOCK
NUMBER, QUANTITY, UNIT OF ISSUE, SUPPLY CONDITION, TYPE OF
PACK, LOT, OWNERSHIP/ PURPOSE, AND/OR LOCATION WAS
PHYSICALLY SELECTED).

MATERIEL SELECTED FROM WRONG
LOCATION

M

STORAGE LOCATION FROM WHICH MATERIEL WAS SELECTED DID NOT
MATCH STORAGE LOCATION CITED IN THE TRANSACTION.

PHYSICAL PROCESSING NOT COMPLETE

N

TRANSACTION UPDATED THE PROPERTY ACCOUNTABILITY RECORD BUT
PHYSICAL PROCESSING OF MATERIEL WAS NOT COMPLETED.

NOT ASSIGNED

O

ERRONEOUS DENIAL

P

DENIAL PROCESSED IN ERROR. MATERIEL FOUND AFTER DENIAL WAS
SUBMITTED.

MATERIEL NOT STORED/STORED
INCORRECTLY

Q

MATERIEL WAS NOT STORED IN FINITE LOCATION OR PLACED IN
FINITE LOCATION WHEN PROCESSING THE STORAGE TRANSACTION.

INFLOAT DOCUMENT CONTROL ERROR

R

ERRONEOUS DATA POSTED TO THE PROPERTY ACCOUNTABILITY RECORD
BECAUSE INFLOAT DOCUMENTS WERE NOT CONSIDERED OR WERE
NOT AVAILABLE.

ERRONEOUS COUNT

S

MATERIEL INCORRECTLY COUNTED.

*** RELATED DATA ITEMS ***

DATA ITEM NAME

SUBMITTED FOR RECONCILIATION BY A
REPORTING ACTIVITY

CODE

EXPLANATION

06

NO ACTION REQUIRED. DUPLICATE RECORDS WILL BE REJECTED TO THE COMPONENT REGISTRY FOR VERIFICATION ACTION. NUMBER OF DUPLICATES WILL BE IDENTIFIED AS SUMMARY INFORMATION TO THE ACTIVITY BEING RECONCILED.

IDENTIFIES A RECONCILIATION REQUEST SUBMITTED TO THE COMPONENT REGISTRY THAT REFLECTS ANOTHER REPORTING ACTIVITY AS THE OWNER. REJECT IS INCLUDED IN THE SMALL ARMS RECORD. REJECT SUSPENSE FILE WHICH MUST BE CLEARED TO COMPLETE THE RECONCILIATION.

07

VERIFY ACTIVE/INACTIVE RECORDS. 1. IF A RECEIPT REQUEST SHIPPING ACTIVITY TO SUBMIT REQUIRED SHIPMENT TRANSACTIONS AND RESUBMIT ERROR TRANSACTION WITH PERTINENT DATA AS REQUIRED TO POST TO MASTER FILE AND REMOVE THE REJECT SUSPENSE. 2. IF NOT A RECEIPT OF SHIPMENT, AND WEAPON IS PHYSICALLY ON HAND AS REPORTED, TAKE THE NECESSARY ACTION PRESCRIBED FOR DUPLICATE SERIAL NUMBERS WITHIN THE SAME NSN.

REFLECTS CONFIRMATION THAT THE COMPONENT REGISTRY HAS ADDED A SERIAL NUMBER AS A RESULT OF A RECONCILIATION TRANSACTION PROCESSED. NO PRIOR RECEIPT OF A TRANSACTION RECORD RECEIVED BY THE COMPONENT REGISTRY

08

NO ACTION REQUIRED. THE RECONCILIATION RECORD WILL BE RECORDED IN THE NEXT COMPONENT REGISTRY MASTER FILE UPDATE AS AN INITIAL REGISTRATION. THE NUMBER OF CODE 8 RECORDS POSTED TO THE COMPONENT MASTER FILE WILL BE IDENTIFIED AS SUMMARY INFORMATION TO THE ACTIVITY BEING RECONCILED.

IDENTIFIES A RECONCILIATION REQUEST SUBMITTED TO THE COMPONENT REGISTRY THAT IS NOT SCHEDULED FOR RECONCILIATION ON DATE RECEIVED

09

VERIFY WHEN RECONCILIATION IS SCHEDULED. REJECT SUSPENSE WILL NOT BE CREATED.

CONTACTED TO VERIFY REPORTED SERIAL NUMBER IF SERIAL NUMBER
IS IN ERROR. CORRECT AND RESUBMIT TRANSACTION.

FROM DODAAC IN TRANSACTION DOES NOT
MATCH DODAAC IN MASTER FILE.

3I

VERIFY, CORRECT, AND RESUBMIT TRANSACTION.

TRANSACTION MATCHED ON STOCK NUMBER
BUT NOT ON SERIAL NUMBER

3J

1. SERIAL NUMBER ERROR EXISTS IN TRANSACTION.
2. THERE ARE MISSING TRANSACTIONS IN THE COMPUTER.
VERIFY, CORRECT, AND RESUBMIT TRANSACTIONS.

RECEIPT TRANSACTION RECEIVED PRIOR
TO SHIPMENT TRANSACTION

3K

POST RECEIPT. REJECT TRANSACTION TO SHIPPING ACTIVITY --
VERIFY SERIAL NUMBER SHIPPED -- CORRECT IF REQUIRED.

INPUT TRANSACTION IS INCOMPATIBLE
TO MASTER FILE

3L

COMPARE REJECTED TRANSACTION AGAINST MASTER FILE AND TAKE
NECESSARY ACTION TO MAKE INPUT TRANSACTION
COMPATIBLE. E.G., S TRANSACTION ON THE MASTER FILE WILL
ACCEPT R TRANSACTION ONLY.

DUPLICATE ON SERIAL NUMBER, STOCK
NUMBER, AND TRANSACTION CODE

3M

REQUEST PRINTOUT FROM THE COMPUTER BY STOCK NUMBER AND
SERIAL NUMBER (TRANSACTION CODE 3). EXAMINE TRANSACTION
TO DETERMINE IF TRANSACTION IS AN EXACT DUPLICATE. IF IT
IS NOT, CORRECT AND RESUBMIT TRANSACTION.

NSN AND WEAPON SERIAL NUMBER
DUPLICATES ANOTHER WEAPON ON MASTER
FILE

3U

1. VERIFY NSN AND SERIAL NUMBER OF WEAPON.
IF INCORRECT, RESUBMIT CORRECT TRANSACTION.
2. IF CORRECT AND WEAPON WAS RECEIVED FROM ACTIVITY SHOWN
IN MASTER FILE, SUBMIT RECEIPT R TRANSACTION TO THE
COMPONENT REGISTRY. 3. IF CORRECT, AND
WEAPON WAS NOT RECEIVED FROM ACTIVITY SHOWN ON MASTER FILE,
TAKE THE NECESSARY ACTION DESCRIBED FOR DUPLICATE SERIAL
NUMBERS WITHIN SAME NSN.

1 INTRODUCTION

1.1 GENERAL

This volume provides DoD standard procedures and EDI conventions to effect supply actions using ANSI ASC X12 transactions.

Use of this volume requires simultaneous access to volume 1. Volume 1 contains the full Table of Contents for the manual; the only listings of Acronyms and Abbreviations, Definitions, and References for the manual; instructions for acquiring access to the DLMS standards database; specific guidance that applies to all implementation conventions; and both functional and technical information that is relatively stable and applies to the DLMS as a whole.

1.2 POLICY

DoD Directive 4140.1 and DoD 4140.1-R provide the DoD policies governing procedures in this volume.

1.3 APPLICABILITY

This volume applies to the Office of the Secretary of Defense, Military Departments, Joint Staff, Unified and Specified Commands, Defense Agencies, and Defense Organizations (hereafter referred to collectively as DoD Components) and, by agreement, to other organizations participating in the Defense Logistics Management Standards System.

1.4 SUPPLY PRC

The Supply PRC is the forum through which the DoD Components and other participating organizations may participate in the development, expansion, improvement, maintenance, and administration of supply requirements for the DLMS. The Supply PRC chairperson, in coordination with the Supply PRC representatives, is responsible for the contents of this volume of the DLMS. Representatives to the Supply PRC are identified in appendix 1A. Refer to volume 1, chapter 1 for a discussion of DLMS PRC functions and responsibilities.

1.5 NONCOMPLIANCE

If reasonable attempts to obtain compliance with prescribed procedures or resolution of DLMS Supply related problems are unsatisfactory, the activity having the problem will request assistance from their DLMS Supply PRC representative. The request will include information and copies of all correspondence pertinent to the problem; including the transaction set number, the transaction number and the date of the transaction involved. The representative will take the necessary actions to resolve the issue or problem. The actions may include requesting assistance from the Supply PRC Chairperson.

1.6 TRANSACTION REVERSAL

Processing activities may totally or partially reverse selected transactions. As a minimum, activities shall apply transaction reversal edits and controls to assure that:

- The original controlling number (transaction number or contract number) is used on all reversal transactions. Activities shall not process a transaction reversal if the transaction or contract number does not match an established file record transaction or contract number. If such a transaction is received, reject it back to the originator using a TS 824 IC - Rejection.
- The cumulative total of all reversal transaction quantities for the transaction or contract number does not exceed the original transaction quantity. If the cumulative total of all reversal transaction quantities exceeds the original transaction quantity, reject the transaction(s), causing the total quantity to exceed the original quantity, back to the submitter using a TS 824 IC- Rejection.

See chapter 7 for quality control requirements and for additional controls required when reversing physical inventory adjustments. See chapter 10 for additional controls required when reversing logistics transfer/decapitalization transactions.

3 SPECIAL PROGRAM REQUIREMENTS

3.1 GENERAL

This chapter provides procedures for forecasting of requirements for items required to support special programs or projects which are of a nonrepetitive nature and cannot be forecast by the ICP based on demand data, and which have the greatest probability of materializing and resulting in the eventual submission of requisitions.

- Submit SPR requests using TS 830 IC - Special Program Requirements (appendix 3A) for those requirements which meet any of the following criteria as to purpose:
 - One-time training exercises or maneuvers.
 - Repair or rebuild programs which are either nonrecurring or which are seldom or irregularly programmed.
 - New constructions (ships, buildings, etc.).
 - One-time alterations, modifications, or conversion programs.
 - Initial issue of existing items (i.e., outfittings, activations, and changes in authorized allowances).
 - Initial requirements for special operational projects.
 - Requirements for initial testing.
 - Requirements for Government-furnished property.
 - Requirements for infrequently planned support operations such as Arctic and Antarctic resupply missions.
 - Special situations of a nonrepetitive nature when required in support of authorized Security Assistance Program requirements (e.g., initial pipeline stockage requirements in support of approved Cooperative Logistics Supply Support Arrangement, etc.).
- The following types of requirements are excluded from identification as SPRs:
 - The following types of requirements are excluded from identification as SPRs:
 - Provisioning, recurring type.
 - WAR Materiel Requirements.
 - Requirements for which the Service/Agency has a recurring demand.
 - Subsistence, all categories

3.2 SPR SUBMISSION AND ROUTING

Limit submission of SPRs to material required not less than 90 calendar days in advance of not more than 5 years prior to the support date (the first day of the month which it is anticipated material will be requisitioned for the program). When procurement is necessary, delivery for an early support date may not be possible since the procurement lead time for most items will be greater than 90 calendar days. Therefore, forecasting activities should submit SPRs to ICPs as far in advance of the support date as practical.

Forecasting activities will prepare a TS 830 IC - Special Program Requirements to transmit SPR data to the ICP. When the requirement for an item is such that material will be required in phases (e.g., 100 each per month; 100 per quarter, etc.), the forecasting activity will stratify the forecast quantity by the support date as allowed by the TS 830 IC - Special Program Requirements.

3.3 DAASC PROCESSING

DAASC will pass or route SPR inquiries as follows:

- If the transaction is directed to the correct SOS, DAASC will pass the transaction to that activity.
- If the inquiry is directed to an incorrect SOS, and the correct SOS is not GSA, DAASC will reroute the transaction to the correct SOS and transmit a TS 870 IC - Special Program Requirements/Logistics Asset Support Estimate Status (appendix 3B) to the submitter citing Status Code BM. Recipients of Status Code BM will update their records to reflect the correct SOS.
- If the inquiry is directed to a correct GSA SOS or to an incorrect SOS but GSA is the correct SOS, DAASC will reject the transaction to the submitter with a TS 824 IC - Reject citing Reject Advice Code AB.

3.4 IMM VALIDATION AND REJECTION

IMMs will reject or provide status for SPR inquiries citing the appropriate reject or status code as follows:

- Reject inquiries received for an obsolete/inactive NSN which the IMM cannot support with a TS 824 IC - Reject.
- Reject inquiries received for an item that is not centrally managed and stocked.
- FSC/NIIN Compatibility: when the IMM receives an SPR inquiry with an incompatible FSC and NIIN, the IMM will research to determine if the FSC matches a previously assigned FSC for the NIIN
 - If the FSC matches, change the FSC to the correct FSC, continue processing the inquiry, and furnish the submitter with a TS 870 IC - SPR/LASE Status citing Status Code BG. Recipients of Status Code BG will update their records to reflect the correct FSC.

If the FSC does not match, reject the inquiry to the submitter with TS 824 IC - Reject citing Status Code CG.

3.5 IMM PROCESSING OF SPR REQUESTS

IMMs measure the size of the requirement being forecasted to determine its acceptability in terms of the risk of long supply being generated. This measurement requires consideration of the size of the forecasted quantity in relation to the normal demand estimated for the item being forecasted, the value (cost) of this quantity, the supply status of the item being forecasted, funding capability of the IMM, accuracy of past forecasts, and the degree of assurance that requisitions will follow

IMMs will determine action to be taken on SPR and within 15 calendar days after receipt of the request will provide appropriate status using the TS 870 IC - SPR/LASE Status. SPR status transactions will advise the forecasting activity of acceptance, rejection (other than for correction and resubmission), or other action required on the SPR. When an IMM receives an SPR request which cannot be processed due to erroneous or missing data, the IMM will reject the request for correction and resubmission.

3.6 FOLLOWUP ON SPR REQUESTS

When the forecasting activity has not received a TS 870 IC - SPR status transaction or a TS 824 IC - Reject within 21 calendar days from the TS 830 IC - SPR submission date, the forecasting activity may submit an SPR inquiry to the ICP using the TS 830 IC - SPR.

3.7 ICP ACTION ON SPR FOLLOWUP

When there is no record of receipt of the original SPR request, the IMM will process the SPR inquiry as an original SPR request.

IMMs will prepare replies to SPR inquiries as specified in section 3.5 above.

3.8 MODIFICATION OF SPR REQUESTS

The forecasting activity may use the TS 830 IC - SPR to submit changes for a previously submitted SPR request to replace data in the original request. Submit SPR modifiers only to change the quantity, the project code, the coast designator, the support date, the ship to address, and/or the initiator of the SPR requirement. If the originator of the SPR modifier differs from the originator of the original SPR, maintain a record of the revised originator.

3.9 RESPONSE TO SPR MODIFIER

ICPs will prepare replies to SPR modifiers as specified in section 3.5, above.

3.10 CANCELLATION OF SPR REQUESTS

The forecasting activity may use the TS 830 IC - SPR to submit an SPR cancellation for a previously submitted SPR request. Cancellations must be for the total quantity applicable to the SPR.

3.11 RESPONSE TO SPR CANCELLATION

ICPs will reply to TS 830 IC - SPR cancellations with TS 870 IC - SPR/LASE status citing SPR

Status Code PD indicating that the cancellation was accepted.

3.12 ACCEPTANCE/REJECTION OF SUBSTITUTE ITEM

Forecasting activities in receipt of SPR responses offering a substitute item will transmit a TS 830 IC - SPR indicating rejection or acceptance of substitute material.

3.13 RESPONSE TO SUBSTITUTE ITEM REJECTION

The IMM will initiate action on the item originally requested. IMM's will prepare status responses as specified in 3.5, above.

3.14 RETENTION OF SPR REQUESTS

The ICP will retain SPR requests until:

- The support date of those requirements for which SPR Status Code PA was furnished or until a requisition is received which can be identified to all or a portion of a particular SPR quantity.
- One procurement lead time/assembly time away from the support date when procurement/assembly is required in support of those requirements for which SPR Status Code PB was furnished.
- Assembly time prior to support date when extra time is required for assembly in support of those requirements for which SPR Status Code PC was furnished.

3.15 FOLLOW-ON STATUS

The IMM will provide revised TS 870 IC - Status when the situation changes (e.g., change in procurement lead time, procurement is required for material originally anticipated to be available from stock, etc.). Generally, these situation changes are unusual in nature, are not programmed for, and require off-line processing. IMM's will provide the status as specified in section 3.5, above.

3.16 PREPARATION OF SPR REQUISITIONS

When TS 870 IC - SPR status citing SPR Status Code PA is received, requisitions citing Demand Code P should be submitted for the SPR related requirements in time to allow for delivery within the appropriate time standard prescribed by UMMIPS. Demand Code P indicates to the ICP that the requisition is for material previously forecasted as an SPR. This enables the ICP to control and apply the appropriate logic for the demand generated by the requisition.

Requisitions submitted as a result of an SPR will include the transaction number from the original SPR to establish an audit trail between the SPR and the subsequent requisitions. This audit trail provides a means to determine whether followon requisitions are submitted for requirements forecasted through SPRs.

When TS 870 IC - SPR status is received citing SPR Status Code PR, the SPR is being deleted and the item is a procurement lead time/assembly time away from the support date. If the requirement is still valid, the requiring activity must immediately submit a TS 511 IC - Requisition citing Demand Code O.

3.17 LOGISTICS REASSIGNMENTS

When an item is involved in a logistics loss to an IMM of another Service/Agency, the LIM will transmit a TS 870 IC - SPR status to the forecasting activity. This status will indicate that the item has been involved in an LR and a new TS 830 IC - SPR must be submitted to the GIM.

When the logistics loss is to an IMM within the same Service/Agency, the LIM will forward the record of the TS 830 IC - SPR to the GIM. No status need be furnished the forecasting activity.

APPENDIX 3A

TRANSACTION SET 830 IMPLEMENTATION CONVENTION SPECIAL PROGRAM REQUIREMENTS

830 Planning Schedule with Release Capability

This Draft Standard for Trial Use contains the format and establishes the data contents of the Planning Schedule with Release Capability Transaction Set (830) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business practice relative to the transfer of forecasting/material release information between organizations.

The planning schedule transaction may be used in various ways or in a combination of ways, such as: (1) a simple forecast; (2) a forecast with the buyer's authorization for the seller to commit to resources, such as labor or material; (3) a forecast that is also used as an order release mechanism, containing such elements as resource authorizations, period-to-date cumulative quantities, and specific ship/delivery patterns for requirements that have been represented in "buckets," such as weekly, monthly, or quarterly. The order release forecast may also contain all data related to purchase orders, as required, because the order release capability eliminates the need for discrete generation of purchase orders.

Implementation Notes

1. Organizations use this transaction set to transmit SPRs to ICPs/IMMs.
2. Use a single occurrence of this transaction set to transmit SPR transactions to one or more ICPs/IMMs. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Table 1

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
24	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

- 2/220** QTY is used to specify supplemental quantities relevant to the forecast function. However, QTY is not related to the actual forecast quantity in the FST segments.
- 2/410** At least one occurrence of segment FST is required, either in the FST loop or within the SDP loop. These two loops are mutually exclusive.
- 3/010** Number of line items (CTT01) is the accumulation of the number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (FST01) for each FST segment.

Segment: **ST** Transaction Set Header
Level: Header
Loop: ____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
		830	X12.14 Planning Schedule with Release Capability			
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Mandatory	Segment: BFR Beginning Segment for Planning Schedule	
	Level: Header	
	Loop: _____	
	Usage: Mandatory	
	Max Use: 1	
	Purpose: To indicate the beginning of a planning schedule transaction set; whether a ship or delivery based forecast; and related forecast envelope dates	
	Syntax: R0203 — At least one of BFR02 or BFR03 is required.	
	Semantic: 1. If BFR01 equals "04" (Net Change), BFR09 is required.	
	2. BFR02 is the identifying number for a forecast assigned by the orderer/purchaser.	
	3. BFR06 - forecast horizon start date: The date when the forecast horizon (envelope) begins.	
	4. BFR07 - forecast horizon end date: The date when the forecast horizon (envelope) ends.	
	5. BFR08 - date forecast generated: The date the forecast data was generated.	
	6. BFR09 - date forecast updated: The date the forecast was updated with "net change" data. (Used only when element 353 in BFR04 equals "04", meaning net change.)	

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	BFR01	353	Transaction Set Purpose Code	M	ID	2/2
			Code identifying purpose of transaction set.			
		00	Original			
		77	Simulation Exercise			
			Code Value Implementation Note:			
			<i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>			
Required	BFR02	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
			Implementation Note:			
			<i>Use a Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>			
Not Used	BFR03	328	Release Number	C	AN	1/30

Mandatory	BFR04	675	Schedule Type Qualifier Code identifying the type of dates used when defining a shipping or delivery time in a schedule or forecast. PR Planned Requirement Based Code Value Implementation Note: <i>Use to indicate requirements data reflect planned program requirement projections, and not historical demand, for specified timeframes.</i>	M	ID	2/2
Mandatory	BFR05	676	Schedule Quantity Qualifier Code identifying the type of quantities used when defining a schedule or forecast. A Actual Discrete Quantities Code Value Implementation Note: <i>Use to indicate quantities are unique to discrete transactions.</i>	M	ID	1/1
Mandatory	BFR06	373	Date Date (YYMMDD). Implementation Note: <i>Use to identify the forecast period start date for which all identified material support should be available. This date represents the outside start date for the total table 2 iterations.</i>	M	DT	6/6
Optional	BFR07	373	Date Date (YYMMDD). Implementation Note: <i>Use as required to identify the forecast period end date for which all identified material support should be available. This date represents the outside end date for the total table 2 iterations.</i>	O	DT	6/6
Mandatory	BFR08	373	Date Date (YYMMDD). Implementation Note: <i>Express the originating activity's date of transaction set preparation in GMT.</i>	M	DT	6/6
Not Used	BFR09	373	Date	O	DT	6/6
Not Used	BFR10	367	Contract Number	O	AN	1/30
Not Used	BFR11	324	Purchase Order Number	O	AN	1/22
Required	BFR12	783	Planning Schedule Type Code Code identifying type of planning schedule used. XA Requirement Forecast Code Value Implementation Note: <i>Use to indicate the transaction is an SPR forecast.</i>	O	ID	2/2
Not Used	BFR13	306	Action Code	O	ID	1/2

Segment: DTM Date/Time Reference

Level: Header

Loop: _____

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.

2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374 Date/Time Qualifier Code specifying type of date or time, or both date and time. 097 Transaction Creation <i>Code Value Implementation Note:</i> <i>Use to identify the originating activity's time of transaction set preparation.</i>	M	ID	3/3
Not Used	DTM02	373 Date	C	DT	6/6
Required	DTM03	337 Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	C	TM	4/8
<i>Implementation Notes:</i> 1. Express the originating activity's time in GMT. 2. Express time in a four-position (HHMM) format.					
Not Used	DTM04	623 Time Code	O	ID	2/2
Not Used	DTM05	624 Century	O	N0	2/2
Not Used	DTM06	1250 Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251 Date Time Period	C	AN	1/35

Required

Segment: N1 Name
Level: Header
Loop: N1 **Repeat:** 200
Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/230 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/230 loop to indicate an organization when an N101 qualifier code (e.g., Z4) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/320 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/230 that does not apply to all the table 2 iterations. (Codes subject to override: ST and Z4.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual P1 Preparer Code Value Implementation Note: Use as needed for original SPR and SPR modification transactions to identify the initiator of the SPR requirement. Use in SPR modification transactions to identify the revised initiator of the SPR requirement. ST Ship To Code Value Implementation Note: Use as needed for original SPR and SPR modification transactions to identify the organization to receive the material. Use in SPR modification transactions identifies the revised organization to receive the material. Z4 Owning Inventory Control Point	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2

Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/230 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/300 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/390 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/310 that does not apply to all table 2 iterations. (Codes subject to override: 0.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	LM01	559	Agency Qualifier Code	M	ID	2/2
			Code identifying the agency assigning the code values.			
			DF Department of Defense (DoD)			
Not Used	LM02	822	Source Subqualifier	O	AN	1/15

Mandatory

Segment: **LQ** Industry Code

Level: Header

Loop: LM

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: **C0102** — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Required	LQ01	1270	Code List Qualifier Code	O	ID	1/3
			Code identifying a specific industry code list			
			0 Document Identification Code			
Required	LQ02	1271	Industry Code	C	AN	1/20
			Code indicating a code from a specific industry code list			

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN **Repeat:** >1

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/LIN/010 loop to identify the type of transaction, material, transaction number, and information associated with the projected requirement.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

Required

LIN01 350 Assigned Identification **O AN 1/11**
Alphanumeric characters assigned for differentiation within a transaction set.

Implementation Notes:

Use to identify the type of transaction. Cite one of the following codes:

1. A - SPR submission
2. B - SA SPR submission
3. C - Cancellation of previously submitted SPR
4. D - Modification of a previously submitted SPR
5. E - Inquiry on status of previously submitted SPR
6. F - Acceptance of offer to provide substitute material
7. G - Rejection of offer to provide substitute material

Mandatory

LIN02 235 Product/Service ID Qualifier **M ID 2/2**
Code identifying the type/source of the descriptive number used in Product/Service ID (234).

Implementation Notes:

1. Use only one of codes A1, A2, FB, FS, MG, or YP to properly identify the material.
2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE.

A1 Plant Equipment Number

Code Value Implementation Note:

Use to identify plant equipment.

A2 Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use to identify ammunition items.

FB Form Number

Code Value Implementation Note:

Use to identify the form stock number.

FS National Stock Number

Code Value Implementation Note:

Must use the NSN when known.

MG Manufacturer's Part Number

Code Value Implementation Note:

Use to identify nonstandard material.

TP Product Type Code

Code Value Implementation Note:

For clothing and footwear, use as needed to identify the NSN when the material requested represents a generic requirement, for which the quantity should be distributed across a predefined range of sizes.

YP Publication Number

Code Value Implementation Note:

Use to identify the publication stock number.

ZB Commercial and Government Entity (CAGE) Code

Code Value Implementation Note:

Use only with code MG to identify a manufacturer's part number.

Mandatory	LIN03	234	Product/Service ID Identifying number for a product or service.	M	AN	1/40
Conditional	LIN04	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2

Segment: REF Reference Numbers

Level: Detail

Loop: LIN

Required

Usage: Optional

Max Use: 12

Purpose: To specify identifying numbers.

Syntax: R0203 — At least one of REF02 or REF03 is required.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	REF01	128	Reference Number Qualifier Code qualifying the Reference Number. TN Transaction Reference Number Code Value Implementation Note: <i>Use to identify the transaction number associated with the SPR forecast.</i>	M	ID	2/2
Required	REF02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Not Used	REF03	352	Description	C	AN	1/80

Optional

Segment: N1 Name

Level: Detail

Loop: N1 **Repeat:** 200

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/320 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/230 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/230 loop with a different address specified in the 2/N1/320 loop when the same N101 qualifier is used in both loops but the N104 address is different. (Codes subject to override: ST and Z4.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual ST Ship To Code Value Implementation Note: Use as needed for original SPR and SPR modification transactions to identify the organization to receive the material. Use in SPR modification transactions identifies the revised organization to receive the material. Z4 Owning Inventory Control Point	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:

Use code TO in conjunction with the appropriate 2/N101/320 code to indicate the organization to receive the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information
Level: Detail
Loop: LM **Repeat:** >1
Usage: Optional
Max Use: 1
Purpose: To transmit standard code list identification information
Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

For any specific table 2 iteration use this 2/LM/390 loop as needed: 1) to identify a DoD code when the LQ01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/300 loop or 2) to identify a DoD code when the LQ01 qualifier code applies to all table 2 iterations but the LQ02 DoD code varies among most of them or 3) to override an LQ02 DoD code in the 1/LM/300 loop with a different DoD code in the 2/LM/390 loop when the same LQ01 qualifier is used in both loops but the LQ02 DoD code is different. (Codes subject to override: 0.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

Required

Segment: FST Forecast Schedule

Level: Detail

Loop: FST **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To specify the forecasted dates and quantities

Syntax: 1. P0607 — If either FST06 or FST07 is present, then the other is required.

2. P0809 — If either FST08 or FST09 is present, then the other is required.

Semantic: If FST03 - "F" (indicating flexible interval), then FST04 and FST05 are required. FST04 would be used for the start date of the flexible interval and FST05 would be used for the end date of the flexible interval.

Comments: 1. As qualified by FST02 and FST03, FST04 represents either a discrete forecast date, the first date of a forecasted bucket (weekly, monthly, quarterly, etc.) or the start date of a flexible interval.

2. FST06 - To qualify time in FST07. The purpose of the FST07 element is to express the specific time of day in a 24-hour clock, to satisfy "just-in-time" requirements. As an alternative, the ship/delivery pattern segment (SDP) may be used to define an approximate time, such as "AM" or "PM".

Implementation Notes:

1. Use a single iteration of the 2/FST/410 loop for SPR cancellation, substitute acceptance, substitute rejection, and SPR inquiry transactions, but only to identify the quantity and support date associated with the transaction.

2. Use multiple 2/FST/410 loop iterations for original SPR and SPR modification transactions, but only to identify and, as needed, stratify applicable SPR forecast quantities by related support dates.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	FST01	380 Quantity	M	R	1/15
		Numeric value of quantity.			

Implementation Note:

Express as a whole number with a decimal. For example, if the quantity is 20, cite only 20.

Mandatory	FST02	680 Forecast Qualifier	M	ID	1/1
		Code specifying the sender's confidence level of the forecast data or an action associated with a forecast			

D Planning

Code Value Implementation Note:

Use only for original SPR, substitute acceptance, substitute rejection, and SPR inquiry transactions. Use in original SPR and SPR inquiry transactions to identify the forecast quantity.

Use in substitute acceptance transactions to identify the quantity for which a substitute is acceptable. Use in substitute rejection transactions to identify the quantity for which a substitute is not acceptable.

			W Cancellation Code Value Implementation Note: <i>Use for SPR cancellation transactions, but only to indicate the requested cancellation quantity.</i>			
			X Modification Code Value Implementation Note: <i>Use for SPR modification transactions, but only to identify the revised SPR forecast quantity and support date, as appropriate.</i>			
Mandatory	FST03	681	Forecast Timing Qualifier Code specifying interval grouping of the forecast.	M	ID	1/1
			D Discrete Code Value Implementation Note: <i>Use to indicate all forecast quantities are discrete quantities.</i>			
Mandatory	FST04	373	Date Date (YYMMDD).	M	DT	6/6
			Implementation Note: <i>Use in original SPR, substitute acceptance, substitute rejection, SPR inquiry and SPR cancellation transactions to identify the specific support date (i.e., the date on which program related requisitions will be initiated). Use in SPR modification transactions to identify the revised support date.</i>			
Not Used	FST05	373	Date	O	DT	6/6

Segment: **SE** Transaction Set Trailer

Level: Summary

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96 Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329 Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 3B

TRANSACTION SET 870 IMPLEMENTATION CONVENTION

SPR/LASE STATUS

870 Order Status Report

This Draft Standard for Trial Use contains the format and establishes the data contents of the Order Status Report Transaction Set (870) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report on the current status of a requirement forecast, an entire purchase order, selected line items on a purchase order, selected products/services on a purchase order, or purchase orders for a specific customer in their entirety or on a selection basis. The transaction set can also be used to report on the current status of single or multiple requisitions. The report format allows for the inclusion of "reasons" relative to the status. This transaction set may also be used to update the supplier's scheduled shipment or delivery dates. This transaction set can result from either an inquiry or a prearranged schedule agreed to by the trading partners.

Implementation Notes

1. Organizations use this transaction set to provide supply status on SPR requests. DAAS uses this transaction set to notify the organization originating the SPR or LASE transaction that DAAS rerouted the transaction. ICPs use this transaction to notify the originator of an SPR or LASE transaction that the FSC provided on the original transaction was incorrect.

2. Use a single occurrence of this transaction set to transmit supply status to one or more organizations. Use one occurrence of this transaction set to transmit a single or multiple transactions.

			870 X12.23 Order Status Report			
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Segment: **BSR** Beginning Segment for Order Status Report

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of an Order Status Report.

Semantic: 1. BSR03 indicates a status report document number assigned by the sender.

2. BSR04 indicates the date of this report from the sender.

3. BSR07 indicates the time of this report from the sender.

4. BSR08 indicates a status report document number assigned by the inquirer.

5. BSR09 indicates the date this report was requested from the sender by the inquirer.

6. BSR10 indicates the time this report was requested from the sender by the inquirer.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	BSR01 850	Status Report Code Code indicating the reason for sending the report	M ID 1/2
		3 Unsolicited Report	
		Code Value Implementation Note: Use to indicate the DAAS or the ICP is notifying an organization of an error in an SPR or LASE transaction.	
		9 Response to a Requirement Forecast	
		Code Value Implementation Note: Use to indicate the supply source is providing planning information related to a SPR.	
Mandatory	BSR02 847	Order/Item Code Code identifying a group of orders and items.	M ID 1/2
		CA All Orders - All Items	
		Code Value Implementation Note: Use to indicate the response applies to all specified items.	
Mandatory	BSR03 127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	M AN 1/30
		Implementation Note: Use a Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.	
Mandatory	BSR04 373	Date Date (YYMMDD).	M DT 6/6

Implementation Note:*Express the originating activity's date in GMT.*

Not Used	BSR05	848	Product/Date Code	O	ID	1/2
Not Used	BSR06	849	Location Code	O	ID	1/2
Optional	BSR07	337	Time	O	TM	4/8

Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)

Implementation Notes:

1. Express the originating activity's time in GMT.
2. Express time in a four-position (HHMM) format.

Not Used	BSR08	127	Reference Number	O	AN	1/30
Not Used	BSR09	373	Date	O	DT	6/6
Not Used	BSR10	337	Time	O	TM	4/8
Optional	BSR11	353	Transaction Set Purpose Code	O	ID	2/2

Code identifying purpose of transaction set.

00 Original

77 Simulation Exercise

Code Value Implementation Note:

Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.

Not Used	BSR12	306	Action Code	O	ID	1/2
----------	-------	-----	-------------	---	----	-----

Required

Segment: N1 Name**Level:** Header**Loop:** N1 **Repeat:** 200**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/050 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/N1/050 loop to indicate an organization when an N101 qualifier code (e.g., P1) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/090 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/050 that does not apply to all the table 2 iterations. (Codes subject to override: P1.)

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98 Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual P1 Preparer Code Value Implementation Note: Use to indicate the activity submitting the original SPR. Z4 Owning Inventory Control Point	M ID 2/2
	N102	93 Name	C AN 1/35
	N103	66 Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
	N104	67 Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706 Entity Relationship Code	O ID 2/2
Required	N106	98 Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/050 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information**Level:** Header**Loop:** LM **Repeat:** 10**Usage:** Optional**Max Use:** 1**Purpose:** To transmit standard code list identification information**Comment:** LM02 identifies the applicable industry code list source information.**Implementation Note:**

Use this 1/LM/120 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/144 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/130 that does not apply to all table 2 iterations. (Codes subject to override: 0.)

Mandatory

Segment: HL Hierarchical Level**Level:** Detail**Loop:** HL **Repeat:** 1000**Usage:** Mandatory**Max Use:** 1**Purpose:** To identify dependencies among and the content of hierarchically related groups of data segments.

- Comments:**
1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.
 2. The HL segment defines a top-down/left-right ordered structure.
 3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.
 4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.
 5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.
 6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Implementation Note:*The transaction set hierarchial data structure is SPR or LASE transaction status only.***Data Element Summary**

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	HL01	628	Hierarchical ID Number	M	AN	1/12
			A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.			
Implementation Note:						
<i>In the first 2/HL/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.</i>						
Not Used	HL02	734	Hierarchical Parent ID Number	O	AN	1/12
Mandatory	HL03	735	Hierarchical Level Code	M	ID	1/2
			Code defining the characteristic of a level in a hierarchical structure.

4 WAR MATERIAL REQUIREMENTS AND SIMULATED MOBILIZATION EXERCISES

4.1 GENERAL

- This chapter prescribes procedures and responsibilities for:
 - Submission of TS IC - 830 War Material Requirements application (appendix 4A) from the Military Departments and Defense Agencies, hereafter referred to as the DoD Components, to the IMMs of the Military Departments, DLA, and GSA.
 - Edit and validation of TS IC - 830 War Material Requirements data by IMMs and rejection of incomplete or invalid input.
 - Providing output from the LIM to the GIM upon logistical reassignment of an item.
- This chapter also provides guidelines which affect simulated mobilization exercises.

4.2 WAR MATERIAL REQUIREMENTS

- DoD policy for management and development of WMR is contained in DoD Directive 3110.6.
- DoD Components will transmit TS 830 IC - War Material Requirements data to reach IMMs by 15 Feb each year and will submit corrections and/or changes as required. Do not submit zero quantity requirements.
- IMM will control each DoD Component's input WMR data transactions. Edit the TS 830 IC - War Material Requirements and validate the edited transactions for adequacy and accuracy of data. Consider validated requirements in both the annual computation of the OWRMR and OWRMRP, and in any recomputation of these requirements upon receipt of corrected or revised input. When a TS 830 IC - War Material Requirement contains an invalid NSN, unit of issue, quantity or date, process a TS 824 IC - Reject. However, when the transaction is invalid for any other reason, manually reject the entire submission to the submitting DoD Component. Include all rejects on a listing reflecting an image of the input transaction and a code identifying the reason for the reject. Mail the listing together with a letter explaining the reject code and action (s) required by the submitter.
- When items are logistically reassigned, the LIM will furnish the GIM a listing of WMR data with a supporting TS 830 IC - War Material Requirement as prescribed by chapter 10, section 10.4.6.

4.3 SIMULATED MOBILIZATION EXERCISES

When establishing plans which require simulated mobilization exercises, identify the associated transactions as simulated mobilization exercise transactions as provided for in the applicable implementation convention. Do not process simulated mobilization transactions in the supply distribution system(s) as action documents which affect accountable/unit records. Service/Agency activities responsible for initiating these exercises must use extreme caution to ensure procedures are explicit and that complete coordination with all participants is accomplished.

APPENDIX 4A

TRANSACTION SET 830 IMPLEMENTATION CONVENTION WAR MATERIAL REQUIREMENTS

830 Planning Schedule with Release Capability

This Draft Standard for Trial Use contains the format and establishes the data contents of the Planning Schedule with Release Capability Transaction Set (830) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business practice relative to the transfer of forecasting/material release information between organizations.

The planning schedule transaction may be used in various ways or in a combination of ways, such as: (1) a simple forecast; (2) a forecast with the buyer's authorization for the seller to commit to resources, such as labor or material; (3) a forecast that is also used as an order release mechanism, containing such elements as resource authorizations, period-to-date cumulative quantities, and specific ship/delivery patterns for requirements that have been represented in "buckets," such as weekly, monthly, or quarterly. The order release forecast may also contain all data related to purchase orders, as required, because the order release capability eliminates the need for discrete generation of purchase orders.

Implementation Notes

1. Organizations use this transaction set to report war reserve material requirements data to IMMs/ICPs.
2. Use a single occurrence of this transaction set to transmit war reserve material requirements to one or more organizations. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Table 3

SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
CTT	Transaction Totals	O	1	
SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

- 2/220** QTY is used to specify supplemental quantities relevant to the forecast function. However, QTY is not related to the actual forecast quantity in the FST segments.
- 2/410** At least one occurrence of segment FST is required, either in the FST loop or within the SDP loop. These two loops are mutually exclusive.
- 3/010** Number of line items (CTT01) is the accumulation of the number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (FST01) for each FST segment.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 830 X12.14 Planning Schedule with Release Capability	M	ID	3/3
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Mandatory

Segment: BFR Beginning Segment for Planning Schedule

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of a planning schedule transaction set; whether a ship or delivery based forecast; and related forecast envelope dates

Syntax: R0203 — At least one of BFR02 or BFR03 is required.

Semantic: 1. If BFR01 equals "04" (Net Change), BFR09 is required.

2. BFR02 is the identifying number for a forecast assigned by the orderer/purchaser.

3. BFR06 - forecast horizon start date: The date when the forecast horizon (envelope) begins.

4. BFR07 - forecast horizon end date: The date when the forecast horizon (envelope) ends.

5. BFR08 - date forecast generated: The date the forecast data was generated.

6. BFR09 - date forecast updated: The date the forecast was updated with "net change" data. (Used only when element 353 in BFR04 equals "04", meaning net change.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
BFR01	353	Transaction Set Purpose Code Code identifying purpose of transaction set.	M ID 2/2
	00	Original	
	77	Simulation Exercise	

Code Value Implementation Note:

Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.

Required

BFR02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C AN 1/30
-------	-----	---	-----------

Implementation Note:

Use to identify the transaction number associated with the report of war material requirements data for the NSN identify in the 2/LIN/010 segment.

Not Used

BFR03	328	Release Number	C AN 1/30
-------	-----	----------------	-----------

Mandatory	BFR04	675	Schedule Type Qualifier Code identifying the type of dates used when defining a shipping or delivery time in a schedule or forecast. PR Planned Requirement Based Code Value Implementation Note: <i>Use to indicate requirements data reflect forecasted requirements for specified timeframes.</i>	M	ID	2/2
Mandatory	BFR05	676	Schedule Quantity Qualifier Code identifying the type of quantities used when defining a schedule or forecast. A Actual Discrete Quantities Code Value Implementation Note: <i>Use to indicate quantities reflect discrete requirements for specified timeframes.</i>	M	ID	1/1
Mandatory	BFR06	373	Date Date (YYMMDD). Implementation Note: <i>Use to identify the forecast period start date.</i>	M	DT	6/6
Optional	BFR07	373	Date Date (YYMMDD). Implementation Note: <i>Use to identify the forecast period end date.</i>	O	DT	6/6
Mandatory	BFR08	373	Date Date (YYMMDD). Implementation Note: <i>Express the originating activity's date of transaction set preparation in GMT.</i>	M	DT	6/6
Not Used	BFR09	373	Date	O	DT	6/6
Not Used	BFR10	367	Contract Number	O	AN	1/30
Not Used	BFR11	324	Purchase Order Number	O	AN	1/22
Required	BFR12	783	Planning Schedule Type Code Code identifying type of planning schedule used. XF War Reserve Forecast Code Value Implementation Note: <i>Use to indicate the transaction is a war reserve material requirements forecast.</i>	O	ID	2/2
Not Used	BFR13	306	Action Code	O	ID	1/2

Segment: DTM Date/Time Reference**Level:** Header**Loop:** ____**Required****Usage:** Optional**Max Use:** 10**Purpose:** To specify pertinent dates and times**Syntax:** 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.**Data Element Summary**

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time. 097 Transaction Creation Code Value Implementation Note: <i>Use to identify the originating activity's time of transaction set preparation.</i>	M	ID	3/3
Not Used	DTM02	373	Date	C	DT	6/6
Required	DTM03	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	C	TM	4/8
Implementation Notes: 1. Express the originating activity's time in GMT. 2. Express time in a four-position (HHMM) format.						
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Required

Segment: N1 Name
Level: Header
Loop: N1 **Repeat:** 200
Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/230 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/230 loop to indicate an organization when an N101 qualifier code (e.g., KD) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/320 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/230 that does not apply to all of the table 2 iterations. (Codes subject to override: KA.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual KA Item Manager ZD Party to Receive Reports Code Value Implementation Note: Use to indicate the organization submitting war reserve material requirements data.	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:

Must use FR and TO in conjunction with the appropriate 1/N101/230 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/300 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/390 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/310 that does not apply to all the table 2 iterations. (Codes subject to override: 0 and LZ.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

Not Used

Segment: LQ Industry Code
Level: Header
Loop: LM
Usage: Mandatory
Max Use: 100
Purpose: Code to transmit standard industry codes
Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Optional	LQ01	1270	Code List Qualifier Code	O	ID	1/3
			Code identifying a specific industry code list			
			0 Document Identification Code			
			LZ War Reserve Material Requirement Code			
			Code Value Implementation Note:			
			<i>Use to identify the type of war reserve requirement for which the forecast applies.</i>			
Conditional	LQ02	1271	Industry Code	C	AN	1/20
			Code indicating a code from a specific industry code list			

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN **Repeat:** >1

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/LIN/010 loop to identify the war reserve material and information associated with the requirement forecast.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

Not Used	LIN01	350	Assigned Identification	O	AN	1/11
Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
Implementation Notes:						
1. Use only one of codes A1, A2, A4, FB, FS, MG, or YP to properly identify the material.						
2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE.						
A1 Plant Equipment Number						
Code Value Implementation Note: Use to identify plant equipment.						
A2 Department of Defense Identification Code (DoDIC)						
Code Value Implementation Note: Use to identify ammunition items.						
A4 Subsistence Identification Number						
Code Value Implementation Note: Use to identify subsistence items.						
FB Form Number						
Code Value Implementation Note: Use to identify the form stock number.						
FS National Stock Number						
Code Value Implementation Note: Must use the NSN when known.						
MG Manufacturer's Part Number						
Code Value Implementation Note: Use to identify nonstandard material.						
YP Publication Number						
Code Value Implementation Note: Use to identify the publication stock number.						
ZB Commercial and Government Entity (CAGE) Code						
Code Value Implementation Note: Use only with code MG to identify a manufacturer's part number.						
Mandatory	LIN03	234	Product/Service ID Identifying number for a product or service.	M	AN	1/40

Optional

Segment: N1 Name

Level: Detail

Loop: N1 Repeat: 200

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/320 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/230 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/230 loop with a different address specified in the 2/N1/320 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: KA.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

Required

Segment: FST Forecast Schedule**Level:** Detail**Loop:** FST **Repeat:** >1**Usage:** Optional**Max Use:** 1**Purpose:** To specify the forecasted dates and quantities**Syntax:** 1. P0607 — If either FST06 or FST07 is present, then the other is required.

2. P0809 — If either FST08 or FST09 is present, then the other is required.

Semantic: If FST03 - "F" (indicating flexible interval), then FST04 and FST05 are required. FST04 would be used for the start date of the flexible interval and FST05 would be used for the end date of the flexible interval.**Comments:** 1. As qualified by FST02 and FST03, FST04 represents either a discrete forecast date, the first date of a forecasted bucket (weekly, monthly, quarterly, etc.) or the start date of a flexible interval.
2. FST06 - To qualify time in FST07. The purpose of the FST07 element is to express the specific time of day in a 24-hour clock, to satisfy "just-in-time" requirements. As an alternative, the ship/delivery pattern segment (SDP) may be used to define an approximate time, such as "AM" or "PM".**Implementation Note:**

Use multiple 2/FST/410 loop iterations to identify incremental monthly forecast quantities. Use only one iteration when identifying the PWR quantity.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	FST01	380	Quantity Numeric value of quantity.	M	R	1/15
Implementation Note: Use to identify the monthly forecast quantity. Express as a whole number with no decimals. For example, if the quantity is 20, city only 20.						
Mandatory	FST02	680	Forecast Qualifier Code specifying the sender's confidence level of the forecast data or an action associated with a forecast D Planning	M	ID	1/1
Code Value Implementation Note: Use to indicate the requirement reflects a planning requirement forecast.						
Mandatory	FST03	681	Forecast Timing Qualifier Code specifying interval grouping of the forecast. M Monthly Bucket (Calendar Months)	M	ID	1/1
Code Value Implementation Note: Use to indicate quantities are reflected in monthly increments.						

Mandatory	FST04	373	Date Date (YYMMDD).	M	DT	6/6
Implementation Note: Use to indentify the specific month of the forecast period for which the quantity applies. Assume that the first day of the month applies.						
Not Used	FST05	373	Date	O	DT	6/6
Not Used	FST06	374	Date/Time Qualifier	C	ID	3/3
Not Used	FST07	337	Time	C	TM	4/8
Not Used	FST08	128	Reference Number Qualifier	C	ID	2/2
Not Used	FST09	127	Reference Number	C	AN	1/30
Not Used	FST10	783	Planning Schedule Type Code	O	ID	2/2

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 2/LM/430 loop to identify DoD unique coded data related to the characteristics and coding requirements for PWR requirements forecast in 2/FST/410.

Data Element Summary

5 REQUISITIONING

5.1 GENERAL

This chapter prescribes procedures for the preparation and submission of requisitions with specific requisitioning requirements involving GFM, SA, NMCS, ANMCS, PWRMS, conventional ammunition, subsistence, bulk petroleum, packaged petroleum additives, and GSA nonmailable items. This chapter also provides procedures for requisition cancellations, modifications, and inquiries. In addition, this chapter prescribes the supply source processing procedures of the aforementioned transactions including the preparation and processing of the material release and material release advice transaction

5.2 PREPARATION OF REQUISITIONS

Requisitioning organizations must use the TS 511 IC - Requisition (appendix 5A) to submit requisitions for all material requirements.

5.2.1 TRANSACTION REFERENCE NUMBER

The transaction reference number identifies each requisition within the supply system as follows:

- Identification Code - This is the first six positions of the transaction reference number and is a six-position constructed code for identification purposes. Use the applicable DoDAAC (AAC for Federal Civil Agencies) or ILCO assigned identification code for SA requisitioners not assigned a DoDAAC. For MAP/GA, the Service/Agency code identifies the U.S. Service or Agency responsible for administering the program line in the first position, the country or international organization code in the second and third positions, the customer-within-country code in the fourth position, a zero in the fifth position, and the type of assistance and financing code in the sixth position. For FMS, the Service assignment code identifies the U.S. Service responsible for administering the case in the first position, the country or international organization code in the second and third positions, the customer-within-country code in the fourth position, the delivery term code in the fifth position, and the type of assistance and financing code in the sixth position. (NOTE: Shipments to Canada identify the customer-within-country code as a two-position code in the fourth and fifth positions.)
- Transaction Control Date - This is a six-position date (as the seventh through twelfth positions) to identify the requisition preparation date.
- Serial Number - This is the assigned four-position line item code (as the thirteenth through sixteenth positions) for each requisition within the transaction set.

5.2.1.1 PRIORITY DESIGNATORS AND REQUIRED DELIVERY DATES

The PD is based upon a combination of factors that relate the relative importance of the requisitioner's mission, expressed by its F/AD and the urgency of need of the end use expressed by the UND. The F/AD (a Roman numeral) is assigned by the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, or a DoD Component authorized by the CJCS to assign F/ADs for their respective forces, activities, programs or projects. The criteria for assignment of an appropriate F/AD is in DoD 4140.1-R. The requisitioning activity determines the UND (an alphabetic character).

Commanding Officers of requisitioning installations are responsible for the accurate assignment of PDs consistent with the F/AD and UND, and the validity of RDDs when assigned to requisitions. Similarly, Commanding Officers of ILCOs, receiving requisitions from SA requisitioners, are responsible for review of assigned PDs and delivery dates. Accomplish the following reviews prior to transmitting requisitions to the supply source:

- Commanders (or acting commanders during absences) will personally review all requirements based on UND A to certify an inability to perform the mission.
- Commanders will designate, in writing, specific personnel who will personally review all requirements based on UND B to certify that the urgency has been accurately determined.

Determine the appropriate UND as follows:

- Use UND A in requisitioning material:
 - Required for immediate end use and without which the force or activity is unable to perform its assigned operational mission or without which the force or activity will be unable to perform its assigned operational mission within 15 days (20 days if the force or activity is located OCONUS).¹
 - Required for immediate installation on, or repair of, mission-essential material and without which the force or activity is unable to perform its assigned operational mission.
 - Required for immediate end use for installation on, or repair of, direct support equipment (such as ground support and firefighting) necessary for the operation of mission-essential material.²
 - Required for immediate end use in the replacement or repair of mission-essential training material and without which the force or activity is unable to perform its assigned training missions.
 - Required for immediate end use to effect the replacement or repair of the essential physical facilities of an industrial or production activity and without which that activity is unable to perform its assigned missions.
 - Required for immediate end use to eliminate an existing work stoppage at an industrial or production activity that is engaged in manufacturing, modifying, or maintaining mission-essential material.
 - Required for immediate end use to eliminate an existing work stoppage on a production line that is performing repair and maintenance of unserviceable items having a Military mission essentiality code of 1 or 2.

¹ Material requirements of this nature affect the readiness of mission-essential material and actually result in a report of casualty in accordance with equipment readiness information systems authorized by the OSD, the Chairman of the Joint Chiefs of Staff, or DoD Component headquarters.

² See Footnote 1

- Use UND B in requisitioning material:
 - Required for immediate end use and without which the capability of the force or activity to perform its assigned operational mission is impaired.
 - Required for immediate installation on, or repair of, mission-essential material and without which the capability of the force or activity to perform its assigned operational missions is impaired.³
 - Required for immediate end use for installation on, or repair of, auxiliary equipment. Auxiliary equipment is defined as equipment which supplements mission-essential material or takes the place of such material should it become inoperative.
 - Required for immediate end use in the replacement or repair of mission-essential or auxiliary training equipment and without which the capability of the force or activity to perform its assigned missions is impaired.
 - Required for immediate end use to effect replacement or repair of the essential physical facilities of an industrial or production activity and without which the capability of that activity to perform its assigned missions is impaired.
 - Required to preclude an anticipated work stoppage at an industrial or production activity that is engaged in manufacturing, modifying, or maintaining mission-essential material.
 - Required to preclude an anticipated work stoppage on a production line performing repair and maintenance of unserviceable intensive management or critical items.
 - Required for the immediate replacement of the safety level quantity of mission-essential items on allowance and load lists (such as, prescribed load lists, spares kits, station sets, or coordinated shipboard allowance lists) when the last item has already been issued.
 - Required for immediate stock replenishment at OCONUS forward area supply activities when a customer's mission-essential stock level goes below the safety level and stock due in is not anticipated to arrive prior to stock on hand reaching a zero balance. The quantity ordered should be the minimum amount sufficient to ensure the maintenance of a positive stock balance until material that is due in actually arrives.
- Use UND C in requisitioning material:
 - Required for on-schedule repair, maintenance, manufacture, or replacement of all equipment.
 - Required for replenishment of stock to meet authorized stockage objectives.
 - Required for purposes not specifically covered by any other UND.

³ See Footnote 1 on page 5-2

The requisitioning activity determines the appropriate PD to use in the requisition based on the assigned F/AD and the UND. Table 1 indicates the appropriate Arabic number PD derived from a combination of a given Roman numeral F/AD with one of the alphabetical UNDs. Note that each force or activity normally can choose from only three PDs.

DERIVATION OF PRIORITY DESIGNATORS

(Relating F/AD to UND)

<u>FORCE OR ACTIVITY DESIGNATOR</u>	<u>URGENCY OF NEED DESIGNATOR</u>		
	<u>A</u>	<u>B</u>	<u>C</u>
I	01	04	11
II	02	05	12
III	03	06	13
IV	07	09	14
V	08	10	15

TABLE 5-1

In the following special circumstances, use the stated PD, irrespective of F/AD, but do not use for the routine replenishment of stocks to meet authorized stockage objectives:

- Use PD 03 for medical or disaster-relief supplies or related items of equipment that are required immediately for:
 - Prolonging life, relieving avoidable suffering, or expediting recovery in case of injury, illness, or disease.
 - Avoiding or reducing the impact of epidemics or similar potential mass illnesses or diseases when in the opinion of medical professionals the probability of epidemics or similar potential mass illnesses is imminent.
- Use PD 03 for emergency supplies or items of equipment that are required immediately for controlling a civil disturbance, civil disorder, or rioting.
- Use PD 06 for emergency supplies of individual and organizational clothing required immediately to provide a minimum of essential clothing to active duty military personnel who are actually without their required clothing.

If local stocks are exhausted and the local supply activity must requisition a specific immediate end-use requirement for a supported activity with a higher F/AD, the supply activity may assign a PD, commensurate with the F/AD of the supported unit, to the specific requirement. Do not use this authority for the routine replenishment requirements of the supported unit.

Whenever a DoD Component executes a contract which provides that a commercial contractor

will requisition GFM from the DoD distribution system, the DoD contracting officer will advise the contractor of the PDs to use in such contractor-prepared requisitions. The advice will take cognizance of the F/AD of the national priority program, force or activity for which the contract is executed, and the potential urgencies of need.

5.2.1.1.1 ISSUE PRIORITY GROUPS

PDs are grouped into IPGs as follows:

- PDs 01, 02, and 03 form IPG I.
- PDs 04, 05, 06, 07, and 08 form IPG II.
- PDs 09, 10, 11, 12, 13, 14, and 15 form IPG III.

5.2.1.1.2 REQUIRED DELIVERY DATES

Requisitioning activities, after determining the appropriate PD applicable to requisitions, will determine the supply transportation system response time requirements by the designation or non-designation of an RDD. The response times (UMMIPS time standards) are displayed in DoD 4140.1-R.

When an RDD shorter than the UMMIPS time standards is assigned, the appropriate PD, consistent with the activity's F/AD and UND, will be cited in the requisition.

If the customer does not specify a delivery date, the customer should expect the total time from order placement to delivery to be within the total order and ship time specified by the UMMIPS time standards.

For subsistence, the RDD is mandatory in all requisitions, with the assigned PD prescribing the precedence of internal supply processing actions for requisitions reflecting identical RDDs. To ensure delivery on the RDD, the ICP/depot may bank the requisitions until the correct processing date, computed by subtracting the number of days needed for depot processing and transit time from the RDD. Submit all requisitions using schedules established by the ICP.

If the customer is collocated with the supply depot issuing the material or has through local negotiations obtained collocated customer status and does not require the fastest possible service of the supply and transportation system, the customer should cite SRC G in the LQ segment and not indicate an RDD.

5.2.1.2 NONREIMBURSABLE MATERIAL

Use the no charge indicator in non-excess personal property requisitions to identify the requisitions for nonreimbursable material. Use the utilization code in requisitions to the DRMS for excess personal property requisitions to denote free issue. See chapter 17 for reutilization and marketing requisitioning procedures.

5.2.1.3 EXCEPTION DATA

Requisitioners must limit repetitive exception data to aid the timely supply source processing of requisitions to meet IPG processing times, SDDs, or RDDs, particularly those which satisfy high

priority requirements. Use available requisitioning capabilities to ensure maximum utilization of automated processes. Processing exception data requisitions is resource intensive, prone to errors, and generally delays required support. The supply sources will disregard all unnecessary exception data (such as, ship by commercial air, do not use postal system, ship by fastest traceable means, or ship overnight delivery) and continue processing. Supply sources will process all requisitions under UMMIPS. (See DoD 4140-1-R.) Within the UMMIPS time segment for transporting the material, it is the shipper's prerogative to select the mode of shipment based on time, distance, item characteristics, and economic factors.

5.2.1.4 LIMITATION ON THE USE OF EXCEPTION DATA

Exception data will normally be limited to the conditions listed below. Commanders will approve, or delegate in writing to specific personnel to approve, the submission of exception data requisitions.

- Non-NSN lumber products identified and ordered by description only or other commodities which require additional descriptive information
- Authorization/identification for items when such requirement is imposed by the ICP or by the parent Service or the requisitioning activity.
- NSN requirements needing additional identifying information; for example, requisitions initially rejected with CG or CJ status.
- Requisitions for LEVEL 1/SUBSAFE and nuclear reactor plant material.
- NSN items for chemicals for boiler water and feedwater analysis.
- Requisitions used to establish a registered user with the ICP in a PICA/SICA situation.
- Requisitions for Marine Corps PWR or Pre-Positioning Ships Program.

5.2.1.5 SPECIAL PROGRAM REQUIREMENTS

Requisitions resulting from SPRs must cite the associated SPR transaction number to establish an audit trail between the draw-down requisition and the original SPR against which the requirement was established.

5.2.1.6 NONSTANDARD MATERIAL

The requisitioner may cite a not to exceed unit price to advise the supply source of funding limitations. The supply source will suspend supply action for 10 days and use D9 status to advise the requisitioner when the actual unit price to be billed exceeds their authorization limit. The requisitioner must cancel the entire requisitioned quantity or a portion of the requisitioned quantity, as appropriate, based on the funding limitations. If the requisitioner fails to adjust the requisitioned quantity within 10 days from the date of the D9 status, the supply source will continue supply action for the originally requisitioned quantity.

5.2.1.7 CONTRACT INFORMATION

All GFM requisitions for or by contractors must identify appropriate contract data.

5.2.2 GOVERNMENT FURNISHED MATERIAL REQUISITIONS

This section prescribes policies and procedures for requisitioning GFM by or for contractors from the DoD Supply System. These procedures establish guidelines for requisitioners, authorized contractors, and S/As to obtain GFM from DoD inventories in support of contract requirements.

The S/As will assign a DoDAAC to each MCA. Requisitioners, authorized contractors, and S/As will transmit all requisitions for GFM to the appropriate MCA for validation.

Any attempt to circumvent GFM validation requirements is sufficient cause to refer the violation to the appropriate criminal investigating activity to determine possible fraud, waste, and abuse. The sponsoring Service or monitoring activity will refer all violations to the criminal investigators based on reports of rejected transactions or violations discovered during the post validation process.

These procedures apply to all requisitions for GFM from DoD supply sources for or by contractors. The production of ammunition is excluded from GFM control.

5.2.2.1 PREPARATION OF REQUISITIONS FOR GOVERNMENT FURNISHED MATERIAL TO CONTRACTORS

The responsible S/A, subject to the terms of the contract, or contractors may initiate requisitions for GFM.

Supply sources will process requisitions containing S/A codes designated for contractors under GFM controls and restrictions except when the issue is for contractor reimbursement by other than an Army contractor. Supply sources will process all Army contractor requisitions and associated transactions under GFM controls.

All GFM requisitions must include GFM-related information as follows:

- MCA monitoring the contract.
- DoDAAC of the contractor requesting and/or receiving the material.
- Indication when issue is without reimbursement.
- Identification of the MDN or contract number.
- Identification of the call or order number, when applicable.

5.2.2.2 SUBMISSION OF GOVERNMENT FURNISHED MATERIAL REQUISITIONS

Requisitioners, control offices, and monitoring activities must submit all requisitions and associated transactions for GFM, regardless of origin (such as contractor or S/A initiated), to the appropriate S/A MCA.

After validating the GFM requisitions, the S/A MCA will forward the validated requisitions to the supply source. The S/A MCA may pass validated transactions internally where the MCA and supply source are collocated. The S/A MCA will transmit the validated transactions via DAASC when the MCA and supply source are not collocated.

5.2.2.3 MANAGEMENT CONTROL ACTIVITY PROCESSING OF GOVERNMENT FURNISHED MATERIAL REQUISITIONS

The MCA will receive and validate the data in the GFM requisitions based on the criteria furnished by the procurement and/or contracting offices. The MCA will make changes, reject, or continue the processing action. The MCA will:

- Verify the item requisitioned against a valid contract to determine authority for issue to the contractor. If blank, incorrect, or not authorized, reject with DN status.
- Determine if the item ordered is authorized by contract, verify the quantity. If blank or invalid, reject with CD status.
- Validate the unit of issue in conjunction with the quantity to ensure that the quantity requisitioned does not exceed the authorized quantity. (NOTE: If a change of unit pack has occurred, appropriate adjustment should be made for the quantity authorized.) If the requisitioned quantity exceeds the remaining quantity authorized, reject the quantity which exceeds the authorized quantity with DJ status. If the authorized quantity has been exhausted by previous requisition(s), reject the total quantity requisitioned with DQ status.
- Determine if the contractor DoDAAC is valid, and if incorrect or not authorized, reject with DN status.
- Determine if the MAN or contract number is valid and if invalid, reject with DB status.

The MCA will maintain a RHF to serve as an auditable record of each GFM transaction. In addition, the MCA will generate reports required by DoD 4140.1-R.

Under emergency conditions, such as a potential contract work stoppage, the MCA may receive telephonic requisitions, PDs 01-08, for GFM. When this occurs, the MCA may telephone the requisitions to the appropriate supply source and validate the requirements afterward. If the post validation process reveals the requisitioner is not authorized GFM, the MCA will:

- submit cancellation requests to the appropriate supply source and
- advise the appropriate criminal investigating agency for determination of fraud, waste, and abuse.

Upon completion of the validation process, the MCA will identify itself as the FROM organization in the transaction and forward the transactions, or internal transactions (optional only when the MCA and supply source are collocated in the same distribution system), to the applicable supply source via DAASC.

5.2.2.4 MANAGEMENT CONTROL ACTIVITY PROCESSING OF GOVERNMENT FURNISHED MATERIAL VALIDATION REQUESTS

MCAs in receipt of a GFM validation request (TS 517 IC - GFM Validation, appendix 5E) will validate the data by the response due date indicated in the validation request and forward a GFM validation response (TS 517 IC - GFM Validation) to the applicable supply source as follows:

- If the requisition has been previously validated, cite Advice Code 2M.
- If the requisition has not been previously validated and the call order number/PIIN (or MDN) is not present, cite Advice Code 2U.
- If the requisition has not been previously validated and the call order number/PIIN (or MDN) is present, validate the stock number, unit of issue/quantity, and contractor and generate the TS 517 IC - GFM Validation response as follows:
 - If the validation process reveals that the contract is not valid, respond with Advice Code 2U.
 - If the validation process reveals that the requested quantity exceeds the contract authorized quantity, respond with Advice Code 2R and indicate the quantity approved for issue in the QTY segment.
 - If the validation process reveals that the requested quantity totally exceeds the contract authorized quantity, respond with Advice Code 2Q and indicate the total quantity is disapproved for issue in the QTY segment.
 - If the validation process reveals that the requested item, or contractor is not authorized GFM under a valid contract, respond with Advice Code 2V.
 - If the validation process reveals that the requested item is authorized, respond with Advice Code 2M.

5.2.2.5 SUPPLY SOURCE PROCESSING OF GOVERNMENT FURNISHED MATERIAL REQUISITIONS

Supply sources receiving GFM requisitions, modifiers, inquiries, and cancellations, regardless of the method of transmission, will process such transactions under these procedures. Supply sources receiving GFM requisitions for items not managed by their activity will reject the requisitions with CH status. Supply sources will edit the GFM transactions for the prescribed data elements and codes and correct, continue the processing actions, or provide the appropriate reject status.

Supply sources will validate all GFM transactions. Supply sources will perform the supply source/MCA validation process. The supply source/MCA validation process is not required when an internal requisition transaction is received from a collocated MCA in the same distribution system. However, supply sources must have safeguards in place to ensure that only internal transactions generated by the collocated MCA are accepted/processed.

Under emergency conditions, supply sources may receive telephonic (PD 01-08) requisitions from the MCA or requisitioner. The supply source may process these requisitions for immediate supply action and complete the GFM validation process later. If the validation process reveals the activity is not authorized GFM, refer the incident to the appropriate criminal investigating agency.

5.2.2.6 SUPPLY SOURCE GOVERNMENT FURNISHED MATERIAL VALIDATION PROCESS

For each GFM requisition, the supply source will employ one of the following options:

- Create and forward a validation request (TS 517 IC - GFM Validation) to the MCA identified in the requisitioner's transaction. If the MCA is invalid or missing, reject with CL status.
- Create and forward a GFM validation request to DAASC even if an MCA is contained in the requisitioner's transaction. DAASC will perform edits regarding the validity of the MCA data under subsection 5.2.2.7, this chapter.
- Utilize a combination of the above options: one for intra-Service transactions and one for inter-Service transactions.
- Suspend further supply support action on the requisitioner's transaction pending receipt of the GFM validation response.
 - If the GFM validation response is not received by the response due date indicated in the GFM validation request, reject the requisitioner's transaction with Status Code DR.
- Upon receipt of the GFM validation response, the supply source will process the suspended transaction using instructions provided by the advice/status code.
 - If Advice Code 2U, reject with DB status.
 - If Advice Code 2R, process for the approved quantity indicated in the GFM validation response. Reject the quantity difference between the suspended transaction and the GFM validation response with DJ status.
 - If Advice Code 2Q, reject with DQ status.
 - If Status Code CL, reject with CL status.
 - If Advice Code 2V, reject with DN status.
 - If Advice Code 2M, process under applicable supply source procedures.
 - If the advice/status code is invalid or an advice/status code is not indicated, reject with DR status.
- If a GFM validation response is received and there is a record of the requisition but a GFM validation request has not been submitted, discard the GFM validation response and generate a GFM validation request.
- If a GFM validation response is received and there is no record of the requisition, provide BF status.

5.2.2.7 DEFENSE AUTOMATIC ADDRESSING SYSTEM PROCESSING OF GOVERNMENT FURNISHED MATERIAL TRANSACTIONS

DAASC will pass all GFM transactions to the identified MCA. If the MCA is not a valid MCA, reject with CL status.

DAASC will pass all GFM validation requests to the identified MCA. If the MCA is invalid,

generate a GFM validation response with Status Code CL to the supply source.

DAASC will pass all GFM validation responses to the identified supply source.

5.2.3 SECURITY ASSISTANCE REQUISITIONS

FMS countries and SAOs will prepare and transmit requisitions to the applicable U.S. Service ILCO. The ILCO will transmit the SA requisitions to the appropriate supply source for processing.

The ILCOs must identify the programmed or nonprogrammed status of a requisition to the supply source by using the appropriate CLPSC. The supply source will process SA requisitions without a CLPSC as unprogrammed requirements.

Certain SA requisitions will be subject to a restriction in quantity when it is determined that the total requirement for an item will result in more than 25 shipment units. This constraint is employed to preclude the assignment of nonconforming TCNs which occurs when the number of shipment units exceeds 25 and which causes a loss of identity to the shipment. The Services will specify those items of equipment to which the quantity restriction applies. Generally, these items will be equipment such as wheeled/tracked vehicles or other items when a unit of issue of one each will constitute a single shipment unit.

5.2.3.1 REQUISITION IDENTIFICATION

All SA requisitions will contain a unique six-position identification code consisting of a combination of codes which identifies the requisitioning country or international organization and which provides specific requisitioning and shipping instructions for the supply source and shipping activities. This identification code is the first six positions of the transaction reference number. The DoD 4000.25-8-M, the DoD 5105.38-M, and the DoD 7290.3-M, in combination, provide the interpretation of these codes. See subsection 5.2.1, above, for specifics on the actual code construction.

5.2.3.2 REQUIRED AVAILABILITY DATES

Always identify the effective RADs in SA requisitions for major weapons systems, end items, and concurrent spares. In FMS cases, compute the RAD by adding the lead time stated on the DD Form 1513 to the date of receipt of the completed, funded, DD Form 1513. For MAP/GA, compute the RAD by adding the ICP determined lead time to the date of the MAP order.

The S/As identify the RAD in the requisitions for major items and associated support equipment and the initial issue parts for MAP/GA, as soon as practicable, but not later than 120 days after receiving an approved funded order.

- RAD time begins with the date of the requisition.
- Requisitioners will modify RADs when contract forecasted delivery dates indicate a change in the availability of the items. Requisitioners will use BB, BV, or B3 status to reflect the true RAD. The ILCO/requisitioner will adjust all records to cite the new RAD information. When unable to meet the established RAD, the supply source will use B3 supply status to notify the ILCO of the RAD slippage.

5.2.4 NOT MISSION CAPABLE SUPPLY AND ANTICIPATED NOT MISSION CAPABLE SUPPLY REQUISITIONS

NMCS is a material condition indicating that systems and equipment are not capable of performing any of their assigned missions because of maintenance work stoppage due to a supply shortage. (See DoD Instruction 3110.5.)

Commanders will approve, or delegate in writing to specific personnel the authority to approve, all NMCS/ANMCS requisitions and submit the requisitions by the most expeditious means.

Submit NMCS and ANMCS requisitions only for material in the quantities needed to return the mission-essential system or equipment to mission capable/operationally ready status or when items are not available in ready-for-issue condition at the supporting post, camp, station, or OCONUS theater. Use overnight or next day delivery service for NMCS and ANMCS shipments whenever possible.

5.2.4.1 NOT MISSION CAPABLE SUPPLY CONDITIONS MEETING SPECIAL REQUIREMENTS CODE A

Use SRC A in PD 01-03 requisitions for material which will cause an NMCS condition to occur in mission-essential systems and equipment. SRC A will identify transactions related to the critical items as requiring expedited handling. Any SRC used in the requisition will appear in the MRO and the shipping documentation. This procedure applies only to NMCS material shipped to U.S. Forces OCONUS or to Forces alerted for deployment within 30 days of the date of the NMCS requisition. SRC A does not apply to SA.

SRC A identifies the need for expedited handling of the NMCS material when meeting the specific conditions listed below. (The Commanding Officer of the requisitioning activity will either personally review, or delegate in writing to specific personnel the authority to review, all requisitions identified for expedited handling to certify compliance with the prescribed criteria.)

- The requisitioning unit must possess F/AD I, II, or III, and
- the items or equipment required are causing mission-essential systems or equipment to be incapable of performing any of their assigned missions (NMCS) or
- the items or equipment required have been identified during maintenance or testing as necessary to prevent mission-essential systems or equipment from being unable to perform assigned operational missions or tasks within 5 days of the date of the requisition.

5.2.4.2 NOT MISSION CAPABLE SUPPLY CONDITIONS MEETING SPECIAL REQUIREMENTS OTHER THAN CODE A

Apply the following to requisitions for NMCS conditions other than SRC A originating from activities where Forces in CONUS are not alerted for deployment.

- Use PDs 01-08 only.
- Cite SRC B.
- Indicate short RDDs.

Use the PD to process these requisitions.

5.2.4.3 ANTICIPATED NOT MISSION CAPABLE SUPPLY CONDITIONS

ANMCS is a condition which is anticipated to occur within 15 days in the CONUS or 20 days OCONUS; such as, equipment becoming deadlined for parts, engines going out of commission for parts, aircraft going out of commission for parts, or a ships' capability being impaired for parts. Prepare requisitions for material to prevent degradation of the mission capability of such systems/equipment as follows:

- Use PDs 01-08 only.
- Cite SRC C.
- Indicate short RDDs.

Use the PD to process these requisitions.

5.2.5 PRE-POSITIONED WAR RESERVE MATERIAL STOCK REQUISITIONS

Use Demand Code O and Project Code 3AA to identify requisitions for the initial fill of PWRMS consumable item requirements. Use Project Code 3PR in PWRMS replenishment requisitions. DoD organizations cannot submit nonreimbursable requisitions to the GSA.

Use the appropriate treasury symbol number and fund purpose code in all reimbursable requisitions for PWRMS requirements. Only use PDs 11-15 in reimbursable requisitions for PWRMS requirements; however, if overriding or operational situations justifies immediate supply support, use PDs 01-03.

Use one of Advice Codes 3C thru 3H, and 3J, as appropriate, to indicate the requirement for newest material and when this material must have at least 75 percent of its shelf life remaining. These advice codes are for DPSC - Medical items and apply to requisitions for PWRR, PMSR, and other requirements authorized and approved by the S/A. Procedures for requesting and approving the use of these codes and the authorized approving S/A organization are as follows:

- Activities will submit their requests to use Advice Codes 3C thru 3H and 3J using internal S/A guidance, to the authorized approving S/A organization.
- The authorized approving S/A organization will submit all approved requests to the DPSC with the following data: (1) DoDAAC of the approved organization, and (2) justification for the use of the new codes. Authorized S/A approving organizations are as follows:

Army

Commander
U.S. Army Medical Material Agency
ATTN: SGMMA-RMM
Fort Detrick
Frederick, MD 21701-5000

Navy	Chief of Naval Operations Navy Department ATTN: OP-41C Washington, DC 20350-2000
Air Force	Air Force Material Command ATTN: AFMLO/FOR-O Frederick, MD 21701-5000
Marine Corps	Commandant of the Marine Corps Headquarters United States Marine Corps ATTN:LPP-2 Washington, DC 20380-0001
Coast Guard	Commandant U.S. Coast Guard ATTN: G-ELM-2 2100 Second Street, SW Washington, DC 20593-0001
NSA	Director National Security Agency ATTN: L1111 9705 Samford Road Fort George G. Meade, MD 20755-6000
DLA	Defense Personnel Support Center ATTN: DPSC-RAM 2800 S. 20th Street Philadelphia, PA 19101-8419

- The DPSC will provide approval/disapproval to the authorized approving S/A organization with an effective date for submission of requisitions.

5.2.6 CONVENTIONAL AMMUNITION REQUISITIONS

Service owners of SMCA managed items may grant authority to the SMCA ICP to issue assets below established stock reservation levels. The Service owner must convey this authority to the SMCA ICP by using Advice Code 2S in the TS 511 IC - Requisition (appendix 5A).

Use Advice Code 3Q, 3V, 3W, 3X, 3Y, or 3Z, as applicable, when usable SCC E material is acceptable.

5.2.7 SUBSISTENCE REQUISITIONS

Always include the applicable subsistence type of pack code and the RDD in requisitions for perishable and nonperishable subsistence items.

Use the appropriate DPSC assigned subsistence identification number (or applicable UPC) to identify brand name resale items as follows:

- Positions 1-4 identify the FSC.
- Positions 5-6 indicate the NCB code; such as, 00 or 01.
- Position 7 contains alphabetic characters to distinguish brand name resale items from NSN items as follows:
 - Code A identifies brand name resale items in the 10-500 series of DLA supply bulletins.
 - Code B identifies items in the 10-600 bulletins.
 - Codes S and J identify certain brand name items announced in the DPSC monthly bulletins. These items do not appear in the 500 and 600 series bulletins.
- Positions 8-10 cite the supply bulletin number which identifies the brand name supplier; for example, SB 10-500-161. The numerics 161 identify a specific supplier by brand name listed in that bulletin.
- Positions 11-13 cite the numerical sequence of items listed in the specific bulletin (0 thru 999); such as, the line item number in the bulletin.

Always use Advice Code 2C in brand name resale subsistence material requisitioned by/for OCONUS activities to advise the supply source to fill or kill any unfilled quantity which the vendor cannot ship for arrival to the OCONUS destination within 30 days after the RDD. If the transshipping depot does not receive the material by the contract delivery date plus 15 days, the supply source will contact the vendor to determine the status of the shipment. If the vendor has not shipped the material, the supply source will initiate procurement or requisition cancellation action and notify the customer with appropriate supply status. If the vendor has shipped the material and the procurement cancellation cannot be effected, the transshipping depot must put the material in stock to fill future requirements. This only applies to shipments which cannot be shipped to arrive at the OCONUS destination within 30 days after the RDD. The supply source will furnish appropriate rejection status to the customer.

5.2.8 BULK PETROLEUM REQUISITIONS

Requisitioning activities use the TS 511 IC - Requisition (appendix 5A) to submit bulk petroleum requisitions to the supply source under DoD 4140.25-M. To assure posting to DFAMS the requisitioner will identify DFSC as an additional recipient of the transaction set. Activities using direct communications or other means for initiating requisitions may be exempted from this DLMS reporting requirement by DFSC in coordination with the Supply PRC Chair following full assessment of the costs and benefits.

5.2.9 PACKAGED PETROLEUM ADDITIVE REQUISITIONS

Intermediate DFSPs which are government owned and operated follow the procedures outlined in this chapter for requisitioning. To assure posting to DFAMS the requisitioner will identify DFSC as an additional recipient of the transaction set.

Contractor-operated DFSPs will follow the procedures outlined in this chapter for requisitioning. Requisitions will be routed directly to DFSC for required MCA approval. The requisition will be posted to the DFAMS prior to forwarding to the supply source.

Activities using direct communications or other means for reporting packaged petroleum additive requisitions to DFSC should not include DFSC in the requisition as an addressee.

5.2.10 SPECIAL GSA PROCEDURES ON NONMAILABLE ITEMS

GSA will process requisitions received with Advice Code 2A (item not available locally) regardless of the possible excessive transportation costs.

GSA will cancel requisitions (with CW status) when received without Advice Code 2A for an item valued at \$25 or less if, at the time of shipment, transportation costs incurred for shipping that order is in excess of 50 percent of the item value. GSA will notify the ordering activity when this condition exists and the requisitioner should attempt to procure the item locally. If local procurement cannot be effected, submit a new requisition with Advice Code 2A. In response, GSA will supply the item regardless of the transportation costs.

These procedures do not apply to SA requisitions.

5.2.11 TIMEFRAMES AND SUBMISSION OF REQUISITIONS

The frequency of submitting requisitions is the sole prerogative of the requisitioner and, except for subsistence items and bulk petroleum, the distribution systems will not prescribe scheduling. Submit requisitions when necessary to meet requirements for stock or to meet specific requirements for immediate use. In order to make the system more efficient and cost-effective, activities should consider consolidating requirements to reduce the submission of low-value requisitions.

The requisition submission time period extends from the date of the requisition to the date of receipt by the initial wholesale supply source; for example, the ICP or stock point which maintains any asset availability records for the purpose of filling material demands or ordering other supply action.

- Date of requisition will indicate the actual date of transmittal from the requisitioner to the initial supply source. Do not predate requisitions to facilitate local processing. The Transaction Set Implementation Convention Process will reflect the true date of transmittal.
- Time consumed by review/approval of control offices which are intermediary between the requisitioner and the initial supply source is counted in the time standard for this segment.

5.2.12 MAINTENANCE OF REQUISITION HISTORY AND DUE-IN FILES

All S/As must maintain a requisition history and due-in file for each transaction processed.

Requisitioners must expeditiously process transaction status and material receipts to requisition and due-in files to preclude the unnecessary generation of followups.

5.3 RETRANSMITTED REQUISITIONS

Use the FROM address in the requisition to identify the activity passing and/or referring the requisition and TO address to identify the activity to receive the requisition. In addition, indicate the applicable suffix code of the retransmitted requisition if the quantity is less than the original requisition quantity and the appropriate demand code. Indicate the date of receipt of the

supply source. Use SRC F to identify retransmitted requisitions generated from backorder releases submitted only to the SMCA.

5.4 REQUISITION CANCELLATIONS

The requisitioner, monitoring activity, S/A headquarters, and authorized command elements may request cancellation of previously submitted requisitions by using the TS 869 IC - Cancellation (appendix 5B). The activity initiating the cancellation action, if other than the requisitioner, must advise other interested activities of the cancellation action. Send single line cancellations to the last known supply source holding the applicable requisitions. Under normal circumstances, cancellation requests represent a discontinued need of specific items and quantities. Do not deobligate funds or update individual due-in records until you receive status from the supply source confirming cancellation.

Do not submit single line item cancellations when a CONUS activity has received notice of shipment for material from a contractor's facility or a depot.

Do not submit single line item cancellations when an OCONUS activity has received shipment status and the line item value of the cancellation is less than \$200, or the material was shipped by air mail or parcel post, or the material was shipped more than 10 days by air shipment to an APOE or 45 days by surface shipment to a WPOE.

Submit cancellations for conditions not excluded when there is no longer a need for a requisitioned quantity regardless of line item dollar value or status. Such submissions will authorize the supply source to properly adjust demands, when appropriate, and initiate cancellation action, when feasible.

Supply sources may initiate billings to requisitioning activities for transportation charges and/or contract termination costs even though the supply source is able to effect cancellation/diversion if requisitions are assigned Status Code BV. The consignee, the appropriate commander, or Service headquarters is responsible for the utilization or disposition of material which can not be canceled or diverted to an alternate consignee.

Requisitioning activities must submit a new requisition with a new transaction reference number, citing appropriate issue PDs, whenever shortages occur for material previously canceled or rejected. Do not submit requests to reinstate previously canceled or rejected requisitions to supply sources.

5.4.1 MASS OR UNIVERSAL CANCELLATION OF REQUISITIONS

Base closures, termination of special projects, ship and unit inactivations, termination of agreements, or termination of vessel outfitting or construction, are events which can necessitate the requirement for a mass or universal cancellation of multiple lines. Although these events may ultimately require mass or universal cancellation action, they are normally known to the affected activities well in advance of the effective date of such closures or termination action. In these instances, every effort will be made by the requisitioning activity to minimize the continued processing of requisitions by the supply sources, and the subsequent entry of unwanted shipments into the DTS, through initiation of single line cancellations. When S/A headquarters are aware that a total project (or total requirement for a single base) is no longer required and should be canceled, the S/A may initiate a mass or universal cancellation request of multiple lines by indicating a date range for the applicable requisition transaction number dates, appropriate project code(s) and/or various organizations.

- A mass cancellation permits continued transaction and shipment processing for selected requisitions.
- A universal cancellation serves to terminate all such processing, even requisitions previously identified for continued transaction and shipment processing under mass cancellation situations.

Requisitions for which transaction and shipment processing must be continued under mass cancellation situations will be indicated by the requiring activity at the earliest date through submission of requisition modifiers, TS 511 IC - Modification (appendix 5B), containing SRC E in the LQ segment. Supply sources will not cancel requisitions which have been modified to contain SRC E during a mass cancellation process.

- The requisition may not be changed to contain SRC E by means of a TS 511 IC - Modification submitted after the effective date of the requested mass cancellation.
- Requisitions, which fall within the scope of the announced mass cancellation criteria, submitted after the effective date of the mass cancellation action, will contain SRC E.

Requests for mass or universal cancellation of requisitions will be initiated by the Service headquarters, or by an authorized command element. The S/A contact points established for issuance and receipt of requests for mass and universal cancellation are listed in figure 5-1. Inter-S/A dissemination of requests for mass or universal cancellation will be made by the contact points designated in Column I to the designated contact points identified in Column 2 of figure 5-1. The mass or universal cancellation request will be accomplished by preparation of the TS 869 IC - Cancellation (appendix 5B).

Intra-S/A dissemination of requests for mass or universal cancellations will be accomplished by the S/A contact point designated in Column 2 of figure 5-1. Intra-S/A dissemination will include all S/A supply sources, storage sites, and other activities within the S/A processing supply transactions or shipments with capability to cancel requisitions or divert shipments. In addition, the designated S/A contact points will ensure that the appropriate overseas theater, force, logistics, or type commanders are cognizant of mass or universal cancellation actions affecting their areas of responsibility.

Requests for mass or universal cancellation action, TS 869 IC - Cancellation/Modification, will be submitted to the S/A designated contact point(s) for cancellation of all open requisitions applicable to specific projects, or bases (as identified by AACs). The request for mass or universal cancellations will contain identification of the activity having submitted the request, the effective date, and the required codes for identification of one of the following, for which cancellation of all applicable requisitions is requested:

- Project code and ship-to address.
- No project code and ship-to address.
- One project code and various addresses.
- No project code and various addresses.
- Various project codes and one address.

- Various project codes and one address.

It is recognized that a need may exist to continue the processing of certain requisitions and shipments during mass cancellations such as high priority demands to satisfy NMCS conditions (identified by SRC A or B in the requisition). In addition, it is recognized that a need may exist to allow continued processing on requisitions for material required to effect base closure. In these instances, submit a TS 511 IC - Modification, containing SRC E in the LQ segment and one of the following selective criteria, to applicable supply sources prior to the submission of the mass cancellation request:

- Project code(s) when associated with the ship-to address being canceled.
- SRC A or B when associated with the ship-to address being canceled.
- Specific PD when associated with the ship-to address being canceled.
- RDP when associated with the ship-to address being canceled - conventional ammunition only.

Upon receipt of the TS 511 IC - Modification containing SRC E in the LQ segment and one of the above selective criteria, supply sources will review all affected requisition(s) and all associated transactions/records to identify those for which continued processing has been requested. In the case of items scheduled for direct delivery, the supply source will forward TS 511 IC - Modifications to procurement sources. Supply sources and procurement sources will annotate the affected requisition(s) and all associated transactions/records with SRC E in the LQ segment.

DTS will continue movement of material to which an SRC E has been applied except when a universal cancellation has been announced.

When OCONUS shipments have already departed from CONUS ports, the responsibility for diversion or disposition is that of the consignee or the appropriate theater, force, logistics, or type commander. Notice to the latter will be the transportation lift data provided by the DTS clearance authority. (See also subsection 5.7.20.)

No attempt will be made to divert material destined to CONUS customer activities beyond the point of shipment.

All shipping S/As will designate storage points within their distribution system to receive shipments redirected as a result of mass or universal cancellation. Fund citations for GBL preparation will also be provided. These designated points and fund citations will be provided to MAC, MTMC, or theater commanders and will serve as predesignated consignees for any announced mass or universal cancellation. If more than one storage point is designated, instructions will be furnished to specify on a geographical basis the storage point designation in relation to each range of water and aerial ports (such as, the west, gulf, and east coasts). In addition, canceling S/As will designate a contact point(s) to provide disposition instructions on material which does not meet the automatic diversion conditions specified in subsection 5.7.20. Designated contact points will provide requested disposition instructions to DTS within 24 hours on material located at air terminals and within 48 hours on material located at water terminals.

Customers retain the authority to submit single line cancellation requests via (TS 869 IC - Cancellation) at any time before, during, or after the effective date of the mass cancellation.

5.5 REQUISITION MODIFICATIONS

The requisitioner, control office, or monitoring activity may request the modification of previously submitted requisitions using the TS 511 IC - Modification (~~appendix 5C~~). Any activity initiating a requisition modification will notify other interested parties of such action, especially, if the activity initiating the modification is other than the requisitioner. Transmit the requisition modification to the last known supply source. Limit modifications to changes in the following:

- Non-GFM Requisitions:
 - Ship-To and/or Bill-To Address(es)
 - Country FMS Offer and Release Option Code
 - FMS Freight Forwarder
 - Treasury Symbol Number/Fund Purpose Code
 - Project Code
 - SRC
 - PD
 - RDD or RDP
 - Advice Code
 - Ultimate Recipient Code
 - Transportation Priority Code
- GFM Requisitions:
 - Project Code
 - PD
 - Advice Code
 - RDD

Identify requisitions for which supply action must be continued during mass cancellation situations and submit modifications with SRC E to the supply source at the earliest possible date to ensure the continued processing of the requisitions.

Only the data on the modification transaction will be changed. All other data will remain as stated on the original requisition .

5.6 REQUISITION INQUIRIES/REQUESTS FOR SUPPLY ASSISTANCE

Use the TS 869 IC - Requisition Inquiry/Supply Assistance (appendix 5D) to followup or request

supply assistance to improve ESDs over the dates indicated in the latest supply status transaction on previously submitted requisitions. The followup request may result in shipment tracing action. The request for supply assistance may result in supply action for I&S items or items of a higher assembly. (See Volume 3, Transportation, for shipment tracing procedures.)

5.6.1 FOLLOWUPS

Submit followups to obtain the latest status for a previously submitted requisition.

Do not submit followups on requisitions for bulk petroleum.

See subsection 5.7.28.1 for the delivery order status inquiry procedures for bulk petroleum.

5.6.1.1 FOLLOWUP SUBMISSION CRITERIA

Submit followups when status data is not onhand to indicate a delay in receipt of material beyond the SDD or RDD or when the UMMIPS order and shipping time standard for receipt of material has elapsed.

Submit followups to the supply source where you transmitted the requisition if you have not received status indicating another activity is responsible for the demand. When supply status has been received, direct the followup to the activity indicated as currently processing the requisition; for example, the last known supply source. The supply source may follow up to a shipping activity on open MROs.

Do not submit followups after receiving shipment status evidencing completion of shipment unless you do not receive the material within normal transit time based on the date of the shipment as cited in the shipment status transaction.

5.6.1.2 FOLLOWUP SUBMISSION TIMEFRAMES

For PD 01-08 demands, submit followups only after expiration of at least 3 days from the date of the requisition or transaction date of the latest supply status.

For PD 09-15 demands, submit followups only after expiration of at least 7 days from date of the requisition or transaction date of the latest supply status.

5.6.2 REQUESTS FOR SUPPLY ASSISTANCE

Requisitioners may initiate requests for supply assistance only for PD 01-08 requisitions after receipt of supply status indicating an unacceptable delivery date. Requests for supply assistance include, but are not limited to, I&S items or items of an higher assembly. Do not generate requests for supply assistance prior to the receipt of supply status indicating open status.

Forward requests for supply assistance on previously submitted PD 01-08 requisitions to the supply source processing the requirement. Indicate an appropriate mission impact statement code in the request for supply assistance to indicate to the supply source the extent of the mission degradation which is created by the absence of the required material.

5.7 REQUISITION PROCESSING AND RELATED ACTIONS

Supply sources receiving requisitions, followups, modifications, cancellations, and/or supply assistance requests will process such transactions using these procedures.

5.7.1 GENERAL

Supply sources will review the unit of issue and enter correct unit of issue or reject. If rejected, provide the correct unit of issue in the TS 870 IC - Supply Status (appendix 6B).

When supply sources and storage activities utilize the sequential (or batch) method of processing and do not possess real time processing capability, such processing is to be performed as frequently as necessary in order to meet UMMIPS time standards, or specific RDD for subsistence requisitions as applicable. In every such cycle, cancellation requests (including automatic cancellation initiated by the supply source) and MOV reconciliation requests will be processed prior to backorder releases and new requisitions. Demands will be sequenced as follows:

- PD.
- OSD/CJCS project codes. Requisitions with OSD/CJCS project codes will be ranked above all other requisitions within the same PD.
- SRC A and PD 01, 02, or 03.
- SRC B, C, D, or E and PD 01-08.
- RDD/RAD, if earlier than the computed SDD.
- RDP, if later than the computed SDD--conventional ammunition only.

Backordered requirements will be merged (in the above sequence) with all new transactions in any requisition processing cycle in which additional assets become available; for example, receipts of material and debit onhand adjustments.

Processing points will record the date of receipt of each requisition received. The date of receipt will enable supply sources to compute the requisition submission time. The computation will be made by subtracting the date in the demand transaction from the date received. The submission time will provide a basis for the ICPs to measure the first cycle segment of supply effectiveness.

The transaction reference number, and a suffix when applicable, will be used as a basis for determining duplicate transactions. The recipient will disregard all duplicate transactions.

5.7.2 EFFECT OF PRIORITY DESIGNATOR ON REQUISITION PROCESSING

Each requisition will contain a PD assigned by the requisitioning activity, which will not be changed by processing points except in the following conditions:

- Special Requirements Code A is present but the PD is not 01, 02, or 03, the supply source will enter PD 03.
- SRC B or C is present, but the PD is not 01 - 15, the supply source will enter PD 08.

- SRC D is present but the PD is not 01 - 15, the supply source will enter PD 08.
- An OSD/CJCS project code is present, but the PD is not 01-15, the supply source will cite PD 03.
- For all other conditions, if the PD is not 01 - 15, the supply source will enter PD 15.

The assigned PD dictates the precedence of internal supply processing actions (such as, from the receipt of a transaction until release to transportation) and determines the SDD. The mandatory time standards for the processing of transactions are as indicated in UMMIPS. All time standards are expressed in calendar days from the time of receipt of requisitions at the initial supply source. For subsistence requisitions, the assigned RDD is the primary processing criteria, while the assigned PD dictates the precedence of internal supply processing action for requisitions reflecting identical RDDs. Time standards indicated in UMMIPS do not apply to subsistence requisitions.

On occasion, available assets will be insufficient to satisfy all current demands and backorders for specific items. The IMM will reserve assets of such critical items through the use of item control levels and criteria which will restrict issue to specific categories of requirements only, i.e., those within designated ranges of PDs, CJCS approved projects, or firm commitments for delivery of material to SA recipients. Control levels will be established for IMM to reserve stocks for issue only for PD 01-03. These requirements will be satisfied by issue to zero stock balance of serviceable stocks. Control levels may be established at the discretion of the IMM to reserve a greater level of stocks which may not be issued for PD 09-15 requirements.

Control levels will also be established by the supply source to restrict issues against requisitions for the initial fill of PWRMS consumable item requirements to ensure that:

- Assets available below the AFAO are not issued against requisitions for non-reimbursable PWRMS requirements regardless of the PD.
- Assets available below the ROP are not issued against requisitions for non-reimbursable PWRMS requirements which contain a PD of 11-15 during initial processing of the requisition. Subsequent processing of such requisitions is prescribed in subsection 5.6.4, this chapter.

OSD/CJCS projects, when so designated, and PD 01-03 requisitions containing SRC A, will be ranked above all other requisitions with the same PDs for processing purposes. SRC A requisitions and related transactions will receive special attention to provide for expedited processing actions.

When system-wide inventory levels do not permit positive supply action on all requisitions within a given PD, supply procedures will provide for a release of demands containing the specifically designated OSD/JCS project codes and SRC A as the respective most urgent. PD 01-08 requisitions assigned SRC D or E and other requisitions/material obligations will be processed for release under subsection 5.7.1, this chapter.

5.7.3 SUPPLY SOURCE PROCESSING OF REQUISITIONS WITH ADVICE CODE 2D, 27, OR 29

Supply sources will edit all requisitions containing Advice Codes 2D, 27, and 29 to determine if an increase in the requisition quantity to the quantity unit pack is less or more than \$5. If less than \$5, the supply source will disregard the advice code in the requisition. If \$5 or more, the supply source will honor the advice code and process the requisition for the exact quantity requested. When a quantity adjustment is made using the above criteria, the supply source will use BJ status to notify the customer of the quantity adjustment.

5.7.4 SUPPLY SOURCE PROCESSING OF REQUISITIONS FOR QUANTITIES THAT EXCEED THE NORMAL DEMAND

The supply source may request verification of requisitions that reflect quantities which exceed normal demands or quantities that appear to be excessive or in error before taking positive supply action. When the supply source determines that the requisitioned quantity needs to be verified, the supply source will generate a TS 517 IC - Material Obligation Validation (appendix 9A) to request verification of the quantity. The supply source will indicate a response due date in the quantity verification inquiry. The organization verifying the requisitioned quantity will provide a response to the supply source by the response due date indicated in the quantity verification inquiry; otherwise, the supply source will automatically cancel the requisition.

5.7.5 SUPPLY SOURCE PROCESSING OF PRE-POSITIONED WAR RESERVE MATERIAL STOCK REQUISITIONS

Supply sources, except GSA, will process funded and unfunded requisitions for the initial fill of PWRMS consumable item requirements using the criteria established below. The GSA will process only funded requisitions for PWRMS requirements and does not differentiate between those requisitions and others.

Upon receipt of PWRMS requisitions for the initial fill of consumable item requirements (Demand Code O and Project Code 3AA), the supply source will determine asset availability in excess of the AFAO and:

- If sufficient assets are available in excess of the AFAO to satisfy the total requisition quantity, the total requisition will be processed as free issue.
- If the assets available in excess of the AFAO are not sufficient to satisfy the total requisition quantity, then the portion of the requisition quantity equal to the quantity of assets available in excess of the AFAO will be processed as free issue and the balance of the requisition quantity will be processed as follows:
 - When the supply source determines that assets are not available in excess of the AFAO, the basis of unit price code in the PO1 segment of the PWRMS requisition for the initial fill of consumable item requirements (Demand Code O and Project Code 3AA) will be checked and:
 - If code NC, the unfilled quantity on the requisition will be rejected. The rejection will be accomplished under Status Code CB since all unfunded PWRMS requisitions will be processed as fill or kill.

- If a basis of unit price code is not identified, the PWRMS requisitions will be processed as containing Advice Code 2L and the PD will be checked to determine further processing routines.
- Except for subsistence, PWRMS requisitions with PD 01-03 will be processed for issue using UMMIPS supply source processing standards. Subsistence requisitions will be processed to meet a specific RDD.
- Except for subsistence, PWRMS requisitions with PDs 11-15 will be issued from assets available above the ROP or equivalent. When assets above the ROP or equivalent are not available to satisfy the requisitioned quantity, the unfilled quantity will be placed on backorder and the appropriate supply status will be provided with an ESD equal to one procurement lead time. Backordered PWRMS requisitions with PDs 11-15 will be released from backorder at the end of the procurement lead time or when sufficient stocks are available above the ROP. (PWRMS requisitions with PDs 04-10, when received, will be processed in the same manner as PD 11-15 requisitions.)

5.7.6 SUPPLY SOURCE PROCESSING OF REQUIRED DELIVERY PERIOD REQUISITIONS (CONVENTIONAL AMMUNITION ONLY)

Requisitions with an RDP that has an earliest delivery date that is within the standard UMMIPS timeframes for the PD will be processed using the time period established for that PD.

Requisitions with an RDP that has an earliest delivery date that is longer than the standard UMMIPS timeframes for the PD will not be placed on backorder. If stock is not available, the requisition will be referred or rejected back to the customer. If stock is available, an MRO will be issued to the storage facility. The shipping activity will establish necessary control mechanisms to provide timely shipment to the customer.

Requisitions that cannot be delivered within the RDP will be rejected with CB status.

RDP procedures do not apply to SA requisitions.

5.7.7 SUPPLY SOURCE PROCESSING OF REQUISITIONS FOR NONCONSUMABLE ITEMS FROM A NONREGISTERED USER

If the PD is 01-08, process the requisition for issue and provide DS status to the requisitioner.

If the PD is 09-15 and assets are available above the ROP, process the requisition for issue and provide DS status to the requisitioner.

If the PD is 09-15 and assets are not available above the ROP, reject the requisition with CC or CN status, as appropriate.

5.7.8 SUPPLY SOURCE PROCESSING OF SUBSISTENCE REQUISITIONS

Do not backorder subsistence requisitions. Process subsistence requisitions to meet the specific RDD.

5.7.9 MAINTENANCE OF REQUISITION HISTORY RECORDS

Supply sources will retain accessible requisition history records for a minimum period of 6 months after the closing of requisition records by cancellation, rejection, or shipment to provide for responsive replies to requisition inquiries.

5.7.10 REJECTION OF REQUISITIONS

Supply sources will provide supply status to requisitioning and status organizations, identified in the requisition or followon transactions, as notices of requisition rejection with the reason for such action indicated by an appropriate status code.

5.7.11 RELEASE OF MATERIAL OBLIGATIONS

A material obligation is that quantity of an item requisitioned which is not immediately available for issue, but which is recorded as a stock commitment for future issue. Supply sources will establish procedures for the partial release of the material obligation when assets are insufficient to satisfy the entire demand consistent with the PD and delivery requirements of the requisition involved.

5.7.12 PREPARING MATERIAL RELEASE ORDERS

MROs, TS 940 IC - Material Release, (appendix 5E), are prepared by the supply source as a result of processing requisitions against inventory records and determination that material is available. MROs are used as a directive for release and shipment of material from stock.

Requisitions or MROs which contain Advice Code 2T and do not contain an RDD will be processed under the assigned PD without regard to the advice code.

MROs applicable to DFAMS reporting of DLA-owned bulk petroleum will be accomplished according to DoD 4140.25-M and the implementation conventions shown at appendix 5F.

5.7.13 MATERIAL RELEASE CONFIRMATION

The MRC (TS 945 IC - Material Release Advice, appendix 5F) serves as advice from a storage site to the supply source which initiated the MRO of supply action taken.

Supply sources will follow up on storage facilities at least once every 30 days for unconfirmed MROs which are 7 days old for PDs 01-08 and 15 days old for PDs 09-15.

5.7.13.1 DEFENSE AUTOMATIC ADDRESSING SYSTEM PROCESSING OF RELEASE CONFIRMATIONS

DAASC will use the data in MRC, TS 945 IC - Material Release Advice, with transaction type code NJ in the WO6 segment, to create shipment transactions (TS 856 IC - Shipment Status, (appendix 6D). Upon completion of this process, DAASC will transmit the MRC to the appropriate organization(s) as indicated in the N1 segment and the TS 856 IC - Shipment Status to authorized status receiving organizations.

5.7.14 STORAGE ACTIVITY DENIALS OR REJECTION OF MATERIAL RELEASES

MRDs, TS 945 IC - Material Release Advice, appendix 5F, are prepared by storage sites and transmitted to the supply source which initiated the MRO as notification of negative action on the MRO and will show the quantity denied and the appropriate management code.

If the storage activity cannot meet the delivery timeframe specified by the RDP, the storage activity will use the TS 945 IC - Material Release Advice to provide CB status to the supply source. The supply source will provide this status advice to the eligible status recipients (applies to conventional ammunition requisitions only).

5.7.15 RETRANSMITTING REQUISITIONS TO ANOTHER SUPPLY SOURCE

The supply source may retransmit requisitions to another source for continued supply action. The supply source will always identify the date of receipt of the original requisition in the PO1 Loop, G62 segment, in the retransmitted requisition. The supply source will always include SRC F in retransmitted requisitions submitted to the SMCA that are backorder releases from the Service ICPs.

When an SICA receives a requisition for a nonconsumable item from a SICA activity, the SICA may initiate supply action if stocks are normally held for this purpose, or the SICA may forward the requirement to the PICA. If forwarded to the PICA, the SICA must record the requisition as received from the SICA requisitioning activity and recode the requirement, as necessary, with status addressees, treasury symbol number/fund purpose code, and/or project code which will ensure PICA output of status, billing, MOV requests, and consignment instructions consistent with the SICA Service's NIP implementing instructions. If the PICA is only to provide status to the SICA, the SICA will not provide BM status to the requisitioning activity. The SICA will provide the SICA requisitioning activity with status received from the PICA based on the data elements and coding contained in the original requisition.

5.7.16 PROCESSING FOLLOWUPS

Process the TS 869 IC - Requisition Inquiry/Supply Assistance (appendix 5D) to determine the current status of requisitions. Time standards for dispatching status in reply to followups established for the distribution system are as follows:

- For PD 01-08, dispatch status within 2 days from the date of receipt of the followup.
- For PD 09-15, dispatch status within 5 days from the date of receipt of the followup.

A storage activity, in response to a followup initiated by a supply source, will use the TS 945 IC - Material Release Advice to provide shipment confirmation, denial, or supply status information, as appropriate.

Storage activities will provide Status Code BE if there is a record of the MRO but no record of having taken action in response to the MRO. Supply sources in receipt of this status will validate the original requirement with the requisitioner or, for GFM requisitions, with the MCA. The MCA is responsible for taking the necessary action to validate GFM requirements with the requisitioner and the supply source. If the requested material has not been received, and the

requisitioner's or the MCA's response indicates a continued valid requirement, the processing point will generate an MRO modifier transaction, which contains the same data as the original MRO. Storage activities in receipt of MRO modifiers will process them using subsection 5.7.19.

Storage activities will provide BE status in response to supply source inquiries if the storage activity has a record of the MRO but does not have a record of responding to the MRO.

Supply sources, in receipt of BE status or after 60 days have passed from the MRO generation date without confirmation or receipt of an MRA, will generate a pseudo shipment status TS 856 IC - Shipment Status (appendix 6E) with Transaction Type Code NC, to requisitioning and authorized status organizations. This shipment status will not cite a TCN or the mode of shipment. The generation date will be used as the date released to carrier.

DoD components will establish a management evaluation program which monitors storage activities providing BE status. Goals should be established and the performance attained be a rating element of the activity commander.

Storage activities responding to a followup initiated by a supply source on an MRO for which no record is held at the storage activity will provide BF supply status.

Supply sources in receipt of storage activity responses to followups will furnish appropriate status to eligible recipients using chapter 6.

Requests for supply assistance require management decisions relative to supply requirements which are not normally programmed in a manner to permit mechanical processing. Therefore, these transactions should be manually reviewed to permit a determination as to whether the ESDs can be improved. Receipt of requests for supply assistance serves as notification of the need for the concerned material to be received by consignees on dates earlier than those which would result from the shipments accomplished using the supply source ESDs. The actual date of the requirement need is the prerogative of the requisitioning activity. Any advancement of the ESDs, including a single day, will be considered by supply sources as an improvement. Management decisions, designed to improve ESDs, should include one or more of the following and/or any other additional actions which will cause improvement in ESDs:

- Cannibalization of existing equipment.
- Acceleration of repair programs.
- Offers of I & S items.
- Diversion of material shipments.
- Supply from reserve assets.
- Supply from known station or depot excess stocks.
- Supply resulting from screening of material held pending classification.

During the course of actions taken to improve ESDs, followup inquiries will not be construed by supply sources as authority to override any requirements of equal and/or higher priority. Consideration will not be given to diversion of any assets required to satisfy requirements of equal and/or higher priority.

When determination is made that requested improvement in ESDs can be accomplished, the revised ESDs will be transmitted to status recipients. When actions taken by management do not result in improved ESDs, status recipients will be provided with the latest status applicable to the requisitions concerned.

Supply sources, in receipt of followups on requisitions for which MROs were created directing lateral redistribution of retail stock, will provide applicable status as follows:

- If the current status is BA and the ESD or the UMMIPS timeframes, whichever applies, has not passed, provide BA status with the appropriate ESD to the requisitioner.
- If the current status is BA and the ESD or the UMMIPS timeframes, has passed, provide B5 status to the requisitioner and generate TS 940 IC (appendix 5F), with transaction type code NB to the retail reporting activity. Supply sources in receipt of responses to followups will furnish appropriate status to eligible recipients using chapter 6.
- If the current status is positive shipping status, provide TS 856 IC - Shipment Status (appendix 6E) with Transaction Type Code AS.

Processing points retransmitting requisition inquiries to another supply source for continued action will cite their DoDAAC as the FROM address. Processing points receiving such retransmitted transactions will not automatically retransmit such transactions back to the processing point from which the transaction was received without obtaining the prior agreement of that activity.

5.7.17 FORCE-CLOSED MATERIAL RELEASE CONFIRMATIONS

Subsequent to generating pseudo shipment status transactions for unconfirmed MROs under subsection 5.7.16, above, supply sources will hold the MRO record open pending an MRA response (under chapter 14). If an MRA response is received, use it to close the record. For shipments to SA recipients, the supply source may elect to use the MRA data or generate a TS 940 IC - Material Release with transaction type code NA and action code CL, indicating the mode of shipment and date shipped from the MRA, to interface with billing. If an MRA response is not received within the initial and followup timeframes, the supply source may force-close the MRO using TS 940 IC - Material Release with transaction type code NA and action code CL. For shipment to SA recipients, supply sources will ensure that proper inventory accounting and billing procedures are applied.

5.7.18 PROCESSING REDISTRIBUTION ORDERS

RDOs are originated by an ICP/IMM to direct release of material from a supply distribution activity to another within the same distribution system.

Prepare RDOs using the TS 940 - IC - Material Release format.

5.7.19 PROCESSING REQUISITION AND MATERIAL RELEASE ORDER MODIFIERS

Supply sources will process a TS 511 IC - Modification (appendix 5C) requisition modifier transactions to provide for modification of requisitions on backorder or for which MROs have not been processed to storage or retail activities. The corresponding original requisitions in process, and material obligations, will be recycled under S/A policy and normal processing actions will be continued to accommodate the modified PD, SRC, or RDD/RDP.

- Modification of MROs is at the discretion of the S/As. However, modifications will not be processed against requisitions for which MROs of retail assets have been generated.
- Modification of requisitions which have been submitted to procurement sources for direct delivery is not required, except for requisition modifier transactions which contain:
 - A revised country FMS offer/release option code and/or FF code.
 - SRC E.
 - Changes to the SHIP-TO address.
- The application of modifiers on requisitions for which split actions have been taken by the supply source is at the option of the S/As.
- Supply sources will provide status (TS 870 IC - Supply Status, appendix 6B) after processing requisition modifier transactions as follows:
 - When the modifier transaction contains invalid entries for data elements listed in section 5.5, the modifier request will be rejected by means of D7 status.
 - When the requisition modifier transaction is not honored because the requested modifications cannot be made, supply sources will provide B2 status to the activities designated on the unmodified requisition.
 - When the requested modifications have been successfully processed, BK status will be provided.
- In addition, when modifier transactions are processed, supply sources will provide the latest supply or shipment status to all parties identified in the original or modified requisition transaction.
- Supply sources will process requested modifications only when all data fields can be modified, as requested. If this cannot be done, reject the modifier with TS 870 IC - Supply Status with B2 status.

When S/As modify MROs, submit a modifier transaction (TS 940 IC - Material Release, appendix 5F) to the applicable storage activity. Prepare the appendix 5F modifier transaction as a result of processing the TS 511 - OC - Modification.

- Storage activities, upon receipt of MRO modifier transactions, will modify the original MRO whenever the modifier is received prior to the actual printing of the DD Form

1348-1A. This will be accomplished by matching the transaction reference numbers of modifier transactions with transaction reference numbers of MROs having been previously received, including a match of suffix codes.

- These modified transactions will be processed in the normal manner prescribed for MROs.
- When storage activities receive MRO modifier transactions for which they have no record of the original MRO, they will process the modifier transactions as new MROs.
- Storage activities will provide TS 945 IC - Material Release Advice with B2 or BK status to advise supply sources when requested modifications are or are not accomplished.

When TS 511 IC - Modifications are referred to another supply source, the referring activity will identify the DoDAAC of the activity to which the requisition was referred as well as their own DoDAAC in the transaction and retransmit. Processing points receiving such passed transactions will not automatically pass such transactions back to the processing point from which the transaction was received (for example, the From addressee) without obtaining the prior agreement of that activity.

5.7.20 PROCESSING SINGLE LINE CANCELLATION REQUESTS

Supply sources, procurement, storage, and reporting activities will process single line cancellations, as prescribed herein.

Supply sources, procurement, and storage, and reporting activities are responsible for exercising the fullest practical resourcefulness in preventing the issue and shipment of unwanted material. The practical considerations involved in processing cancellation requests include such factors as time, related packing and handling costs, the dollar value, and location of material for which cancellation is requested.

General rules for the disposition and diversion of material which has been shipped are as follows:

- Supply sources are responsible for providing diversion and/or disposition instructions for all items under their cognizance destined for OCONUS which have progressed to the point where procurement actions cannot be terminated or shipment into the DTS has not occurred. When OCONUS shipments have been lifted from CONUS terminals, the responsibility for diversion or disposition is that of the consignee, the appropriate commander, or Service headquarters.
- Supply sources may request diversion or disposition instructions from S/A contact points designated in figure 5-1 column 1, for both nonstocked and non-NSN items. However, supply sources may, based on their stock position, divert material to depot stock.
- S/As may predetermine and designate alternate consignees so that the DoDAAC of these activities may be inserted in subsequent supply and/or transportation transactions. These predetermined destinations will be based on considerations as stated above, and may vary by NSN, FSC, or FSG.
- When OCONUS shipments cannot be diverted or held for disposition, storage and procurement activities will advise supply sources when elements of the DTS were unable

to accomplish the desired shipment diversion or hold. The supply source will provide TS 856 IC - Shipment IC - Shipment Status (appendix 6E) to all eligible recipients of status. These transactions will contain a date, as provided by the clearance authorities, on which the shipment was lifted from the terminal for delivery OCONUS.

- When diversion of OCONUS shipments is accomplished by the DTS, supply sources will furnish TS 870 IC - Supply Status (appendix 6B) with B6 status to all authorized status organizations. The advice of actions taken by the DTS will be provided under Volume 3, Transportation.
- Supply sources will automatically initiate cancellation action for unfilled quantities of material obligations or open requisitions upon deletion of a DoDAAC. Applicable supply and shipment status will be furnished to authorized recipients and, in the event DAASC does not have a recorded DoDAAC, the status will be disposed of.
- Costs incurred in cancellations/diversion will be billed as provided in subsection 5.7.23, below.
- No attempt will be made to stop or divert shipments to CONUS (domestic) consignees once released for shipment, regardless of the mode of shipment.

5.7.21 PROCESSING MASS OR UNIVERSAL CANCELLATION REQUESTS

Supply sources are responsible for assuring that requisition processing, procurement, and storage activities exercise the fullest practical resourcefulness in preventing the issue and shipment of unwanted material. The practical considerations involved in the processing of cancellation requests include such factors as time, packing and handling, related costs, and the location of material for which cancellation is requested.

Supply sources in receipt of mass or universal cancellation requests will cancel quantities for which MROs, and/or purchase requests have not been submitted to storage or procurement activities. Provide TS 870 IC - Supply Status (appendix 6B) with BQ or B4 status, as appropriate, as notice of accomplished cancellations to all authorized status organizations under chapter 6 within the timeframe for furnishing status.

Supply sources will furnish TS 870 IC - Supply Status (appendix 6B) with B9 status to all authorized status organizations under chapter 6 within the timeframes for furnishing status for:

- Unconfirmed MROs and open procurement actions.
- MRCs which indicate that shipment to OCONUS activities has been accomplished within 45 days of the effective date of the mass cancellation.

Provide TS 870 IC - Supply Status (appendix 6B) BQ, B4, or B6 status as notification for each line item actually canceled or diverted and B8 status for each line item not canceled or diverted.

Supply sources will provide storage activities cancellation requests, TS 940 IC - Material Release (appendix 5F), for all unconfirmed MROs and MRCs which indicate that shipment to OCONUS activities has been made within 45 days of the effective date of the mass or universal cancellation.

Supply sources will provide procurement activities cancellation requests, TS 869 IC - Cancellation (appendix 5B), for all open procurement actions.

Supply sources will not provide storage and procurement activities with cancellation requests when:

- In receipt of MRCs which evidence that shipment has been accomplished by parcel post.
- In receipt of MRCs which evidence that shipment to CONUS activities has been accomplished.
- In receipt of MRCs which evidence that shipment to OCONUS customers was accomplished more than 45 days prior to the receipt of the mass or universal cancellation request.

The following rules apply to mass or universal cancellation of shipments from storage:

- Upon receipt of the mass or universal cancellation TS 869 IC - Cancellation (appendix B5) pending the receipt of single line cancellation requests TS 940 IC - Material Release from the supply source, the storage activity will identify all affected MROs where the items have not been released to a carrier for delivery to the consignee.
 - For universal cancellation, the storage activity will suspend further processing of all MROs, including any containing an SRC of E.
- For those OCONUS shipments which meet the mass or universal cancellation criteria and which have entered the DTS within 45 days of the date of the mass or universal cancellation request, the storage activity will generate a TS 945 IC - Material Release Advice (appendix 5F) with Transaction Type Code NR in the WO6 segment and Status Code DW in the LQ segment.
- Storage activities will accomplish cancellation for all items for which single line cancellation requests TS 940 IC - Material Release with Transaction Type Code ND are received from the supply source and the items have not been released to a carrier for delivery to the consignee.
- Storage activities will advise the supply source of their actions taken in response to cancellation requests. When a shipment has not been released to the carrier for delivery to consignee and cancellation is accomplished, TS 945 IC - Material Release Advice will be prepared and submitted to the supply source with BQ status.
- When storage activities do not accomplish cancellation, the supply source will be furnished TS 945 IC - Material Release Advice reflecting Status Code B8.
- Storage activities in receipt of transportation confirmation of shipment diversion transactions will generate to the appropriate supply source a TS 945 IC - Material Release Advice with Status Code BQ, for the requisitions contained within the shipment unit. The TS 945 IC - Material Release Advice in this instance will contain, in addition to the normal data elements, the DoDAAC of the new consignee.
- Storage activities in receipt of transportation denial of shipment diversion transactions will generate to the appropriate supply source a TS 945 IC - Material Release Advice with

Status Code B8.

All rules governing the single line cancellation of shipments from procurement also apply to requests for mass or universal cancellation, except as modified herein:

- The supply source will initiate cancellation requests for all items scheduled for direct delivery, and for which purchase requests have been submitted, regardless of material costs.
- Procurement activities will not initiate actions with the DTS to cause diversion of shipments at terminals.
- For those OCONUS shipments which have entered the DTS within 45 days of the date of the mass or universal cancellation request, or from the date of receipt of the TS 869 IC - Cancellation (appendix 5B) from the supply source, the procurement activity will generate a TS 945 IC - Material Release Advice with action code AW in the W06 segment to the DAASC.
- Procurement activities in receipt of confirmation of shipment diversion transactions will generate to the appropriate supply source a TS 945 IC - Material Release Advice with Status Code BQ for the requisitions contained within the shipment unit. The TS 945 IC - Material Release Advice in this instance will contain, in addition to the normal data elements, the DoDAAC of the new consignee .
- Procurement activities in receipt of denial of shipment diversion transactions will generate, to the appropriate supply source, a TS 945 IC - Material Release Advice with Status Code B8.

5.7.21.1

DISPOSITION OF FRUSTRATED SHIPMENTS AND/OR MATERIAL FROM MASS/UNIVERSAL CANCELLATION ACTIONS

The disposition of frustrated shipments at WPOEs/APOEs which are the result of mass or universal cancellation action will be as follows:

- Shipments from DoD storage points, or from commercial vendors acting under the direction of a DoD procuring activity, will be diverted to the predesignated storage sites of the shipping/procuring S/A.
- Shipments from GSA storage points, or from commercial vendors acting under the direction of a GSA procuring activity, will be diverted to predesignated GSA material returns facilities.
- DTS attempts to divert/frustrate shipments will terminate 45 days from the effective date of the mass or universal cancellation message.

It is recognized that certain strategic and tactical operations or political considerations may dictate that all shipments for a given consignee be stopped or diverted. In these most restrictive of shipment diversion situations and economic considerations; such as, the comparison of accessorial cost of stopping, holding, and returning the material to depots/storage activities, the value of the canceled material and the costs of the receiving activity to perform the necessary processing or reprocessing of the material are not controlling factors. In most situations; however, the strategic, tactical, or political environment is such that complete disregard of these

economic considerations is not warranted.

Transportation diversion procedures are established to permit diversion only if the material being shipped can be identified and located by TCN.

- Non-Consolidated Shipment Units. Shipment units eligible for cancellation that have not been consolidated into a container with other shipments will be stopped and diverted by the POE up to the point of lift. Diversion of cancellation eligible shipments at or beyond the POD will be the responsibility of the appropriate theater, force, logistics, or type commander.
- Consolidated Multiple Shipment Units. Individual line items will not be removed from Multiple Line Shipment Units (consolidated packs), nor will a shipment unit container be removed from a multicontainer shipment (SEAVAN) type device. Shipment units cannot be diverted in the DTS if stuffed or loaded with other shipment units or on multiple shipment unit devices; such as, SEAVANS, CONEX, MILVANS, and AIRCRAFT PALLETS.

For those mass or universal cancellation requests which specify FSC, FSG, NSN, or part number data, the DTS will stop and frustrate, for S/A review, all shipments of the canceling S/A for the affected consignees. Disposition of cancellation eligible shipments at or beyond the POD will be the responsibility of the appropriate theater, force, logistics, or type commander.

The DTS will generate specified documentation for the following categories of shipments:

- For all shipments which are diverted, as a result of mass or universal cancellation, the DTS will generate a confirmation of shipment diversion transaction to the DAASC. The confirmation of shipment diversion will contain complete TCMD data for each shipment unit and, if available, the contract number. In addition:
 - For shipments which are diverted under pre-positioned instructions, the DTS will generate a GBL to the new consignee.
 - For shipment units which are frustrated but are not diverted to a specific site, the DTS will generate a request for disposition instructions to the DAASC, which will route the transactions to the appropriate S/A contact points. In situations where the designated S/A contact point is a collocated liaison office, the request for disposition instruction transactions will be listed and provided to the contact point directly. After receipt of disposition instructions for such frustrated shipments, the DTS will prepare a GBL or other appropriate transaction for the new consignee.
 - For shipments intransit to, at, or between the POD and the OCONUS consignee, the OCONUS DTS activity will request disposition instructions from the appropriate theater, force, logistics, or type commander's designated contact point.
- For shipments which have been intransit between the WPOE/APOE and the OCONUS consignee less than 30 days, the DTS will:
 - Generate a listing of the manifest shipment unit data, vessel/aircraft identification and departure date, WPOD/APOD and ETA. This listing will be disseminated to the affected OCONUS command component, the appropriate WPOD/APOD, and

to the designated contact point, if requested.

- Generate denial or shipment diversion transactions for each individual shipment unit to the DAASC.

Storage sites in receipt of diverted shipments will report the receipt to the appropriate supply source under chapter 14. Reconsignment/disposition will be as directed.

The S/A initiating the cancellation requests applicable to U.S. Forces requisitions will be charged with (1) transportation and terminal costs associated with holding, stopping, and returning material to depots/storage, (2) procurement termination costs when it is determined that termination is in the best interest of the Government, and (3) excess transportation costs that may be incurred when moving the cargo unaffected by the mass or universal cancellation action. Specific instructions concerning material transportation charges and credit allowances are contained in the DoD 7420.13-R, DoD 4140.1-R, FPMR 101-26.311, and FPMR 101-27.505.

5.7.22

PROCESSING OF MASS OR UNIVERSAL CANCELLATION TRANSACTIONS BY THE DEFENSE AUTOMATIC ADDRESSING SYSTEM

Upon receipt of the mass or universal cancellation request, DAASC will begin the establishment of a TSDC file. DAASC will add to the TSDC file a copy of each TS 945 IC - Material Release Advice that has Transaction Type Code NR in the WO6 segment and Status Code DW in the LQ segment.

When a confirmation of shipment diversion transaction is received from the DTS, the DAASC will match the TCN with the TCN in all applicable TS 945 IC - Material Release Advice transactions in the TSDC file. The DAASC will generate TS 870 IC - Supply Status (appendix 6B) with B6 status to the applicable supply source for each material release advice transaction matched. In this instance, the supply status transaction will contain the DoDAAC of the new consignee.

When a denial of shipment diversion transaction is received from the DTS, the DAASC will match the TCN with the TCN in all applicable material release advice transactions in the TSDC file. The DAASC will generate TS 870 IC - Supply Status (appendix 6B) with B8 supply status to the applicable supply source for each material release advice matched.

When a request for disposition instructions is received from the DTS, the DAASC will match the TCN with the TCN in all applicable material release advice transactions in the TSDC file. The DAASC will generate a narrative message to the designated canceling S/A contact point which provides the contact point with the TCMD transaction data, plus all supporting material release advice transactions which comprise the shipment.

For those material release advice transactions on which confirmation/denial shipment diversion, or request for disposition instruction transactions are not received within 21 days of the date of the mass or universal cancellation request, the DAASC will initiate a shipment tracer action under Volume 3, Transportation, to the APOE/WPOE indicated in the material release advice.

When confirmation/denial of diversion or request for disposition instruction transactions are received from the transportation clearance authorities, and the DAASC does not find a corresponding material release advice record within the TSDC file, the DAASC will forward the transactions TS 870 IC - Supply Status (appendix 6B) to the shipping activity identified in the transportation mass/universal cancellation status transactions.

5.7.23 SUPPLY SOURCE PROCESSING OF SINGLE LINE CANCELLATION REQUESTS

Process cancellation requests TS 869 IC - Cancellation, (appendix 5B) as follows:

- First, against backorders in the following order of assigned status: (BB, BC, BD, BZ, and BV).
- Second, against unconfirmed shipments (BA status).
- Third, confirmed OCONUS shipments TS 945 IC - Material Release Advice, when shipped (to surface/aerial POEs and SEAVAN assembly points) prior to ICP receipt of cancellation requests in less than 45 days for surface mode and 10 days for air mode.
- Fourth, against all other status.

Processing points receiving passed cancellation transactions will not automatically pass such transactions back to the processing point from which the transaction was received without obtaining the prior agreement of that activity.

Initiate/accomplish cancellation actions against the quantity in the cancellation request received.

Edit cancellations processed to preclude duplicate cancellations. As a minimum, this edit will compare quantity, transaction reference number, suffix, and the preparation date. Discard duplicates. Process all other cancellations as received.

Process cancellation requests, regardless of dollar value or quantity, to immediately cancel quantities for which MROs and purchase requests have not been submitted to the depot/storage, reporting or procurement activities.

If the quantity in the cancellation request is equal to or less than the backorder quantity at the supply source (Status Code BB, BC, or BD), effect cancellation immediately and provide TS 870 IC - Supply Status (appendix 6B) with BQ supply status to all authorized status organizations. Since cancellation action cannot be effected immediately on requisitions in Status Code BV, provide TS 870 IC - Supply Status (appendix 6B) with B9 supply status to all authorized status organizations.

If the quantity in the cancellation request is greater than the backordered quantity (if any), but equal to or less than the recorded requisition quantity, the supply source will initiate cancellation action under the criteria prescribed above. When the cancellation request is greater than the recorded requisition quantity, initiate cancellation action on the recorded quantity.

When cancellation requests are against released shipments or DVDs with BV status, the supply source will consider diversion of the material to depot stock or to fill other demands/backorders, or contract termination, as appropriate. The foregoing also applies to nonstocked and non-NSN material at S/A option, when there is a foreseeable demand for the item.

In the event the above actions are taken, use TS 870 IC - Supply Status (appendix 6B) with B4 status to indicate that the organization identified in the canceled requisition may be billed as follows:

- Transportation costs for returning the material to depot/storage and/or procurement termination costs when it is determined that termination is in the best interest of the Government.
- Specific instructions concerning material, transportation charges, and credit allowances are contained in Volume 7, Finance.
- In addition to the above costs, when applicable, the supply source will bill rebuilding costs and other expenses incurred in canceling SA requisitions under DoD 5105.38-M. Charge for transportation (such as terminal costs associated with stopping, holding, and returning material to depots or storage) and procurement termination costs incident to actual diversion/cancellation of FMS requisitions under DoD 5105.38-M.

Reverse the demand data previously recorded by the quantity actually canceled or diverted into the storage activity based on a cancellation request.

Provide notice of the success or failure of cancellation or diversion actions to all authorized status organizations under chapter 6. Use the supply or shipment status to provide this notice as follows:

- Use TS 870 IC - Supply Status (appendix 6B) with B4, B6, BQ, BR, or BS status to indicate cancellations/diversions accomplished.
- Use TS 870 IC - Supply Status (appendix 6B) with B9 status to indicate cancellation/diversion action being attempted.
- Use TS 856 IC - Shipment Status (appendix 6E) with shipment status to indicate cancellation/diversion not accomplished.
- Use TS 870 IC - Supply Status (appendix 6B) with B8 status to indicate cancellation not accomplished as a followup to the previously furnished B9 status.
- Use TS 870 IC - Supply Status (appendix 6B) with BF status to indicate no record of the transaction reference number for the cancellation request submitted.
- Use TS 870 IC - Supply Status (appendix 6B) with an appropriate B_, C_, or D_ series status code for those transactions showing a record of a previous cancellation or rejection.

5.7.24 SUPPLY SOURCE SUBMISSION OF SINGLE LINE CANCELLATION/DIVERSION REQUESTS TO PROCUREMENT

Use TS 869 IC - Cancellation (appendix 5B) to prepare cancellation requests. Cite the appropriate contract data when submitting cancellation requests to procurement. Identification of the contract data or PRN will be dependent upon whether a number is assigned to a contract and is known to the supply source at the time of receipt of the cancellation request. When the PRN is used, indicate the DoDAAC of the consignee to which to divert the shipment. When the supply source does not desire diversion, do not indicate a diversion address.

All requests for cancellation/diversion submitted to the procurement activity will contain the following minimum information:

- Notification that the transaction is a request for cancellation or diversion.
- Identification of the supply source submitting the request.
- The stock or part number or description of the item involved.
- The quantity of the item to be canceled/diverted.
- The original requisition document number and the suffix code, if applicable.
- Identification of the ship-to and mark-for addresses, as contained in the applicable purchase request.
- All contract data, if known; otherwise, the PRN and date of the purchase request.
- Diversion or hold instructions to include coded and in-the-clear, ship-to, and mark-for addresses for shipment if diversion is to be accomplished.

Submit cancellation/diversion requests to procurement activities:

- Regardless of dollar value and/or quantity, when the purchase requests have been submitted but the contracts have not been awarded. This applies to items and/or quantities assigned BZ status.
- For items and/or quantities on awarded contracts and/or purchase agreements and the dollar value of the cancellation/diversion action exceeds \$200.

Supply sources will decide whether to suspend or continue the cancellation, diversion, or hold actions. Decisions to continue cancellations or diversions will be provided to procurement activities by cancellation request documents prepared in the manual format and containing the notation: SUPPLY SOURCE DECISION FOR CANCELLATION OR DIVERSION. Supply sources will advise the ILCO of contractual agreements which will result in cost conditions if cancellations, diversions, or holding are accomplished. The ILCO will decide whether the cancellation, diversion, or hold actions will be suspended or continued. Decisions to continue cancellations or diversions will be provided the supply source by narrative message containing the notation: ILCO DECISION FOR CANCELLATION OR DIVERSION.

Do not submit cancellation/diversion requests or requests for determination as to whether cancellation is in the best interest of the Government to procurement activities when:

- The dollar value of the request is less than \$200.⁴
- DD Form 250, Material Inspection and Receiving Report, SPN, vendor shipment notice, or equivalent is on record indicating:
 - Shipments to CONUS consignees were released to carriers regardless of dollar value.

⁴ As an exception for intra-Service/Agency use only, cancellation/diversion may be submitted to procurement regardless of dollar value when critical/short supply items are affected.

- Shipments to OCONUS consignees were previously released to carriers, and the number of days prescribed above have elapsed (10 days air/45 days surface) .
- Shipment/delivery by air mail or parcel post. In this case, shipment status will be furnished in response to cancellations received.

Provide notice of the success or failure of cancellation or diversion actions to authorized status organizations under the procedures of chapter 6. Use the supply and/or shipment status to provide this notice as follows:

- TS 870 IC - Supply Status (appendix 6B) with B4, B6, BQ, or BS status applies to cancellations/diversions accomplished.
- TS 870 IC - Supply Status (appendix 6B) with B9 status indicates cancellation/diversion action being attempted.
- TS 856 IC - Shipment Status (appendix 6E) with Shipment status indicates cancellation/diversion not accomplished.
- TS 870 IC - Supply Status (appendix 6B) with B8 status indicates cancellation not accomplished when B9 status previously furnished.

5.7.25 PROCUREMENT ACTIVITY PROCESSING OF SINGLE LINE CANCELLATION AND/OR DIVERSION REQUESTS

TS 869 IC - Cancellation (appendix 5B) and manual cancellation/diversion requests will be processed in the sequence of PDs.

Immediate cancellation action will be taken when contracts have not been awarded and/or firm orders have not been issued/placed.

Procurement activities will advise the supply source of contractual agreements which may result in unfavorable cost conditions if cancellation, diversion, or holding actions are accomplished. Supply sources will decide whether the cancellation, diversion, or hold actions will be suspended or continued. Decisions to continue cancellation or diversion will be provided to procurement activities by cancellation request documents prepared in the manual format and containing the notation: SUPPLY SOURCE DECISION FOR CANCELLATION OR DIVERSION.

The cost of diversion or shipment hold actions will be provided to the supply source for appropriate billing. Costs incurred in contract termination and diversion will also be furnished to supply sources to permit appropriate billing.

Procurement activities are required to initiate actions with clearance authorities to cause diversion of shipments at terminals. Procurement activities requiring diversion instructions in the instances when a new consignee is not provided, will request these instructions from the supply source. Such requests will be accomplished by telephone or message.

When the above cancellation/termination or diversion/hold actions would not be in the best interest of the Government, the supply source will be so advised and requested to furnish a decision by a specified date.

Actions to cancel, divert, or terminate contracts will be initiated within 1 working day from the receipt of cancellation requests. These actions will be completed as expeditiously as possible, but will not exceed 5 working days for PD 01-08 requests and 10 working days for PD 09-15 requests. When multiple cancellation requests are received on the same day, consideration will be given to the priority of the requests, OCONUS destination, the dollar value of the material, and the status of the contract involved.

The procurement activity will advise the supply source that the attempted stop/diversion action has/has not been accomplished by the DTS within 2 working days of receiving the confirmation/denial notification from the DTS.

5.7.26 SUPPLY SOURCE PROCESSING OF CANCELLATION REQUESTS FOR MATERIAL RELEASE ORDERS OF RETAIL ASSETS

Supply source cancellation requests, TS 940 IC - Material Release (appendix 5F), will be submitted to reporting activities regardless of dollar value and quantity when status code BA is recorded, but shipment status has not been received. The supply source will provide TS 870 IC - Supply Status (appendix 6B) with code B9 to all eligible recipients. If shipment status has been received, provide this status to all eligible recipients.

Supply sources in receipt of responses to cancellation requests will furnish appropriate status to all eligible recipients.

5.7.27 SUPPLY SOURCE SUBMISSION OF SINGLE LINE CANCELLATION AND/OR DIVERSION REQUESTS TO STORAGE ACTIVITIES

Supply source cancellation requests or followups on cancellation requests, TS 940 IC - Material Release, will be submitted to storage activities:

- Regardless of dollar value and quantity when Status Code BA is recorded, but an MRC has not been received. This applies to PD 01-15 requisitions/MROs for U.S. Forces, CONUS and OCONUS, and SA.
- When the MRC is recorded on an OCONUS shipment which was released to carrier for shipment to POE, less than 45 days by surface mode or less than 10 days by air mode, and the dollar value of the shipment exceeds \$200.

The TS 940 IC - Material Release will contain the DoDAAC of the activity to which shipments will be diverted when shipment has already been released. When the supply source does not desire or cannot provide diversion to a specific activity, do not indicate a diversion address. In the latter case, the supply source will obtain and provide alternate destinations, if requested, by storage activities.

In the case of an attempted diversion, the supply source will provide TS 870 IC - Supply Status (appendix 6B) with B9 status to authorized status organizations.

Supply sources will not provide storage activities with requests for cancellation/diversion when:

- In receipt of the MRC at the time of receipt of a cancellation request and the item requested for cancellation has a line item value of less than \$200 and is for an OCONUS shipment.

- Receipt of an MRC and OCONUS shipment has been accomplished by parcel post, air mail, or UPS.
- When the MRC is recorded on an OCONUS shipment which was released to the carrier for shipment more than 45 days by surface mode or 10 days by air mode prior to the receipt of the cancellation request.
- Receipt of the MRC and shipment to a CONUS activity was accomplished prior to the receipt of the cancellation request.

In the instances described above, furnish TS 856 IC - Shipment Status (appendix 6D) to authorized status organizations.

5.7.28 STORAGE ACTIVITY PROCESSING OF SINGLE LINE CANCELLATION AND/OR DIVERSION REQUESTS

Process cancellations using TS 940 IC - Material Release in the sequence prescribed in subsection 5.7.23.

Maintain records to allow a determination as to whether line items shipped were in single line or multiline shipment units and the respective dollar value of each. This allows identification of shipment units which are susceptible to cancellation and determination as to whether cancellation actions should be continued under the following policies and procedures.

To the extent that processing capability is available, the S/As will develop and maintain data to:

- Allow identification of the depot work area to which shipment processing should have progressed. Work areas for consideration are as follows:

<u>COMPUTER</u>	<u>STORAGE</u>	<u>SHIPMENT PREPARATION</u>	<u>SHIPPING</u>
Mechanized processing of TS 940 IC - Material Releases and output of DD Forms 1348-1A and stop shipment notices	Bin Area Bulk Area	Preservation Packaging Packing Consolidation Parcel Post	Consolidation Air Freight Moter (Truck) Freight Rail Freight

- Include the maximum time experienced in processing DD Form 1348-1A shipments in each of the above work areas (within total time allowed by DoD 4140.1-R from receipt of MRO to release to transportation). Such data would provide a basis for determining the work areas where stop shipment action could most likely be taken on receipt of a supply source cancellation request to the storage activity. Also, consider the transaction priority as it affects processing time in hours versus days.

The storage activity, upon receipt of a cancellation request TS 940 IC - Material Release appendix 5E) from the supply source, will determine the appropriate work area(s) to which the stop shipment notices would be sent when cancellation of an inprocess DD Form 1348-1A shipment is required. The stop shipment notices will include pertinent line item/transaction identification, priority, and information as to whether a single or multiline shipment unit, is

involved. A separate stop shipment notice will be issued to the current work area and every other work area through which the shipment would subsequently be processed.

Accomplish cancellation for all items/quantities for which a DD Form 1348-1A has not been released to storage work areas.

Attempt cancellation for all items/quantities for which a DD Form 1348-1A has been released to storage work areas and there is no record of transportation release to a carrier, unless:

- The dollar value is less than \$25 for a single line shipment unit.
- The dollar value of a single line packed in a consolidated shipment unit is less than \$200.

The storage activity will advise the supply source and, if applicable, all authorized status organizations of actions taken in response to cancellation requests. Provide this notice as follows:

- When the storage activity has no record of the MRO receipt, provide BF status using a TS 945 IC - Material Release Advice (appendix 5F).
- When the items have not left the depot and cancellation action is accomplished, respond only to the supply source with a TS 945 IC - Material Release Advice with BQ status.
- When cancellation is not attempted under the less than \$25/\$200 criteria, the storage activity will furnish the supply source a TS 945 IC - Material Release Advice with B8 status.
- When the items have been released to a carrier in shipments destined to a CONUS customer, take no action to stop/divert the material beyond the point of shipment. Provide the supply source a TS 945 IC - Material Release Advice with B8 status (Transaction Type Code NJ in the WO6 segment) and pertinent shipping information in the applicable segments.
- When the items have been released to a carrier in shipments destined for an OCONUS consignee, the storage activity will initiate actions under Volume 3, Transportation, to stop or divert shipments within the DTS. Provide B9 status to the supply source via a TS 945 IC - Material Release Advice.
- The storage activity will not initiate action to stop or divert OCONUS shipments within the DTS when:
 - The items are consolidated in a multiline shipment unit.
 - The items were in OCONUS shipments released to carriers for shipment more than 45 days by surface or more than 10 days by air prior to receipt of the cancellation request.
 - The items were shipped to OCONUS customers by air mail, parcel post, or UPS.
 - A single line item shipment has a total dollar value of less than \$200.

- The single line item shipment unit has a total dollar value of less than \$1,000 and was shipped in consolidation with other shipment units in larger containers; such as, CONEX and SEAVAN.
- Following receipt of confirmation that shipment stop or diversion action has been accomplished by the DTS, the storage activity will provide B6 status to the supply source.
- When the storage activity does not initiate stop or diversion action with the DTS because of one of the conditions identified above or, when notified that a requested stop or diversion action has not been accomplished by the DTS, the storage activity will provide to the supply source a TS 945 IC - Material Release Advice with B8 status (Transaction Type Code NJ in the WO6 segment) and pertinent shipping information in the applicable segments.

Storage activities requiring diversion instructions when applicable information is not included in the cancellation request will request such instructions from the supply source by telephone or message.

Storage activities will complete the above actions in 2 working days for PDs 01-08 and 5 working days for PDs 09-15.

The storage activity will advise the supply source that the attempted stop or diversion action has or has not been accomplished by the DTS within 2 working days of receiving the confirmation or denial notification from the DTS.

Accomplish MRO cancellations applicable to DFAMS reporting of DLA-owned bulk petroleum under DoD 4140.25-M and TS 940 IC - Material Release appendix 5E).

5.7.29 REPORTING ACTIVITY PROCESSING CANCELLATION REQUESTS FOR MROs OF RETAIL ASSETS

Reporting activities will attempt cancellation to the maximum extent possible.

When the reporting activity has no record of the MRO receipt, provide the supply source a TS 945 IC - Material Release Advice with BF status.

When cancellation cannot be accomplished, provide the supply source a TS 945 IC - Material Release Advice with B8 status.

When cancellation can be accomplished, provide the supply source a TS 945 IC - Material Release Advice with BQ status.

The reporting activity will not attempt diversion of materiel confirmed shipped.

5.7.30 DIRECT VENDOR DELIVERY OF REQUISITIONS

In instances where requisitions are accomplished by DVD, an interface is required between supply and the purchasing operations. This interface will result in an interchange of specific information and documentation between supply sources and procurement activities to ensure:

- Transmission of status to designated recipients in an orderly and timely fashion.

- Proper marking of shipment containers.
- Delivery of material using priorities or RDDs.

Purchase requests will contain specific in-the-clear and coded data as specified below, which will be perpetuated on procurement instruments and related transactions:

- The original requisition number, including suffixes when assigned.
- In-the-clear, ship-to address of the ultimate consignee and mark-for address, when applicable.
- Project code and project name, if applicable.
- Schedule of deliveries using RDDs or RADs, whichever is applicable. List items on procurement requests in descending sequence of delivery or availability dates. (A separate requisition number is required for each delivery date, consignee, and priority.) This sequence would provide for listing items with earliest dates first and will result in the required schedule of deliveries.
- Identification and address of the organization to receive the notice or evidence of shipment made by contractors as required by DoD FAR Supplement, appendix I-401, table 2.

Identify requisitions to be supplied by DVD sources separately from stock replenishment buys on purchase requests.

5.7.31 DELIVERY ORDER STATUS INQUIRY FOR BULK PETROLEUM

As the IMM for petroleum, DFSC will use the TS 869 IC - Requisition Inquiry/Supply Assistance (appendix 5D) to perform the delivery order review function under DoD 4140.25-M. This will occur when an order cannot be automatically closed out due to an out of tolerance variance between the quantity shipped or received and the quantity on order. Recipients will use the information contained in the inquiry to verify that all orders and shipment/receipts have been correctly posted and take corrective action as required.

APPENDIX 5A

TRANSACTION SET 511 IMPLEMENTATION CONVENTION REQUISITION

511 Requisition

This Draft Standard for Trial Use contains the format and establishes the data contents of the Requisition Transaction Set (511) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to requisition needed material and equipment from a supply distribution system for immediate consumption or stockage against projected requirements. The originator can also use this transaction set to inquire about the status of, amend, or terminate the original requisition.

This transaction set may be used to convey a description and quantity of the required material, delivery and billing information, and other logistics information necessary to evaluate and meet the material needs of the originator. This transaction set is not used to establish a contractual relationship between trading partners, and may precede the use of a purchase order.

Implementation Notes

1. Organizations use this transaction set to order items of supply.
2. DoD distinguishes between DoD originated requisitions, requisitions for material to be provided as GFM to commercial contractors, and requisitions from foreign governments for material provided in support of SA.
3. Use a single occurrence of this transaction set to transmit requisitions to one or more supply sources. Use one occurrence of this transaction set to transmit a single or multiple transactions.
4. A single transaction set may contain a combination of requisitions for standard and nonstandard material.
5. DoD makes no unique differentiation in the use of the requisition application to transmit misrouted transactions between supply sources or to refer a transaction to another supply source for processing.

51	290	SE	Transaction Set Trailer	M	1

NOTES/COMMENTS:

1/050 The LM loop identifies logistic data common to the entire transaction set.

1/070 The N1 loop identifies name and or address information common to the entire transaction set.

2/150 Each iteration of the QTY loop qualifies a portion of the total quantity ordered with particular logistics information codes.

2/180 The N1 loop identifies the name and address information unique to each use of the LX loop.

2/220 The REF loop conveys serial and lot number inventory data.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
	511	X12.225 Requisition

------	-----	---	---	----	-----

Mandatory

Segment: BR Beginning Segment for Material Management

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of a material management transaction and to transmit identifying numbers and dates

Syntax: 1. C0504 — If BR05 is present, then BR04 is required.
2. P0708 — If either BR07 or BR08 is present, then the other is required.
3. P1011 — If either BR10 or BR11 is present, then the other is required.

Semantic: 1. BR03 is the date of the transaction set preparation.
2. BR09 is the time of the transaction set preparation

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
BR01	353	Transaction Set Purpose Code	M	ID	2/2
		Code identifying purpose of transaction set.			
		00 Original			
		77 Simulation Exercise			

Code Value Implementation Note:

Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.

Mandatory

BR02	640	Transaction Type Code	M	ID	2/2
		Code specifying the type of transaction.			
		A0 Requisition			

Code Value Implementation Note:

Use when the transaction set contains one or more requisitions regardless of the type of requisition.

Mandatory

BR03	373	Date	M	DT	6/6
		Date (YYMMDD).			

Implementation Note:

Express the originating activity's date in GMT.

Not Used

	Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	

Implementation Notes:

1. Express the originating activity's time in GMT.
2. Express time in a four-position (HHMM) format.

Not Used	BR10 128 Reference Number Qualifier	C ID 2/2
Not Used	BR11 127 Reference Number	C AN 1/30

Optional

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** 50

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/050 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 79) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/130 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. The code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/060 that does not apply to all the table 2 iterations. (Codes subject to override: 0, 67, 78, 79, 85, 87, 89, 95, 97, A2, A3, A6, A7, A8, AJ, AK, AL, BD, DE, DF, and DG.)

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3
	0	Document Identification Code	
	67	Type of Assistance Code	
	Code Value Implementation Note: <i>For SA transactions, use only when the coded address in the transaction number does not identify the type of assistance and financing.</i>		
	78	Project Code	
	Code Value Implementation Note: <i>Use as needed to identify special programs, exercises, projects, operations, and other purposes.</i>		
	79	Priority Designator Code	
	Code Value Implementation Note: <i>Recommend using in all requisitions.</i>		
	85	Country and Activity Code	
	Code Value Implementation Note: <i>For MAP/GA transactions, use only when the coded address in the transaction number does not identify the country or activity.</i>		
	87	Subsistence Type of Pack Code	
	Code Value Implementation Note: <i>Use with subsistence items only.</i>		
	89	Cooperative Logistics Program Support Code	
	Code Value Implementation Note: <i>For FMS transactions, must use to identify programmed, nonprogrammed, and termination/drawdown requirements.</i>		
	95	Offer and Release Option Code	
	Code Value Implementation Note: <i>For FMS transactions, must use to advise the supply source of the type of notice required prior to shipping the material.</i>		
	97	Ultimate Recipient Code	
	Code Value Implementation Note: <i>Use as needed to identify the buyer of DoD material to allow full payment for material supplied to a non-DoD customer.</i>		

A2 Customer Within Country Code

Code Value Implementation Note:

For SA transactions, use only when the coded address in the transaction number does not identify the customer-within-country.

A3 Delivery Term Code

Code Value Implementation Note:

For FMS transactions, use only when the coded address in the transaction number does not identify the delivery term.

A6 Freight Forwarder Number

Code Value Implementation Note:

Must use in FMS transactions to identify the country representative or freight forwarder to receive shipments and documentation.

A7 Record Control Number

Code Value Implementation Note:

Must use in MAP/GA transactions to identify the program line item number.

A8 Program Year Code

Code Value Implementation Note:

Must use in MAP/GA transactions to indicate the program year in which the requisitioned item was approved and funded.

AJ Utilization Code

Code Value Implementation Note:

Use to identify a specialized purpose for which the requisition is submitted.

AK Distribution Code

AL Special Requirements Code

Code Value Implementation Note:

Use to identify any special handling and processing requirements.

BD Transportation Priority Code

Code Value Implementation Note:

Use to identify a transportation priority which is different than that associated with the requisition priority.

DE Signal Code

DF Media and Status Code

DG Fund Code

Required

LQ02 1271 **Industry Code**
Code indicating a code from a specific industry code list

C AN 1/20

Mandatory

Segment: N1 Name**Level:** Header**Loop:** N1 **Repeat:** 20**Usage:** Mandatory**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code

- Syntax:** 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/070 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/070 loop to indicate an organization when an N101 qualifier code (e.g., BS) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/180 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/070 that does not apply to all of the table 2 iterations. (Codes subject to override: BS, BT, ST, Z4, Z5, and ZD.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	

Implementation Note:

When requisitioning bulk petroleum or non-GFM packaged fuel additives, use the TO address to identify the supply source (consignor) and the ZD address to send the DFSC an information copy of the requisition. When requisitioning GFM packaged fuel additives, do not use the ZD address.

BS Bill and Ship To**Code Value Implementation Note:**

Use either this code, or both codes BT and ST, for reimbursable material. Use to identify the organization which receives both the material and the billing for the material.

BT Bill-to-Party**Code Value Implementation Note:**

Use with code ST for reimbursable material. Use to identify the organization to receive the billing for material when different from the organization receiving the material. Use precludes the use of Code BS.

OB Ordered By**Code Value Implementation Note:**

Use to identify the requisitioner.

ST Ship To

Code Value Implementation Note:

Use with code BT for reimbursable material. Use to identify the organization to receive the material when different from the activity being billed for the material. Use precludes the use of Code BS.

Z4 Owning Inventory Control Point

Code Value Implementation Note:

Use to identify the owning ICP.

Z5 Management Control Activity

Code Value Implementation Note:

Use for submission of all GFM requisitions.

ZD Party to Receive Reports

Code Value Implementation Note:

Use to send the DFSC an information copy of all requisitions for bulk petroleum or non-GFM packaged fuel additives.

Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier	C	ID	1/2
			Code designating the system/method of code structure used for Identification Code (67).			
			10 Department of Defense Activity Address Code (DODAAC)			
			A2 Military Assistance Program Address Code (MAPAC)			
			M4 Department of Defense Routing Identifier Code (RIC)			
Required	N104	67	Identification Code	C	AN	2/20
			Code identifying a party or other code.			
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code	O	ID	2/2
			Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/070 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: G61 Contact**Level:** Header**Loop:** N1**Usage:** Optional**Max Use:** 5**Purpose:** To identify a person or office to whom communications should be directed**Syntax:** P0304 — If either G6103 or G6104 is present, then the other is required.**Comment:** G6103 qualifies G6104.**Implementation Notes:**

1. Use only under exceptional circumstances when requiring direct communication with the party originating the transaction set.

2. Use multiple repetitions to identify multiple points of contact or communication numbers. When using multiple repetitions to identify different communication numbers for a single point of contact, repeat the name cited in G6102.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
G6101	366	Contact Function Code	M ID 2/2
		Code identifying the major duty or responsibility of the person or group named.	
		IC Information Contact	

Code Value Implementation Note:

Use to identify the point of contact.

Mandatory

G6102	93	Name	M AN 1/35
		Free-form name.	

Implementation Note:

Provide the last name, first name, middle initial and rate/rank/title, as required, of the individual named as point of contact. Include blank spaces between name components and periods after initials. Do not include NMN when a middle initial is not available.

Required

G6103	365	Communication Number Qualifier	C ID 2/2
		Code identifying the type of communication number.	

Implementation Notes:

1. Use to identify the preferred method of communication in the first repetition. Use additional repetitions when identifying alternate communication methods.

2. Do not include blank spaces or dashes between numbers.

AU Defense Switched Network**Code Value Implementation Note:**

Use to identify the DSN telephone number.

EM Electronic Mail**FT** Federal Telecommunications System (FTS)**Code Value Implementation Note:**

Use to identify the FTS telephone number.

FX Facsimile

Code Value Implementation Note:

Use to identify the facsimile DSN telephone number.

IT International Telephone

TE Telephone

Code Value Implementation Note:

Use to identify the commercial telephone number. Include the area code and number.

TL Telex

TX TWX

Required	G6104	364	Communication Number	C AN	1/80
			Complete communications number including country or area code when applicable.		
Optional	G6105	443	Contact Inquiry Reference	O AN	1/20
			Additional reference number or description to clarify a contact number.		

Implementation Note:

Use to indicate the office symbol or activity code, for the party identified.

Optional

Segment: **LX** Assigned Number

Level: Detail

Loop: LX Repeat: >1

Usage: Optional

Max Use: 1

Purpose: To reference a line number in a transaction set.

Implementation Note:

Use as a counter to identify the number of 2/LX/010 loop iterations in the transaction set.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LX01	554	Assigned Number Number assigned for differentiation within a transaction set.	M	N0	1/6

Implementation Note:

In the first 2/LX/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Mandatory

Segment: N9 Reference Number

Level: Detail

Loop: LX

Usage: Mandatory

Max Use: >1

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.

2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Notes:

1. Use to identify the transaction number. The transaction number defines each requisition included in the transaction set. The composition of each transaction number within the 511 transaction set is as follows: (1) the DoDAAC (or ILCO assigned addressing code for SA transactions not assigned a DoDAAC), (2) a four position date consisting of the last digit of the calendar year and the ordinal day of the calendar year, and (3) the requisition serial number.

2. For MAP Grant transactions, the ILCO assigned addressing code is a six position number consisting of Service Assignment Code in the first position, Country or International Organization Code in the second and third positions, Customer-Within-Country Code in the fourth position, zero in the fifth position, and Type of Assistance and Financing Code in the sixth position.

3. For FMS transactions, the ILCO assigned addressing code is a six position number consisting of Service Assignment Code in the first position, Country or International Organization Code in the second and third positions, Customer-Within-Country Code in the fourth position, Delivery Terms Code in the fifth position, and Type of Assistance and Financing Code in the sixth position. For Canada only, identify the customer-within-country with a two position code in the fourth and fifth positions.

4. Do not repeat the ILCO addressing information elsewhere in the transaction set.

5. Use multiple repetitions as needed to identify ancillary information related to the requisition.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N901	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2
	43	Supporting Document Number	
		Code Value Implementation Note: Use to identify the SPR transaction number and establish an audit trail between the draw-down requisition and the original SPR against which the requirement was established.	
	SS	Split Shipment Number	
		Code Value Implementation Note: Use to identify the suffix associated with a DTID transaction number.	
	TN	Transaction Reference Number	
		Code Value Implementation Note: Use to identify the transaction number of the requisition.	
	W1	Defense Turn-In Document Number	

Code Value Implementation Note:

Use to identify the transaction number under which material was shipped to a DRMO. Use only when requisitioning material from the DRMS.

W8 Suffix

Code Value Implementation Note:

Use to identify the suffix of a requisition referred to another supply source for a quantity less than the original requisition quantity.

WO Work Order Number

Code Value Implementation Note:

Use to identify a maintenance work order number when appropriate.

Required	N902	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
Not Used	N903	369	Free-form Description	C	AN	1/45
Not Used	N904	373	Date	O	DT	6/6
Not Used	N905	337	Time	C	TM	4/8
Not Used	N906	623	Time Code	O	ID	2/2

Optional

Segment: PO1 Baseline Item Data

Level: Detail

Loop: LX

Usage: Optional

Max Use: >1

Purpose: To specify basic and most frequently used line item data

- Syntax:**
1. C0302 — If PO103 is present, then PO102 is required.
 2. C0504 — If PO105 is present, then PO104 is required.
 3. P0607 — If either PO106 or PO107 is present, then the other is required.
 4. P0809 — If either PO108 or PO109 is present, then the other is required.
 5. P1011 — If either PO110 or PO111 is present, then the other is required.
 6. P1213 — If either PO112 or PO113 is present, then the other is required.
 7. P1415 — If either PO114 or PO115 is present, then the other is required.
 8. P1617 — If either PO116 or PO117 is present, then the other is required.
 9. P1819 — If either PO118 or PO119 is present, then the other is required.
 10. P2021 — If either PO120 or PO121 is present, then the other is required.
 11. P2223 — If either PO122 or PO123 is present, then the other is required.
 12. P2425 — If either PO124 or PO125 is present, then the other is required.

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. PO101 is the line item identification
 3. PO106 through PO125 provide for ten (10) different product/service ID's per each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use to identify the material and other information required to process the requisition.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	PO101	350	Assigned Identification	O	AN	1/11
Required	PO102	330	Quantity Ordered Quantity ordered.	C	R	1/9
Implementation Notes:						
1. Must use to identify the requisitioned quantity.						
2. Express as a whole number with no decimal. For example, if the quantity requisitioned is 20, cite only 20.						
Required	PO103	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	O	ID	2/2
Implementation Note: Use to identify the unit of issue for the required material. (See the unit of issue conversion table in volume 1, chapter 10.)						
Conditional	PO104	212	Unit Price Price per unit of product, service, commodity, etc.	C	R	1/17
Implementation Note: Use for nonstandard and nonreimbursable material. For nonstandard material, express the not to exceed dollar amount in whole dollars. Do not include decimals or cents. For nonreimbursable material, indicate 0 dollars.						
Optional	PO105	639	Basis of Unit Price Code Code identifying the type of unit price for an item.	O	ID	2/2
Implementation Note: Use for nonstandard and nonreimbursable material. For nonstandard material, use to identify a unit price above which authority to proceed with the acquisition must have the requisitioner's approval.						
NC No Charge						
Code Value Implementation Note: Use to indicate nonreimbursable material.						
NE Not to Exceed						
Code Value Implementation Note: Use to indicate an authorized unit price for the nonstandard material.						
Required	PO106	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Implementation Notes:						
1. Use only one of codes A1, A2, A4, FB, FS, MG, or YP to properly identify the material requisitioned.						
2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE.						
3. When citing the Federal Supply Classification (code FT), always use code CN to identify the commodity name or description.						
A1 Plant Equipment Number						
Code Value Implementation Note: Use to identify plant equipment.						
A2 Department of Defense Identification Code (DoDIC)						
Code Value Implementation Note: Use to identify ammunition items.						

			A4 Subsistence Identification Number <i>Code Value Implementation Note:</i> Use to identify subsistence items.			
			CN Commodity Name <i>Code Value Implementation Note:</i> Use only with code FT to identify the material name or description.			
			FB Form Number <i>Code Value Implementation Note:</i> Use to identify the form stock number.			
			FS National Stock Number <i>Code Value Implementation Note:</i> Must use the NSN when known.			
			FT Federal Supply Classification <i>Code Value Implementation Note:</i> Use to identify nonstandard material when a part number is not available and material can only be ordered by description (e.g., non-NSN lumber products).			
			JP Package Type Code <i>Code Value Implementation Note:</i> Must use when material must meet OCONUS packaging and preservation requirements. When used, the paired data element 234 will cite 1 indicating that packaging must meet OCONUS specifications. When not used, CONUS specifications are adequate.			
			MG Manufacturer's Part Number <i>Code Value Implementation Note:</i> Use to identify nonstandard material.			
			YP Publication Number <i>Code Value Implementation Note:</i> Use to identify the publication stock number.			
			ZB Commercial and Government Entity (CAGE) Code <i>Code Value Implementation Note:</i> Use only with code MG to identify a manufacturer's part number.			
Required	PO107	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Conditional	PO108	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Conditional	PO109	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Conditional	PO110	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Conditional	PO111	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Not Used	PO112	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	PO113	234	Product/Service ID	C	AN	1/40
Not Used	PO114	235	Product/Service ID Qualifier	C	ID	2/2

Not Used	PO115	234	Product/Service ID	C	AN	1/40
Not Used	PO116	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	PO117	234	Product/Service ID	C	AN	1/40
Not Used	PO118	235	Product/Service ID Qualifier	C	ID	2/2

Optional

Segment: AT Financial Accounting
Level: Detail
Loop: LX
Usage: Optional
Max Use: >1
Purpose: To transmit financial accounting data
Syntax: C1001 — If AT10 is present, then AT01 is required.
Comment: AT09 identifies unique local activity financial accounting information

Implementation Notes:

1. Use multiple repetitions, as needed, to identify the appropriations to cite for goods, services, and related adjustments.
2. Must use for all reimbursable requisitions.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Required	AT01	1271	Industry Code Code indicating a code from a specific industry code list	C AN 1/20
	Implementation Note: Use to identify the DLMS Fund Purpose Code. Use any code except CR or DR.			
Optional	AT02	1282	Treasury Symbol Number Number identifying a department, fiscal year, treasury account number, and appropriation limit for a standard accounting classification coding structure	O AN 7/21
	Implementation Note: Cite the basic appropriation (departmental index, fiscal year, treasury account number) and limit/subhead.			
Optional	AT03	1283	Budget Activity Number Number identifying an administrative subdivision of funds against which a transaction is to be charged for a standard accounting classification coding structure	O AN 1/16
Optional	AT04	1284	Object Class Number Number identifying the nature of the goods or services acquired and a specific office or organization using resources for a standard accounting classification coding structure	O AN 3/12
Required	AT05	1285	Reimbursable Source Number Number identifying the source of an appropriation or fund reimbursement for a standard accounting classification coding structure	O AN 1/3
	Implementation Note: Use to identify the DLMS Fund Code.			
Optional	AT06	1286	Transaction Reference Number Number identifying an original request for goods and services to the matching financial transaction for a standard accounting classification coding structure	O AN 4/20

Optional	AT07	1287	Accountable Station Number Number identifying an office responsible for entering a financial transaction into the applicable accounting system for a standard accounting classification coding structure	O AN 3/8
Optional	AT08	1288	Paying Station Number Number identifying an office responsible for making a payment or collection and the corresponding voucher number under which the action was taken for a standard accounting classification coding structure	O AN 8/14
Optional	AT09	352	Description A free-form description to clarify the related data elements and their content.	O AN 1/80
Implementation Note: <i>Use for supplemental accounting classification data.</i>				
Not Used	AT10	1270	Code List Qualifier Code	O ID 1/3

Recom.

Segment: DD Demand Detail

Level: Detail

Loop: LX

Usage: Optional

Max Use: 100

Purpose: To describe the type of demand and the intended use of material

Syntax: 1. C0201 — If DD02 is present, then DD01 is required.

2. P03040507 — If either DD03, DD04, DD05 or DD07 are present, then the others are required.

3. C0605 — If DD06 is present, then DD05 is required.

4. C1009 — If DD10 is present, then DD09 is required.

Semantic: DD08 transmits the stock level indicator. "Y" indicates that the material is normally carried in stock. "N" indicates that the material is not normally stocked

Implementation Notes:

1. Use to convey the demand code associated with the requisition and, as appropriate, to identify the applicable weapon system for which the item is being requisitioned.

2. As an option, use multiple repetitions to stratify the quantity requisitioned by weapon system and associated demand code. The total quantity identified in all repetitions must equal the quantity in PO102.

3. DD01 is always understood to be the Demand Code. (See volume 1, chapter 10, appendix 10G, DLMS code list value 74.)

4. DD05 is always understood to be the Service/Agency Code. (See volume 1, chapter 10, appendix 10G, DLMS code list value 71.)

5. DD09 is always understood to be the Reason for Requisitioning Code. (See volume 1, chapter 10, appendix 10G, DLMS code list value 98.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Required	DD01	1271	Industry Code Code indicating a code from a specific industry code list	C	AN	1/20
Not Used	DD02	1270	Code List Qualifier Code	O	ID	1/3
Conditional	DD03	128	Reference Number Qualifier Code qualifying the Reference Number. W2 Weapon System Number	C	ID	2/2
Code Value Implementation Note: Use to identify the applicable weapon system designator code.						
Conditional	DD04	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Conditional	DD05	1271	Industry Code Code indicating a code from a specific industry code list	C	AN	1/20

Implementation Note:*Use only to identify the Service associated with the weapon system for which this demand is reported.*

Not Used	DD06	1270	Code List Qualifier Code	O	ID	1/3
Conditional	DD07	380	Quantity Numeric value of quantity.	C	R	1/15

Implementation Note:*Use to identify the quantity associated with the weapon system and associated demand code.*

Recom.	DD08	1073	Yes/No Condition or Response Code Code indicating a Yes or No condition or response. N No Y Yes	O	ID	1/1

Optional

Segment: GF Furnished Goods and Services

Level: Detail

Loop: LX

Usage: Optional

Max Use: 1

Purpose: To specify information related to furnished material, equipment, property, information, and services.

Syntax: 1. P0102 — If either GF01 or GF02 is present, then the other is required.
2. P0506 — If either GF05 or GF06 is present, then the other is required.
3. P0809 — If either GF08 or GF09 is present, then the other is required.

Semantic: GF04 is the value of government-furnished property

Implementation Notes:

1. Use in all GFM-related transactions.
2. Use either the MDN or contract number (but not both) to identify the procurement source from which the commercial contractor is authorized to requisition material from DoD inventories.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Conditional	GF01	128	Reference Number Qualifier Code qualifying the Reference Number. W3 Manufacturing Directive Number	C	ID	2/2
Conditional	GF02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Optional	GF03	367	Contract Number Contract number.	O	AN	1/30

Optional	GF07	328	Release Number Number identifying a release against a Purchase Order previously placed by the parties involved in the transaction.	O	AN	1/30
Implementation Note: Use to identify the call or order number, or the call or order number including the respective call or order modification, as applicable, when using GF03.						
Not Used	GF08	128	Reference Number Qualifier	C	ID	2/2
Not Used	GF09	127	Reference Number	C	AN	1/30

Optional

Segment: G62 Date/Time**Level:** Detail**Loop:** LX**Usage:** Optional**Max Use:** 20**Purpose:** To specify pertinent dates and times

- Syntax:** 1. R0103 — At least one of G6201 or G6203 is required.
2. P0102 — If either G6201 or G6202 is present, then the other is required.
3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Note:

Use multiple repetitions as needed to define unique dates or delivery periods associated with the requisitioner's requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
G6201	432	Date Qualifier	C ID 2/2

Code specifying type of date.

01 Cancel After This Date

Code Value Implementation Note:

Use only to identify the expiration date of the funding citation. Use only when requisitioning nonstandard material.

53 Deliver Not Before Date

Code Value Implementation Note:

Use to identify the earliest acceptable delivery date for the material requisitioned. For conventional ammunition requirements, it defines the earliest acceptable delivery date for the required delivery period.

54 Deliver No Later Than Date

Code Value Implementation Note:

Use to identify the latest acceptable delivery date for the material requisitioned. For conventional ammunition requirements, it defines the latest acceptable delivery date for the required delivery period.

85 Date Issued

Code Value Implementation Note:

Use only when requisitioning nonstandard material. Cite the effective date of the drawing number (when only using code PT) or the drawing revision number (when using code DR with code PT) identified in the 2/LIN/100 segment.

BC Publication Date

Code Value Implementation Note:

Use only when requisitioning nonstandard material to cite the manufacturer's catalog publication date when a catalog is identified in the 2/LIN/100 segment.

BD Required By

Code Value Implementation Note:

For FMS and MAPI/GA requirements, use as needed to identify the required availability date. For all other uses, it is the required delivery date.

LD Last Demand

Code Value Implementation Note:

Must use when transmitting misrouted requisition or when referring a requisition to another supply source to identify the date of receipt of the requisition as recorded by the initial supply source in the supply distribution system; otherwise, do not use.

Required	G6202	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	G6203	176	Time Qualifier	C	ID	1/2
Not Used	G6204	337	Time	C	TM	4/8
Not Used	G6205	623	Time Code	O	ID	2/2
Not Used	G6206	624	Century	O	NO	2/2

Optional

Segment: MAN Marks and Numbers**Level:** Detail**Loop:** LX**Usage:** Optional**Max Use:** 5**Purpose:** To indicate identifying marks and numbers for shipping containers**Syntax:** 1. P0405 — If either MAN04 or MAN05 is present, then the other is required.

2. C0605 — If MAN06 is present, then MAN05 is required.

Semantic: 1. MAN01/MAN02 and MAN04/MAN05 may be used to identify two different marks and numbers assigned to the same physical container.

2. When both MAN02 and MAN03 are used, MAN02 is the starting number of a sequential range and MAN03 is the ending number of that range.

3. When both MAN05 and MAN06 are used, MAN05 is the starting number of a sequential range, and MAN06 is the ending number of that range.

Comments: 1. When MAN01 contains code UC (U.P.C. Shipping Container Code) and MAN05/MAN06 contain a range of ID numbers, MAN03 is not used. The reason for this is that the U.P.C. Shipping Container code is the same on every carton that is represented in the range in MAN05/MAN06.

2. MAN03 and/or MAN06 are only used when sending a range(s) of ID numbers.

3. When both MAN02/MAN03 and MAN05/MAN06 are used to send ranges of ID numbers, the integrity of the two ID numbers must be maintained.

Implementation Notes:

1. Use to specify in-the-clear text that should appear on shipping container markings.

2. Use MAN04 as needed to convey additional in-the-clear shipping container markings.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	MAN01	88	Marks and Numbers Qualifier Code specifying the application or source of Marks and Numbers (87). R Originator Assigned	M ID 1/2
Mandatory	MAN02	87	Marks and Numbers Marks and numbers used to identify a shipment or parts of a shipment.	M AN 1/45

11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

Comments: 1. See the Data Dictionary for a complete list of ID's.

2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use only to provide a detailed description of the nonstandard material identified in PO106. Use with the MEA, G62 (2/LX/010 loop, position 080), N1 (2/N1/180 loop), and G69 segments to fully identify the nonstandard material.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	LIN01	350	Assigned Identification	O	AN	1/11
Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
			CL Color			
			CN Commodity Name			
			Code Value Implementation Note: <i>Use to identify the nomenclature of the nonstandard material.</i>			
			DR Drawing Revision Number			
			F1 Catalog Number			
			Code Value Implementation Note: <i>Use to identify the manufacturer's catalog which references the nonstandard material. Cite the effective catalog publication date, if applicable, in the 2/G62/080 segment.</i>			
			F2 Technical Order Number			
			F3 Technical Manual Number			
			F4 Series Identifier			
			Code Value Implementation Note: <i>Use to cite the manufacturer's series number of the nonstandard material.</i>			
			F7 End-Item Description			
			Code Value Implementation Note: <i>Use to identify the applicable end item which applies to the nonstandard material. Description may include the NSN and/or nomenclature.</i>			
			GS General Specification Number			
			Code Value Implementation Note: <i>Use to indicate a specification number, other than a MILSPEC, associated with the nonstandard material.</i>			
			MF Manufacturer			
			Code Value Implementation Note: <i>Use to identify the manufacturer's name of the nonstandard material.</i>			
			MN Model Number			
			Code Value Implementation Note: <i>Use to cite the manufacturer's model number of the nonstandard material.</i>			
			MS Military Specification (MILSPEC) Number			
			PR Process Number			
			Code Value Implementation Note: <i>Use to cite a general operating specification which cannot be identified by use of the 2/MEA/105 segment. For example, the MEA use is primarily to identify physical sizes and dimensions of nonstandard material. Code PR use is to indicate specifications similar to output rated wattage and horsepower.</i>			
			PT Print or Drawing			
			Code Value Implementation Note: <i>Use to cite the applicable drawing numbers for the nonstandard material.</i>			
			PW Part Drawing			
			Code Value Implementation Note: <i>Use to cite the applicable figure numbers for the nonstandard material.</i>			
			SN Serial Number			

Code Value Implementation Note:*Use to cite the manufacturer's serial number of the nonstandard material.*

Optional

Segment: MEA Measurements**Level:** Detail**Loop:** LX**Usage:** Optional**Max Use:** >1**Purpose:** To specify physical measurements or counts, including dimensions, tolerances, variances, and weights

(See Figures Appendix for example of use of C001.)

Syntax: 1. R03050608 — At least one of MEA03, MEA05, MEA06 or MEA08 is required.

2. C0504 — If MEA05 is present, then MEA04 is required.

3. C0604 — If MEA06 is present, then MEA04 is required.

4. L07030506 — If MEA07 is present, then at least one of MEA03, MEA05 or MEA06 are required.

5. E0803 — Only one of MEA08 or MEA03 may be present.

Semantic: MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.**Comment:** When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed use MEA05 as the negative (-) value and MEA06 as the positive (+) value.**Implementation Notes:**

1. Use multiple repetitions to identify any measurements/dimensions related to the nonstandard material.

2. Must use MEA02, MEA03, and MEA04.

Optional

Segment: G69 Line Item Detail - Description

Level: Detail

Loop: LX

Usage: Optional

Max Use: >1

Purpose: To describe an item in free-form format

Implementation Note:

Use only to describe nonstandard material when the 2/LIN/100 and 2/MEA/105 segments do not provide adequate descriptive capability. Use multiple repetitions as needed to provide the narrative descriptive information.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
G6901	369	Free-form Description Free-form descriptive text.	M AN 1/45

Optional

Segment: NTE Note/Special Instruction

Level: Detail

Loop: LX

Usage: Optional

Max Use: >1

Purpose: To transmit information in a free-form format, if necessary, for comment or special instruction

Comment: The NTE segment permits free-form information/data which, under ANSI X12 standard implementations, is not machine processable. The use of the "NTE" segment should therefore be avoided, if at all possible, in an automated environment.

Implementation Note:

Use only to identify exception data associated with the transaction. Use only during extraordinary situations requiring manual intervention in the requisition processing routine.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Required	NTE01	363	Note Reference Code Code identifying the functional area or purpose for which the note applies.	O ID 3/3
			ORI Order Instructions	
Mandatory	NTE02	352	Description A free-form description to clarify the related data elements and their content.	M AN 1/80

Optional

Segment: LM Code Source Information
Level: Detail
Loop: LM **Repeat:** 50
Usage: Optional
Max Use: 1
Purpose: To transmit standard code list identification information
Comment: LM02 identifies the applicable industry code list source information.

Implementation Notes:

1. Must use the 2/LM/130 loop if not using the 1/LM/050 loop.
2. For any specific table 2 iteration use this 2/LM/130 loop as needed 1) to identify a DoD code when the LQ01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/050 loop or 2) to identify a DoD code when the LQ01 qualifier applies to all table 2 iterations but the LQ02 DoD code varies among most of them or 3) to override an LQ02 DoD code in the 1/LM/050 loop with a different DoD code in the 2/LM/130 loop when the same LQ01 qualifier is used in both loops but the LQ02 DoD code is different. (Codes subject to override: 0, 67, 71, 78, 79, 85, 87, 89, 95, 97, A2, A3, A6, A7, A8, AJ, AK, AL, BD, DE, DF, and DG.)

Data Element Summary

Optional

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3
		0 Document Identification Code	
		67 Type of Assistance Code	
		Code Value Implementation Note: <i>For SA transactions, use only when the coded address in the transaction number does not identify the type of assistance and financing.</i>	
		71 Service and Agency Code	
		Code Value Implementation Note: <i>Must use in FMS transactions to identify the customer country's requisitioning Service Code: B, D, or P. For all SA transactions, repeat a second time to identify the Service ILCO managing the case or program line only when the ILCO is not identified in the coded address in the transaction number.</i>	
		78 Project Code	
		Code Value Implementation Note: <i>Use as needed to identify special programs, exercises, projects, operations, and other purposes.</i>	
		79 Priority Designator Code	
		Code Value Implementation Note: <i>Recommend using in all requisitions.</i>	
		80 Advice Code	
		Code Value Implementation Note: <i>Use as needed to convey information to the supply source which is considered essential to the supply action.</i>	
		83 Supply Condition Code	
		Code Value Implementation Note: <i>Use to identify the minimum acceptable supply condition for the quantity in 2/QTY/150.</i>	
		85 Country and Activity Code	
		Code Value Implementation Note: <i>For MAP/GA transactions, use only when the coded address in the transaction number does not identify the country or activity.</i>	
		87 Subsistence Type of Pack Code	
		Code Value Implementation Note: <i>Use with subsistence items only.</i>	

89 Cooperative Logistics Program Support Code

Code Value Implementation Note:

For FMS transactions, must use to identify programed, nonprogramed, and termination/drawdown requirements.

95 Offer and Release Option Code

Code Value Implementation Note:

For FMS transactions, must use to advise the supply source of the type of notice required prior to shipping the material.

97 Ultimate Recipient Code

Code Value Implementation Note:

Use as needed to identify the buyer of DoD material to allow full payment for material supplied to a non-DoD customer.

A2 Customer Within Country Code

Code Value Implementation Note:

For SA transactions, use only when the coded address in the transaction number does not identify the customer-within-country.

A3 Delivery Term Code

Code Value Implementation Note:

For FMS transactions, use only when the coded address in the transaction number does not identify the delivery term.

A4 Case Designator Number

Code Value Implementation Note:

Must use in FMS transactions to identify the FMS case number. For CLSSAs, repeat up to two times to identify the FMS FMSO I and FMSO II case numbers. In this instance, the first occurrence will cite the FMSO I case number, and a second occurrence, if applicable, will reflect the FMSO II case number.

A5 Subcase Number

Code Value Implementation Note:

Use as needed in FMS transactions based on Service requirements.

A6 Freight Forwarder Number

Code Value Implementation Note:

Must use in FMS transactions to identify the country representative or freight forwarder to receive shipments and documentation.

A7 Record Control Number

Code Value Implementation Note:

Must use in MAP/GA transactions to identify the program line item number.

A8 Program Year Code

Code Value Implementation Note:

Must use in MAP/GA transactions to indicate the program year in which the requisitioned item was approved and funded.

AJ Utilization Code

Code Value Implementation Note:

Use to identify a specialized purpose for which the requisition is submitted.

AK Distribution Code

AL Special Requirements Code

Code Value Implementation Note:

Use to identify any special handling and processing requirements.

BD Transportation Priority Code

Code Value Implementation Note:

Use to identify a transportation priority which is different than that associated with the requisition priority.

DE Signal Code

DF Media and Status Code

DG Fund Code

EJ Disposal Condition Code

Code Value Implementation Note:

Use to indicate the minimum acceptable disposal condition for all material requisitioned from Defense reutilization and marketing.

Required

LQ02

1271

Industry Code

Code indicating a code from a specific industry code list

C AN 1/20

Optional

Segment: QTY Quantity

Level: Detail

Loop: QTY **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To specify quantity information.

Implementation Note:

Use the 2/QTY/150 loop when requisitioning material from reclamation sources. When used, multiple iterations of the 2/QTY/150 loop stratify the original requisition quantity by the minimum acceptable condition code.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	QTY01	673	Quantity Qualifier Code specifying the type of quantity. 69 Incremental Order Quantity	M	ID	2/2
Mandatory	QTY02	380	Quantity Numeric value of quantity.	M	R	1/15
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID	2/2

Implementation Note:

Express as a whole number with no decimal. For example if the quantity is 20, cite only 20.

Required

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 50

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use the 2/LM/160 loop to identify DoD unique coded data related to the characteristics and coding requirements for the transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2

Not Used

Mandatory

Segment: **LQ** Industry Code

Level: Detail

Loop: LM

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: **C0102** — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LQ01	1270	Code List Qualifier Code	O	ID	1/3
		Code identifying a specific industry code list			
		83 Supply Condition Code			

Code Value Implementation Note:

Use to identify the minimum acceptable supply condition for the quantity in 2/QTY/150.

Required

LQ02	1271	Industry Code	C	AN	1/20
		Code indicating a code from a specific industry code list			

Optional

Segment: N1 Name**Level:** Detail**Loop:** N1 **Repeat:** 100**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/180 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/070 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/070 loop with a different address specified in the 2/N1/180 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: BS, BT, ST, Z4, Z5, and ZD.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

When requisitioning bulk petroleum or non-GFM packaged fuel additives, use the TO address to identify the supply source (consignor) and the ZD address to send the DFSC an information copy of the requisition. When requisitioning GFM packaged fuel additives, do not use the ZD address.

BS Bill and Ship To**Code Value Implementation Note:**

Use either this code, or both codes BT and ST, for reimbursable material. Use to identify the organization which receives both the material and the billing for the material.

BT Bill-to-Party**Code Value Implementation Note:**

Use with code ST for reimbursable material. Use to identify the organization to receive the billing for material when different from the organization receiving the material. Use precludes the use of Code BS.

OB Ordered By**Code Value Implementation Note:**

Use to identify the requisitioner.

ST Ship To

Code Value Implementation Note:

Use with code BT for reimbursable material. Use to identify the organization to receive the material when different from the activity being billed for the material. Use precludes the use of Code BS.

Z1 Party to Receive Status

Code Value Implementation Note:

Use to indicate the party to receive status when different from Service/Agency prescribed status recipient. Use multiple iterations of the 2/N1/180 loop to identify all status recipients, as required.

Z2 Unserviceable Material Consignee

Code Value Implementation Note:

Use as needed when requisitioning from a reclamation organization to indicate the consignee for unserviceable material.

Z3 Potential Source of Supply

Code Value Implementation Note:

Use as needed when requisitioning nonstandard material to identify potential supply sources.

Z4 Owning Inventory Control Point

Code Value Implementation Note:

Use to identify the owning ICP.

Z5 Management Control Activity

Code Value Implementation Note:

Use for submission of all GFM requisitions.

Z7 Mark-for Party

Code Value Implementation Note:

Use as needed to identify an entity located within the ship-to address that is to actually receive the material.

ZD Party to Receive Reports

Code Value Implementation Note:

Use to send the DFSC an information copy of all requisitions for bulk petroleum or non-GFM packaged fuel additives.

ZE End Item Manufacturer

Code Value Implementation Note:

Use when requisitioning nonstandard material to identify the manufacturer of the end item (Make). When using, N102 will cite the actual name of the end item manufacturer.

Conditional

N102 93 Name C AN 1/35
Free-form name.

Implementation Note:

Use only with N101 code ZE. When using N102, do not use N103 and N104.

Conditional

N103 66 Identification Code Qualifier C ID 1/2
Code designating the system/method of code structure used for Identification Code (67).

10 Department of Defense Activity Address Code (DODAAC)

A2 Military Assistance Program Address Code (MAPAC)

M4 Department of Defense Routing Identifier Code (RIC)

Conditional

N104 67 Identification Code C AN 2/20
Code identifying a party or other code.

Not Used

N105 706 Entity Relationship Code O ID 2/2

Optional

N106

98

Entity Identifier Code

O ID 2/2

Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use code TO in conjunction with the appropriate 2/N101/180 code to indicate the organization receiving the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: REF Reference Numbers

Level: Detail

Loop: REF **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To specify identifying numbers.

Syntax: R0203 — At least one of REF02 or REF03 is required.

Implementation Notes:

1. Use the 2/REF/220 loop to provide UII or lot number information for controlled material.
2. Either a UII or a lot number defines the looping structure. Once defined, use the 2/N9/240 segment for other characteristics, as needed.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	REF01	128	Reference Number Qualifier Code qualifying the Reference Number. LT Lot Number Code Value Implementation Note: Use to indicate the manufacturer's lot number, batch number, or other number identifying the production run. SE Serial Number Code Value Implementation Note: Use to cite the UII assigned to the item for a NUIT or LUIT program.	M	ID	2/2
Required	REF02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Not Used	REF03	352	Description	C	AN	1/80

Optional

Segment: N9 Reference Number

Level: Detail

Loop: REF

Usage: Optional

Max Use: >1

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.
2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Note:

Use only to identify the characteristic not defined in the 2/REF/220 segment.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N901	128	Reference Number Qualifier Code qualifying the Reference Number. Not Used	N904	373	Date	O	DT	6/6
Not Used	N905	337	Time	C	TM	4/8
Not Used	N906	623	Time Code	O	ID	2/2

Optional

Segment: N1 Name

Level: Detail

Loop: REF

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

Use to identify the manufacturer of the UIT item.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual MF Manufacturer of Goods	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 33 Commercial and Government Entity (CAGE)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Not Used	N106	98	Entity Identifier Code	O ID 2/2

Segment: SE Transaction Set Trailer

Level: Detail

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 5B

TRANSACTION SET 869 IMPLEMENTATION CONVENTION CANCELLATION

869 Order Status Inquiry

This Draft Standard for Trial Use contains the format and establishes the data contents of the Order Status Inquiry Transaction Set (869) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to request all pertinent information relative to an entire purchase order, selected line items on a purchase order, or selected products/services on a purchase order. Inquiry can also be made for all or a selected portion of the customer's ordered items, all or a selected portion of the customer's unshipped items, or all or a selected portion of the customer's shipped items.

Implementation Notes

1. Organizations use this transaction set to request cancellation of previously submitted requisitions, regardless of current transaction status. Authorized organizations use this transaction set to request mass or universal cancellation of requisitions.
2. Use a single occurrence of this transaction set to exchange transactions between a single activity and a single or multiple supply sources. Use one occurrence of this transaction set to transmit a single or multiple transactions.

NOTE/COMMENT:

3/010 CTT01 is the number of HL segments.

Mandatory	Segment: ST Transaction Set Header
	Level: Header
	Loop: _____
	Usage: Mandatory
	Max Use: 1
	Purpose: To indicate the start of a transaction set and to assign a control number
	Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).
Implementation Note: <i>See control structure discussion in volume 1, chapter 6.</i>	

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
		869	X12.11 Order Status Inquiry			
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

	Segment:	BSI Beginning Segment for Order Status Inquiry				
	Level:	Header				
	Loop:	_____				
Mandatory	Usage:	Mandatory				
	Max Use:	1				
	Purpose:	To indicate the beginning of an order status inquiry and to provide the type of customer status inquiry.				
	Semantic:	1. BSI01 is a status inquiry reference number.				
		2. BSI02 is date of the inquiry.				
		3. BSI06 is time of the inquiry.				
Data Element Summary						
	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	BSI01	127	Reference Number	M	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
	Implementation Note:					
	Place a Z in this data element. This data element is not used by DLMS but is mandatory in the X12 standards. The Z satisfies the X12 usage requirement and shall not be processed by receiving application software.					
Mandatory	BSI02	373	Date	M	DT	6/6
			Date (YYMMDD).			
	Implementation Note:					
	Express the originating activity's date of transaction set preparation in GMT.					
Mandatory	BSI03	847	Order/Item Code	M	ID	1/2
			Code identifying a group of orders and items.			
			PP Selected Orders - Selected Items			
	Code Value Implementation Note:					
	Use to indicate that the transaction set contains transactions that apply to requisitions for material no longer needed.					
Not Used	BSI04	848	Product/Date Code	O	ID	1/2
Not Used	BSI05	849	Location Code	O	ID	1/2
Required	BSI06	337	Time	O	TM	4/8
			Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)			
	Implementation Notes:					
	1. Express the originating activity's time of transaction set preparation in GMT.					
	2. Express time in a four-position (HHMM) format.					
Required	BSI07	353	Transaction Set Purpose Code	O	ID	2/2
			Code identifying purpose of transaction set.			
			00 Original			

77 Simulation Exercise

Code Value Implementation Note:

Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.

Required

BSI08 640 Transaction Type Code O ID 2/2
Code specifying the type of transaction.

AC Requisition Cancellation

Code Value Implementation Note:

Use to identify requests for cancellation of previously submitted requisitions.

Optional

BSI09 306 Action Code O ID 1/2
Code indicating type of action.

Implementation Notes:

1. Use only when the transaction set contains a request for mass or universal cancellation of requisitions. When used, the transaction set identifies requisitions associated with an organization (identified in 2/N1/110).
2. The range of requisitions may be qualified through the identification of a special project (identified in the 2/LM/170 loop) and/or a range of requisition transaction dates (identified in 2/DTM/030).

AW Mass Cancellation

Code Value Implementation Note:

Use when requisitions with special requirements code E are not to be cancelled.

C Cancelled

Code Value Implementation Note:

Use for universal cancellation when all applicable requisitions must be cancelled.

Mandatory	Segment: HL Hierarchical Level		
	Level: Detail Loop: HL Repeat: >1 Usage: Mandatory Max Use: 1 Purpose: To identify dependencies among and the content of hierarchically related groups of data segments. Comments: 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data. 2. The HL segment defines a top-down/left-right ordered structure. 3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction. 4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate. 5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information. 6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.		

Implementation Notes:

1. The transaction set hierarchical data structure is organization information followed by transaction specific information.
2. Use a single 2/HL/010 organization loop iteration to identify organization information.
3. Use multiple 2/HL/010 transaction loops for individual cancellation transactions only, as needed, for each 2/HL/010 organization loop to identify individual requisitions for cancellation.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	M AN 1/12
	Implementation Note: In the first 2/HL/010 loop iteration, cite 1. In each subsequent loop iteration, increase incrementally by 1.			
Optional	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to.	O AN 1/12

Implementation Note:

Use in every 2/HL/010 transaction loop iteration to identify the organization loop with which the current loop is associated. Data element content is the sequential number assigned to the 2/HL/010 organization loop iteration and serves as the cross-reference between transaction set level organization data and associated transactions.

Mandatory

HL03 735 Hierarchical Level Code M ID 1/2
Code defining the characteristic of a level in a hierarchical structure.

V Address Information

Code Value Implementation Note:

Use in every 2/HL/010 organization loop iteration.

W Transaction Reference Number

Code Value Implementation Note:

Use in every 2/HL/010 transaction loop iteration.

Not Used

HL04 736 Hierarchical Child Code O ID 1/1

Optional

Segment: **DTM** Date/Time Reference

Level: Detail

Loop: HL

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:
Use multiple repetitions to define dates associated with the transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time.	M	ID	3/3
	Implementation Notes:					
	1. Always use code 097 to identify the transaction preparation date.					
	2. Use codes 196 and 197 only for mass or universal cancellation requests to identify a range of requisition transaction dates for which mass or universal cancellation applies.					
			097 Transaction Creation			
			Code Value Implementation Note: <i>Use to indicate the date of transaction preparation.</i>			
			196 Start			
			Code Value Implementation Note: <i>Use to indicate the range start date, inclusive.</i>			
			197 End			
			Code Value Implementation Note: <i>Use to indicate the range end date, inclusive.</i>			
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Optional

Segment: REF Reference Numbers**Level:** Detail**Loop:** HL**Usage:** Optional**Max Use:** >1**Purpose:** To specify identifying numbers.**Syntax:** R0203 — At least one of REF02 or REF03 is required.**Implementation Note:**

Use multiple repetitions, as needed, in 2/HL/010 transaction loop iterations for individual cancellation transactions only to identify ancillary information related to the requisition.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Notes:

1. Must use either CT or W4 (but not both).
2. When citing a contract number (code CT), use codes 83, C7, and OQ, as needed, to further identify the applicable number.

83 Extended (or Exhibit) Line Item Number (ELIN)**Code Value Implementation Note:**

Use in conjunction with the contract number to identify the ELIN, or the ELIN including the SUBELIN, as appropriate.

C7 Contract Line Item Number**Code Value Implementation Note:**

Use in conjunction with the contract number to identify the CLIN, the CLIN including the SUBCLIN, or the ALIN, as appropriate.

CT Contract Number**Code Value Implementation Note:**

Use to identify the contract number, when available.

OQ Order Number**Code Value Implementation Note:**

Use to identify the call number or order number, if applicable.

TN Transaction Reference Number**Code Value Implementation Note:**

Use to identify the transaction number of the requisition to be cancelled.

W4 Procurement Request Number**Code Value Implementation Note:**

Use to identify the procurement request number for procurement source transactions when there is no contract award and no contract number assignment. When using, do not use codes 83, C7, CT, or OQ.

W8 Suffix**Code Value Implementation Note:**

Use as needed to identify a transaction number suffix when the original requisition has been split.

Required	REF02	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			

Not Used	REF03	352	Description	C	AN	1/80
----------	-------	-----	-------------	---	----	------

Optional
Segment: **QTY** Quantity
Level: Detail
Loop: HL
Usage: Optional
Max Use: 1
Purpose: To specify quantity information.

Implementation Note:

Use in 2/HL/010 transaction loop iterations for individual cancellation transactions only to identify the quantity to be canceled if less than the quantity remaining.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	QTY01	673	Quantity Qualifier Code specifying the type of quantity. QC Quantity Disapproved Code Value Implementation Note: Use to identify the quantity to be canceled.	M	ID	2/2
Mandatory	QTY02	380	Quantity Numeric value of quantity.	M	R	1/15
Implementation Note: Express as whole number with no decimals. For example, if the quantity to be canceled is 20, cite only 20.						
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID	2/2

Segment: **GF** **Furnished Goods and Services**

Level: Detail

Loop: HL

Usage: Optional

Max Use: 1

Purpose: To specify information related to furnished material, equipment, property, information, and services.

Syntax: 1. P0102 — If either GF01 or GF02 is present, then the other is required.
2. P0506 — If either GF05 or GF06 is present, then the other is required.
3. P0809 — If either GF08 or GF09 is present, then the other is required.

Semantic: GF04 is the value of government-furnished property

Implementation Notes:

1. Use in all GFM-related transactions.
2. Use either the MDN or contract number (but not both) to identify the procurement source from which the commercial contractor is authorized to requisition material from DoD inventories.
3. Use in the 2/HL/010 organization loop to identify the contract number or MDN when the same contract number or MDN applies to all transactions cited in the 2/HL/010 transaction loops. Use in the individual 2/HL/010 transaction loops to identify the contract number or MDN when the contract number or MDN varies by transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Conditional	GF01	128	Reference Number Qualifier Code qualifying the Reference Number. W3 Manufacturing Directive Number	C	ID	2/2
Conditional	GF02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Optional	GF03	367	Contract Number Contract number.	O	AN	1/30
Not Used	GF04	782	Monetary Amount	O	R	1/15
Not Used	GF05	128	Reference Number Qualifier	C	ID	2/2
Not Used	GF06	127	Reference Number	C	AN	1/30
Optional	GF07	328	Release Number Number identifying a release against a Purchase Order previously placed by the parties involved in the transaction.	O	AN	1/30
Implementation Note: Use to identify the call or order number when using GF03.						
Not Used	GF08	128	Reference Number Qualifier	C	ID	2/2
Not Used	GF09	127	Reference Number	C	AN	1/30

Optional

Segment: N1 Name**Level:** Detail**Loop:** N1 **Repeat:** >1**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.**Comments:** 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. Use the 2/N1/110 loop in every 2/HL/010 organization loop to identify the organization originating the transaction set.
2. Use the 2/N1/110 loop in the 2/HL/010 organization loop for mass or universal cancellation requests to identify, as a minimum, the organization to receive the transaction set for non-GFM transactions, the MCA for GFM transactions, and the requisitioning activity.
3. Use the 2/N1/110 loop in the 2/HL/010 organization loop for mass or universal cancellation requests, as needed, to identify an additional status recipient, or the DFSC.
4. Use the 2/N1/110 loop in the 2/HL/010 organization loop for individual cancellation requests to identify the organization to which material should be diverted, the organization to receive the transaction set, an additional status recipient, the MCA, or the DFSC when the same organization applies to all transactions cited in the 2/HL/010 transaction loops. Use the 2/N1/110 loop in the individual 2/HL/010 transaction loops to identify the organization to which material should be diverted, the organization to receive the transaction set, an additional status recipient, the MCA, or the DFSC when the organization varies by transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	M ID 2/2
		AN Authorized From	
		Code Value Implementation Note: Use in mass or universal cancellation requests to identify the organization authorized to request the mass or universal cancellation.	
		CN Consignee	
		Code Value Implementation Note: Supply sources or authorized activities use for individual cancellation requests when requisitions for material under contract for direct vendor delivery cannot be canceled. Use to identify the organization to which material should be diverted.	
		OB Ordered By	

Code Value Implementation Note:

Use to identify the requisitioning activity.

Z1 Party to Receive Status

Code Value Implementation Note:

Use multiple iterations of the 2/N1/110 loop as needed to identify all status recipients when different from Service/Agency prescribed status recipients.

Z4 Owning Inventory Control Point

Code Value Implementation Note:

Use to identify the source of supply that is in receipt of the requisitions desired to be cancelled.

Z5 Management Control Activity

Code Value Implementation Note:

Use for all GFM transactions.

ZD Party to Receive Reports

Code Value Implementation Note:

Use as needed to provide the DFSC an information copy of all transactions for bulk petroleum or non-GFM packaged fuel additives.

Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier	C	ID	1/2
			Code designating the system/method of code structure used for Identification Code (67).

Segment: SE Transaction Set Trailer

Level: Summary

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 5C

TRANSACTION SET 511 IMPLEMENTATION CONVENTION MODIFICATION

511 Requisition

This Draft Standard for Trial Use contains the format and establishes the data contents of the Requisition Transaction Set (511) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to requisition needed material and equipment from a supply distribution system for immediate consumption or stockage against projected requirements. The originator can also use this transaction set to inquire about the status of, amend, or terminate the original requisition.

This transaction set may be used to convey a description and quantity of the required material, delivery and billing information, and other logistics information necessary to evaluate and meet the material needs of the originator. This transaction set is not used to establish a contractual relationship between trading partners, and may precede the use of a purchase order.

Implementation Notes

1. Organizations use this transaction set to request the modification of previously submitted requisitions. Prior to the submission of mass cancellation transactions, authorized organizations also use this transaction set to request mass modification of requisitions to prevent their cancellation by the mass cancellation request.
2. Use a single occurrence of this transaction set to transmit transactions to one or more supply sources. Use one occurrence of this transaction set to transmit a single or multiple transactions.

NOTES/COMMENTS:

1/050 The LM loop identifies logistic data common to the entire transaction set.

1/070 The N1 loop identifies name and or address information common to the entire transaction set.

2/150 Each iteration of the QTY loop qualifies a portion of the total quantity ordered with particular logistics information codes.

2/180 The N1 loop identifies the name and address information unique to each use of the LX loop.

2/220 The REF loop conveys serial and lot number inventory data.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
	511	X12.225 Requisition			

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	--	---	----	-----

Segment: **BR** Beginning Segment for Material Management

Level: Header

Loop: _____

Mandatory **Usage:** Mandatory

Max Use: 1

Purpose: To indicate the beginning of a material management transaction and to transmit identifying numbers and dates

Syntax: 1. C0504 — If BR05 is present, then BR04 is required.
2. P0708 — If either BR07 or BR08 is present, then the other is required.
3. P1011 — If either BR10 or BR11 is present, then the other is required.

Semantic: 1. BR03 is the date of the transaction set preparation.
2. BR09 is the time of the transaction set preparation

Implementation Notes:
1. Use tables 1 and 2 to request modification of individual transactions.
2. Use table 1 and 2/SE/290 only to request a mass modification.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	BR01	353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.	M	ID	2/2
Mandatory	BR02	640	Transaction Type Code Code specifying the type of transaction. AM Requisition Modification Code Value Implementation Note: Use when the transaction set contains a request(s) to modify requisition(s).	M	ID	2/2
Mandatory	BR03	373	Date Date (YYMMDD).	M	DT	6/6
			Implementation Note: Express the originating activity's date in GMT.			
Not Used	BR04	67	Identification Code	C	AN	2/20
Not Used	BR05	66	Identification Code Qualifier	O	ID	1/2
Optional	BR06	306	Action Code Code indicating type of action.	O	ID	1/2

Implementation Note:

Use only when the transaction set contains a request for mass modification of requisitions. When used, the transaction set identifies requisitions associated with an organization (identified in 1/BR/020). The range of requisitions may be qualified through the identification of a range of requisition transaction dates (identified in 1/G62/030); a series of project codes, special requirements codes or priorities (identified in the 1/LM/050 loop) and/or a range of requisition transaction dates (identified in 1/G62/030).

2 Change (Update)

Code Value Implementation Note:

Use for mass modifications to indicate that special requirements code E should be assigned to all requisitions that should not be cancelled by a mass cancellation transaction.

Not Used	BR07	128	Reference Number Qualifier	C	ID	2/2
Not Used	BR08	127	Reference Number	C	AN	1/30
Required	BR09	337	Time	O	TM	4/8
Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)						

Implementation Notes:

1. Express the originating activity's time in GMT.
2. Express time in a four-position (HHMM) format.

Not Used	BR10	128	Reference Number Qualifier	C	ID	2/2
Not Used	BR11	127	Reference Number	C	AN	1/30

Optional

Segment: G62 Date/Time

Level: Header

Loop: _____

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R0103 — At least one of G6201 or G6203 is required.

2. P0102 — If either G6201 or G6202 is present, then the other is required.

3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Notes:

1. Use as needed for mass modification transactions only to identify a range of requisition transaction dates for which mass modification applies.

2. Use as needed for mass modification transactions for ammunition items only to identify the required delivery period.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
G6201	432	Date Qualifier Code specifying type of date.	C	ID	2/2
	53	Deliver Not Before Date			
		Code Value Implementation Note: For conventional ammunition, use to indicate the required delivery period start date, inclusive.			
	54	Deliver No Later Than Date			
		Code Value Implementation Note: For conventional ammunition, use to indicate the required delivery period end date, inclusive.			
	62	Accrual Start Date			
		Code Value Implementation Note: Use to indicate the range start date, inclusive.			
	63	Accrual End Date			
		Code Value Implementation Note: Use to indicate the range stop date, inclusive.

Optional

Segment: LM Code Source Information**Level:** Header**Loop:** LM **Repeat:** 50**Usage:** Optional**Max Use:** 1**Purpose:** To transmit standard code list identification information**Comment:** LM02 identifies the applicable industry code list source information.**Implementation Notes:**

1. Use the 1/LM/050 loop in modification requests, as needed, to identify the document identification code of the transaction and the revised coded data associated with the individual requisitions.
2. Use the 1/LM/050 loop as needed for mass modification transactions to identify the applicable codes which further define the range of transactions to which this transaction set applies.
3. Use this 1/LM/050 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 79) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/130 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/060 that does not apply to all table 2 iterations. (Codes subject to override: 0, 78, 79, 95, 97, A6, AK, AL, BD, DE, DF, and DG.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2
Not Used	LM02	822	Source Subqualifier	O	AN	1/15

Mandatory

Segment: LQ Industry Code
Level: Header
Loop: LM
Usage: Mandatory
Max Use: 100
Purpose: Code to transmit standard industry codes
Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
			O	ID	1/3
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list			

Required

Implementation Notes:

1. Use all codes as needed for individual modification requests.
2. Use only codes 78, 79 and/or AL for mass modification transactions. Use multiple repetitions to identify multiple criteria identifying the range of transactions subject to mass modification.

- 0 Document Identification Code
- 78 Project Code
- 79 Priority Designator Code
- 95 Offer and Release Option Code

Code Value Implementation Note:

Use for FMS requisitions only to advise the supply source of the new type of notice required prior to shipping the material.

- 97 Ultimate Recipient Code

Code Value Implementation Note:

Use to identify the new ultimate recipient or buyer of DoD material so that DoD can be fully reimbursed for material supplied to a non-DoD customer.

- A6 Freight Forwarder Number

Code Value Implementation Note:

Use for FMS requisitions only to identify the new country representative or freight forwarder to receive shipments and documentation.

- AK Distribution Code
- AL Special Requirements Code

Code Value Implementation Note:

Use for modification of individual requisitions to identify any new special handling and processing requirements.

- BD Transportation Priority Code

Code Value Implementation Note:

Use to identify a transportation priority which is different than that associated with the requisition priority.

- DE Signal Code
- DF Media and Status Code

Required	DG Fund Code			
	LQ02 1271 Industry Code		C AN	1/20
	Code indicating a code from a specific industry code list			

Mandatory

Segment: N1 Name

Level: Header

Loop: N1 **Repeat:** 20

Usage: Mandatory

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/070 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/LM/070 loop to indicate an organization when an N101 qualifier code (e.g., BS) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/180 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N1/070 that does not apply to all of the table 2 iterations. (Codes subject to override: BS, BT, ST, Z4, Z5, Z7, and ZD.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		BS Bill and Ship To	
		Code Value Implementation Note:	
		Use either this code, or both codes BT and ST, for reimbursable material. Use, as needed, to identify the revised organization which receives both the material and the billing for the material.	
		BT Bill-to-Party	
		Code Value Implementation Note:	
		Use as needed with code ST for reimbursable material. Use to identify the revised organization to receive the billing for material when different from the organization receiving the material. Use precludes the use of code BS.	
		OB Ordered By	
		Code Value Implementation Note:	
		Use to identify the organization that submitted the original requisition.	
		ST Ship To	
		Code Value Implementation Note:	
		Use as needed with code BT for reimbursable material to identify the revised organization to receive the material when different from the organization receiving the billing. Use precludes the use of code BS.	

Z4 Owning Inventory Control Point**Code Value Implementation Note:***Use to identify the supply source.***Z5** Management Control Activity**Code Value Implementation Note:***Use for all GFM transactions.***Z7** Mark-for Party**Code Value Implementation Note:***Use as needed to identify a revised entity located within the ship-to address that is to actually receive the material.***ZD** Party to Receive Reports**Code Value Implementation Note:***Use to send the DFSC an information copy of all transactions for bulk petroleum or non-GFM packaged fuel additives.*

Not Used

N102 93 Name C AN 1/35

Required

N103 66 Identification Code Qualifier C ID 1/2
Code designating the system/method of code structure used for Identification Code (67).**10** Department of Defense Activity Address Code (DODAAC)**M4** Department of Defense Routing Identifier Code (RIC)

Required

N104 67 Identification Code C AN 2/20
Code identifying a party or other code.

Not Used

N105 706 Entity Relationship Code O ID 2/2

Optional

N106 98 Entity Identifier Code O ID 2/2
Code identifying an organizational entity, a physical location, or an individual**Implementation Note:***Must use codes FR and TO in conjunction with the appropriate 1/N101/070 code to indicate the organizations sending and receiving the transaction set.***FR** Message From**Code Value Implementation Note:***Use to indicate that the organization cited in N104 transmitted the transaction set.***TO** Message To**Code Value Implementation Note:***Use to indicate that the organization cited in N104 is to receive the transaction set.*

Optional

Segment: **LX** Assigned Number

Level: Detail

Loop: LX Repeat: >1

Usage: Optional

Max Use: 1

Purpose: To reference a line number in a transaction set.

Implementation Note:

Use for individual modification transactions as a counter to identify the number of 2/LX/010 loop iterations in the transaction set. Do not use this or any table 2 segments, except 2/SE/290, for mass modifications.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LX01	554	Assigned Number	M	N0	1/6
Number assigned for differentiation within a transaction set.					

Implementation Note:

In the first 2/LX/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Mandatory

Segment: N9 Reference Number

Level: Detail

Loop: LX

Usage: Mandatory

Max Use: >1

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.

2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Notes:

1. Use in individual modification transactions to identify the transaction number of the requisition to be modified.
2. Use multiple repetitions in individual modification transactions, as needed, to identify ancillary information related to the requisition.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N901	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Notes:

1. Supply sources use only one of codes CT or W4 to advise a procurment activity of the contract or PR information.
2. When citing a contract number (code CT), use code C7, as needed, to identify the contract line number.

C7 Contract Line Item Number

Code Value Implementation Note:

Use in conjunction with the contract number to identify the associated CLIN, CLIN including SUBCLIN, or agreement line item number (ALIN), as appropriate.

CT Contract Number

Code Value Implementation Note:

Use to identify the contract number or obligation authority number associated with the requisition, when available.

TN Transaction Reference Number

W4 Procurement Request Number

Code Value Implementation Note:

Use to identify a procurement request associated with the requisition when no contract number is assigned.

W8 Suffix

Code Value Implementation Note:

Use as needed to identify a transaction number suffix when the original requisition has been split.

Required

(Codes subject to override: BS, BT, ST, Z4, Z5, Z7, and ZD.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		BS Bill and Ship To	
		Code Value Implementation Note:	
		Use either this code, or both codes BT and ST, for reimbursable material. Use, as needed, to identify the revised organization which receives both the material and the billing for the material.	
		BT Bill-to-Party	
		Code Value Implementation Note:	
		Use as needed with code ST for reimbursable material. Use to identify the revised organization to receive the billing for material when different from the organization receiving the material. Use precludes the use of code BS.	
		ST Ship To	
		Code Value Implementation Note:	
		Use as needed with code BT for reimbursable material to identify the revised organization to receive the material when different from the organization receiving the billing. Use precludes the use of code BS.	
		Z1 Party to Receive Status	
		Code Value Implementation Note:	
		Use to indicate the party to receive status when different from Service/Agency prescribed status recipient. Use multiple iterations of the 2/N1/180 loop as required to identify all status recipients.	
		Z4 Owning Inventory Control Point	

Code Value Implementation Note:

Use to identify the supply source.

Z5 Management Control Activity**Code Value Implementation Note:**

Use for all GFM transactions.

Z7 Mark-for Party**Code Value Implementation Note:**

Use as needed to identify a revised entity located within the ship-to address that is to actually receive the material.

ZD Party to Receive Reports**Code Value Implementation Note:**

Use to send the DFSC an information copy of all transactions for bulk petroleum or non-GFM packaged fuel additives.

Not Used

N102	93	Name	C	AN	1/35
------	----	------	---	----	------

Required

N103	66	Identification Code Qualifier	C	ID	1/2
------	----	-------------------------------	---	----	-----

Code designating the system/method of code structure used for Identification Code (67).

10 Department of Defense Activity Address Code (DODAAC)

M4 Department of Defense Routing Identifier Code (RIC)

Required

N104	67	Identification Code	C	AN	2/20
------	----	---------------------	---	----	------

Code identifying a party or other code.

Not Used

N105	706	Entity Relationship Code	O	ID	2/2
------	-----	--------------------------	---	----	-----

Optional

N106	98	Entity Identifier Code	O	ID	2/2
------	----	------------------------	---	----	-----

Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use code TO in conjunction with the appropriate 2/N101/180 code to indicate the organization receiving the transaction set.

TO Message To**Code Value Implementation Note:**

Use to indicate that the organization cited in N104 is to receive the transaction set.

Segment: SE Transaction Set Trailer

Level: Detail

Loop: _____

Mandatory **Usage:** Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 5D

TRANSACTION SET 869 IMPLEMENTATION CONVENTION REQUISITION INQUIRY/SUPPLY ASSISTANCE

869 Order Status Inquiry

This Draft Standard for Trial Use contains the format and establishes the data contents of the Order Status Inquiry Transaction Set (869) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to request all pertinent information relative to an entire purchase order, selected line items on a purchase order, or selected products/services on a purchase order. Inquiry can also be made for all or a selected portion of the customer's ordered items, all or a selected portion of the customer's unshipped items, or all or a selected portion of the customer's shipped items.

Implementation Notes

1. Organizations use this transaction set to inquire about the status of or request supply assistance for previously submitted requisitions.
2. Organizations use this transaction set to inquire about quantity variances between previously submitted bulk petroleum delivery orders and quantities shipped or received.
3. Use a single occurrence of this transaction set to exchange transactions between a single activity and a single or multiple supply sources. Use one occurrence of this transaction set to transmit a single or multiple transactions.

NOTE/COMMENT:

3/010 CTT01 is the number of HL segments.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
	869	X12.11 Order Status Inquiry			

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	--	---	----	-----

	Segment: BSI Beginning Segment for Order Status Inquiry				
	Level: Header				
	Loop: _____				
Mandatory	Usage: Mandatory				
	Max Use: 1				
	Purpose: To indicate the beginning of an order status inquiry and to provide the type of customer status inquiry.				
	Semantic: 1. BSI01 is a status inquiry reference number. 2. BSI02 is date of the inquiry. 3. BSI06 is time of the inquiry.				
Data Element Summary					
	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES	
Mandatory	BSI01	127	Reference Number	M AN	1/30
	Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.				
Implementation Note: Place a Z in this data element. This data element is not used by DLMS but is mandatory in the X12 standards. The Z satisfies the X12 usage requirement and shall not be processed by receiving application software.					
Mandatory	BSI02	373	Date	M DT	6/6
	Date (YYMMDD).				
Implementation Note: Express the originating activity's date of transaction set preparation in GMT.					
Mandatory	BSI03	847	Order/Item Code	M ID	1/2
	Code identifying a group of orders and items. PI Selected Orders - Shipped Orders				
Code Value Implementation Note: Use to indicate that the transaction set contains transactions that apply to previously submitted bulk petroleum delivery orders for which quantity variances exist.					
PO Selected Orders - Unshipped Items					
Code Value Implementation Note: Use to indicate that the transaction set contains transactions that apply to open requisitions for which shipment status has not been received.					
Not Used	BSI04	848	Product/Date Code	O ID	1/2
Not Used	BSI05	849	Location Code	O ID	1/2
Required	BSI06	337	Time	O TM	4/8
	Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)				
Implementation Notes: 1. Express the originating activity's time of transaction set preparation in GMT.					

2. Express time in a four-position (HHMM) format.

Required

BSI07 353 Transaction Set Purpose Code O ID 2/2
Code identifying purpose of transaction set.

00 Original

77 Simulation Exercise

Code Value Implementation Note:

Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.

Required

BSI08 640 Transaction Type Code O ID 2/2
Code specifying the type of transaction.

AF Requisition Follow-Up

Code Value Implementation Note:

Use to identify status inquiries on previously submitted requisitions.

AQ Quantity Verification Inquiry

Code Value Implementation Note:

Use to identify quantity verification inquiries for bulk petroleum.

AR Supply Assistance

Code Value Implementation Note:

Use to identify requests for supply assistance.

Not Used

BSI09 306 Action Code O ID 1/2

Mandatory

Segment: HL Hierarchical Level

Level: Detail

Loop: HL **Repeat:** >1

Usage: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments.

Comments: 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.

2. The HL segment defines a top-down/left-right ordered structure.

3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.

4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.

5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.

6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Implementation Notes:

1. The transaction set hierarchical data structure is organization information followed by transaction specific information and substitute item loops.

2. Use a single 2/HL/010 organization loop iteration to identify organization information.

3. Use multiple 2/HL/010 transaction loops as needed for each 2/HL/010 organization loop to identify individual transactions subject to inquiry or assistance and their associated data.

4. Use multiple 2/HL/010 substitute item loops in supply assistance transactions only as needed for each 2/HL/010 transaction loop to identify acceptable substitute items.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
HL01	628	Hierarchical ID Number	M AN 1/12
		A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	

Implementation Note:

In the first 2/HL/010 loop iteration, cite 1. In each subsequent loop iteration, increase incrementally by 1.

Optional	HL02	734	Hierarchical Parent ID Number	O AN 1/12
			Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to.	
			Implementation Notes:	
			1. Use in every 2/HL/010 transaction loop iteration to identify the organization loop with which the current loop is associated. Data element content is the sequential number assigned to the 2/HL/010 organization loop iteration and serves as the cross-reference between transaction set level organization data and associated transactions.	
			2. Use in every 2/HL/010 substitute item loop iteration to identify the transaction loop with which the current loop is associated. Data element content is the sequential number assigned to the 2/HL/010 transaction loop iteration and serves as the cross-reference between the transaction and acceptable substitute items.	
Mandatory	HL03	735	Hierarchical Level Code	M ID 1/2
			Code defining the characteristic of a level in a hierarchical structure.	
			I Item	
			Code Value Implementation Note:	
			Use in every 2/HL/010 substitute item loop iteration.	
			SB Substitute	
			Code Value Implementation Note:	
			Use in every 2/HL/010 substitute item loop iteration for supply assistance transactions only.	
			V Address Information	
			Code Value Implementation Note:	
			Use in every 2/HL/010 organization loop iteration.	
			W Transaction Reference Number	
			Code Value Implementation Note:	
			Use in every 2/HL/010 transaction loop iteration.	
Not Used	HL04	736	Hierarchical Child Code	O ID 1/1

Optional

Segment: DTM Date/Time Reference

Level: Detail

Loop: HL

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.

2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. Use as needed for supply assistance requests only to identify dates associated with the material requirement.

2. Use in the organization loop only if the same Material Required Date applies to ALL items identified in the subordinate transaction loops. Otherwise use in appropriate transaction loops to identify dates that vary among subordinate transaction loops. Do not use in substitute item loops.

Data Element Summary

Mandatory-

Segment: REF Reference Numbers

Level: Detail

Loop: HL

Usage: Optional

Max Use: >1

Purpose: To specify identifying numbers.

Syntax: R0203 — At least one of REF02 or REF03 is required.

Implementation Notes:

1. Use in all 2/HL/010 transaction loop iterations to identify the transaction number and suffix.
2. Use in all 2/HL/010 substitute item loop iterations to identify and describe acceptable substitute items.
3. Use in all 2/HL/010 transaction loops for bulk petroleum quantity variance inquiries to identify the ordered material.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Notes:

1. Use only one of codes XA or XB, as needed, to identify acceptable substitute material. When citing a manufacturer's part number (code XB), always use code W7 to identify the manufacturer's CAGE.
2. Use codes CU, IX, and MJ as needed in conjunction with REF01 code XB to indicate amplifying information associated with the substitute material.
3. Use code NS in bulk petroleum quantity variance inquiries.

1I Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use in 2/HL/010 substitute item loops only to identify acceptable substitute ammunition items.

CU Clear Text Clause

Code Value Implementation Note:

Use as needed in 2/HL/010 substitute item loops only to identify a free-form description of acceptable substitute nonstandard material when additional descriptive capability is required. Use with REF03 only.

EQ Equipment Number

Code Value Implementation Note:

Use in 2/HL/010 substitute item loops only to identify acceptable substitute plant equipment.

FQ Form Number

Code Value Implementation Note:

Use in 2/HL/010 substitute item loops only to identify the form stock number.

IX Item Number

Code Value Implementation Note:

Use as needed in 2/HL/010 substitute item loops only to identify the applicable end item which applies to the nonstandard material. Use REF02 and REF03 as needed to identify the NSN and nomenclature.

MJ Model Number

Code Value Implementation Note:

Use as needed in 2/HL/010 substitute item loops only to identify the manufacturer's model number of the nonstandard material.

NS National Stock Number

Code Value Implementation Note:

Must use in all 2/HL/010 transaction loops to identify the ordered material - bulk petroleum only.

S6 Stock Number

Code Value Implementation Note:

Use in 2/HL/010 substitute item loops only to identify the publication stock number.

TN Transaction Reference Number

Code Value Implementation Note:

Use in 2/HL/010 transaction loops only to identify the transaction number assigned to the transaction.

W7 Commercial and Government Entity (CAGE) Code

Code Value Implementation Note:

Use with code XB only to identify a manufacturer's part number.

W8 Suffix

Code Value Implementation Note:

Use as needed in 2/HL/010 transaction loops only to identify a transaction number suffix when the original requisition has been split.

XA Substitute National Stock Number

Code Value Implementation Note:

Use as needed in 2/HL/010 substitute item loops only to identify the acceptable substitute NSN.

XB Substitute Manufacturer's Part Number

Code Value Implementation Note:

Use as needed in 2/HL/010 substitute item loops only to identify acceptable substitute nonstandard material.

Conditional

REF02 127 Reference Number C AN 1/30
Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.

Conditional

REF03 352 Description C AN 1/80
A free-form description to clarify the related data elements and their content.

Implementation Notes:

1. Use as needed in conjunction with code XB to identify the nonstandard material nomenclature.
2. Use as needed in conjunction with code CU to identify a free-form description of acceptable nonstandard material.
3. Use as needed in conjunction with code IX to identify the end item nomenclature.

Optional

Segment: LIN Item Identification

Level: Detail

Loop: HL

Usage: Optional

Max Use: >1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use in all 2/HL/010 transaction loop iterations in supply assistance requests to identify the requisitioned material.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any selected order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

Optional

Segment: **QTY** Quantity
Level: Detail
Loop: HL
Usage: Optional
Max Use: 1
Purpose: To specify quantity information.

Implementation Note:

Use in all 2/HL/010 transaction loops to identify the quantities associated with the transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	QTY01	673	Quantity Qualifier Code specifying the type of quantity. 63 On Order Quantity Code Value Implementation Note: Use in quantity variance inquiries to identify the ordered quantity. AB Urgent Delivery Quantity Code Value Implementation Note: Use in supply assistance transactions to identify the quantity urgently required. QD Quantity Delivered Code Value Implementation Note: Use in quantity variance inquiries to identify the shipped or received quantity. Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.	M ID 2/2
Mandatory	QTY02	380	Quantity Numeric value of quantity.	M R 1/15
Not Used	QTY03	355	Unit or Basis for Measurement Code	O ID 2/2

Optional

Segment: N1 Name

Level: Detail

Loop: N1 **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. Use the 2/N1/110 loop in every 2/HL/010 organization loop to identify the organization originating the transaction set.

2. Use the 2/N1/110 loop in the 2/HL/010 organization loop to identify the organization to receive the transaction set, an additional status recipient, or the MCA when the same organization applies to all transactions cited in the 2/HL/010 transaction loops. Use the 2/N1/110 loop in the individual 2/HL/010 transaction loops to identify the organization to receive the transaction set, an additional status recipient, or the MCA when the organization varies by transaction or the entity identifier (N101) does not apply for all transactions.

3. Use the 2/N1/110 loop as needed in 2/HL/010 substitute item loops to identify the potential source of supply and end item manufacturer.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		OB Ordered By	
		Code Value Implementation Note:	
		Use to identify the requisitioning activity originating the transaction set.	
		Z1 Party to Receive Status	
		Code Value Implementation Note:	
		Use multiple iterations of the 2/N1/110 loop as needed to identify all status recipients when different from Service/Agency prescribed status recipients.	
		Z3 Potential Source of Supply	
		Code Value Implementation Note:	
		Use only in supply assistance requests as needed to identify potential alternative sources for the required material.	
		Z4 Owning Inventory Control Point	
		Code Value Implementation Note:	
		Use to identify the supply source to receive the transaction set.	
		Z5 Management Control Activity	

		Code Value Implementation Note: Use as needed for all GFM related transactions to identify the MCA associated with the GFM transaction.		
		ZE End Item Manufacturer		
		Code Value Implementation Note: Use only in supply assistance requests as needed to identify the manufacturer of the end item (Make). When using, cite the actual name of the end item manufacturer in N102.		
Conditional	N102	93 Name Free-form name.	C AN	1/35
		Implementation Note: Use only with N101 code ZE. When using N102, do not use N103 and N104.		
Conditional	N103	66 Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) 33 Commercial and Government Entity (CAGE)	C ID	1/2
		Code Value Implementation Note: Use when the organization is a contractor not assigned a DoDAAC.		
		M4 Department of Defense Routing Identifier Code (RIC)		
Conditional	N104	67 Identification Code Code identifying a party or other code.	C AN	2/20
Not Used	N105	706 Entity Relationship Code	O ID	2/2
Optional	N106	98 Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID	2/2
		Implementation Note: Must use codes FR and TO in conjunction with the appropriate 2/N101/110 code to indicate the organizations sending and receiving the transaction set.		
		FR Message From		
		Code Value Implementation Note: Use to indicate that the organization cited in N104 transmitted the transaction set.		
		TO Message To		
		Code Value Implementation Note: Use to indicate that the organization cited in N104 is to receive the transaction set.		

Optional

Segment: PER Administrative Communications Contact

Level: Detail

Loop: N1

Usage: Optional

Max Use: 3

Purpose: To identify a person or office to whom administrative communications should be directed

- Syntax:**
1. P0304 — If either PER03 or PER04 is present, then the other is required.
 2. P0506 — If either PER05 or PER06 is present, then the other is required.
 3. P0708 — If either PER07 or PER08 is present, then the other is required.

Implementation Notes:

1. Use only in supply assistance transactions.
2. Use in the 2/HL/010 organization loop with N101 code FR to identify a point of contact with the organization originating the transaction set.
3. Use in 2/HL/010 substitute item loops to identify a potential source of supply.
4. Use multiple repetitions to identify a POC and multiple communication numbers. When using multiple repetitions to identify different communication numbers for a single POC, repeat the name cited in PER02.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
PER01	366	Contact Function Code	M ID 2/2
Code identifying the major duty or responsibility of the person or group named.			

Implementation Notes:

1. Use code IC as needed, in the 2/N1/110 Message From (FR) loop.
2. Use code SU in the 2/N1/110 Potential Source of Supply (Z3) loop.

IC Information Contact

Code Value Implementation Note:

Must use in the first repetition to identify the primary point of contact and their communication number.

SU Supplier Contact

Required

PER02	93	Name	O AN 1/35
Free-form name.			

Implementation Note:

Provide the last name, first name, middle initial, and rate/rank/title, as required, of the individual named as POC. Include blank spaces between name components and periods after initials. Do not include NMN when a middle initial is not available.

Conditional

PER03	365	Communication Number Qualifier	C ID 2/2
Code identifying the type of communication number.			

Implementation Notes:

1. Use to identify the preferred method of communication in the first repetition. Use PER05/6 and PER07/8 to identify additional communication numbers. Use additional repetitions of the PER segment to identify more than 3 numbers.

2. Do not include blank spaces or dashes between numbers.

AU Defense Switched Network

Code Value Implementation Note:

Use to identify the DSN telephone number.

EM Electronic Mail

FT Federal Telecommunications System (FTS)

Code Value Implementation Note:

Use to identify the FTS telephone number.

FX Facsimile

Code Value Implementation Note:

Use to identify the facsimile DSN telephone number.

IT International Telephone

Code Value Implementation Note:

Include country and city code as needed.

TE Telephone

Code Value Implementation Note:

Use to identify the commercial telephone number. Include the area code and number.

TL Telex

TX TWX

Conditional

PER04	364	Communication Number	C	AN	1/80
Complete communications number including country or area code when applicable.					

Conditional

PER05	365	Communication Number Qualifier	C	ID	2/2
Code identifying the type of communication number.					

Implementation Notes:

1. Use to identify an alternate, or secondary, communication number which can be used to contact the specified POC.

2. Do not include blank spaces or dashes between numbers.

3. Use to identify the FTS telephone number.

AU Defense Switched Network

Code Value Implementation Note:

Use to identify the DSN telephone number.

EM Electronic Mail

FT Federal Telecommunications System (FTS)

Code Value Implementation Note:

Use to identify the FTS telephone number.

FX Facsimile

Code Value Implementation Note:

Use to identify the facsimile DSN telephone number.

IT International Telephone

			Code Value Implementation Note: Include country and city code as needed.		
			TE Telephone		
			Code Value Implementation Note: Use to identify the commercial telephone number. Include area code and number.		
			TL Telex		
			TX TWX		
Conditional	PER06	364	Communication Number Complete communications number including country or area code when applicable.	C AN	1/80
Conditional	PER07	365	Communication Number Qualifier Code identifying the type of communication number.	X ID	2/2
			Implementation Notes: 1. Use to identify an alternate, or secondary, communication number which can be used to contact the specified POC. 2. Do not include blank spaces or dashes between numbers.		
			AU Defense Switched Network		
			Code Value Implementation Note: Use to identify the DSN telephone number.		
			EM Electronic Mail		
			FT Federal Telecommunications System (FTS)		
			Code Value Implementation Note: Use to identify the FTS telephone number.		
			FX Facsimile		
			Code Value Implementation Note: Use to identify the facsimile DSN telephone number.		
			IT International Telephone		
			Code Value Implementation Note: Include country and city code as needed.		
			TE Telephone		
			Code Value Implementation Note: Use to identify the commercial telephone number. Include area code and number.		
			TL Telex		
			TX TWX		
Conditional	PER08	364	Communication Number Complete communications number including country or area code when applicable.	X AN	1/80
Optional	PER09	443	Contact Inquiry Reference Additional reference number or description to clarify a contact number.	O AN	1/20
			Implementation Note: Use as needed only in the 2/HL/010 organization loop with N101 code FR to indicate the office symbol or activity code for the identified party.		

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Notes:

1. Use the 2/LM/170 loop in supply assistance transactions only in 2/HL/010 organization loop to identify information related to the operational necessity for obtaining the required material.
2. Use the 2/LM/170 loop in quantity variance transactions in 2/HL/010 transaction loops to identify information related to delivery order reconciliation.
3. Use the 2/LM/170 loop in 2/HL/010 organization loop to identify DoD unique data.

Data Element Summary

Mandatory

Mandatory	Segment: SE Transaction Set Trailer
	Level: Summary
	Loop: _____
	Usage: Mandatory
	Max Use: 1
	Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).
	Comment: SE is the last segment of each transaction set.
	Implementation Note: See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 5E

**TRANSACTION SET 517 IMPLEMENTATION CONVENTION
GOVERNMENT FURNISHED MATERIAL VALIDATION**

517 Material Obligation Validation

This Draft Standard for Trial Use provides the format and establishes the data contents of the Material Obligation Validation Transaction Set for use within the context of an Electronic Data Interchange (EDI) environment. The material obligation validation transaction set may be used to: (1) verify the continued need for open orders, (2) confirm open order quantities and order priority, (3) request reinstatement of erroneously cancelled open orders, and (4) validate Government Furnished Material (GFM) orders. The transaction set may convey a description of the material, the urgency of need associated with the transaction and quantity of required material. This transaction set is bidirectional between trading partners.

Implementation Notes

1. Supply sources use this transaction set to request the validation of GFM requisitions received from a commercial contractor. MCAs use this transaction set to respond to GFM validation requests.
2. Use a single occurrence of this transaction set to exchange GFM validations either between a single supply source and a single or multiple MCAs or between a single MCA and a single or multiple supply sources. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Not Used	BR06	306 Action Code	O	ID	1/2
Not Used	BR07	128 Reference Number Qualifier	C	ID	2/2
Not Used	BR08	127 Reference Number	C	AN	1/30

Optional	BR09 337 Time	O TM 4/8
----------	---------------------	---------------

Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)

Implementation Notes:

1. Express the originating activity's time in GMT.
2. Express time in a four-position (HHMM) format.

Not Used	BR10 128 Reference Number Qualifier	C ID 2/2
Not Used	BR11 127 Reference Number	C AN 1/30

Optional

Segment: G62 Date/Time

Level: Header

Loop: _____

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

- Syntax:**
1. R0103 — At least one of G6201 or G6203 is required.
 2. P0102 — If either G6201 or G6202 is present, then the other is required.
 3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Note:

Use the 1/G62/030 segment identify dates associated with the inquiry/reply.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Required	G6201	432	Date Qualifier Code specifying type of date.	C	ID	2/2
Required		64	Must Respond By <i>Code Value Implementation Note:</i> Use to indicate the response due date.			
		BB	Transaction Control Date <i>Code Value Implementation Note:</i> Use to indicate the GFM validation request date.			
		BE	Validated <i>Code Value Implementation Note:</i> Use to indicate the response date.			
Required	G6202	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	G6203	176	Time Qualifier	C	ID	1/2
Not Used	G6204	337	Time	C	TM	4/8
Not Used	G6205	623	Time Code	O	ID	2/2
Not Used	G6206	624	Century	O	N0	2/2

Required

Segment: N1 Name**Level:** Header**Loop:** N1 **Repeat:** >1**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/060 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/N1/060 loop to indicate the organization when an N101 qualifier code (e.g., Z4) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/090 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/060 that does not apply to all the table 2 iterations. (Code subject to override: Z4 and Z5.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/060 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: **QTY** Quantity

Level: Detail

Loop: QTY Repeat: >1

Usage: Optional

Max Use: 1

Purpose: To specify quantity information.

Implementation Note:*Use the 2/QTY/010 loop to identify the individual GFM transactions and associated quantity.***Data Element Summary**

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
QTY01	673	Quantity Qualifier	M	ID	2/2

Code specifying the type of quantity.

38 Original Quantity

Code Value Implementation Note:*Use for validation inquiry transactions only to identify the quantity cited in the requisition.*

QA Quantity Approved

Code Value Implementation Note:*Use for validation advice transactions only to identify the quantity validated and approved for issue.*

QC Quantity Disapproved

Code Value Implementation Note:*Use for validation advice transactions only to identify the disapproved quantity.*

Mandatory

QTY02	380	Quantity	M	R	1/15
-------	-----	----------	---	---	------

Numeric value of quantity.

Implementation Note:*Express the quantity as a whole number with no decimal. For example, if the quantity is 20, cite only 20.*

Not Used

QTY03	355	Unit or Basis for Measurement Code	O	ID	2/2
-------	-----	------------------------------------	---	----	-----

Optional

Segment: N9 Reference Number

Level: Detail

Loop: QTY

Usage: Optional

Max Use: 30

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.
2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Note:

Use multiple repetitions as needed to identify the material and transaction number associated with the transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N901	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Notes:

1. Use only one of codes 11, EQ, FQ, MF, NS, S6, or XD to properly identify the material associated with the transaction.

2. When citing a manufacturer's part number (code MF), always use code W7 to identify the manufacturer's CAGE.

11 Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use to identify ammunition items.

EQ Equipment Number

Code Value Implementation Note:

Use to identify plant equipment.

FQ Form Number

Code Value Implementation Note:

Use to identify the form number.

MF Manufacturers Part Number

Code Value Implementation Note:

Use to identify nonstandard material.

NS National Stock Number

Code Value Implementation Note:

Must use the NSN when known.

S6 Stock Number

Code Value Implementation Note:

Use to identify the publication stock number.

TN Transaction Reference Number

Code Value Implementation Note:

Must use to identify the transaction number for each transaction.

W7 Commercial and Government Entity (CAGE) Code

Code Value Implementation Note:

Use only with code MF to identify a manufacturer's part number.

W8 Suffix

Code Value Implementation Note:

Use as needed to identify the transaction number suffix.

XD Subsistence Identification Number

Code Value Implementation Note:

Use to identify subsistence items.

Required	N902	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
Not Used	N903	369	Free-form Description	C	AN	1/45
Not Used	N904	373	Date	O	DT	6/6
Not Used	N905	337	Time	C	TM	4/8
Not Used	N906	623	Time Code	O	ID	2/2

Optional

Segment: GF **Furnished Goods and Services**

Level: Detail

Loop: QTY

Usage: Optional

Max Use: 1

Purpose: To specify information related to furnished material, equipment, property, information, and services.

Syntax: 1. P0102 — If either GF01 or GF02 is present, then the other is required.
2. P0506 — If either GF05 or GF06 is present, then the other is required.
3. P0809 — If either GF08 or GF09 is present, then the other is required.

Semantic: GF04 is the value of government-furnished property

Implementation Notes:

1. Use in validation inquiry transactions only.
2. Use either the MDN or contract number (but not both) to identify the procurement source from which the commercial contractor is authorized to requisition material from DoD inventories.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Conditional	GF01	128 Reference Number Qualifier Code qualifying the Reference Number.	C	ID	2/2
		W3 Manufacturing Directive Number			
Conditional	GF02	127 Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30

Not Used	GF06	127 Reference Number	C	AN	1/30
Optional	GF07	328 Release Number Number identifying a release against a Purchase Order previously placed by the parties involved in the transaction.	O	AN	1/30
Implementation Note: Use as needed to identify the call or order number, or the call or order number including the respective call or order modification number when using GF03.					
Not Used	GF08	128 Reference Number Qualifier	C	ID	2/2
Not Used	GF09	127 Reference Number	C	AN	1/30

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use the 2/LM1070 loop to identify the type of transaction, and, for validation advice transactions, only to identify DoD unique coded data indicating the results of the validation process.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2
Not Used	LM02	822	Source Subqualifier	O	AN	1/15

Mandatory	Segment:	LQ Industry Code		
	Level:	Detail		
	Loop:	LM		
	Usage:	Mandatory		
	Max Use:	100		
	Purpose:	Code to transmit standard industry codes		
	Syntax:	C0102 — If LQ01 is present, then LQ02 is required.		
Implementation Note: Use to identify codes, as appropriate, consistent with management information requirements.				
Data Element Summary				
Required	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
	LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3
Implementation Note: Use only one of codes 80 or 81 in validation advice transactions. Do not use either code 80 or 81 in validation inquiry transactions.				
0 Document Identification Code				
78 Project Code				
80 Advice Code				
Code Value Implementation Note: Use as needed to convey information to the supply source which is considered essential to the validation advice transaction.				
81 Status Code				
Code Value Implementation Note: Use as needed to identify status information associated with the validation advice transaction.				
AK Distribution Code				
DE Signal Code				
DF Media and Status Code

Required	LQ02	1271	Industry Code Code indicating a code from a specific industry code list	C AN 1/20

Optional

Segment: N1 Name

Level: Detail

Loop: N1 Repeat: >1

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.**Comments:** 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/090 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/060 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/060 loop with a different address specified in the 2/N1/090 loop when the same N101 qualifier is used in both loops but the N104 address is different. (Code subject to override: Z4 and Z5.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual Z4 Owning Inventory Control Point Z5 Management Control Activity	M	ID	2/2
Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C	ID	1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Use code TO in conjunction with the appropriate 2/N101/090 code to indicate the organization to receive the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Segment: **SE** Transaction Set Trailer

Level: Detail

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M	NO	1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

APPENDIX 5F

TRANSACTION SET 940 IMPLEMENTATION CONVENTION MATERIAL RELEASE

940 Warehouse Shipping Order

This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Shipping Order Transaction Set (940) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable the depositor to advise a warehouse to make a shipment, confirm a shipment, or modify or cancel a previously transmitted shipping order.

Implementation Notes

1. IMMs/ICPs use this transaction set to direct storage facility shipments, to reposition inventory between storage facilities, to inquire about the status of open shipment directives, to cancel and modify previously submitted shipment directives, and to advise that open shipment directives will be administratively closed. DRMS uses this transaction set to inquire about discrepancies in either shipments to or receipts at a DRMO.
2. DoD distinguishes among redistribution orders; material release orders, inquiries, cancellations, and modifications; disposal release orders, inquiries, cancellations, modifications, and shipment confirmation inquiries; historical material release orders; historical disposal release orders; and material release order forced closures.
3. Use a single occurrence of this transaction set to exchange transactions between a single ICP/IMM and a single storage organization. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Table 1

NOTE/COMMENT:

2/140 The LX loop conveys serial number data.

Segment: **ST** Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 940 X12.189 Warehouse Shipping Order	M	ID	3/3
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Segment: **W05 Shipping Order Identification**
Level: Header
Loop: ____
Usage: Mandatory
Max Use: 1
Purpose: To transmit identifying numbers and other basic data for this transaction set
Syntax: **P0405** — If either W0504 or W0505 is present, then the other is required.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	W0501	473	Order Status Code Code identifying purpose of transaction set. N Original X Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M	ID	1/1
Mandatory	W0502	285	Depositor Order Number Identifying number for warehouse shipping order assigned by the depositor. Implementation Note: <i>Use a Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	M	AN	1/22
Not Used	W0503	324	Purchase Order Number	O	AN	1/22
Not Used	W0504	472	Link Sequence Number	C	NO	6/6
Not Used	W0505	474	Master Reference (Link) Number	C	AN	1/22
Required	W0506	640	Transaction Type Code Code specifying the type of transaction. NA Material Release Order Code Value Implementation Note: <i>Use to direct shipment of material to a customer.</i> NB Material Release Inquiry Code Value Implementation Note: <i>Use to inquire about the status of an open material release action.</i> ND Material Release Cancellation Code Value Implementation Note: <i>Use to request cancellation (or diversion) of either an open material release order or redistribution order. Do not use the diversion capability for bulk petroleum transactions.</i> NE Disposal Release Order Code Value Implementation Note: <i>Use to direct shipment of material to a disposal or reutilization facility.</i>	O	ID	2/2

NF Disposal Release Inquiry

Code Value Implementation Note:

Use to inquire about the status of open disposal release orders, shipment discrepancies at a DRMO, or receipt discrepancies at a DRMO.

NG Disposal Release Cancellation

Code Value Implementation Note:

Use to request cancellation of an open disposal release order.

NH Disposal Shipment Confirmation Inquiry

Code Value Implementation Note:

Use to inquire about the shipment status of an open disposal release order.

NI Redistribution Order

Code Value Implementation Note:

Use to redistribute inventory between and among storage facilities.

Optional

W0507

306 Action Code

O ID 1/2

Code indicating type of action.

2 Change (Update)

Code Value Implementation Note:

Use as needed in conjunction with W0506 codes NA and NE, but only to modify previously submitted material release order or disposal release order transactions.

CL Closed

Code Value Implementation Note:

Use with code NA or NE to identify administrative action to close an open material release order or a disposal release order.

W1 Reconcile Historical Records

Code Value Implementation Note:

Use as needed in conjunction with W0506 codes NA and NE, but only to indicate the submission of historical information on previously reported transactions.

Optional

Segment: N1 Name

Level: Header

Loop: 0100 **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/040 loop will, as a minimum, cite the organization originating the transaction set and the organization to receive the transaction set.

2. Use this 1/N1/040 loop to indicate an organization when an N101 qualifier code (e.g., ST) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/110 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N1/040 that does not apply to all of the table 2 iterations. (Codes subject to override: BS, BT, and ST.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		BS Bill and Ship To	
		Code Value Implementation Note:	
		Use either this code, or both codes BT and ST, for reimbursable material. Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the organization which receives both the material and the billing for the material.	
		BT Bill-to-Party	
		Code Value Implementation Note:	
		Use with code ST for reimbursable material. Use as needed for redistribution orders, material release orders, historical material release orders, material release order modifications, disposal release orders, historical disposal release orders, and disposal release order modifications to identify the organization to receive the billing for the material when different from the organization receiving the material. Use precludes the use of code BS.	
		SB Storage Area	
		Code Value Implementation Note:	
		Use to identify the storage facility to receive the transaction set.	

ST Ship To

Code Value Implementation Note:

Use with code BT for reimbursable material. Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the organization to receive the material, when different from the activity being billed for the material. Use precludes the use of code BS.

Z4 Owning Inventory Control Point

Code Value Implementation Note:

Use to identify the ICP originating the transaction set.

Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier	C	ID	1/2
			Code designating the system/method of code structure used for Identification Code (67).			
			10 Department of Defense Activity Address Code (DODAAC)			
			A2 Military Assistance Program Address Code (MAPAC)			
			Code Value Implementation Note:			
			For SA program transactions, use to indicate structured MAPAC for the ship to address.			
			M4 Department of Defense Routing Identifier Code (RIC)			
Required	N104	67	Identification Code	C	AN	2/20
			Code identifying a party or other code.			
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code	O	ID	2/2
			Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/040 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Required

Segment: **G62 Date/Time**
Level: Header
Loop: _____
Usage: Optional
Max Use: 10
Purpose: To specify pertinent dates and times
Syntax: 1. R0103 — At least one of G6201 or G6203 is required.
2. P0102 — If either G6201 or G6202 is present, then the other is required.
3. P0304 — If either G6203 or G6204 is present, then the other is required.
Implementation Note:
Use to identify the date and time of transaction set preparation.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
G6201	432	Date Qualifier Code specifying type of date. 07 Effective Date Code Value Implementation Note: Use to identify the date of transaction set preparation in GMT.	C	ID	2/2

Required

G6202	373	Date Date (YYMMDD).	C	DT	6/6
-------	-----	------------------------	---	----	-----

Required

G6203	176	Time Qualifier Code specifying the reported time. W Effective Time Code Value Implementation Note: Use to identify the time of transaction set preparation in GMT. Express time in a four-position (HHMM) format.	C	ID	1/2
-------	-----	--	---	----	-----

Required

G6204	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	C	TM	4/8

Optional

Segment: LM Code Source Information

Level: Header

Loop: 0200 **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/160 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 79) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/120 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ/170 that does not apply to all of the table 2 iterations. (Codes subject to override: All codes listed under 1/LQ01/170.)

Data Element Summary

Mandatory

Not Used

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2

Mandatory

Segment: LQ Industry Code

Level: Header

Loop: 0200

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3

Implementation Note:

Use one of codes 99 or A1 (but not both) as needed in redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the correct material to select for shipment. For material release order modifications, use one of codes 99 or A1 (but not both) to identify the revised code, as appropriate.

0 Document Identification Code

71 Service and Agency Code

Code Value Implementation Note:

Must use in FMS transactions to identify the customer country's requisitioning Service code: B, D, or P.

78 Project Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders, but only to identify special programs, exercises, projects, operations, and other purposes. Use in material release order modifications only to identify the revised project code.

79 Priority Designator Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders, but only to identify the supply priority assigned to this transaction. Use in material release order modifications only to identify the revised priority.

83 Supply Condition Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the supply condition code of the material to be selected for shipment.

87 Subsistence Type of Pack Code

Code Value Implementation Note:

Use with subsistence items only, as needed, for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the specific subsistence type of pack to select for shipment.

88 Disposal Authority Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to indicate that the designated material is authorized for shipment to a disposal or reutilization facility.

90 Precious Metals Indicator Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to identify the precious metal content of the specified material.

91 Automated Data Processing Equipment Identification Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to identify ADPE identification information.

92 Reason for Disposal Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to identify the reason the disposal action is required.

93 Type of Storage Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders, but only to identify the minimum storage requirements associated with the material.

95 Offer and Release Option Code

Code Value Implementation Note:

Use as needed for FMS material release orders and historical material release orders, but only to identify the type of notice required prior to material shipment.

97 Ultimate Recipient Code

Code Value Implementation Note:

Use as needed for material release orders and historical material release orders, but only to identify the buyer of DoD material, to allow full payment for material supplied to the non-DoD customer.

99 Purpose Code

A1 Ownership Code

A4 Case Designator Number

Code Value Implementation Note:

Must use in FMS transactions to identify the FMS case number. For CLSSAs, repeat up to two times to identify the FMS, FMSO I, and FMSO II case numbers. In this instance, the first occurrence will cite the FMSOI case number, and a second occurrence, if applicable, will reflect the FMSO II.

A5 Subcase Number

Code Value Implementation Note:

Use as needed in FMS transactions based on Service requirements.

A6 Freight Forwarder Number

Code Value Implementation Note:

Must use for FMS material release orders and historical material release orders, to identify the country representative or freight forwarder to receive shipments and documentation.

A7 Record Control Number

Code Value Implementation Note:

Use as needed for MAP/GA material release orders and historical material release orders, but only to identify the program line item number.

A8 Program Year Code

Code Value Implementation Note:

Use as needed for MAP/GA material release orders and historical material release orders, but only to identify the program year in which the material was approved and funded.

AK Distribution Code

AL Special Requirements Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders, but only to identify any special handling and processing requirements.

BD Transportation Priority Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify a transportation priority which is different than that associated with the requisition priority.

DE Signal Code

DF Media and Status Code

DG Fund Code

FD Demilitarization Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to identify any demilitarization actions which must take place prior to disposal.

HD Discrepancy Status or Disposition Code

Code Value Implementation Note:

Use as needed for material release orders when directing shipment of discrepant or deficient material.

Required

LQ02 1271 Industry Code
Code indicating a code from a specific industry code list

C AN 1/20

Optional

Segment: W01 Line Item Detail - Warehouse

Level: Detail

Loop: 0300 **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To transmit basic and most frequent shipment related line item data elements

- Syntax:**
1. R0304 — At least one of W0103 or W0104 is required.
 2. P0405 — If either W0104 or W0105 is present, then the other is required.
 3. P0607 — If either W0106 or W0107 is present, then the other is required.

Implementation Note:

Use the 2/W01/020 loop to identify material and other data pertinent to the transaction affecting the selection and shipment of material.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
W0101	330	Quantity Ordered Quantity ordered.	M	R	1/9

Implementation Note:

Use to identify the material quantity associated with the transaction.

Mandatory

W0102	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	M	ID	2/2
-------	-----	---	---	----	-----

Implementation Note:

Use to identify the unit of issue for the required material. (See the unit of issue conversion table in volume 1, chapter 10.)

Not Used

W0103	438	U.P.C. Case Code	C	AN	12/12
-------	-----	-------------------------	---	----	-------

Required

W0104	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
-------	-----	---	---	----	-----

Implementation Note:

Use only one of codes A1, A2, A4, FB, FS, FT, MG, or YP to identify the material.

A1 Plant Equipment Number

Code Value Implementation Note:

Use to identify plant equipment.

A2 Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use to identify ammunition items.

A4 Subsistence Identification Number

Code Value Implementation Note:

Use to identify subsistence items.

			CN Commodity Name			
			Code Value Implementation Note: <i>Must use code CN to identify the commodity name or description only when citing the Federal Supply Classification (code FT).</i>			
			FB Form Number			
			Code Value Implementation Note: <i>Use to identify the form stock number.</i>			
			FS National Stock Number			
			Code Value Implementation Note: <i>Must use the NSN when known.</i>			
			FT Federal Supply Classification			
			Code Value Implementation Note: <i>Use to identify nonstandard material when a part number is not available and material can only be identified by description (e.g., non-NSN lumber products).</i>			
			MG Manufacturer's Part Number			
			Code Value Implementation Note: <i>Use to identify nonstandard material.</i>			
			YP Publication Number			
			Code Value Implementation Note: <i>Use to identify the publication stock number.</i>			
			ZB Commercial and Government Entity (CAGE). Code			
			Code Value Implementation Note: <i>Use only with code MG to identify a manufacturer's part number.</i>			
Required	W0105	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Conditional	W0106	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Conditional	W0107	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Not Used	W0108	59	Freight Class Code	O	AN	2/5
Not Used	W0109	121	Rate Class Code	O	ID	1/3
Not Used	W0110	23	Commodity Code Qualifier	O	ID	1/1
Not Used	W0111	22	Commodity Code	O	AN	1/30
Not Used	W0112	416	Pallet Block and Tiers	O	N0	6/6
Not Used	W0113	451	Warehouse Lot Number	O	AN	1/12
Optional	W0114	286	Product/Service Condition Code Code identifying condition of product/service.	O	ID	2/2
			03 Recouped			
			Code Value Implementation Note: <i>Use as needed for disposal release orders and historical disposal release orders, but only to indicate that reclamation is required prior to material release to a disposal or reutilization organization.</i>			

Required

Segment: N9 Reference Number

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 200

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.
2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Note:

Use multiple repetitions as needed to identify ancillary information related to the transaction. Must use at least one repetition to identify the transaction number.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N901	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2
		16 Military Interdepartmental Purchase Request (MIPR) Number	
		Code Value Implementation Note: Use, as needed, to identify the MIPR number for tracking "in-process" material.	
		17 Client Reporting Category	
		1Y Repair Action Number	
		Code Value Implementation Note: Use, as needed, to identify the DMISA line number for tracking "in-process" material.	
		4C Shipment Destination Code	
		Code Value Implementation Note: Use as needed for redistribution orders, material release orders, historical material release orders, and material release order modifications to provide in-the-clear text that should appear on the shipping container markings. When the 2/N902/040 is insufficient, continue the clear text "entry" in 2/N903/040. Use multiple repetitions, as needed, to identify all in-the-clear-text as specified in the requisition.	
		97 Package Number	
		Code Value Implementation Note: Use as needed for redistribution orders, material release orders, historical material release orders, and material release order modifications, but only when material must meet OCONUS packaging and preservation requirements. When using, the paired data element 127 cites numeric 1, indicating packaging must meet OCONUS specifications. When not using, CONUS level specifications are adequate. Use in a material release order modification transaction to identify the revised packaging and preservation requirements.	
		AH Agreement Number	
		Code Value Implementation Note: Use, as needed, to identify the Depot Maintenance Inter-Service Support Agreement (DMISA) number for tracking "in-process" material.	
		CT Contract Number	

Code Value Implementation Note:

Use as needed on shipments of GFM to the contractor.

F8 Original Reference Number

Code Value Implementation Note:

Use as needed to identify the offer of material transaction number on lateral redistribution orders.

TN Transaction Reference Number

Code Value Implementation Note:

Use to identify the transaction number assigned to a transaction. (For SA material release orders and historical material release orders only, the first six positions of the transaction number identify the Service assignment code, country or international organization code, customer-within-country code, delivery term code, and the type of assistance and financing code. Use the 1/LM/160 loop or the 2/LM/120 loop, as appropriate, to identify other unique data required to process SA transactions.

W3 Manufacturing Directive Number

Code Value Implementation Note:

Use as needed on shipments of GFM to the contractor.

W8 Suffix

Code Value Implementation Note:

Use as needed for all transactions other than redistribution orders, to identify the suffix associated with the transaction number.

WO Work Order Number

Code Value Implementation Note:

Use as needed to identify a maintenance work order number.

Required	N902	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
Conditional	N903	369	Free-form Description	C	AN	1/45
			Free-form descriptive text.			
Implementation Note:						
Use only when 2/N901/040 cites code 4C and 2/N902/040 is insufficient to continue clear text entry that should appear on the shipping container markings.						
Not Used	N904	373	Date	O	DT	6/6
Not Used	N905	337	Time	C	TM	4/8
Not Used	N906	623	Time Code	O	ID	2/2

Segment: AT Financial Accounting
Level: Detail
Loop: 0300
Usage: Optional
Max Use: >1
Purpose: To transmit financial accounting data
Syntax: C1001 — If AT10 is present, then AT01 is required.
Comment: AT09 identifies unique local activity financial accounting information

Implementation Note:

Use multiple repetitions as needed to identify the appropriations to cite for goods, services, and related adjustments.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Required	AT01	1271	Industry Code Code indicating a code from a specific industry code list	C AN 1/20
	Implementation Note: Use to identify the DLMS Fund Purpose Code. Use any code except CR or DR.			
Optional	AT02	1282	Treasury Symbol Number Number identifying a department, fiscal year, treasury account number, and appropriation limit for a standard accounting classification coding structure	O AN 7/21
	Implementation Note: Cite the basic appropriation (departmental index, fiscal year, treasury account number) and limit/subhead.			
Optional	AT03	1283	Budget Activity Number Number identifying an administrative subdivision of funds against which a transaction is to be charged for a standard accounting classification coding structure	O AN 1/16
Optional	AT04	1284	Object Class Number Number identifying the nature of the goods or services acquired and a specific office or organization using resources for a standard accounting classification coding structure	O AN 3/12
Required	AT05	1285	Reimbursable Source Number Number identifying the source of an appropriation or fund reimbursement for a standard accounting classification coding structure	O AN 1/3
	Implementation Note: Use to identify the DLMS Fund Code.			
Optional	AT06	1286	Transaction Reference Number Number identifying an original request for goods and services to the matching financial transaction for a standard accounting classification coding structure	O AN 4/20

Optional	AT07	1287	Accountable Station Number Number identifying an office responsible for entering a financial transaction into the applicable accounting system for a standard accounting classification coding structure	O AN	3/8
Optional	AT08	1288	Paying Station Number Number identifying an office responsible for making a payment or collection and the corresponding voucher number under which the action was taken for a standard accounting classification coding structure	O AN	8/14
Optional	AT09	352	Description A free-form description to clarify the related data elements and their content.	O AN	1/80
Implementation Note: <i>Use for supplemental accounting classification data.</i>					
Not Used	AT10	1270	Code List Qualifier Code	O ID	1/3

Optional
Segment: **QTY** Quantity
Level: Detail
Loop: 0300
Usage: Optional
Max Use: 10
Purpose: To specify quantity information.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	QTY01	673	Quantity Qualifier Code specifying the type of quantity. V1 Retention Quantity Code Value Implementation Note: <i>Use as needed for disposal release orders and historical disposal release orders, but only to identify the quantity of material to be retained in inventory.</i>	M	ID	2/2
Mandatory	QTY02	380	Quantity Numeric value of quantity. Implementation Note: <i>Express as a whole number with no decimal. For example, if the quantity is 20, cite only 20.</i>	M	R	1/15
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID	2/2

Optional

Segment: G62 Date/Time

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

- Syntax:**
1. R0103 — At least one of G6201 or G6203 is required.
 2. P0102 — If either G6201 or G6202 is present, then the other is required.
 3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Note:

Use multiple repetitions as needed to define unique dates or delivery periods associated with the transaction.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
G6201	432	Date Qualifier	C ID 2/2

Code specifying type of date.

09 Process Date

Code Value Implementation Note:

Use with the transaction history to identify the date on which the material release was processed by receiving activity.

36 Expiration Date

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders, but only for subsistence items to identify the specific expiration date for subsistence selected for shipment.

53 Deliver Not Before Date

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders only to identify the earliest acceptable delivery date for the material directed for shipment. For conventional ammunition transactions, use to identify the earliest acceptable delivery date for the required delivery period. Use as needed for material release order modifications, but only to identify the revised earliest acceptable delivery date.

54 Deliver No Later Than Date

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders, but only to identify the latest acceptable delivery date for the material directed for shipment. For conventional ammunition transactions, use to identify the latest acceptable delivery date for the required delivery period. Use as needed for material release order modifications, but only to identify the revised latest acceptable delivery date.

BD Required By

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders, but only to identify the required delivery date. For SA transactions, use to identify the required availability date. Use as needed for material release order modifications, but only to identify the revised required delivery date or required availability date.

BF Pack Date

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders, but only for subsistence items to identify the pack date of subsistence directed for shipment. Use as needed for material release order modifications and disposal release order modifications, but only to identify the revised subsistence pack date.

Required	G6202	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	G6203	176	Time Qualifier	C	ID	1/2
Not Used	G6204	337	Time	C	TM	4/8
Not Used	G6205	623	Time Code	O	ID	2/2
Not Used	G6206	624	Century	O	NO	2/2

Segment: G66 Transportation Instructions
Level: Detail
Loop: 0300
Usage: Optional
Max Use: 1
Purpose: To specify transportation instructions relating to shipment

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	G6601	146	Shipment Method of Payment	O	ID	2/2
Optional	G6602	91	Transportation Method/Type Code Code specifying the method or type of transportation for the shipment.	O	ID	1/2
Implementation Notes:						
1. Use as needed for bulk petroleum redistribution orders and material release orders only to indicate the mode of shipment. (See the mode of shipment conversion table in volume 1, chapter 10.)						
2. For non-bulk petroleum material, use only when premium transportation is directed for redistribution orders, material release orders, historical material release orders, and material release order modifications.						
A Air						
Code Value Implementation Note:						
Use to indicate material shipment via Air mode when premium transportation is directed.						
Not Used	G6603	399	Pallet Exchange Code	O	ID	1/1
Not Used	G6604	400	Unit Load Option Code	O	ID	2/2
Not Used	G6605	387	Routing	O	AN	1/35
Not Used	G6606	433	F.O.B. Point Code	O	ID	2/2
Not Used	G6607	434	F.O.B. Point	O	AN	1/30

Optional

Segment: N1 Name**Level:** Detail**Loop:** 0300**Usage:** Optional**Max Use:** 3**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. Use 2/N1/110 to identify a new consignee for diversions and to identify entities within the ship-to address that will actually receive the material.

2. For any specific table 2 iteration use this 2/N1/110 loop as needed: 1) to identify an organization when the N101 qualifier does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/070 loop or 2) to override an address in the 1/N1/070 loop with a different address specified in the 2/N1/110 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: BS, BT, and ST.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		BS Bill and Ship To	
		Code Value Implementation Note:	
		Use either this code, or both codes BT and ST, for reimbursable material. Use as needed for redistribution orders, material release orders, historical material release orders, material release order modifications, disposal release orders, and historical disposal release orders to identify the organization which receives both the material and the billing for the material.	
		BT Bill-to-Party	
		Code Value Implementation Note:	
		Use with code ST for reimbursable material. Use as needed for redistribution orders, material release orders, historical material release orders, material release order modifications, disposal release orders, historical disposal release orders, and disposal release order modifications to identify the organization to receive the billing for the material when different from the organization receiving the material. Use precludes the use of code BS.	
		CN Consignee	
		Code Value Implementation Note:	
		Use as needed for material release order cancellations to identify the new consignee to which a shipment should be diverted. Do not use for bulk petroleum transactions.	
		ST Ship To	

Code Value Implementation Note:

Use with code BT for reimbursable material. Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the organization to receive the material, when different from the activity being billed for the material. Use precludes the use of code BS.

Z7 Mark-for Party

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, material release order modifications, disposal release orders, historical disposal release orders, and disposal release order modifications, but only to identify an entity located within the ship-to address that is to actually receive the material.

Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier	C	ID	1/2
			Code designating the system/method of code structure used for Identification Code (67).			
			10 Department of Defense Activity Address Code (DODAAC)			
			A2 Military Assistance Program Address Code (MAPAC)			
			Code Value Implementation Note:			
			For SA program transactions, use to indicate structured MAPAC for the ship-to address.			
Required	N104	67	Identification Code	C	AN	2/20
			Code identifying a party or other code.			
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Not Used	N106	98	Entity Identifier Code	O	ID	2/2

Optional

Segment: LM Code Source Information

Level: Detail

Loop: 0310 **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

For any specific table 2 iteration use this 2/LM/120 loop as needed: 1) to identify a DoD code when the LQ01 qualifier does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/160 loop or 2) to override an LQ02 DoD code in the 1/LM/160 loop with a different DoD code in the 2/LM/120 loop when the same qualifier is used in both loops but the the LQ02 DoD code is different. (Codes subject to override: 0, 78, 79, 83, 87, 88, 90, 91, 92, 93, 95, 97, 99, A1, A4, A6, A7, A8, AK, AL, BD, DE, DF, DG, and FD.)

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values.	M	ID	2/2
		DF Department of Defense (DoD)			

Not Used

LM02	822	Source Subqualifier	O	AN	1/15
------	-----	----------------------------	---	----	------

Mandatory

Segment: LQ Industry Code

Level: Detail

Loop: 0310

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3

Implementation Note:

Use one of codes 99 or A1 (but not both) as needed in redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the correct material to select for shipment. For material release order modifications, use one of codes 99 or A1 (but not both) to identify the revised code, as appropriate.

0 Document Identification Code

71 Service and Agency Code

Code Value Implementation Note:

Must use in FMS transactions to identify the customer country's requisitioning Service code: B, D, or P.

78 Project Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders, but only to identify special programs, exercises, projects, operations, and other purposes. Use in material release order modifications only to identify the revised project code.

79 Priority Designator Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders, but only to identify the supply priority assigned to this transaction. Use in material release order modifications only to identify the revised priority.

80 Advice Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, and disposal release inquiries, but only to convey information considered essential to the supply action.

83 Supply Condition Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the supply condition code of the material to be selected for shipment.

84 Management Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify applicable management information.

87 Subsistence Type of Pack Code

Code Value Implementation Note:

Use with subsistence items only, as needed, for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the specific subsistence type of pack to select for shipment.

88 Disposal Authority Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to indicate that the designated material is authorized for shipment to a disposal or reutilization facility.

90 Precious Metals Indicator Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to identify the precious metal content of the specified material.

91 Automated Data Processing Equipment Identification Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to identify ADPE identification information.

92 Reason for Disposal Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to identify the reason the disposal action is required.

93 Type of Storage Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders, but only to identify the minimum storage requirements associated with the material.

95 Offer and Release Option Code

Code Value Implementation Note:

Use as needed for FMS material release orders and historical material release orders, but only to identify the type of notice required prior to material shipment.

97 Ultimate Recipient Code

Code Value Implementation Note:

Use as needed for material release orders and historical material release orders, but only to identify the buyer of DoD material, to allow full payment for material supplied to the non-DoD customer.

99 Purpose Code

A1 Ownership Code

A4 Case Designator Number

Code Value Implementation Note:

Must use in FMS transactions to identify the FMS case number. For CLSSAs, repeat up to two times to identify the FMS, FMSO I, and FMSO II case numbers. In this instance, the first occurrence will cite the FMSO I case number, and a second occurrence, if applicable, will reflect the FMSO II.

A5 Subcase Number

Code Value Implementation Note:

Use as needed in FMS transactions based on Service requirements.

A6 Freight Forwarder Number

Code Value Implementation Note:

Must use for FMS material release orders and historical material release orders, to identify the country representative or freight forwarder to receive shipments and documentation.

A7 Record Control Number

Code Value Implementation Note:

Use as needed for MAP/GA material release orders and historical material release orders, but only to identify the program line item number.

A8 Program Year Code

Code Value Implementation Note:

Use as needed for MAP/GA material release orders and historical material release orders, but only to identify the program year in which the material was approved and funded.

AK Distribution Code

AL Special Requirements Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, and historical material release orders, but only to identify any special handling and processing requirements.

BD Transportation Priority Code

Code Value Implementation Note:

Use as needed for redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify a transportation priority which is different than that associated with the requisition priority.

DE Signal Code

DF Media and Status Code

DG Fund Code

FD Demilitarization Code

Code Value Implementation Note:

Use as needed for disposal release orders and historical disposal release orders, but only to identify any demilitarization actions which must take place prior to disposal.

GA Action Code

Code Value Implementation Note:

Use as needed for bulk petroleum only to identify submission of change(s) or reversal of a previously accepted/recorded transaction.

HD Discrepancy Status or Disposition Code

Code Value Implementation Note:

Use as needed for material release orders when directing shipment of discrepant or deficient material.

Required

LQ02

1271

Industry Code

Code indicating a code from a specific industry code list

C AN 1/20

Optional

Segment: LX Assigned Number

Level: Detail

Loop: 0320 **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To reference a line number in a transaction set.

Implementation Notes:

1. Use as a counter to identify the number of 2/LX/140 loop iterations in the transaction set.
2. Use the 2/LX/140 loop only to provide UH or lot numbers information, as needed, for redistribution orders, material release orders, historical material release orders, material release order modifications, disposal release orders, historical disposal release orders, and disposal release order modifications.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LX01	554	Assigned Number	M	N0	1/6
Number assigned for differentiation within a transaction set.					

Implementation Note:

In the first 2/LX/140 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Optional

Segment: N9 Reference Number

Level: Detail

Loop: 0320

Usage: Optional

Max Use: >1

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.
2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Note:
Use to provide UII or lot number information for controlled material.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N901	128	Reference Number Qualifier Code qualifying the Reference Number. LT Lot Number Code Value Implementation Note: <i>Use to identify the manufacturer's lot number, batch number, or other number identifying the production run.</i> SE Serial Number Code Value Implementation Note: <i>Use to cite the UII assigned to the item for an NUUI or LUUI program.</i>	M	ID	2/2
Required	N902	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30

Mandatory

Segment: SE Transaction Set Trailer

Level: Summary

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10

Mandatory

SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9
------	-----	--	----------

APPENDIX 5G

**TRANSACTION SET 945 IMPLEMENTATION CONVENTION
MATERIAL RELEASE ADVICE**

945 Warehouse Shipping Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Shipping Advice Transaction Set (945) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by the warehouse to advise the depositor that shipment was made. It is used to reconcile order quantities with shipment quantities.

Implementation Notes

1. Storage facilities use this transaction set to provide IMM/ICPs with disposition information on material release orders (including material release order modifications), disposal release orders (including disposal release order modifications), and requests to cancel material/disposal release orders.
2. DoD distinguishes between material release confirmation, historical material release confirmation, material release denial, historical material release denial, material release advice, material release cancellation advice, historical material release cancellation advice, disposal release confirmation, historical disposal release confirmation, disposal release denial, historical disposal release denial, disposal release advice, disposal release cancellation advice, and historical disposal release cancellation advice transactions.
3. Use a single occurrence of this transaction set to exchange transactions between a single storage facility and a single or multiple IMM/ICPs. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Table 1

NOTE/COMMENT:

2/110 The LX loop conveys serial number data.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143 Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 945 X12.193 Warehouse Shipping Advice	M	ID	3/3
Mandatory	ST02	329 Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Segment: W06 Warehouse Shipment Identification
Level: Header
Loop: _____
Mandatory
Usage: Mandatory
Max Use: 1
Purpose: To provide identifying numbers, dates, and other basic data for this transaction set
Syntax: P0708 — If either W0607 or W0608 is present, then the other is required.
Semantic: W0603 is the actual date on which shipment was made.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	W0601	514	Reporting Code Code specifying the basis used when reporting shipment information. J Original Transaction K Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M	ID	1/1

Not Used	W0607	474	Master Reference (Link) Number	C	AN	1/22
Not Used	W0608	472	Link Sequence Number	C	N0	6/6
Not Used	W0609	152	Special Handling Code	O	ID	2/3
Not Used	W0610	891	Shipping Date Change Reason Code	O	ID	2/2
Required	W0611	640	Transaction Type Code Code specifying the type of transaction. NJ Material Release Confirmation Code Value Implementation Note: <i>Use to provide positive status on a material release order.</i> NK Material Release Denial Code Value Implementation Note: <i>Use to provide denial (warehouse refusal) information on a material release order.</i> NL Material Release Advice Code Value Implementation Note: <i>Use to provide non-positive status on a material release order.</i>	O	ID	2/2

NM Disposal Release Confirmation

Code Value Implementation Note:

Use to provide positive status on a disposal release order.

NP Disposal Release Denial

Code Value Implementation Note:

Use to provide denial (warehouse refusal) information on a disposal release order.

NQ Disposal Shipment Confirmation

Code Value Implementation Note:

Use to provide non-positive status on a disposal release order.

NR Material Release Cancellation Advice

Code Value Implementation Note:

Use to provide status taken on a request to cancel a material release order.

NT Disposal Release Cancellation Advice

Code Value Implementation Note:

Use to provide status taken on a request to cancel a disposal release order.

Optional

W0612

306

Action Code

Code indicating type of action.

O

ID

1/2

W1 Reconcile Historical Records

Code Value Implementation Note:

Use as needed in conjunction with W0611 codes NJ, NK, NM, NP, NR, and NT only to indicate the submission of historical information on previously reported transactions.

Required

Segment: N1 Name
Level: Header
Loop: 0100 **Repeat:** 10
Usage: Mandatory
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/040 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/040 loop to indicate an organization when an N101 qualifier code (e.g., Z4) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/080 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/040 that does not apply to all the table 2 iterations. (Code subject to override: Z4.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual SB Storage Area Code Value Implementation Note: Use to identify the storage facility originating the transaction set. Z4 Owning Inventory Control Point Code Value Implementation Note: Use to identify the ICP to receive the transaction set.	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2

Optional

N106 98 Entity Identifier Code O ID 2/2
Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/040 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Required	Segment: G62 Date/Time				
	Level: Header				
	Loop: _____				
	Usage: Optional				
	Max Use: 5				
	Purpose: To specify pertinent dates and times				
	Syntax: 1. R0103 — At least one of G6201 or G6203 is required.				
	2. P0102 — If either G6201 or G6202 is present, then the other is required.				
	3. P0304 — If either G6203 or G6204 is present, then the other is required.				
	Implementation Note: Use to identify the date and time of transaction set preparation.				

Data Element Summary					
REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Required	G6201	432 Date Qualifier Code specifying type of date. 07 Effective Date Code Value Implementation Note: Use to identify the date of transaction set preparation in GMT.	C	ID	2/2
Required	G6202	373 Date Date (YYMMDD).	C	DT	6/6
Required	G6203	176 Time Qualifier Code specifying the reported time. W Effective Time Code Value Implementation Note: Use to identify the time of transaction set preparation in GMT. Express time in a four-position (HHMM) format.	C	ID	1/2
Required	G6204	337 Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	C	TM	4/8
Not Used	G6205	623 Time Code	O	ID	2/2
Not Used	G6206	624 Century	O	NO	2/2

Optional

Segment: LM Code Source Information

Level: Header

Loop: 0200 **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/160 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 79) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/090 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/170 that does not apply to all the table 2 iterations. (Codes subject to override: 0, 36, 37, 38, 58, 82, 83, 92, 93, 99, A1, AK, DE, DF, and DG.)

Data Element Summary

Mandatory

Not Used

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2

Mandatory

Segment: LQ Industry Code

Level: Header

Loop: 0200

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3

Implementation Note:

Use one of codes 99 or A1 (but not both), as needed.

0 Document Identification Code

36 Air Terminal Identifier Code

Code Value Implementation Note:

Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify air terminal identification codes for OCONUS shipments made via DTS air modes.

37 Water Terminal Identifier Code

Code Value Implementation Note:

Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify water terminal identification codes for OCONUS shipments made via DTS water modes.

38 Consolidation and Containerization Point Code

Code Value Implementation Note:

Use as needed for CONUS destination shipments to identify the applicable regional freight consolidation center through which a shipment will transit.

58 Transportation Bill Code

Code Value Implementation Note:

Use as needed for SA material release confirmation and historical material release confirmation transactions only to identify the appropriate transportation billing information.

78 Project Code

Code Value Implementation Note:

Use as need to identify special programs, exercises, projects, operations, and other purposes.

79 Priority Designator Code

Code Value Implementation Note:

Use as needed to identify the supply priority assigned to this transaction.

81 Status Code

Code Value Implementation Note:

Use as needed to identify any applicable supply status information.

83 Supply Condition Code

Code Value Implementation Note:

Use to identify the supply condition code of the material referenced in the transaction.

84 Management Code

Code Value Implementation Note:

Use to identify any applicable management information related to material referenced in the transaction.

87 Subsistence Type of Pack Code

Code Value Implementation Note:

Use as needed with subsistence items only for denials.

88 Disposal Authority Code

Code Value Implementation Note:

Use as needed to indicate that the designated material is authorized for shipment to a disposal or reutilization facility.

90 Precious Metals Indicator Code

Code Value Implementation Note:

Use as needed to identify the precious metal content of the specified material.

91 Automated Data Processing Equipment Identification Code

Code Value Implementation Note:

Use as needed to identify ADPE identification information.

92 Reason for Disposal Code

Code Value Implementation Note:

Use as needed for disposal release confirmation and historical disposal release confirmation transactions only to identify the reason for transfer of the shipment unit.

93 Type of Storage Code

Code Value Implementation Note:

Use as needed for material release confirmation and historical material release confirmation transactions only to identify the minimum level of storage environment required for the shipment unit.

99 Purpose Code

A1 Ownership Code

AK Distribution Code

BC Transportation Holding Delay Code

Code Value Implementation Note:

Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify the reason shipment has been delayed.

DE Signal Code

DF Media and Status Code

DG Fund Code

HD Discrepancy Status or Disposition Code

Code Value Implementation Note:

Use as needed for material release orders when directing shipment of discrepant or deficient material.

Required

LQ02

1271

Industry Code

Code indicating a code from a specific industry code list

C AN 1/20

Required

Segment: W12 Warehouse Item Detail

Level: Detail

Loop: 0300 **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To designate those line items that were shipped

- Syntax:**
1. R0607 — At least one of W1206 or W1207 is required.
 2. P0708 — If either W1207 or W1208 is present, then the other is required.
 3. P101112 — If either W1210, W1211 or W1212 are present, then the others are required.
 4. P131415 — If either W1213, W1214 or W1215 are present, then the others are required.
 5. P1718 — If either W1217 or W1218 is present, then the other is required.

Semantic: Whenever W1201 contains IS, W1216, W1217 and W1218 refer to the original item ordered.

Implementation Note:

Use the 2/W12/020 loop to identify the material and other data pertinent to the transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
W1201	368	Shipment/Order Status Code Code indicating the status of an order or shipment or the disposition of any difference between the quantity ordered and the quantity shipped for a line item or transaction. UR Unsolicited Report Code Value Implementation Note: Use to indicate a normal response to any material or disposal release transaction.	M ID 2/2
Not Used	W1202	330 Quantity Ordered	O R 1/9
Not Used	W1203	382 Number of Units Shipped	O R 1/10
Not Used	W1204	383 Quantity Difference	O R 1/9
Not Used	W1205	355 Unit or Basis for Measurement Code	O ID 2/2
Not Used	W1206	438 U.P.C. Case Code	C AN 12/12
Required	W1207	235 Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C ID 2/2

Implementation Note:

Use only one of codes A1, A2, A4, FB, FS, FT, MG, or YP to properly identify the material.

A1 Plant Equipment Number

Code Value Implementation Note:

Use to identify plant equipment.

A2 Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use to identify ammunition items.

A4 Subsistence Identification Number

Code Value Implementation Note:

Use to identify subsistence items.

FB Form Number

Code Value Implementation Note:

Use to identify the form stock number.

FS National Stock Number

Code Value Implementation Note:

Must use the NSN when known.

FT Federal Supply Classification

Code Value Implementation Note:

Use to identify nonstandard material when a part number is not available and material can only be identified by description (e.g., non-NSN lumber products).

MG Manufacturer's Part Number

Code Value Implementation Note:

Use to identify nonstandard material.

YP Publication Number

Code Value Implementation Note:

Use to identify the publication stock number.

Required	W1208	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Not Used	W1209	451	Warehouse Lot Number	O	AN	1/12
Not Used	W1210	81	Weight	C	R	1/10
Not Used	W1211	187	Weight Qualifier	C	ID	1/2
Not Used	W1212	188	Weight Unit Code	C	ID	1/1
Not Used	W1213	81	Weight	C	R	1/10
Not Used	W1214	187	Weight Qualifier	C	ID	1/2
Not Used	W1215	188	Weight Unit Code	C	ID	1/1
Not Used	W1216	438	U.P.C. Case Code	O	AN	12/12
Conditional	W1217	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2

Implementation Notes:

1. When citing the Federal Supply Classification (code FT) in W1207, always use code CN to identify the commodity name or description.
2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE.

CN Commodity Name

Code Value Implementation Note:

Use only with code FT to identify the material name or description.

ZB Commercial and Government Entity (CAGE) Code

Code Value Implementation Note:

Use only with code MG to identify the manufacturer's part number.

Conditional	W1218	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Not Used	W1219	892	Line Item Change Reason Code	O	ID	2/2
Not Used	W1220	893	Warehouse Detail Adjustment Identifier	O	ID	1/1

Required

Segment: N9 Reference Number

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 200

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.

2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Note:

Use multiple repetitions, as needed, to identify ancillary information related to the transaction.
Must use at least one repetition to identify the transaction number.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N901	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Note:

Use only one of codes 08, 16, 97, 1Y, AH, AW, BL, BM, IZ, K1, K2, K3, SI, or WY for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify the shipment unit number. Code supplements the cross reference between the TCN used for intransit control procedures and the applicable shipment identification number associated with the mode of shipment.

08 Carrier Assigned Package Identification Number

Code Value Implementation Note:

Use as needed to identify the shipment unit small package identification number when no other number is available.

16 Military Interdepartmental Purchase Request (MIPR) Number

Code Value Implementation Note:

Use, as needed, to identify the MIPR number for tracking "in-process" material.

1Y Repair Action Number

Code Value Implementation Note:

Use, as needed, to identify the DMISA line number for tracking "in-process" material.

2I Tracking Number

Code Value Implementation Note:

Use as needed to identify all shipments to a DRMO that qualify for intransit control procedures, e.g., the shipped material line item value is \$800 or more or the item is recorded as pilferable/sensitive. Cite Y in N902 if shipment meets specified criteria.

97 Package Number

Code Value Implementation Note:

Use as needed to identify the shipment unit package identification number.

AH Agreement Number

Code Value Implementation Note:

Use, as needed, to identify the Depot Maintenance Inter-Service Support Agreement (DMISA) number for tracking "in-process" material.

AW Air Waybill Number

Code Value Implementation Note:

Use as needed to identify the shipment unit air waybill number.

BL Government Bill of Lading

Code Value Implementation Note:

Use as needed to identify the government bill of lading (e.g., not through a CONUS regional freight consolidation center) to a CONUS destination.

BM Bill of Lading Number

Code Value Implementation Note:

Use as needed to identify the shipment unit commercial bill of lading number.

CT Contract Number

Code Value Implementation Note:

Use as needed on shipments of GFM to the contractor.

IZ Insured Parcel Post Number

Code Value Implementation Note:

Use as needed to identify the shipment unit insured parcel post number.

K1 Foreign Military Sales Notice Number

Code Value Implementation Note:

Use for FMS shipments made on a commercial bill of lading or commercial collect bill of lading, as needed, to identify the shipment unit FMS notice number.

K2 Certified Mail Number

Code Value Implementation Note:

Use as needed to identify the shipment unit certified mail number.

K3 Registered Mail Number

Code Value Implementation Note:

Use as needed to identify the shipment unit registered parcel post number.

SI Shipper's Identifying Number for Shipment (SID)

Code Value Implementation Note:

Use as needed to identify the shipment unit express mail number.

TG Transportation Control Number (TCN)

Code Value Implementation Note:

Use to identify the content of all shipments as specified by intransit control procedures.

TN Transaction Reference Number

Code Value Implementation Note:

Use to identify the transaction number assigned to this transaction.

W1 Defense Turn-In Document Number

Code Value Implementation Note:

Use as needed for disposal release confirmation and historical disposal release confirmation transactions only to identify the DTID.

W3 Manufacturing Directive Number

Code Value Implementation Note:

Use as needed on shipments of GFM to the contractor.

W8 Suffix

Code Value Implementation Note:

Use as needed to identify the suffix associated with the transaction number.

WO Work Order Number

Code Value Implementation Note:

Use as needed to identify a maintenance work order number.

WY Waybill Number

Code Value Implementation Note:

Use as needed to identify the shipment unit waybill number.

Required	N902	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
Not Used	N903	369	Free-form Description	C	AN	1/45
Not Used	N904	373	Date	O	DT	6/6
Not Used	N905	337	Time	C	TM	4/8
Not Used	N906	623	Time Code	O	ID	2/2

Optional

Segment: G62 Date/Time

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R0103 — At least one of G6201 or G6203 is required.
2. P0102 — If either G6201 or G6202 is present, then the other is required.
3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Note:

Use multiple repetitions, as needed, to define unique dates associated with the transaction.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
G6201	432	Date Qualifier Code specifying type of date.	C	ID	2/2
		09 Process Date			
		Code Value Implementation Note: Use with the transaction history to identify the date on which the material release advice was processed by the initiating activity.			
		11 Shipped on This Date			
		Code Value Implementation Note: Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify date material was shipped.			
		17 Estimated Delivery Date			
		Code Value Implementation Note: Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify the estimated shipping date or estimated date material will be available for shipment when shipment has not occurred.			
		BH Offered for Delivery			
		Code Value Implementation Note: Use as needed for material release advice and disposal release advice transactions only to identify the date material is tendered to the carrier for shipment.			
		BU Rejection			
		Code Value Implementation Note: Use as needed for material release denial, historical material release denial, disposal release denial, and historical disposal release denial transactions only to identify the date of warehouse refusal.			
		TR Transfer			

Code Value Implementation Note:

Use as needed for material release advice and disposal release advice transactions only to identify the date material is transferred to the carrier if a delay occurs prior to actual shipment.

Not Used	G6206	624	Century	O	N0	2/2

Required

Segment: QTY Quantity

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 10

Purpose: To specify quantity information.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
QTY01	673	Quantity Qualifier Code specifying the type of quantity.	M ID 2/2
		01 Discrete Quantity Code Value Implementation Note: Use as needed for material release advice and disposal release advice transactions only to identify the quantity for which status is being provided.	
		03 Discreet Quantity - Rejected Material Code Value Implementation Note: Use as needed for material release cancellation advice, historical material release cancellation advice, disposal release cancellation advice, and historical disposal release cancellation advice transactions to identify the quantity which was cancelled.	
		39 Shipped Quantity Code Value Implementation Note: Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify the quantity for which release is confirmed.	
		QC Quantity Disapproved Code Value Implementation Note: Use as needed for material release denial, historical material release denial, disposal release denial, and historical disposal release denial transactions only to identify the quantity of the warehouse refusal.	
		V1 Retention Quantity Code Value Implementation Note: Use as needed for disposal release confirmation disposal release denial, and historical disposal release confirmation transactions only to identify the quantity actually retained.	

Mandatory

QTY02	380	Quantity Numeric value of quantity.	M R 1/15
-------	-----	---	----------

Required

QTY03	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	O ID 2/2
-------	-----	---	----------

Implementation Note:

Use for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify the unit of issue for the material shipped. (See unit of issue conversion table in volume 1, chapter 10.)

Segment: AT Financial Accounting
Level: Detail
Loop: 0300
Usage: Optional
Max Use: >1
Purpose: To transmit financial accounting data
Syntax: C1001 — If AT10 is present, then AT01 is required.
Comment: AT09 identifies unique local activity financial accounting information

Implementation Note:

Use multiple repetitions, as needed, for material release confirmations and historical material release confirmations to identify the appropriations to cite to receive credit for the cost of the material, PCH costs, and transportation costs associated with the lateral redistribution of material.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Required	AT01	1271	Industry Code Code indicating a code from a specific industry code list	C AN 1/20
			Implementation Note: Use to identify the DLMS Fund Purpose Code. Use any code except CR or DR.	
Optional	AT02	1282	Treasury Symbol Number Number identifying a department, fiscal year, treasury account number, and appropriation limit for a standard accounting classification coding structure	O AN 7/21
			Implementation Note: Cite the basic appropriation (departmental index, fiscal year, treasury account number) and limit/subhead.	
Optional	AT03	1283	Budget Activity Number Number identifying an administrative subdivision of funds against which a transaction is to be charged for a standard accounting classification coding structure	O AN 1/16
Optional	AT04	1284	Object Class Number Number identifying the nature of the goods or services acquired and a specific office or organization using resources for a standard accounting classification coding structure	O AN 3/12
Required	AT05	1285	Reimbursable Source Number Number identifying the source of an appropriation or fund reimbursement for a standard accounting classification coding structure	O AN 1/3
			Implementation Note: Use to identify the DLMS fund code.	
Optional	AT06	1286	Transaction Reference Number Number identifying an original request for goods and services to the matching financial transaction for a standard accounting classification coding structure	O AN 4/20

Optional	AT07	1287	Accountable Station Number Number identifying an office responsible for entering a financial transaction into the applicable accounting system for a standard accounting classification coding structure	O AN	3/8
Optional	AT08	1288	Paying Station Number Number identifying an office responsible for making a payment or collection and the corresponding voucher number under which the action was taken for a standard accounting classification coding structure	O AN	8/14
Optional	AT09	352	Description A free-form description to clarify the related data elements and their content.	O AN	1/80
Implementation Note: <i>Use for the supplemental accounting classification accounting data.</i>					
Not Used	AT10	1270	Code List Qualifier Code	O ID	1/3

Optional

Segment: W27 Carrier Detail

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 1

Purpose: To specify details of the transportation equipment and carrier routing details

Syntax: R0203 — At least one of W2702 or W2703 is required.

Semantic: 1. W2702 is required when W2701 = B, E, H, I, K, L, M, P or T.

2. W2706 is required when W2701 = G or R.

Comment: Shipment/order status code is used at the total invoice level only when differences cannot be provided at the line item level or when the entire order has been shipped complete.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
W2701	91	Transportation Method/Type Code Code specifying the method or type of transportation for the shipment.	M ID 1/2

Implementation Note:

Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify the mode of shipment. (See volume 1, chapter 10 for the mode of shipment code conversion table.)

Required

W2702	140	Standard Carrier Alpha Code Standard Carrier Alpha Code	C ID 2/4
-------	-----	--	----------

Implementation Note:

Use ZZ for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The ZZ entry satisfies the X12 usage requirements; the receiving application software shall not process it.

Not Used

W2703	387	Routing	C AN 1/35
-------	-----	---------	-----------

Not Used

Optional

Segment: N1 Name

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 5

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/080 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/040 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address indicated in the 1/N1/040 loop with a different address specified the 2/N1/080 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Code subject to override: Z4.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

		Code identifying an organizational entity, a physical location, or an individual	
		CA Carrier	
		Code Value Implementation Note:	
		Use as needed for material release confirmations, historical material release confirmations, disposal release confirmations, and historical disposal release confirmations to identify the shipment unit carrier.	
		CN Consignee	
		Code Value Implementation Note:	
		Use as needed for material release cancellation advice and historical material release cancellation advice transactions to identify the consignee.	
		ST Ship To	
		Code Value Implementation Note:	
		Use for material release confirmations, historical material release confirmations, disposal release confirmations, and historical disposal release confirmations to identify the organization to receive the material.	
		Z4 Owning Inventory Control Point	
		Code Value Implementation Note:	
		Use to identify the ICP to receive the transaction set.	
N102	93	Name	C AN 1/35

Not Used

Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) 2 Standard Carrier Alpha Code (SCAC) Code Value Implementation Note: <i>Use as needed to identify the commercial carrier when no DoDAAC is assigned.</i> M4 Department of Defense Routing Identifier Code (RIC)	C	ID	1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Must use code TO in conjunction with the appropriate 2/N101/080 code to indicate the organization receiving the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Detail

Loop: 0310 **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Notes:

1. Must use the 2/LM/090 loop if not using the 1/LM/160 loop.
2. For any specific table 2 iteration use this 2/LM/090 loop as needed: 1) to identify a DoD code when the LQ01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/160 loop or 2) to identify a DoD code when the LQ01 qualifier applies to all table 2 iterations but the LQ02 DoD code varies among most of them or 3) to override an LQ02 DoD code in the 1/LM/160 loop with a different DoD code in the 2/LM/090 loop when the same LQ01 qualifier is used in both loops, but the LQ02 DoD code is different. (Codes subject to override: 0, 36, 37, 38, 58, 82, 83, 92, 93, 99, A1, AK, DE, DF, and DG.)

Level: Detail

Loop: 0310

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3

Implementation Note:

Use one of codes 99 or A1 (but not both), as needed.

0 Document Identification Code

36 Air Terminal Identifier Code

Code Value Implementation Note:

Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify air terminal identification codes for OCONUS shipments made via DTS air modes.

37 Water Terminal Identifier Code

Code Value Implementation Note:

Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify water terminal identification codes for OCONUS shipments made via DTS water modes.

38 Consolidation and Containerization Point Code

Code Value Implementation Note:

Use as needed for CONUS destination shipments to identify the applicable regional freight consolidation center through which a shipment will transit.

58 Transportation Bill Code

Code Value Implementation Note:

Use as needed for SA material release confirmation and historical material release confirmation transactions only to identify the appropriate transportation billing information.

78 Project Code

Code Value Implementation Note:

Use as need to identify special programs, exercises, projects, operations, and other purposes.

79 Priority Designator Code

Code Value Implementation Note:

Use as needed to identify the supply priority assigned to this transaction.

81 Status Code

Code Value Implementation Note:

Use as needed to identify any applicable supply status information.

83 Supply Condition Code

Code Value Implementation Note:

Use to identify the supply condition code of the material referenced in the transaction.

84 Management Code

Code Value Implementation Note:

Use to identify any applicable management information related to the material referenced in the transaction.

87 Subsistence Type of Pack Code

Code Value Implementation Note:

Use as needed with subsistence items only for denials.

88 Disposal Authority Code

Code Value Implementation Note:

Use as needed to indicate that the designated material is authorized for shipment to a disposal or reutilization facility.

90 Precious Metals Indicator Code

Code Value Implementation Note:

Use as needed to identify the precious metal content of the specified material.

91 Automated Data Processing Equipment Identification Code

Code Value Implementation Note:

Use as needed to identify ADPE identification information.

92 Reason for Disposal Code

Code Value Implementation Note:

Use as needed for disposal release confirmation and historical disposal release confirmation transactions only to identify the reason for transfer of the shipment unit.

93 Type of Storage Code

Code Value Implementation Note:

Use as needed for material release confirmation and historical material release confirmation transactions only to identify the minimum level of storage environment required for the shipment unit.

99 Purpose Code

A1 Ownership Code

AK Distribution Code

BC Transportation Holding Delay Code

Code Value Implementation Note:

Use as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to identify the reason shipment has been delayed.

DE Signal Code

DF Media and Status Code

DG Fund Code

HD Discrepancy Status or Disposition Code

Code Value Implementation Note:

Use as needed to material release confirmation when discrepant or deficient material has been shipped.

Required

Code indicating a code from a specific industry code list

C AN 1/20

Optional

Segment: **LX** Assigned Number

Level: Detail

Loop: 0320 Repeat: >1

Usage: Optional

Max Use: 1

Purpose: To reference a line number in a transaction set.

Implementation Notes:

1. Use as a counter to identify the number of 2/LX/110 loop iterations in the transaction set.
2. Use the 2/LX/110 loop as needed for material release confirmation, historical material release confirmation, disposal release confirmation, and historical disposal release confirmation transactions only to provide UIT information.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LX01	554	Assigned Number Number assigned for differentiation within a transaction set.	M NO 1/6

Implementation Note:

In the first 2/LX/110 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Optional

Segment: N9 Reference Number

Level: Detail

Loop: 0320

Usage: Optional

Max Use: >1

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.
2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Note:
Use to identify either a unique item identifier or a lot number.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N901	128	Reference Number Qualifier Code qualifying the Reference Number. ------	-----	--	----------

6 ASSET STATUS REPORTING

6.1 IN STORAGE ASSETS

This subsection prescribes procedures for the interchange of asset status information between Component wholesale and below wholesale distribution systems and owners/managers. Assets within the wholesale distribution system are reported in accordance with this volume. Assets below the wholesale distribution system shall be reported when requested by the owner/manager. Use the TS 846 IC - Asset Status Inquiry/Report (appendix 6A) with the appropriate asset status code to request, change, or discontinue asset status reporting from the below wholesale distribution system.

6.2 SUPPLY AND SHIPMENT STATUS - GENERAL

Status data is either supply status or shipment status. Supply sources prepare status transactions using the applicable appendices described under subsections 6.2.1 and 6.2.2, below. Status data may be informational or require additional action by organizations based on the assigned status code. (Status recipients include, but are not limited to, requisitioners, control offices, and/or monitoring activities.) For SA shipment status, the control office or monitoring activity receives the status from the supply source and provide it to the appropriate country status recipient. (For FMS customers, the status goes to the MAPAD TAC 4 country status recipient. For MAP/GA customers, the status goes to the MAPAD TAC 3 country/in-country SAO status recipient.)

- Supply status informs organizations of action taken or being taken on material requisitioned but not shipped, shipment consignment instructions, or disposition instructions for material offered under the MRP. See appendices 6B, 6C, and 6D.
- Shipment status informs organizations of the actual shipping dates (such as, the date released to the carrier), the release criteria for shipments, or shipment delay notifications. It also provides for an interface with transportation and for shipment tracing by organizations under Volume 3, Transportation. See appendixes 6E, 6F, and 6G.

6.2.1 TYPES OF SUPPLY STATUS

6.2.1.1 SUPPLY STATUS

Use appendix 6B.

6.2.1.1.1 RESPONSE TO REQUISITION

Supply sources (or MCAs processing GFM transactions) use the TS 870 IC - Supply Status (appendix 6B) with appropriate status codes to convey advice to organizations as notice of action taken or being taken on requisitions and requisition-related transactions; such as, retransmitted requisitions, cancellations, modifications, and requisition inquiries (followups and/or requests for supply assistance). Organizations must identify additional status addressees in the original requisition and/or requisition-related transactions, as applicable. DAASC generates supply status in selected situations resulting from item identification edits but will indicate their DoDAAC as the MESSAGE FROM address in the supply status.

Supply sources or MCAs use the response to requisition to advise organizations of the following action decisions (as indicated), alone or in combination. This includes status upon processing

a requisition inquiry (followup and request for supply assistance) or a cancellation request and rejection status when rejecting transactions.

- Backorder.
- Partial issue or partial other action.
- Material substitution.
- Unit of issue changes.
- Retransmitted (rerouted) requisitions.
- Cancellation, modification, or inquiry.
- Any circumstance which predict that issue may not be made within the timeframes established for the assigned PD.

6.2.1.1.2 NOTICE OF RESPONSE TO DIRECT VENDOR DELIVERY

Supply sources use the notice of response to DVD to advise organizations that material is being supplied by DVD from procurement. The supply (procurement) source generates this notice for each requisition that is procured for DVD to a consignee. The DVD TS 870 IC - Supply Status notice provides a cross-reference between the requisition transaction reference number and the contract information. Organizations may also use the information in this notice to report the nonreceipt of material.

6.2.1.1.3 NOTICE OF RESPONSE TO SUPPLY ASSISTANCE

Supply sources use the notice of response to supply assistance to advise organizations of action taken to expedite the shipment of the requested material.

6.2.1.2 NOTICE OF AVAILABILITY REPLY

Use appendix 6C.

6.2.1.2.1 RESPONSE TO NOTICE OF AVAILABILITY

FMS CRs/FFs use the response to the NOA to provide shipment consignment instructions to shipping activities for material reported available for shipment.

The CR/FF use the response to the NOA to respond to the key NOA specifying shipment consignment instructions, if any, and must coordinate these or other shipment or delivery instructions with the MTMC releasing authority. The CR/FF must indicate in the response to the NOA the date when separate shipment instructions, if required, were mailed.

Shipment release instructions must provide for shipment or delivery of material to a single destination by shipment unit. Shipping activities must not split shipment units identified by shipment unit numbers to accommodate shipments or deliveries to multiple points. Specify the need for coordinated instructions in instructions to the CRs/FFs regarding replies to NOAs when an export release is required and include provisions for the following minimum data in the replies to the other NOAs:

- The complete name and address of the consignee except when the CR/FF will pick up the material.
- The date the material is to be shipped or the date when the CR/FF will pick up the material.
- The complete name and telephone number(s) of the individual(s) who will be available and authorized to receive on behalf of the purchasing country, for the specific classified shipment covered by the NOA advising of the availability of a classified shipment.

In instances where the shipment does not require an export release or the shipping activity has determined that there is no requirement for a high degree of protection or control and Country FMS Offer/Release Option Y is indicated for the material, release the shipment to the CR/FF on the 15th calendar day after the NOA date, unless alternate shipping instructions are received. When an export release is required, the shipment will be held pending receipt of releasing and shipping instructions from the MTMC releasing authority and if such instructions are not received within 15 calendar days after the NOA date, followup only to MTMC instead of transmitting a duplicate NOA.

In instances where the shipping activity has determined a need for a high degree of protection of control or Country FMS Offer/Release Option Z is indicated for the material, the shipment will be held pending receipt of releasing and shipping instructions from the CR/FF. Should such instructions not be received within 15 calendar days after the NOA date, transmit a duplicate of the NOA to the designated notice recipient, with the same shipment unit number assigned. This duplicate NOA indicates that the shipment delay is caused by the CR/FF's failure to furnish releasing and shipping instructions.

6.2.1.3 MATERIAL RETURNS SUPPLY STATUS

Organizations and supply sources use the TS 870 IC - Material Returns Supply Status (appendix 6D), to convey advice to one another as notice of action taken or being taken on the OMRs and OMR-related transactions. Organizations use the TS 870 IC - Material Returns Supply Status to provide status to the ICPs/IMMs. The ICPs/IMMs use the TS 870 IC - Material Returns Supply Status to provide status or disposition instructions for material to organizations, including disposition instructions related to discrepant material reported under chapter 18. Use chapter 12 to determine the processing procedures for and the prescribed usage of this status.

6.2.1.3.1 UNSOLICITED REPORT

Customer organizations use the unsolicited report TS 870 IC - Material Returns Supply Status to provide status to the supply source on open OMRs for unshipped material.

6.2.1.3.2 RESPONSE TO MATERIAL RETURNS

Supply sources use the TS 870 IC - Material Returns Supply Status to provide informational status or disposition instructions to organizations for material reported under the MRP.

6.2.2 TYPES OF SHIPMENT STATUS

6.2.2.1 SHIPMENT STATUS

See appendix 6E.

6.2.2.1.1 SHIPMENT ADVICE

Supply sources use the TS 856 IC - Shipment Status (appendix 6E) to provide shipment status information related to requisitions.

6.2.2.2 NOTICE OF AVAILABILITY

The U.S. shipping organization uses the TS 856 IC - Notice of Availability (appendix 6F) to notify the designated CR/FF that material is ready for shipment. All classified shipments and certain unclassified shipments for those countries specifically requesting NOAs, such as the Federal Republic of Germany, must have NOAs. Each NOA has an assigned FMS notice number which is the control number assigned to the shipment.

When a country replies to a NOA by TS 870 IC - Notice of Availability Reply (appendix 6C) and rejects the shipment because the shipment unit contains material which constitutes a duplicate shipment, the U.S. shipping organization must withdraw the rejected material from the shipment and prepare a new NOA.

6.2.2.2.1 DELAYED

Use TS 870 IC - Notice of Availability to indicate that all of the referenced shipments are delayed.

6.2.2.2.2 EXPORT RELEASE NOT REQUIRED

Use TS 870 IC - Notice of Availability to indicate that all of the referenced shipments do not require export release instructions.

6.2.2.2.3 EXPORT RELEASE REQUIRED

Use TS 870 IC - Notice of Availability to indicate that all of the referenced shipments require export release instructions.

6.2.2.3 SHIPMENT STATUS MATERIAL RETURNS

Use TS 856 IC - Shipment Status Material Returns (appendix 6G) to indicate the shipment of OMR material.

6.2.3 REQUESTING STATUS

Organizations use the TS 511 IC - Requisition Inquiry (appendix 5A) to request status on a previously submitted requisition.

To assure that supply sources will automatically provide status data to all of the organizations required to receive supply and/or shipment status, identify all of the additional organizations to receive status in the initial requisition or in requisition-related transactions.

6.2.4 USE OF STATUS RECEIVED

Organizations receiving status must promptly record all the status information received (automatically and/or in response to requisition inquiries) to applicable due-in records and/or requisition history (status) files, and, in the case of the DRMS, the disposal suspense file. Status recipients will use the supply status data to establish or update the due-in record to monitor for

material receipts under chapter 13. In addition, status recipients must:

- Give particular attention to the transaction date in the supply status received to ensure that records/files are updated in the proper chronological order/date sequence.
- Review the TS 870 IC - Supply Status (appendix 6B) received for additional action required by the status code, if any. If a requisition has been rejected with a rejection status code, and the material is still required, submit the requirement as a new requisition with a new transaction reference number and a current transaction date.
- Anticipate receipt of material within the prescribed UMMIPS timeframe for the assigned PD, or the RDD cited in the requisition, upon receipt of supply status without an ESD.
- Evaluate the status already received prior to submitting requisition inquires to followup for additional status.

6.2.5 FURNISHING STATUS - GENERAL

Supply sources must automatically furnish TS 870 IC - Supply Status when processing requisitions, RDOs, cancellations, modifications, and requisition inquiries (followups and requests for supply assistance). MCAs must furnish reject status for requisitions they process. Supply sources must maintain and furnish current supply status as provided below. For these purposes, MCAs and supply sources must maintain accessible requisition history records for a minimum of six months after completing a shipment of material or canceling a requisition, to provide for timely status responses. MCAs must maintain requisition history records until contract termination.

Supply source initiated requisition status includes all status transactions (supply and shipment) generated during supply source processing that is not produced in response to requisition inquiries or cancellation requests.

Supply sources must provide supply status based on normal requisition processing including additional supply status due to changes in requisition processing; such as, cancellation actions, modifications, item substitutions, DVD actions, changes in ESDs (when retransmitting requisitions to another supply source), and requisition inquires (followups and requests for supply assistance). MCAs must furnish reject status for requisitions they process. For the purpose of furnishing status and providing a timely response to requisition inquiries, MCAs and supply sources must maintain accessible requisition history records for a minimum of 6 months after completing a shipment or canceling a requisition. MCAs must maintain requisition history records until contract termination. In addition, supply sources must furnish:

- TS 870 IC - Supply Status with BB supply status (citing the scheduled ESD for release of material from stock to the customer) when backordering a requisition against a due-in to stock. The supply source will always furnish additional BB status to organizations with a revised ESD when adjusting shipping dates.
- TS 870 IC - Supply Status with BZ supply status with an ESD after deciding to process the requirement as a DVD shipment. The supply sources must furnish BV status after effecting contracts or procurement actions and establishing an agreed-to contract shipping date. This BV status must contain the contract shipping date and also the contract data which provides organizations with a cross-reference to the original requisition.
- TS 870 IC - Supply Status with Additional BV status with a revised ESD to organizations when adjusting contract shipping dates on items scheduled for DVD.

The supply source may reject a requisition or initiate a manual off-line request to obtain the additional information necessary to continue processing when in receipt of a requisition which contains insufficient information to allow processing actions or to complete processing actions. Use the STATUS TO organization identified in the requisition as the action addressee on all requests for additional information. Treat the other organizations identified in the requisition which are not designated as STATUS TO organizations as information addressees on requests for additional information. When such an inquiry for additional information is made, the supply source will provide TS 870 IC - Supply Status with BD status to all designated STATUS TO organizations. Supply sources will suspend further action on requisitions awaiting additional information until a response is received or until 30 days have elapsed from the date the inquiry was made, whichever occurs first. Upon receipt of the requested additional information, the supply source will continue normal processing. If the organization does not provide the needed additional information after the 30-day cutoff, the supply source will reject the requisition TS 870 IC - Supply Status with D3 status.

For each reinstated requisition, retransmitted (rerouted) requisition, requisition modifier, and MRO processed, supply sources will automatically furnish supply and/or shipment status, as appropriate.

For each shipment on a DTID, the shipping organization must provide a TS 945 IC - Material Release Advice (appendix 5F) or a TS 856 IC - Shipment Status (appendix 6E) with appropriate intransit control coding as specified under the chapter 17 procedures for the material being shipped to the DRMS.

Supply sources will provide TS 870 IC - Supply Status BB status when a requisition or a reinstated requisition is backordered against a due-in to stock. This status will contain the ESD for release of material from stock to the customer. When shipping dates are adjusted, the supply source will furnish additional BB status with the revised ESD.

Supply sources will furnish TS 870 IC - Supply Status exception supply status when the intent to process for DVD is known. This exception status will contain Status Code BZ and the ESD. When contracts or procurement actions have been effected and an agreed-to contract shipping date is established, supply sources will furnish additional BV status indicating the contract shipping date.

When contract shipping dates are adjusted on items scheduled for DVD, the supply source will provide TS 870 IC - Supply Status with additional BV status to indicate the revised shipping date. Supply sources use the DVD notice TS 870 IC - Supply Status to notify organizations of material being supplied by DVD. This notice provides a cross-reference between the transaction reference number and the contract data. When delivery dates are established for DVD shipments, the supply source will provide the DVD notice in addition to the supply status.

The use of supply and shipment status is mandatory for all supply source initiated requisition status. Supply source initiated requisition status includes all status generated during supply source processing that is not produced in response to followups or cancellation requests.

6.2.5.1 PREPARATION OF STATUS

All supply status transactions evidencing that material will be released for shipment later than the SDD or RDD/RDP will contain an ESD. Such supply status is applicable to material obligations including procurement for DVD. Conversely, the supply source will reject requisitions which contain Advice Code 2C, 2J, 2T, or 2W with CB status when items are not available for immediate

release or cannot be supplied by the SDD/RDD/RDP with a TS 870 IC - Supply Status.

ESDs are also mandatory entries for those transactions reporting adjusted ESDs and any circumstance which predict that issue may not be made within the timeframes established for the PD. Storage facilities in receipt of requisition inquiries on requirements which are in the process of being filled will use the supply status to provide ESDs to the requesting supply source. Status transactions providing advice of such events as changes in stock numbers, unit of issue changes, rejections, and shipments, will not contain an ESD.

Supply sources must use TS 870 IC - Supply Status with status codes in the C and D series when rejecting requisitions and RDOs.

Status furnished by TS 870 IC - Supply Status in response to a TS 869 IC - Requisition Inquiry will contain the most current information available regarding the status of the requisition. Supply status in response to a requisition inquiry must contain a changed/new ESD, when applicable, and a transaction date that corresponds to the date of the reply. TS 856 IC - Shipment Status in response to a requisition inquiry must contain the shipping data for the material shipped.

The CA and TD status are the only status conditions to which the supply source will provide a narrative explanation (in a free-form format) identifying the reason for rejection.

TS 870 IC - Supply Status with BF status furnished in response to cancellation requests with a transaction reference number not matching supply source records preclude supply source processing of subsequently received transactions for this same transaction reference number. When providing BF status in response to a cancellation request, also provide BF status in response to all other transactions received which contain the same transaction reference number. Supply sources do no other processing of these transactions. Supply sources retain accessible history records of BF status generated from processing no-record cancellation requests for a minimum of 6 months following the generation of the BF status.

Use chapter 12 procedures for providing MRSS transactions resulting from processing OMRs and OMR-related transactions.

6.2.5.2 TIME STANDARDS FOR PROVIDING STATUS TRANSACTIONS

When required, supply sources will dispatch applicable status on requisitions, retransmitted requisitions, reinstated requisitions, and responses to requisition inquiries within the times prescribed below:

Supply Status:

- Two days from receipt of PD 01-08 transactions.
- Five days from receipt of PD 09-15 transactions.
- Twenty-four hours after release of MOV requests.

Shipment Status:

- Twenty-four hours after shipment (or release to carrier) for PD 01-03 transactions.
- Forty-eight hours after shipment for PD 04-08 transactions.

- Three working days after shipment for PD 09-15 transactions.
- Twenty-four hours from receipt of PD 01-03 requisition inquiries.
- Forty-eight hours from receipt of PD 04-08 requisition inquiries.
- Three working days from receipt of PD 09-15 requisition inquiries.

6.2.6 DISTRIBUTION OF STATUS

Supply sources must automatically provide supply and/or shipment status in response requisition cancellations, including mass and universal cancellations. In addition to status furnished to organizations, the DAASC will provide shipment status to storage/procurement activities and/or the supply source (when DVD actions with BV status are applicable) on all affected shipments which have entered the DTS during mass or universal cancellation situations. Supply sources must furnish the status of cancellation actions within 5 days of receipt of the requisition cancellations. Supply sources must revise this status as further actions are taken on the cancellation request.

The supply source must address supply and shipment status furnished in response to requisition cancellations as follows:

- When there is no record of the requisition cancellation, address the status transaction to the requisitioner.
- When there is a record of the requisition cancellation, address the status transaction to the organization(s) identified in the cancellation request, including any additional status organizations.

6.3 LOGISTICS ASSET SUPPORT ESTIMATE

This section prescribes a standard procedure for authorized activities of the Military Services/DLA to determine the ability of the IMMs to support contingency or operational plans, projects, and other important programs. This program is not intended for routine supply status inquiries as described in chapter 5. Rather, this program is to obtain a general estimate of the type of supply support which might be anticipated when a specific requisition is not pertinent to the inquiry. Personnel responsible for scheduling, planning, or reporting on the overall supply support status of major equipment or systems, will initiate LASE inquiries in conjunction with particular programs or projects.

The provisions of this section are applicable to HQ DLA, DSCs except the Defense Fuel Supply Center, Service ICPs functioning as IMMs, and selected activities of the Army, Navy, Air Force, Marine Corps, and Coast Guard.

Use TS 846 IC - Logistics Asset Support (appendix 6H) to effect LASE procedures as follows:

- Forecasting activities use to submit LASE inquiries to the IMM.
- IMMs use to respond to the forecasting activity inquiry.

6.3.1 ASSET SUPPORT INQUIRIES

Only the authorized activities listed in subsection 6.3.6 may submit LASE inquiries to IMMs. IMMs will validate the DoDAAC of incoming requests and reject those with invalid or

unauthorized entries as prescribed in subsection 6.3.5.

Authorized activities will determine the type of logistic data required and will submit LASE inquiries using the TS 846 IC - Logistics Asset Support citing the request code applicable to the type of asset information required. The request code will determine if asset data will be for issuable onhand and due-in assets, backorder, or both asset and backorder availability.

6.3.2 ASSET SUPPORT RESPONSE

IMMs will prepare LASE responses using TS 846 IC - Logistics Asset Support containing the data specified by the submitting activity.

IMMs will normally respond to LASE inquiries within 5 working days after receipt and, in all instances, must respond within 10 working days.

When the IMM receives a LASE inquiry on a non-preference item, the IMM may provide data for the replacing preferred item. When this option is exercised, the LASE response will cite the replacing preferred item.

IMMs will use data contained in each LASE response for review and control. IMMs will retain this data for at least 90 days.

IMMs will reject LASE inquiries when necessary in accordance with subsection 6.3.4.1.

6.3.3 NONRESPONSE TO LASE INQUIRIES

When the authorized activity has not received a response to LASE inquiry within 15 calendar days from the submission date, the authorized activity may submit a new LASE inquiry to the appropriate IMM, in accordance with subsection 6.3.1.

6.3.4 DAASC PROCESSING

DAASC will pass or route LASE inquiries as follows:

- If the inquiry is directed to the correct SOS, DAASC will pass the transaction to that activity.
- If the inquiry is directed to an incorrect SOS, and the correct SOS is not GSA, DAASC will reroute the transaction to the correct SOS and transmit a TS 870 IC - SPR/LASE Status (appendix 3B, chapter 3) to the submitter citing Status Code BM. Recipients of Status Code BM will update their records to reflect the correct SOS.
- If the inquiry is directed to a correct GSA SOS, or to an incorrect SOS but GSA is the correct SOS, DAASC will reject the transaction to the submitter using TS 824 IC - Reject citing Reject Advice Code AY.

6.3.4.1 IMM VALIDATION AND REJECTION

IMMs will reject or provide status for LASE inquiries citing the appropriate reject or status code as follows:

- IMMs will transmit a TS 824 IC Reject for LASE inquiries submitted by DoDAACs not authorized in subsection 6.4.5 citing Reject Advice Code AV.

- IMM will transmit a TS 82 IC - Reject for LASE inquiries received for an obsolete/inactive NSN which the IMM cannot support citing Reject Advice Code CJ.
- IMM will transmit a TS 824 IC - Reject for LASE inquiries received for an item that is not centrally managed and stocked citing Reject Advice Code AU.
- FSC/NIIN Compatibility. When the IMM receives a LASE inquiry with an incompatible FSC and NIIN, the IMM will research to determine if the FSC matches a previously assigned FSC for the NIIN and take action as follows:
 - If the FSC matches, change the FSC to the correct FSC, continue processing the inquiry, and furnish the submitter with a TS 870 IC- SPR/LASE Status (appendix 3B) citing Status Code BG. Recipients of Status Code BG will update their records to reflect the correct FSC.
 - If the FSC does not match, reject the inquiry to the submitter using a TS 824 - Rejectr citing Status Code CG.

**TRANSACTION SET 846 IMPLEMENTATION CONVENTION
ASSET STATUS INQUIRY/REPORT**

846 Inventory Inquiry/Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Implementation Notes

1. Organizations use this transaction set to request and/or report asset status and inventory balance information.
2. Use a single occurrence of this transaction set to exchange transactions with a single or multiple organizations; Use one occurrence of this transaction set to transmit a single or multiple transactions.

NOTES/COMMENTS:

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume I, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
	846	X12.28 Inventory Inquiry/Advice			

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	---	---	----	-----

Mandatory

Segment: BIA Beginning Segment for Inventory Inquiry/Advice

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of an inventory inquiry/advice transaction set.

Semantic: 1. BIA03 identifies the number of the inquiry/advice that is transferred.

2. BIA04 identifies the date of the inquiry/advice that is transferred.

3. BIA05 identifies the time of the inquiry/advice that is transferred.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
BIA01	353	Transaction Set Purpose Code Code identifying purpose of transaction set.	M ID 2/2
	00	Original	
	77	Simulation Exercise	
		Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	

Mandatory

BIA02	755	Report Type Code Code indicating the title or contents of a document, report or supporting item	M ID 2/2
	TI	Asset Status Inquiry	
		Code Value Implementation Note: <i>Use to identify a request for asset information.</i>	
	TJ	Asset Status Advice	
		Code Value Implementation Note: <i>Use to identify an asset status report.</i>	

Mandatory

BIA03	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	M AN 1/30
		Implementation Note: <i>Use a Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	

Mandatory

BIA04	373	Date Date (YYMMDD).	M DT 6/6
		Implementation Note: <i>Express the originating activity's date of transaction set preparation in GMT.</i>	

Required	BIA05	337	Time	O	TM	4/8
Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)						

Implementation Notes:

1. Express the originating activity's time of transaction set preparation in GMT.
2. Express time in a four-position (HHMM) format.

Not Used	BIA06	306	Action Code	O	ID	1/2
----------	-------	-----	-------------	---	----	-----

Segment: DTM Date/Time Reference**Level:** Header**Loop:** ____

Optional

Usage: Optional**Max Use:** 10**Purpose:** To specify pertinent dates and times**Syntax:** 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.

2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:

Use this 1/DTM/050 segment to indicate the date when a DTM01 qualifier code (e.g., 106) applies to ALL table 2 iterations and the same DTM02 date applies to all or most of the table 2 iterations. For any specific table 2 iteration where the date is to differ from the one indicated in table 1, use the 2/DTM/100 segment and specify the matching qualifier in DTM01 and the different date in DTM02. This will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/DTM01/050 that does not apply to all of the table 2 iterations. (Codes subject to override: 090, 091, 106, and 600.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time.	M	ID	3/3
		090 Report Start			
		Code Value Implementation Note: Use as needed for asset status inquiries only to identify the start date for inventory reporting.			
		091 Report End			
		Code Value Implementation Note: Use as needed for asset status inquiries only to identify the stop-date for inventory reporting.			
		106 Required By			
		Code Value Implementation Note: Use as needed for asset status inquiries only to identify the date by which a one-time asset status report is required.			
		600 As Of			
		Code Value Implementation Note: Use for asset status reports only to identify the close of business date associated with the inventory information.

Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.
Implementation Note:
Use the 1/N1/080 loop to cite the organization originating the transaction set.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual SB Storage Area Code Value Implementation Note: Use to indicate a depot or storage activity. Z4 Owning Inventory Control Point	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:
Must use code FR in conjunction with the appropriate 1/N101/080 code to indicate the organization sending the transaction set.

FR Message From
Code Value Implementation Note:
Use to indicate that the organization cited in N104 transmitted the transaction set.

Optional

Segment: LM Code Source Information**Level:** Header**Loop:** LM **Repeat:** 10**Usage:** Optional**Max Use:** 1**Purpose:** To transmit standard code list identification information**Comment:** LM02 identifies the applicable industry code list source information.**Implementation Note:**

Use this 1/LM/140 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/260 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/150 that does not apply to all the table 2 iterations. (Codes subject to override: 0.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M ID 2/2

LM02	822	Source Subqualifier	O AN 1/15
------	-----	----------------------------	-----------

Mandatory

Segment: LQ Industry Code

Level: Header

Loop: LM

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LQ01	1270	Code List Qualifier Code	O	ID	1/3
		Code identifying a specific industry code list			
		0 Document Identification Code			

Required

LQ02	1271	Industry Code	C	AN	1/20
		Code indicating a code from a specific industry code list			

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN **Repeat:** 10000

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/LIN010 loop to identify the material, transaction number, and inventory information associated with asset status reporting.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

Not Used	LIN01	350	Assigned Identification	O	AN	1/11
Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
Implementation Notes: 1. Use only one of codes A1, A2, A4, FS, or MG to identify the item of inventory. 2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE. A1 Plant Equipment Number Code Value Implementation Note: Use to identify plant equipment. A2 Department of Defense Identification Code (DoDIC) Code Value Implementation Note: Use to identify ammunition items. A4 Subsistence Identification Number Code Value Implementation Note: Use to identify subsistence items. FS National Stock Number Code Value Implementation Note: Must use the NSN when known. MG Manufacturer's Part Number Code Value Implementation Note: Use to identify nonstandard material. ZB Commercial and Government Entity (CAGE) Code Code Value Implementation Note: Use only with code MG to identify a manufacturer's part number.						
Mandatory	LIN03	234	Product/Service ID Identifying number for a product or service.	M	AN	1/40

Optional

Segment: DTM Date/Time Reference

Level: Detail

Loop: LIN

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. Must use 2/DTM/100 if not using 1/DTM/050.
2. For any specific table 2 iteration use this 2/DTM/100 segment as needed: 1) to identify the date when a DTM01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/DTM/050 segment or 2) when the DTM01 qualifier applies to all table 2 iterations but the DTM02 date varies among most of them or 3) to override a date in the 1/DTM/050 segment with a different date specified in the 2/DTM/100 segment when the same DTM01 qualifier is used in both segments, but the DTM02 date is different. (Codes subject to override: 090, 091, 106, and 600.)

Data Element Summary

Mandatory

Segment: QTY Quantity

Level: Detail

Loop: QTY **Repeat:** 99

Usage: Optional

Max Use: 1

Purpose: To specify quantity information.

Implementation Note:

Use successive iterations of the 2/QTY/320 loop, as needed, in asset status reports only to stratify inventory values and UIT information by material classification.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
QTY01	673	Quantity Qualifier Code specifying the type of quantity.	M ID 2/2
		17 Quantity on Hand	
		Code Value Implementation Note: Use to identify the on hand quantity.	
		60 Total Authorized Quantity	
		Code Value Implementation Note: Use as needed to identify the operating level, the quantity of material required to sustain operations in the interval between replenishments.	
		BA Due-In	
		Code Value Implementation Note: Use as needed to identify the total quantity reflected as due-in on inventory records.	
		BQ Backorder Quantity	
		Code Value Implementation Note: Use as needed to identify the total quantity reflected as backordered on inventory records.	
		V1 Retention Quantity	
		Code Value Implementation Note: Use as needed to identify the quantity of material an activity is authorized to retain above its requisitioning objective.	
		XJ Other War Reserve Material Requirements Protectable (OWRMRP) Quantity	
		Code Value Implementation Note: Use as needed to identify the quantity intended to provide the interim support essential to sustain operations until resupply can be effected.	
		XU Reserved	
		Code Value Implementation Note: Use as needed to identify the total quantity reflected as reserved for special projects or programs on inventory records.	
		XV Requisitioning Objective	
		Code Value Implementation Note: Use as needed to identify the calculated requisitioning objective of the item reported.	
		XY Safety Level	

Code Value Implementation Note:

Use as needed to identify the quantity of material which is required to be on hand to permit continued operation in the event of minor interruption of normal replenishment or unpredictable fluctuation in demand.

YA Total Demand Quantity

Code Value Implementation Note:

Total number of items ordered.

YB Total Demand Orders

Code Value Implementation Note:

Total number of demand transactions reflected in total demand quantity.

Mandatory

QTY02 380 Quantity
Numeric value of quantity.

M R 1/15

Implementation Note:

Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.

Not Used

QTY03 355 Unit or Basis for Measurement Code

O ID 2/2

Optional

Segment: LM Code Source Information

Segment: LS Loop Header

Level: Detail

Loop: QTY

Usage: Optional

Max Use: 1

Purpose: To indicate that the next segment begins a loop

Semantic: One loop may be nested contained within another loop, provided the inner nested loop terminates before the outer loop. When specified by the standard setting body as "mandatory", this segment in combination with "LE", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

Comment: See Figures Appendix for an explanation of the use of the LS and LE segments.

Implementation Note:

Use as needed in each 2/QTY/320 loop to prevent a syntax error in the use of the 2/REF/390 loop.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LS01	447	Loop Identifier Code	M AN 1/4
		The loop ID number given on the transaction set diagram is the value for this data element in segments LS and LE	

Implementation Note:

Cite REF to indicate the 2/REF/390 loop.

Optional	Segment:	REF Reference Numbers				
	Level:	Detail				
	Loop:	REF	Repeat:	>1

Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Optional

Segment: N1 Name
Level: Detail
Loop: REF
Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.
Implementation Note:
Use to identify the manufacturer of the UIT item.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual MF Manufacturer of Goods	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 33 Commercial and Government Entity (CAGE)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Not Used	N106	98	Entity Identifier Code	O ID 2/2

Optional

Segment: LE Loop Trailer

Level: Detail

Loop: QTY

Usage: Optional

Max Use: 1

Purpose: To indicate that the loop immediately preceding this segment is complete

Semantic: One loop may be nested contained within another loop, provided the inner nested loop terminates before the other loop. When specified by the standards setting body as "mandatory", this segment in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop beginning segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

Comment: See Figures Appendix for an explanation of the use of the LE and LS segments.

Implementation Note:

Use as needed in each 2/QTY/320 loop to annotate the conclusion of any 2/REF/390 loop iteration.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LE01	447	Loop Identifier Code	M AN 1/4
The loop ID number given on the transaction set diagram is the value for this data element in segments LS and LE			

Implementation Note:

Repeat the content of 2/LS/380.

Required

Segment: N1 Name
Level: Detail
Loop: N1 **Repeat:** 200
Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.
Implementation Note:
Use the 2/N1/450 loop to, as a minimum, identify the organization to receive the transaction set.
Use multiple repetitions of the 2/N1/450 loop to identify all transaction set recipients, as required.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N101	98 Entity Identifier Code	M	ID	2/2
		Code identifying an organizational entity, a physical location, or an individual			
		LG Location of Goods			
		Code Value Implementation Note: Use as needed for asset status reports only to identify the asset storage organization when different from the organization originating the transaction set.			
		SB Storage Area			
		Code Value Implementation Note: Use to indicate a depot or storage activity.			
		Z4 Owning Inventory Control Point			
Not Used	N102	93 Name	C	AN	1/35
Required	N103	66 Identification Code Qualifier	C	ID	1/2
		Code designating the system/method of code structure used for Identification Code (67).			
		10 Department of Defense Activity Address Code (DODAAC)			
		M4 Department of Defense Routing Identifier Code (RIC)			
Required	N104	67 Identification Code	C	AN	2/20
		Code identifying a party or other code.			
Not Used	N105	706 Entity Relationship Code	O	ID	2/2
Optional	N106	98 Entity Identifier Code	O	ID	2/2
		Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

Must use code TO in conjunction with the appropriate 2/N101/450 code to indicate the organization receiving the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Mandatory

Segment: SE Transaction Set Trailer

Level: Summary

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	SE01	96 Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M	NO	1/10
Mandatory	SE02	329 Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

APPENDIX 6B

TRANSACTION SET 870 IMPLEMENTATION CONVENTION SUPPLY STATUS

870 Order Status Report

This Draft Standard for Trial Use contains the format and establishes the data contents of the Order Status Report Transaction Set (870) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report on the current status of a requirement forecast, an entire purchase order, selected line items on a purchase order, selected products/services on a purchase order, or purchase orders for a specific customer in their entirety or on a selection basis. The transaction set can also be used to report on the current status of single or multiple requisitions. The report format allows for the inclusion of "reasons" relative to the status. This transaction set may also be used to update the supplier's scheduled shipment or delivery dates. This transaction set can result from either an inquiry or a prearranged schedule agreed to by the trading partners.

Implementation Notes

1. Organizations use this transaction set to provide supply status information on open (unshipped) orders.
2. DoD distinguishes among requisition status, notices of a direct vendor delivery, and responses to a supply assistance request.
3. Use a single occurrence of this transaction set to transmit supply status to one or more requisitioners. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Table 1

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
33	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/086 Use is limited to intra-organizational transactions.

2/340 The LX loop conveys serial number, lot number, and inventory data.

3/010 The number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Segment: BSR Beginning Segment for Order Status Report**Level:** Header**Loop:** _____**Usage:** Mandatory**Max Use:** 1**Purpose:** To indicate the beginning of an Order Status Report.**Semantic:** 1. BSR03 indicates a status report document number assigned by the sender.

2. BSR04 indicates the date of this report from the sender.

3. BSR07 indicates the time of this report from the sender.

4. BSR08 indicates a status report document number assigned by the inquirer.

5. BSR09 indicates the date this report was requested from the sender by the inquirer.

6. BSR10 indicates the time this report was requested from the sender by the inquirer.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
BSR01	850	Status Report Code Code indicating the reason for sending the report	M ID 1/2

Implementation Note:

Use only one of codes 4, 5, or 6 to indicate that all transactions contained in the transaction set are of the same type.

4 Response to Requisition

Code Value Implementation Note:

Use to indicate normal requisition supply status.

5 Notice of Response to Direct Vendor Delivery

Code Value Implementation Note:

Use to indicate that the supply source is providing the required material directly from a commercial source.

6 Notice of Response to Supply Assistance

Code Value Implementation Note:

Use to indicate the response to a supply assistance inquiry.

Mandatory

BSR02	847	Order/Item Code Code identifying a group of orders and items.	M ID 1/2
-------	-----	--	----------

CO All Orders - Unshipped Items

Code Value Implementation Note:

Use to indicate that all orders remain open.

Mandatory

BSR03	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	M AN 1/30
-------	-----	---	-----------

Implementation Note: <i>Place a Z in this data element. This data element is not used in DLMS but is mandatory in the X12 standards. The Z satisfies the X12 usage requirement and shall not be processed by receiving application software.</i>						
Mandatory	BSR04	373	Date Date (YYMMDD).	M	DT	6/6
Implementation Note: <i>Express the originating activity's date in GMT.</i>						
Not Used	BSR05	848	Product/Date Code	O	ID	1/2
Not Used	BSR06	849	Location Code	O	ID	1/2
Required	BSR07	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	O	TM	4/8
Implementation Notes: 1. <i>Express the originating activity's time in GMT.</i> 2. <i>Express time in a four-position (HHMM) format.</i>						
Not Used	BSR08	127	Reference Number	O	AN	1/30
Not Used	BSR09	373	Date	O	DT	6/6
Not Used	BSR10	337	Time	O	TM	4/8
Required	BSR11	353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	O	ID	2/2
Not Used	BSR12	306	Action Code	O	ID	1/2

Required

Segment: N1 Name**Level:** Header**Loop:** N1 **Repeat:** 200**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/050 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/N1/050 loop to indicate an organization when an N101 qualifier code (e.g., OB) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/090 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/050 that does not apply to all the table 2 iterations. (Code subject to override: OB.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual OB Ordered By Z4 Owning Inventory Control Point Code Value Implementation Note: Use to indicate the source of supply furnishing status.	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) A2 Military Assistance Program Address Code (MAPAC) Code Value Implementation Note: For FMS customers, indicate the MAPAD TAC 4, and for MAP/GA, indicate the MAPAD TAC 3. M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2

Optional

N106 98 Entity Identifier Code O ID 2/2
Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/050 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Segment: DTM Date/Time Reference

Level: Header

Loop: _____

Required **Usage:** Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:
Use to indicate the transaction preparation date.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time. 097 Transaction Creation Code Value Implementation Note: Use to indicate the date of transaction preparation.	M	ID	3/3
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Segment: LM Code Source Information
Level: Header
Loop: LM **Repeat:** 10
Usage: Optional
Max Use: 1
Purpose: To transmit standard code list identification information
Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/120 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/144 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/130 that does not apply to all the table 2 iterations. (Codes subject to override: 0, AK, DE and DG.)

------	------	---	---	----	------

Mandatory	Segment: HL Hierarchical Level		
	Level: Detail Loop: HL Repeat: 1000 Usage: Mandatory Max Use: 1 Purpose: To identify dependencies among and the content of hierarchically related groups of data segments. Comments: <ol style="list-style-type: none"> 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data. 2. The HL segment defines a top-down/left-right ordered structure. 3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction. 4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate. 5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information. 6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment. 		

Implementation Note:

The transaction set hierarchical data structure is transaction number only.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	M AN 1/12
	Implementation Note: <i>In the first 2/HL/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.</i>			
Not Used	HL02	734	Hierarchical Parent ID Number	O AN 1/12
Mandatory	HL03	735	Hierarchical Level Code Code defining the characteristic of a level in a hierarchical structure.	M ID 1/2
			W Transaction Reference Number

Segment: CS Contract Summary

Level: Detail

Loop: HL

Usage: Optional

Max Use: 3

Purpose: To provide information about a contract

Syntax: P0405 — If either CS04 or CS05 is present, then the other is required.

Semantic: 1. CS09 is the permissible overage as a percentage of the total contract line item number (CLIN) quantity.

2. CS10 is the permissible shortage as a percentage of the total contract line item number (CLIN) quantity.

3. CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.

4. CS14 is the Unit of Measure stipulated in the contract.

5. CS15 is the contract line item number (CLIN) unit price specified in the contract.

6. CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract. A "N" indicates that no Critical Application Indicator is specified in the contract.

7. CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract. A "N" indicates that no Special Requirements Indicator is specified in the contract.

Comments: 1. CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).

2. CS07 and CS13 (DE 560) can be used to indicate two different types of special services required.

Implementation Note:

Use only in direct vendor delivery transactions to identify basic contract information related to the acquisition action.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Required	CS01	367	Contract Number Contract number.	O AN 1/30
Optional	CS02	327	Change Order Sequence Number Number assigned by the orderer identifying a specific change or revision to a previously transmitted transaction set.	O AN 1/8

Implementation Note:

Use as needed to identify a modification number to the cited contract.

Optional	CS03	328	Release Number Number identifying a release against a Purchase Order previously placed by the parties involved in the transaction.	O	AN	1/30
Implementation Note: Use as needed to identify the call or order number, or the call or order number including the respective call or order modification, as applicable.						
Conditional	CS04	128	Reference Number Qualifier Code qualifying the Reference Number.	C	ID	2/2
Implementation Note: Use the appropriate code, based on the CS01 information, when the ELIN or CLIN are known. 83 Extended (or Exhibit) Line Item Number (ELIN) Code Value Implementation Note: Used to identify the ELIN, or the ELIN including the SUBELIN, as appropriate. C7 Contract Line Item Number Code Value Implementation Note: Used to identify the CLIN, or the CLIN including the SUBCLIN, as appropriate.						
Conditional	CS05	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Not Used	CS06	324	Purchase Order Number	O	AN	1/22

		Y Yes		

Optional

Segment: N1 Name**Level:** Detail**Loop:** N1 **Repeat:** 200**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/090 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/050 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/050 loop with a different address specified in the 2/N1/090 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Code subject to override: OB.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	M ID 2/2
		C4 Contract Administration Office	
		Code Value Implementation Note: Use as needed for direct vendor deliveries only to identify the CAO for the related acquisition action.	
		OB Ordered By	
		PR Payer	
		Code Value Implementation Note: Use as needed for direct vendor deliveries only to identify the paying office for the related acquisition action.	
		SH Shipper	
		Code Value Implementation Note: Use as needed for direct vendor deliveries only to identify the organization that will initiate the material shipment for the related acquisition action.	
		SU Supplier/Manufacturer	
		Code Value Implementation Note: Use as needed for direct vendor deliveries only to identify the contractor providing the material for the related acquisition order.	
		Z1 Party to Receive Status	

Code Value Implementation Note:

Use to indicate the party to receive status when different from Service/Agency prescribed status recipients. Use multiple iterations of the 2/N1/090 loop to identify all status recipients, as required.

Z7 Mark-for Party

Code Value Implementation Note:

Use as needed for direct vendor deliveries only to identify the organization for whom the material will be marked.

Z8 Last Known Source of Supply

Code Value Implementation Note:

Use as needed for requisition supply status transactions only to identify the supply source to which any future inquiries should be addressed when different from the organization originating the transaction.

Not Used

N102 93 Name C AN 1/35

Required

N103 66 Identification Code Qualifier C ID 1/2
Code designating the system/method of code structure used for Identification Code (67).

10 Department of Defense Activity Address Code (DODAAC)

33 Commercial and Government Entity (CAGE)

Code Value Implementation Note:

Use as needed for direct vendor delivery 2/N1/090 supplier loops only to identify the contractor providing the material, when the contractor is not assigned a DODAAC.

A2 Military Assistance Program Address Code (MAPAC)

Code Value Implementation Note:

For FMS customers, indicate the MAPAD TAC 4, and for MAP/GA, indicate the MAPAD TAC 3.

M4 Department of Defense Routing Identifier Code (RIC)

Required

N104 67 Identification Code C AN 2/20
Code identifying a party or other code.

Not Used

N105 706 Entity Relationship Code O ID 2/2

Optional

N106 98 Entity Identifier Code O ID 2/2
Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Use code TO in conjunction with the appropriate 2/N101/090 code to indicate the organization to receive the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Notes:

1. For any specific table 2 iteration use this 2/LM/144 loop as needed: 1) to identify a DoD code when the LQ01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/120 loop or 2) to identify a DoD code when the LQ01 qualifier applies to all table 2 iterations but the LQ02 DoD code varies among most of them or 3) to override an LQ02 DoD code in the 1/LM/120 loop with a different DoD code in the 2/LM/144 loop when the same LQ01 qualifier is used in both loops but the LQ02 DoD code is different. (Codes subject to override: 0, AK, DE, and DG.)

2. Use the 2/LM/144 loop, as needed, for direct vendor deliveries only to identify basic contract information related to the acquisition.

Data Element Summary

Mandatory

Not Used

Required

Segment: PO1 Baseline Item Data

Level: Detail

Loop: PO1 **Repeat:** 1000

Usage: Optional

Max Use: 1

Purpose: To specify basic and most frequently used line item data

- Syntax:**
1. C0302 — If PO103 is present, then PO102 is required.
 2. C0504 — If PO105 is present, then PO104 is required.
 3. P0607 — If either PO106 or PO107 is present, then the other is required.
 4. P0809 — If either PO108 or PO109 is present, then the other is required.
 5. P1011 — If either PO110 or PO111 is present, then the other is required.
 6. P1213 — If either PO112 or PO113 is present, then the other is required.
 7. P1415 — If either PO114 or PO115 is present, then the other is required.
 8. P1617 — If either PO116 or PO117 is present, then the other is required.
 9. P1819 — If either PO118 or PO119 is present, then the other is required.
 10. P2021 — If either PO120 or PO121 is present, then the other is required.
 11. P2223 — If either PO122 or PO123 is present, then the other is required.
 12. P2425 — If either PO124 or PO125 is present, then the other is required.

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. PO101 is the line item identification
 3. PO106 through PO125 provide for ten (10) different product/service ID's per each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/PO1/150 loop to identify the material and status associated with the transaction number.
2. Use multiple iterations of the 2/PO1/150 loop to identify multiple actions taken on a single transaction. Use a suffix code to differentiate each loop.

3. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Optional	PO101	350	Assigned Identification Alphanumeric characters assigned for differentiation within a transaction set.	O AN 1/11
Implementation Note: Use as needed to identify a suffix code associated with the material and quantity for which status is provided. Use only alphabetic characters based on suffix code assignment rules.				
Required	PO102	330	Quantity Ordered Quantity ordered.	C R 1/9
Implementation Notes: 1. Use to identify the quantity associated with the transaction number and suffix code. 2. Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.				
Optional	PO103	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	O ID 2/2
Implementation Note: Use as needed to identify the correct unit of issue associated with the status provided. (See the unit of issue conversion table in volume 1, chapter 10.)				
Conditional	PO104	212	Unit Price Price per unit of product, service, commodity, etc.	C R 1/17
Optional	PO105	639	Basis of Unit Price Code Code identifying the type of unit price for an item.	O ID 2/2
Implementation Note: Use as needed to identify the correct unit price associated with the status provided. ES Estimated Code Value Implementation Note: Use to indicate the estimated unit price billed when Code ST does not apply. ST Standard Code Value Implementation Note: Use to identify the standard unit price billed for the material.				
Required	PO106	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C ID 2/2
Implementation Notes: 1. Use only one of codes A1, A2, A4, FB, FS, FT, MG, or YP to properly identify the material which will be provided as indicated by the status code. 2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE. A1 Plant Equipment Number				

Code Value Implementation Note:

Use to identify plant equipment.

A2 Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use to identify ammunition items.

A4 Subsistence Identification Number

Code Value Implementation Note:

Use to identify subsistence items.

FB Form Number

Code Value Implementation Note:

Use to identify the form stock number.

FS National Stock Number

Code Value Implementation Note:

Must use the NSN when known.

FT Federal Supply Classification

Code Value Implementation Note:

Use to identify nonstandard material when a part number is not available and material can only be ordered by description (e.g., non-NSN lumber products).

MG Manufacturer's Part Number

Code Value Implementation Note:

Use to the identify nonstandard material.

YP Publication Number

Code Value Implementation Note:

Use to identify the publication stock number.

ZB Commercial and Government Entity (CAGE) Code

Code Value Implementation Note:

Use only with code MG to identify a manufacturer's part number.

Required	PO107	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Conditional	PO108	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Conditional	PO109	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40

Not Used	PO125	234	Product/Service ID	C	AN	1/40

Segment: ISR Item Status Report

Level: Detail

Loop: ISR **Repeat:** 104

Usage: Optional

Max Use: 1

Purpose: To specify detailed purchase order/item status.

Semantic: If ISR01 specifies a date, ISR02 is required.

Implementation Note:

Use the 2/ISR/210 loop to provide detailed status information.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ISR01	368	Shipment/Order Status Code	M	ID	2/2
			Code indicating the status of an order or shipment or the disposition of any difference between the quantity ordered and the quantity shipped for a line item or transaction.			
			CO Customer Inquiry - Unshipped Items Only			
			Code Value Implementation Note:			
			<i>Use to indicate status in response to a customer inquiry.</i>			
			UR Unsolicited Report			
			Code Value Implementation Note:			
			<i>Use to indicate status in accordance with normal status response parameters.</i>			
Not Used	ISR02	373	Date	O	DT	6/6
Not Used	ISR03	641	Status Reason Code	O	ID	3/3

Optional

Segment: QTY Quantity
Level: Detail
Loop: ISR
Usage: Optional
Max Use: 4
Purpose: To specify quantity information.

Implementation Note:

Use as needed for supply status transactions only to identify the vendor's minimum order quantity associated with the status provided.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	QTY01	673	Quantity Qualifier Code specifying the type of quantity. 57 Minimum Order Quantity	M	ID	2/2
Mandatory	QTY02	380	Quantity Numeric value of quantity.	M	R	1/15
			Implementation Note: <i>Express as a whole number without decimal.</i>			
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID	2/2

Required

Segment: **DTM** Date/Time Reference

Level: Detail

Loop: ISR

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:
Use as needed to identify the ESD associated with the transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time.	M	ID	3/3
		369	Estimated Departure Date			
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Optional	Segment: REF Reference Numbers			
	Level: Detail			
	Loop: ISR			
	Usage: Optional			
	Max Use: 12			
Mandatory	Purpose: To specify identifying numbers.			
	Syntax: R0203 — At least one of REF02 or REF03 is required.			
	Implementation Notes:			
	1. Use as needed for supply status transactions to identify the federal supply schedule number associated with the status provided.			
	2. Use as needed to identify modified funding data.			
Mandatory	3. Use as needed to provide the narrative explanation associated with the status provided.			
	Data Element Summary			
	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
	REF01	128	Reference Number Qualifier	M ID 2/2
			Code qualifying the Reference Number.	
Conditional			FG Fund Identification Number	
			Code Value Implementation Note:	
			Use with BK status to indicate the modified funding data.	
			L1 Letters or Notes	
			W6 Federal Supply Schedule Number	
Conditional	REF02	127	Reference Number	C AN 1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	
			Implementation Note:	
			Use only with codes FG and WG to provide the federal supply schedule number and funding data, as needed.	
	REF03	352	Description	C AN 1/80
Conditional			A free-form description to clarify the related data elements and their content.	
			Implementation Note:	
			Use only with code L1 and status code CA to indicate the reason for rejection.	

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use the 2/LM/320 loop to identify status and other coded information related to the transaction number.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2

------	-----	--	----------

APPENDIX 6C

**TRANSACTION SET 870 IMPLEMENTATION CONVENTION
NOTICE OF AVAILABILITY REPLY**

870 Order Status Report

This Draft Standard for Trial Use contains the format and establishes the data contents of the Order Status Report Transaction Set (870) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report on the current status of a requirement forecast, an entire purchase order, selected line items on a purchase order, selected products/services on a purchase order, or purchase orders for a specific customer in their entirety or on a selection basis. The transaction set can also be used to report on the current status of single or multiple requisitions. The report format allows for the inclusion of "reasons" relative to the status. This transaction set may also be used to update the supplier's scheduled shipment or delivery dates. This transaction set can result from either an inquiry or a prearranged schedule agreed to by the trading partners.

Implementation Notes

1. CRs/FFs use this transaction set to respond to an FMS NOA providing shipment instructions for material reported available for shipment.
2. Use a single occurrence of this transaction set to transmit NOA replies to one or more organizations. Use one occurrence of this transaction set to transmit a single or multiple transactions.

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
20	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/086 Use is limited to intra-organizational transactions.

2/340 The LX loop conveys serial number, lot number, and inventory data.

3/010 The number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of quantities ordered (PO102) for each PO1 segment.

Segment: **ST** Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143 Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 870 X12.23 Order Status Report	M	ID	3/3
Mandatory	ST02	329 Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Segment: **BSR** Beginning Segment for Order Status Report

Level: Header

Loop: ____

Mandatory **Usage:** Mandatory

Max Use: 1

Purpose: To indicate the beginning of an Order Status Report.

Semantic: 1. BSR03 indicates a status report document number assigned by the sender.

2. BSR04 indicates the date of this report from the sender.

3. BSR07 indicates the time of this report from the sender.

4. BSR08 indicates a status report document number assigned by the inquirer.

5. BSR09 indicates the date this report was requested from the sender by the inquirer.

6. BSR10 indicates the time this report was requested from the sender by the inquirer.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	BSR01	850 Status Report Code Code indicating the reason for sending the report 8 Response to Notice of Availability	M	ID	1/2
Mandatory	BSR02	847 Order/Item Code Code identifying a group of orders and items. CO All Orders - Unshipped Items Code Value Implementation Note: <i>Use to indicate that all orders remain open and unshipped.</i>	M	ID	1/2
Mandatory	BSR03	127 Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	M	AN	1/30
		Implementation Note: <i>Place a Z in this data element. This data element is not used by DLMS but is mandatory in the X12 standards. The Z satisfies the X12 usage requirement and shall not be processed by receiving application software.</i>			
Mandatory	BSR04	373 Date Date (YYMMDDQ).	M	DT	6/6
		Implementation Note: <i>Express the originating activity's date of transaction set preparation in GMT.</i>			
Not Used	BSR05	848 Product/Date Code	O	ID	1/2
Not Used	BSR06	849 Location Code	O	ID	1/2

Required	BSR07	337	Time	O	TM	4/8
			Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)			
			Implementation Notes:			
			1. Express the originating activity's time of transaction set preparation in GMT.			
			2. Express time in a four-position (HHMM) format.			
Not Used	BSR08	127	Reference Number	O	AN	1/30
Not Used	BSR09	373	Date	O	DT	6/6
Not Used	BSR10	337	Time	O	TM	4/8
Required	BSR11	353	Transaction Set Purpose Code	O	ID	2/2
			Code identifying purpose of transaction set.			
			00 Original			
			77 Simulation Exercise			
			Code Value Implementation Note:			
			Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.			
Not Used	BSR12	306	Action Code	O	ID	1/2

Required

Segment: N1 Name**Level:** Header**Loop:** N1 **Repeat:** 200**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/050 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/N1/050 loop to indicate an organization when an N101 qualifier code (e.g., CI) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/090 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/050 loop that does not apply to all the table 2 iterations. (Code subject to override: CI.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual 98 Freight Management Facilitator Code Value Implementation Note: Use to identify the FF originating the transaction set. CI Consignor Code Value Implementation Note: Use to indicate the shipping activity. CY Country Code Value Implementation Note: Use to identify the CR originating the transaction set.	M ID 2/2
N102	93	Name	C AN 1/35
N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) Code Value Implementation Note: Use with code KA in N101.	C ID 1/2

Not Used

Required

A2 Military Assistance Program Address Code (MAPAC)

Code Value Implementation Note:

Use to indicate the structured MAPAC which identifies the CR/FF forwarding the reply.

M4 Department of Defense Routing Identifier Code (RIC)

Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/050 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Segment: **DTM** Date/Time Reference
Level: Header

Required	LQ02	1271	Industry Code Code indicating a code from a specific industry code list	C	AN	1/20

Mandatory

Segment: HL Hierarchical Level

Level: Detail

Loop: HL **Repeat:** 1000

Usage: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments.

Comments: 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.

2. The HL segment defines a top-down/left-right ordered structure.

3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.

4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.

5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.

6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Implementation Note:

The transaction set hierarchical data structure is shipment unit only as identified by the FMS notice number assigned to control the shipment.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	M AN 1/12

Implementation Note:

In the first 2/HL/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Not Used

HL02	734	Hierarchical Parent ID Number	O AN 1/12
------	-----	--------------------------------------	-----------

Mandatory

HL03	735	Hierarchical Level Code Code defining the characteristic of a level in a hierarchical structure. S Shipment	M ID 1/2
------	-----	--	----------

Code Value Implementation Note:
Use to identify the individual shipment loops addressed in the FMS NOA reply.

Not Used

HL04 736 Hierarchical Child Code

O ID 1/1

Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 6D

TRANSACTION SET 870 IMPLEMENTATION CONVENTION MATERIAL RETURNS SUPPLY STATUS

870 Order Status Report

This Draft Standard for Trial Use contains the format and establishes the data contents of the Order Status Report Transaction Set (870) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to report on the current status of a requirement forecast, an entire purchase order, selected line items on a purchase order, selected products/services on a purchase order, or purchase orders for a specific customer in their entirety or on a selection basis. The transaction set can also be used to report on the current status of single or multiple requisitions. The report format allows for the inclusion of "reasons" relative to the status. This transaction set may also be used to update the supplier's scheduled shipment or delivery dates. This transaction set can result from either an inquiry or a prearranged schedule agreed to by the trading partners.

Implementation Notes

1. ICPs and IMMs use this transaction set to provide disposition instructions, to inquire or to respond as to the status of material reported as excess or available for redistribution under the Material Returns Program. Reporting organizations use this transaction set to provide supply status on open reports prior to the shipment of material. Organizations use this transaction set to provide disposition instructions for discrepant or deficient material.
2. Use a single occurrence of this transaction set to transmit transactions between a single ICP/IMM and multiple reporting organizations or a single reporting organization and multiple ICPs/IMMs. Use one occurrence of this transaction set to transmit a single or multiple transactions.
3. A single transaction set may contain a combination of transactions for standard and nonstandard material.

Segment: N1 Name**Level:** Header**Loop:** N1 **Repeat:** 200**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code

- Syntax:** 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/050 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/050 loop to indicate an organization when an N101 qualifier code (e.g., Z4) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/090 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/050 that does not apply to all the table 2 iterations. (Code subject to override: Z4).

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	M ID 2/2
		RL Reporting Location	
		Code Value Implementation Note: Use as required to indicate the reporting organization when providing status on open material returns reports.	
		Z1 Party to Receive Status	
		Code Value Implementation Note: Use to indicate the party to receive status when different from Service/Agency prescribed status recipient. Use multiple iterations of the 1/N1/050 loop to identify status recipients, as required.	
		Z4 Owning Inventory Control Point	
Not Used	N102	93 Name	C AN 1/35
Required	N103	66 Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67).	C ID 1/2
		10 Department of Defense Activity Address Code (DODAAC)	
		M4 Department of Defense Routing Identifier Code (RIC)	

Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/050 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: DTM Date/Time Reference

Level: Header

Loop: _____

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:

Use this 1/DTM/110 segment to indicate the date when a DTM01 qualifier code (e.g., 600) applies to ALL table 2 iterations and the same DTM02 date applies to all or most of the table 2 iterations. For any specific table 2 iteration where the date is to differ from the one indicated in table 1, use the 2/DTM/240 segment and specify the matching qualifier in DTM01 and the different date in DTM02. This date will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/DTM01/110 that does not apply to all the table 2 iterations. (Code subject to override: 600.)

Data Element Summary

Mandatory

Segment: HL Hierarchical Level

Level: Detail

Loop: HL **Repeat:** 1000

Usage: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments.

Comments: 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.

2. The HL segment defines a top-down/left-right ordered structure.

3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.

4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.

5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.

6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Implementation Note:

The transaction set hierarchical data structure is transaction number only.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	M AN 1/12

Implementation Note:

In the first 2/HL/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Not Used

HL02 734 **Hierarchical Parent ID Number** O AN 1/12

Mandatory

HL03 735 **Hierarchical Level Code** M ID 1/2
Code defining the characteristic of a level in a hierarchical structure.

W Transaction Reference Number

Code Value Implementation Note:

Use to identify the individual transaction status loops.

Not Used	HL04	736	Hierarchical Chlld Code	O	ID	1/1

Required	Segment:	REF Reference Numbers				
	Level:	Detail				
	Loop:	HL				
	Usage:	Optional				
	Max Use:	12				
	Purpose:	To specify identifying numbers.				
	Syntax:	R0203 — At least one of REF02 or REF03 is required.				
	Implementation Note:					
		Use to identify the transaction number associated with the transaction.				
	</					

Optional

Segment: N1 Name**Level:** Detail**Loop:** N1 **Repeat:** 200**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/090 loop as needed: 1) to identify a receiving organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/050 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them, or 3) to override an address in the 1/N1/050 loop with a different address specified in the 2/N1/090 segment when the same N101 qualifier is used in both loops but the N104 address is different. (Code subject to override: Z4.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		RL Reporting Location	
		Code Value Implementation Note:	
		Use as required to indicate the reporting organization when providing status on open material returns reports.	
		ST Ship To	
		Code Value Implementation Note:	
		ICPs/IMMs only use, as needed, to identify the receiving depot to which the reported material is to be shipped.	
		TO Message To	
		Code Value Implementation Note:	
		Use to indicate the organization to receive the transaction set.	
		Z1 Party to Receive Status	
		Code Value Implementation Note:	
		Use to indicate the party to receive status when different from the Service/Agency prescribed status recipient. Use multiple iterations of the 2/N1/090 loop to identify all additional status recipients, as required.	
		Z4 Owning Inventory Control Point	
		Z8 Last Known Source of Supply	

			Code Value Implementation Note: <i>ICPs/IMMs only use, as needed, to identify the ICP/IMM to receive all future transactions.</i>		
			ZB Party to Receive Credit		
			Code Value Implementation Note: <i>ICPs/IMMs only use, as needed, to identify the organization to which credit will be issued when different from the organization specified by the reporting organization.</i>		
Not Used	N102	93	Name	C AN	1/35
Required	N103	66	Identification Code Qualifier	C ID	1/2
			Code designating the system/method of code structure used for Identification Code (67).		
			10 Department of Defense Activity Address Code (DODAAC)		
			M4 Department of Defense Routing Identifier Code (RIC)		
Required	N104	67	Identification Code	C AN	2/20
			Code identifying a party or other code.

Required

Segment: PO1 Baseline Item Data

Level: Detail

Loop: PO1 **Repeat:** 1000

Usage: Optional

Max Use: 1

Purpose: To specify basic and most frequently used line item data

Syntax: 1. C0302 — If PO103 is present, then PO102 is required.

2. C0504 — If PO105 is present, then PO104 is required.

3. P0607 — If either PO106 or PO107 is present, then the other is required.

4. P0809 — If either PO108 or PO109 is present, then the other is required.

5. P1011 — If either PO110 or PO111 is present, then the other is required.

6. P1213 — If either PO112 or PO113 is present, then the other is required.

7. P1415 — If either PO114 or PO115 is present, then the other is required.

8. P1617 — If either PO116 or PO117 is present, then the other is required.

9. P1819 — If either PO118 or PO119 is present, then the other is required.

10. P2021 — If either PO120 or PO121 is present, then the other is required.

11. P2223 — If either PO122 or PO123 is present, then the other is required.

12. P2425 — If either PO124 or PO125 is present, then the other is required.

Comments: 1. See the Data Dictionary for a complete list of ID's.

2. PO101 is the line item identification

3. PO106 through PO125 provide for ten (10) different product/service ID's per each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/PO1/150 loop to identify the material and status associated with the material returns transaction number and the transaction number suffix, as needed.

2. Use multiple iterations of the 2/PO1/150 loop to identify multiple actions taken on a single transaction. Use a suffix code to differentiate each loop.

3. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Optional	PO101	350	Assigned Identification Alphanumeric characters assigned for differentiation within a transaction set.	O	AN	1/11
Implementation Note: Use as needed to identify a suffix code associated with the material and quantity for which status is provided. Use only alphabetic characters based on suffix code assignment rules.						
Required	PO102	330	Quantity Ordered Quantity ordered.	C	R	1/9
Implementation Notes: 1. Use to identify the quantity associated with the transaction number and suffix code. 2. Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.						
Optional	PO103	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	O	ID	2/2
Implementation Note: ICPs/IMMs only use as needed to identify the correct unit of issue when different from the original material return transaction. (See unit of issue conversion table in volume 1, chapter 10.)						
Not Used	PO104	212	Unit Price	C	R	1/17
Not Used	PO105	639	Basis of Unit Price Code	O	ID	2/2
Required	PO106	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Implementation Notes: 1. Use only one of codes A1, A2, A4, FB, FS, FT, MG, or YP to properly identify the material. 2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE. A1 Plant Equipment Number Code Value Implementation Note: Use to identify plant equipment. A2 Department of Defense Identification Code (DoDIC) Code Value Implementation Note: Use to identify ammunition items. A4 Subsistence Identification Number Code Value Implementation Note: Use to identify subsistence items. FB Form Number Code Value Implementation Note: Use to identify the form stock number. FS National Stock Number						

Code Value Implementation Note:*Must use the NSN when known.***FT** Federal Supply Classification**Code Value Implementation Note:***Use to identify nonstandard material when a part number is not available and material can only be ordered by description (e.g., non-NSN lumber products).***MG** Manufacturer's Part Number**Code Value Implementation Note:***Use to identify nonstandard material.***YP** Publication Number**Code Value Implementation Note:***Use to identify the publication stock number.***ZB** Commercial and Government Entity (CAGE) Code**Code Value Implementation Note:***Use only with code MG to identify a manufacturer's CAGE code.*

Segment: SAC Service, Promotion, Allowance, or Charge Information

Level: Detail

Loop: ISR

Usage: Optional

Max Use: 25

Purpose: To request or identify a service, promotion, allowance, or charge; to specify the amount or percentage for the service, promotion, allowance, or charge

- Syntax:**
1. R0203 — At least one of SAC02 or SAC03 is required.
 2. P0304 — If either SAC03 or SAC04 is present, then the other is required.
 3. P0607 — If either SAC06 or SAC07 is present, then the other is required.
 4. P0910 — If either SAC09 or SAC10 is present, then the other is required.
 5. C1110 — If SAC11 is present, then SAC10 is required.
 6. L130204 — If SAC13 is present, then at least one of SAC02 or SAC04 are required.
 7. C1413 — If SAC14 is present, then SAC13 is required.

- Semantic:**
1. If SAC01 is A or C, then at least one of SAC05, SAC07, or SAC08 is required.
 2. SAC05 is the total amount for the service, promotion, allowance, or charge.
 3. If SAC05 is present with SAC07 or SAC08, then SAC05 takes precedence.
 4. SAC08 is the allowance or charge rate per unit.
 5. SAC10 and SAC11 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity.
 6. SAC10 and SAC11 used together indicate a quantity range, which could be a dollar amount, that is applicable to service, promotion, allowance, or charge.
 7. SAC13 is used in conjunction with SAC02 or SAC04 to provide a specific reference number as identified by the code used.
 8. SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.

Comments: 1. SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction to further the code in SAC02.

2. In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to a "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier DO - Dollars in SAC09.

Implementation Note:

ICPs/IMMs only use to identify the value of credit to be provided and the quantity on which the credit is based.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	SAC01	248	Allowance or Charge Indicator Code which indicates an allowance or charge for the service specified. A Allowance Code Value Implementation Note: Use to indicate that credit information is provided.	M	ID	1/1
Required	SAC02	1300	Service, Promotion, Allowance, or Charge Code Code identifying the service, promotion, allowance, or charge B800 Credit	C	ID	4/4
Not Used	SAC03	559	Agency Qualifier Code	C	ID	2/2
Not Used	SAC04	1301	Agency Service, Promotion, Allowance, or Charge Code	C	AN	1/10
Required	SAC05	610	Amount Monetary amount.	O	N2	1/15
			Implementation Note: Use to identify the value of credit provided for the reported material, expressed in dollars and cents format. Cite 0 when no credit is provided.			
Not Used	SAC06	378	Allowance/ Charge Percent Qualifier	C	ID	1/1
Not Used	SAC07	332	Percent	C	R	1/6
Optional	SAC08	118	Rate Rate expressed in the standard monetary denomination for the currency specified	O	R	1/9
Required	SAC09	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	C	ID	2/2
			Implementation Note: Use to identify the correct unit of issue associated with the quantity expressed in SAC10. (See unit of issue conversion table in volume 1, chapter 10.)			
Required	SAC10	380	Quantity Numeric value of quantity.	C	R	1/15
			Implementation Note: Use to indicate the quantity of reported material on which the credit is based. Express as whole number without decimal.			
Not Used	SAC11	380	Quantity	O	R	1/15
Not Used	SAC12	331	Allowance or Charge Method of Handling Code	O	ID	2/2

Not Used	SAC13	127	Reference Number	C	AN	1/30
Not Used	SAC14	770	Option Number	O	AN	1/20
Not Used	SAC15	352	Description	O	AN	1/80

Required

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use the 2/LM/320 loop to identify status related to the transaction number.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	LM01	559	Agency Qualifier Code	M	ID	2/2
			Code identifying the agency assigning the code values.			
			DF Department of Defense (DoD)			
Not Used	LM02	822	Source Subqualifier	O	AN	1/15

Mandatory

Segment: **LQ Industry Code**

Level: Detail

Loop: LM

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: **C0102** — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3

Implementation Note:

Use as needed when directing return of discrepant or deficient material.

78 Project Code

Code Value Implementation Note:

ICPs/IMMs only use to identify the project code assigned when shipment of the reported material is directed.

81 Status Code

Code Value Implementation Note:

ICPs/IMMs and reporting organizations use to identify the applicable status code for the suffix code and quantity reported.

83 Supply Condition Code

Code Value Implementation Note:

ICPs/IMMs and reporting organizations use to identify the supply condition code associated with the reported material.

87 Subsistence Type of Pack Code

Code Value Implementation Note:

ICPs/IMMs and reporting organizations use is to identify type of pack associated with the reported subsistence items.

BD Transportation Priority Code

Code Value Implementation Note:

ICPs/IMMs only use to identify the transportation priority when shipment of the reported material is directed.

FD Demilitarization Code

Code Value Implementation Note:

ICPs/IMMs only use to identify the applicable demilitarization code when the status code directs disposal action.

HD Discrepancy Status or Disposition Code

Code Value Implementation Note:

Use as needed when directing return of discrepant or deficient material.

Required	LQ02	1271	Industry Code	C	AN	1/20
			Code indicating a code from a specific industry code list			

Optional

Segment: LX Assigned Number

Level: Detail

Loop: LX **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To reference a line number in a transaction set.

Implementation Notes:

1. Use as a counter to identify the number of 2/LX/340 loop iterations in the transaction set.
2. Use the 2/LX/340 loop to provide UIT information.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LX01	554	Assigned Number Number assigned for differentiation within a transaction set.	M	NO	1/6

Implementation Note:

In the first 2/LX/340 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Segment: REF Reference Numbers
Level: Detail
Loop: LX
Usage: Optional
Max Use: >1
Purpose: To specify identifying numbers.
Syntax: R0203 — At least one of REF02 or REF03 is required.

Implementation Note:

Use multiple repetitions, as needed, to identify either a unique item identifier or a lot number.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	REF01	128	Reference Number Qualifier Code qualifying the Reference Number. LT Lot Number <i>Code Value Implementation Note:</i> Use to identify the manufacturer's lot number, batch number, or other number identifying the production run. SE Serial Number <i>Code Value Implementation Note:</i> Use to identify a unique item identifier.	M	ID	2/2
Required	REF02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Not Used	REF03	352	Description	C	AN	1/80

Optional	Segment: N1 Name	
	Level: Detail	
	Loop: LX	
	Usage: Optional	
	Max Use: 1	
	Purpose: To identify a party by type of organization, name and code	
	Syntax: 1. R0203 — At least one of N102 or N103 is required.	
	2. P0304 — If either N103 or N104 is present, then the other is required.	
	Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.	
	2. N105 and N106 further define the type of entity in N101.	
	Implementation Note:	
	<i>Use to identify the manufacturer of the UIT item.</i>	

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N101	98 Entity Identifier Code	M	ID	2/2
		Code identifying an organizational entity, a physical location, or an individual			
		MF Manufacturer of Goods			
Not Used	N102	93 Name	C	AN	1/35
Required	N103	66 Identification Code Qualifier	C	ID	1/2
		Code designating the system/method of code structure used for Identification Code (67).			
		33 Commercial and Government Entity (CAGE)			
Required	N104	67 Identification Code	C	AN	2/20
		Code identifying a party or other code.			
Not Used	N105	706 Entity Relationship Code	O	ID	2/2
Not Used	N106	98 Entity Identifier Code	O	ID	2/2

Optional

Segment: DTM Date/Time Reference

Level: Detail

Loop: LX

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:

Use multiple repetitions, as needed, to identify dates related to the UIT.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time.	M	ID	3/3
	036	Expiration Code Value Implementation Note: <i>Use to identify the expiration date of the lot identified.</i>			
	094	Manufacture Code Value Implementation Note: <i>Use to identify the date of manufacture of the UIT material identified.</i>			
	510	Date Packed Code Value Implementation Note: <i>Use to identify the date of pack for the lot identified.</i>			
DTM02	373	Date Date (YYMMDD).	C	DT	6/6

Mandatory

Segment: SE Transaction Set Trailer

Level: Summary

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M	NO	1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

APPENDIX 6E

**TRANSACTION SET 856 IMPLEMENTATION CONVENTION
SHIPMENT STATUS**

856 Ship Notice/Manifest

This Draft Standard for Trial Use contains the format and establishes the data contents of the Ship Notice/Manifest Transaction Set (856) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. The transaction set enables the sender to describe the contents and configuration of a shipment in various levels of detail and provides an ordered flexibility to convey information.

The sender of this transaction is the organization responsible for detailing and communicating the contents of a shipment, or shipments, to one or more receivers of the transaction set. The receiver of this transaction set can be any organization having an interest in the contents of a shipment or information about the contents of a shipment.

Implementation Notes

1. Organizations use this transaction set to provide shipment status information on all shipped orders.
2. Use a single occurrence of this transaction set to transmit shipment status to one organization. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Table 1

N/U	010	CTT	Transaction Totals	O	1	
21	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/010 The HL segment is the only mandatory segment within the HL loop, and by itself, the HL segment has no meaning.

3/010 Number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of units shipped (SN102) for each SN1 segment.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 856 X12.10 Ship Notice/Manifest	M	ID	3/3

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	--	---	----	-----

Segment: BSN Beginning Segment for Ship Notice
Level: Header
Loop: ____
Mandatory
Usage: Mandatory
Max Use: 1
Purpose: To transmit identifying numbers, dates and other basic data relating to the transaction set
Syntax: C0706 — If BSN07 is present, then BSN06 is required.
Semantic: 1. BSN03 is the date the shipment transaction set is created.
2. BSN04 is the time the shipment transaction set is created.
3. BSN06 is limited to shipment related codes
Comment: BSN06 and BSN07 differentiate the functionality of use for the transaction set

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	BSN01 353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M ID 2/2
Mandatory	BSN02 396	Shipment Identification A unique control number assigned by the original shipper to identify a specific shipment. Implementation Note: <i>Use ZZ in this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The ZZ entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	M AN 2/30
Mandatory	BSN03 373	Date Date (YYMMDD).	M DT 6/6
Mandatory	BSN04 337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99) Implementation Notes: 1. Express the originating activity's time in GMT.	M TM 4/8

2. Express time in a four-position (HHMM) format.

Not Used

BSN05 1005 Hierarchical Structure Code

O ID 4/4

Conditional

BSN06 640 Transaction Type Code
Code specifying the type of transaction.

C ID 2/2

AS Shipment Advice

Code Value Implementation Note:

Use to indicate this transaction set provides shipment status information related to requisitions.

NC Material Release Order Forced Closure

Code Value Implementation Note:

Use to indicate this transaction set provides pseudo shipment status information.

Not Used

BSN07 641 Status Reason Code

O ID 3/3

Mandatory

Segment: HL Hierarchical Level

Level: Detail

Loop: HL **Repeat:** 200000

Usage: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments.

Comments: 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.

2. The HL segment defines a top-down/left-right ordered structure.

3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.

4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.

5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.

6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Implementation Notes:

1. The transaction set hierarchical data structure is address information, followed by transaction shipment status.
2. Use the first 2/HL/010 loop iteration to provide transaction set addressee information.
3. Use the second and all subsequent 2/HL/010 loop iterations to identify individual transaction shipment status information.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	M AN 1/12

Implementation Note:

In the first 2/HL/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Not Used

HL02	734	Hierarchical Parent ID Number	O AN 1/12
------	-----	--------------------------------------	-----------

Mandatory	HL03	735	Hierarchical Level Code Code defining the characteristic of a level in a hierarchical structure. V Address Information Code Value Implementation Note: <i>Use to identify the transaction set address loop.</i> W Transaction Reference Number Code Value Implementation Note: <i>Use to identify the individual transaction shipment status loops.</i>	M	ID	1/2
Not Used	HL04	736	Hierarchical Child Code	O	ID	1/1

Optional

Segment: LIN Item Identification

Level: Detail

Loop: HL

Usage: Optional

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use only in 2/HL/010 transaction reference number loops to identify the material shipped.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LIN01	350	Assigned Identification	O AN 1/11

Not Used

Mandatory

LIN02 235 Product/Service ID Qualifier M ID 2/2
Code identifying the type/source of the descriptive number used in
Product/Service ID (234).

Implementation Notes:

1. Use only one of codes A1, A2, A4, FB, FS, FT, MG, or YP to properly identify the material shipped.
2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE.
3. Always use code CN to identify the commodity name or description when citing the Federal Supply Classification (code FT).

A1 Plant Equipment Number**Code Value Implementation Note:**

Use to identify plant equipment.

A2 Department of Defense Identification Code (DoDIC)**Code Value Implementation Note:**

Use to identify ammunition items.

A4 Subsistence Identification Number**Code Value Implementation Note:**

Use to identify subsistence items.

CN Commodity Name**Code Value Implementation Note:**

Use only with code FT to identify the material name or description.

FB Form Number**Code Value Implementation Note:**

Use to identify the form stock number.

FS National Stock Number**Code Value Implementation Note:**

Must use the NSN when known.

FT Federal Supply Classification**Code Value Implementation Note:**

Use to identify nonstandard material when a part number is not available and material can only be identified by description (e.g., non-NSN lumber products).

MG Manufacturer's Part Number**Code Value Implementation Note:**

Use to identify nonstandard material.

YP Publication Number**Code Value Implementation Note:**

Use to identify the publication stock number.

ZB Commercial and Government Entity (CAGE) Code**Code Value Implementation Note:**

Use only with code MG to identify a manufacturer's part number.

Mandatory

LIN03 234 Product/Service ID M AN 1/40
Identifying number for a product or service.

Segment: SN1 Item Detail (Shipment)
Level: Detail
Loop: HL
Usage: Optional
Max Use: 1
Purpose: To specify line item detail relative to shipment
Syntax: P0506 — If either SN105 or SN106 is present, then the other is required.
Semantic: SN101 is the ship notice line item identification.
Comment: SN103 defines the unit of measurement for both SN102 and SN104.

Implementation Note:

Use only in 2/HL/010 transaction reference number loops to identify the number of units shipped.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	SN101	350	Assigned Identification	O	AN	1/11
Mandatory	SN102	382	Number of Units Shipped Numeric value of units shipped in manufacturer's shipping units for a line item or transaction set.	M	R	1/10
Implementation Notes:						
1. Use to identify the shipped quantity.						
2. Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.						
Mandatory	SN103	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	M	ID	2/2
Implementation Note:						
<i>Use to identify the unit of issue for the material shipped (see unit of issue conversion table in volume 1, chapter 10).</i>						
Not Used	SN104	646	Quantity Shipped to Date	O	R	1/9
Not Used	SN105	330	Quantity Ordered	C	R	1/9
Not Used	SN106	355	Unit or Basis for Measurement Code	C	ID	2/2
Not Used	SN107	728	Returnable Container Load Make-Up Code	O	ID	1/2
Not Used	SN108	668	Line Item Status Code	O	ID	2/2

Optional

Segment: TD5 Carrier Details (Routing Sequence/Transit Time)**Level:** Detail**Loop:** HL**Usage:** Optional**Max Use:** 12**Purpose:** To specify the carrier, sequence of routing and to provide transit time information**Syntax:** 1. R0204050612 — At least one of TD502, TD504, TD505, TD506 or TD512 is required.

2. C0203 — If TD502 is present, then TD503 is required.

3. C0708 — If TD507 is present, then TD508 is required.

4. C1011 — If TD510 is present, then TD511 is required.

Comment: When specifying a routing sequence to be used for the shipment movement in lieu of specifying each carrier within the movement: use TD502 to identify the party responsible for defining the routing sequence; use TD503 to identify the actual routing sequence, specified by the party identified in TD502.**Implementation Note:***Use only in 2/HL/010 transaction reference number loops to identify the mode of shipment.***Data Element Summary**

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	TD501	133	Routing Sequence Code	O	ID	1/2
Not Used	TD502	66	Identification Code Qualifier	C	ID	1/2
Not Used	TD503	67	Identification Code	C	AN	2/20
Required	TD504	91	Transportation Method/Type Code Code specifying the method or type of transportation for the shipment.	C	ID	1/2
Implementation Note: <i>Use to identify the mode of shipment. (See the mode of shipment code conversion table in volume 1, chapter 10.)</i>						
Not Used	TD505	387	Routing	C	AN	1/35
Not Used	TD506	368	Shipment/Order Status Code	C	ID	2/2
Not Used	TD507	309	Location Qualifier	O	ID	1/2
Not Used	TD508	310	Location Identifier	C	AN	1/30

Not Used	TD510	732	Transit Time Direction Qualifier	O	ID	2/2
Not Used	TD511	733	Transit Time	C	R	1/4
Not Used	TD512	284	Service Level Code	C	ID	2/2

Optional

Segment: REF Reference Numbers**Level:** Detail**Loop:** HL**Usage:** Optional**Max Use:** >1**Purpose:** To specify identifying numbers.**Syntax:** R0203 — At least one of REF02 or REF03 is required.**Implementation Note:**

Use only in 2/HL/010 transaction reference number loops to identify the customer assigned transaction number, the shipment unit number, and serial or lot numbers associated with the shipment status transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Notes:

1. Use, as needed, only one of codes 08, 97, AW, BL, BM, IZ, K1, K2, K3, SI, or WY to properly identify the shipment unit number. Code use supplements the cross reference between the TCN for intransit control procedures and the applicable shipment identification number associated with the mode of shipment.
2. Use only one of codes LT or SE, as needed, to properly identify lot numbers or serial numbers assigned to shipped material managed under lot or serial number control procedures.

08 Carrier Assigned Package Identification Number**Code Value Implementation Note:**

Use as needed to identify the shipment unit small package identification number when no other number is available.

2I Tracking Number**Code Value Implementation Note:**

Use as needed to identify all shipments to a DRMO that qualify for intransit control procedures (e.g., the shipped material line item value is \$800 or more or the item is recorded as pilferable/sensitive). Cite Y in REF02 if shipment meets specified criteria.

97 Package Number**Code Value Implementation Note:**

Use as needed to identify the shipment unit package identification number.

AW Air Waybill Number**Code Value Implementation Note:**

Use as needed to identify the shipment unit air waybill number.

BL Government Bill of Lading**Code Value Implementation Note:**

Use as needed to identify the government bill of lading for direct shipments (e.g., not through a CONUS regional freight consolidation center) to a CONUS destination.

BM Bill of Lading Number**Code Value Implementation Note:**

Use as needed to identify the shipment unit commercial bill of lading number.

CT Contract Number

Code Value Implementation Note:

Use as needed on push shipments of GFM to the contractor.

IZ Insured Parcel Post Number

Code Value Implementation Note:

Use as needed to identify the shipment unit insured parcel post number.

K1 Foreign Military Sales Notice Number

Code Value Implementation Note:

Use for FMS shipments made on a commercial bill of lading or commercial collect bill of lading, as needed, to identify the shipment unit FMS notice number.

K2 Certified Mail Number

Code Value Implementation Note:

Use as needed to identify the shipment unit certified mail number.

K3 Registered Mail Number

Code Value Implementation Note:

Use as needed to identify the shipment unit registered parcel post number.

LT Lot Number

Code Value Implementation Note:

Use to identify the manufacturer's lot number, batch number, or other number identifying the production run.

SE Serial Number

Code Value Implementation Note:

Use to identify a unique item identifier.

SI Shipper's Identifying Number for Shipment (SID)

Code Value Implementation Note:

Use as needed to identify the shipment unit express mail number.

TG Transportation Control Number (TCN)

Code Value Implementation Note:

Use to identify the content of all shipments as specified by intransit control procedures.

TN Transaction Reference Number

Code Value Implementation Note:

Use in every 2/HL/010 transaction reference number loop to identify the customer assigned transaction number associated with the shipment unit.

W3 Manufacturing Directive Number

Code Value Implementation Note:

Use as needed on push shipments of GFM to the contractor.

W8 Suffix

Code Value Implementation Note:

Use as needed to identify the suffix associated with the transaction number.

WY Waybill Number

Code Value Implementation Note:

Use as needed to identify the shipment unit waybill number.

Required	REF02	127	Reference Number	C AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.		
Not Used	REF03	352	Description	C AN	1/80

Optional

Segment: DTM Date/Time Reference

Level: Detail

Loop: HL

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:

Use only in 2/HL/010 transaction reference number loops to identify dates associated with the shipment status.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time. 011 Shipped	M	ID	3/3
			Code Value Implementation Note: Use as needed to identify the material shipment date, regardless of shipment method.			
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Optional

Segment: N1 Name

Level: Detail

Loop: N1 **Repeat:** 200

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. Use the 2/N1/220 loop in every 2/HL/010 address loop to identify the organization originating the transaction set.
2. Use the 2/N1/220 loop, as needed, in every 2/HL/010 transaction reference number loop to identify the shipment unit consignor, carrier, and organization directing the shipment.
3. Use the 2/N1/220 loop in the 2/HL/010 address loop to identify the organization to receive the transaction set, or an additional organization designated to receive status, when the same organization applies to all transactions cited in the 2/HL/010 transaction reference number loops. Use the 2/N1/220 loop in the individual 2/HL/010 transaction reference number loops to identify the organization to receive the transaction set, or an additional organization designated to receive status, when the organization varies by transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		AA Authority For Shipment	
		Code Value Implementation Note:	
		Use as needed to identify the organization that directed the shipment.	
		CA Carrier	
		Code Value Implementation Note:	
		Use as needed to identify the shipment unit carrier.	
		CI Consignor	
		Code Value Implementation Note:	
		Use as needed to identify the initial shipping activity (of origin).	
		SB Storage Area	
		Code Value Implementation Note:	
		Use as needed to identify the storage facility.	
		Z1 Party to Receive Status	

Code Value Implementation Note:

Use to indicate the organization to receive shipment status including the Service/Agency prescribed status recipient. Use multiple iterations of the 2/N1/220 loop to identify shipment status recipients, as needed.

Z4 Owning Inventory Control Point**Code Value Implementation Note:**

Use as needed to identify the supply source.

Not Used

N102 93 Name C AN 1/35

Required

N103 66 Identification Code Qualifier C ID 1/2

Code designating the system/method of code structure used for Identification Code (67).

10 Department of Defense Activity Address Code (DODAAC)

2 Standard Carrier Alpha Code (SCAC)

Code Value Implementation Note:

Use as needed to identify the commercial carrier when no DoDAAC is assigned.

A2 Military Assistance Program Address Code (MAPAC)

Code Value Implementation Note:

For FMS, indicate MAPAC TAC 4 and MAP/GA, indicate MAPAC TAC 3.

M4 Department of Defense Routing Identifier Code (RIC)

Required

N104 67 Identification Code C AN 2/20

Code identifying a party or other code.

Not Used

N105 706 Entity Relationship Code O ID 2/2

Optional

N106 98 Entity Identifier Code O ID 2/2

Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 2/N1/220 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use only in 2/HL/010 transaction reference number loops.

Data Element Summary

------	-----	--	---	----	-----

APPENDIX 6F

**TRANSACTION SET 856 IMPLEMENTATION CONVENTION
NOTICE OF AVAILABILITY**

856 Ship Notice/Manifest

This Draft Standard for Trial Use contains the format and establishes the data contents of the Ship Notice/Manifest Transaction Set (856) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. The transaction set enables the sender to describe the contents and configuration of a shipment in various levels of detail and provides an ordered flexibility to convey information.

The sender of this transaction is the organization responsible for detailing and communicating the contents of a shipment, or shipments, to one or more receivers of the transaction set. The receiver of this transaction set can be any organization having an interest in the contents of a shipment or information about the contents of a shipment.

Implementation Notes

1. Organizations use this transaction set to provide shipment availability, specification and content information to designated CRs/FFs.
2. DoD distinguishes among FMS NOAs requiring export release authorization, those not requiring export release authorization and those for which release will be delayed.
3. Use a single occurrence of this transaction set to transmit NOAs to one designated country representatives/freight forwarders. Use one occurrence of this transaction set to transmit a single or multiple shipment notification transactions of the same type.
4. Identify the overall shipment attributes and detailed line item content of each shipment.

Table 1

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
23	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/010 The HL segment is the only mandatory segment within the HL loop, and by itself, the HL segment has no meaning.

3/010 Number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of units shipped (SN102) for each SN1 segment.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
	856	X12.10 Ship Notice/Manifest			

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	---	---	----	-----

Segment: **BSN** Beginning Segment for Ship Notice

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To transmit identifying numbers, dates and other basic data relating to the transaction set

Syntax: **C0706** — If BSN07 is present, then BSN06 is required.

Semantic: 1. BSN03 is the date the shipment transaction set is created.
2. BSN04 is the time the shipment transaction set is created.
3. BSN06 is limited to shipment related codes

Comment: BSN06 and BSN07 differentiate the functionality of use for the transaction set

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	BSN01	353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M	ID	2/2
Mandatory	BSN02	396	Shipment Identification A unique control number assigned by the original shipper to identify a specific shipment. Implementation Note: <i>Use a ZZ for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The ZZ entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	M	AN	2/30
Mandatory	BSN03	373	Date Date (YYMMDD). Implementation Note: <i>Express the originating activity's date in GMT.</i>	M	DT	6/6
Mandatory	BSN04	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99) Implementation Notes: 1. Express the originating activity's time in GMT.	M	TM	4/8

		2. Express time in a four-position (HHMM) format.			
Not Used	BSN05	1005	Hierarchical Structure Code	O	ID 4/4
Required	BSN06	640	Transaction Type Code Code specifying the type of transaction.	C	ID 2/2
AD Notice of Availability					
Required	BSN07	641	Status Reason Code Code indicating the status reason.	O	ID 3/3

Implementation Note:

Use only one of codes D50, ENR, or ERR to identify the type of NOA.

D50 Delayed

Code Value Implementation Note:

Use to indicate that all referenced shipments are delayed.

ENR Export Release Not Required

Code Value Implementation Note:

Use to indicate that export release is not required for all referenced shipments.

ERR Export Release Required

Code Value Implementation Note:

Use to indicate that export release is required for all referenced shipments.

Mandatory

Segment: HL Hierarchical Level

Level: Detail

Loop: HL **Repeat:** 200000

Usage: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments.

Comments: 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.

2. The HL segment defines a top-down/left-right ordered structure.

3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.

4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.

5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.

6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Implementation Notes:

1. The transaction set hierarchical data structure is address information, followed by overall shipment attributes, followed by shipment line item detail.

2. Use the first 2/HL/010 loop iteration to provide transaction set addressee information.

3. Use a single or multiple 2/HL/010 shipment loop iterations to identify the attributes associated with a single FMS notice number assigned to control the shipment.

4. Use a single or multiple 2/HL/010 line item loop iterations to identify the line item detail associated with each shipment.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	M AN 1/12

Implementation Note:

In the first 2/HL/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Optional	HL02	734	Hierarchical Parent ID Number	O AN 1/12
Implementation Notes:				
1. Use for each 2/HL/010 line item loop iteration to identify the shipment loop associated with each line item.				
2. Data element content is the sequential number assigned to the 2/HL/010 shipment loop iteration and serves as the cross-reference between the shipment and all line items contained in the shipment.				
Mandatory	HL03	735	Hierarchical Level Code	M ID 1/2
Code defining the characteristic of a level in a hierarchical structure.				
I Item				
Code Value Implementation Note:				
Use to identify the individual line item loops.				
S Shipment				
Code Value Implementation Note:				
Use to identify the individual shipment loops.				
V Address Information				
Code Value Implementation Note:				
Use to identify the transaction set address loop.				
Not Used	HL04	736	Hierarchical Child Code	O ID 1/1

Optional

Segment: LIN Item Identification

Level: Detail

Loop: HL

Usage: Optional

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use only in 2/HL/010 line item loops to identify the material included in the shipment.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LIN01	350	Assigned Identification	O AN 1/11

Not Used

Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
	Implementation Notes: 1. Use only one of codes A1, A2, A4, FB, FS, FT, MG, or YP to properly identify the material shipped. 2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE. 3. When citing the Federal Supply Classification (code FT) always use code CN to identify the commodity name or description. A1 Plant Equipment Number Code Value Implementation Note: Use to identify plant equipment. A2 Department of Defense Identification Code (DoDIC) Code Value Implementation Note: Use to identify ammunition items. A4 Subsistence Identification Number Code Value Implementation Note: Use to identify subsistence items. CN Commodity Name Code Value Implementation Note: Use only with code FT to identify the material name or description. FB Form Number Code Value Implementation Note: Use to identify the form stock number. FS National Stock Number Code Value Implementation Note: Must use the NSN when known. FT Federal Supply Classification Code Value Implementation Note: Use to identify nonstandard material when a part number is not available and material requisitioned was identified by description (e.g., non-NSN lumber products). MG Manufacturer's Part Number Code Value Implementation Note: Use to identify nonstandard material. YP Publication Number Code Value Implementation Note: Use to identify the publication stock number. ZB Commercial and Government Entity (CAGE) Code Code Value Implementation Note: Use only with code MG to identify a manufacturer's part number.					
Mandatory	LIN03	234	Product/Service ID Identifying number for a product or service.	M	AN	1/40
Conditional	LIN04	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2

Conditional	LIN05	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Not Used	LIN06	235	Product/Service ID Qualifier	C	ID	2/2

Not Used	LIN31	234	Product/Service ID	C	AN	1/40

Segment: SN1 Item Detail (Shipment)**Level:** Detail**Loop:** HL

Optional

Usage: Optional**Max Use:** 1**Purpose:** To specify line item detail relative to shipment**Syntax:** P0506 — If either SN105 or SN106 is present, then the other is required.**Semantic:** SN101 is the ship notice line item identification.**Comment:** SN103 defines the unit of measurement for both SN102 and SN104.**Implementation Note:***Use only in 2/HL/010 line item loops to identify the number of units associated with each transaction.***Data Element Summary**

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	SN101	350	Assigned Identification	O	AN	1/11
Mandatory	SN102	382	Number of Units Shipped Numeric value of units shipped in manufacturer's shipping units for a line item or transaction set.	M	R	1/10
Implementation Notes: 1. Use to identify the quantity associated with the individual transaction. 2. Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.						
Mandatory	SN103	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	M	ID	2/2
Implementation Note: Use to identify the unit of issue for the material. (See the unit of issue conversion table in volume 1, chapter 10.)						
Not Used	SN104	646	Quantity Shipped to Date	O	R	1/9
Not Used	SN105	330	Quantity Ordered	C	R	1/9
Not Used	SN106	355	Unit or Basis for Measurement Code	C	ID	2/2
Not Used	SN107	728	Returnable Container Load Make-Up Code	O	ID	1/2
Not Used	SN108	668	Line Item Status Code	O	ID	2/2

Optional	Segment: MEA Measurements
	Level: Detail
	Loop: HL
	Usage: Optional
	Max Use: 40
	Purpose: To specify physical measurements or counts, including dimensions, tolerances, variances, and weights
	(See Figures Appendix for example of use of C001.)
	Syntax: 1. R03050608 — At least one of MEA03, MEA05, MEA06 or MEA08 is required.
	2. C0504 — If MEA05 is present, then MEA04 is required.
	3. C0604 — If MEA06 is present, then MEA04 is required.
	4. L07030506 — If MEA07 is present, then at least one of MEA03, MEA05 or MEA06 are required.
	5. E0803 — Only one of MEA08 or MEA03 may be present.
	Semantic: MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.
	Comment: When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed use MEA05 as the negative (-) value and MEA06 as the positive (+) value.
	Implementation Note: Use only in 2/HL/010 shipment loops. Use three repetitions to identify shipment pieces, weight and cube.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	MEA01	737	Measurement Reference ID Code	O	ID	2/2
Required	MEA02	738	Measurement Qualifier	O	ID	1/3
			Code identifying a specific product or process characteristic to which a measurement applies			
			A Consolidated Weight			
			Code Value Implementation Note: Use with code LB in MEA04-1, to identify the shipment weight in pounds.			
			SQ Shipped Quantity			
			Code Value Implementation Note: Use with code PC in MEA04-1, to identify the number of physical units (pieces) in the shipment.			
			UCB Cube			
			Code Value Implementation Note: Use with code CF in MEA04-1 to identify the shipment cubic size (volume) expressed as cubic feet.			
Required	MEA03	739	Measurement Value	C	R	1/20
			The value of the measurement.			

	Implementation Note: Use to identify the actual number of pounds, pieces, or cubic feet, associated with the shipment based on the coding in MEA02 and MEA04-1.				
Required	MEA04	C001	COMPOSITE UNIT OF MEASURE	C	
			To identify a composite unit of measure		
			(See Figures Appendix for examples of use.)		
Mandatory	MEA04 - 1	355	Unit or Basis for Measurement Code	M	ID 2/2
			Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken		
			CF Cubic Feet		
			Code Value Implementation Note: Use with code UCB in MEA02 to indicate that the shipment cube is expressed as cubic feet.		
			LB Pound		
			Code Value Implementation Note: Use with code A in MEA02 to indicate that the shipment weight is expressed as pounds.		
			PC Piece		
			Code Value Implementation Note: Use with code SQ in MEA02 to indicate that the shipment quantity is expressed as pieces.		
Not Used	MEA04 - 2	1018	Exponent	O	R 1/15
Not Used	MEA04 - 3	649	Multiplier	O	R 1/10
Not Used	MEA04 - 4	355	Unit or Basis for Measurement Code	O	ID 2/2
Not Used	MEA04 - 5	1018	Exponent	O	R 1/15
Not Used	MEA04 - 6	649	Multiplier	O	R 1/10
Not Used	MEA04 - 7	355	Unit or Basis for Measurement Code	O	ID 2/2
Not Used	MEA04 - 8	1018	Exponent	O	R 1/15
Not Used	MEA04 - 9	649	Multiplier	O	R 1/10
Not Used	MEA04 - 10	355	Unit or Basis for Measurement Code	O	ID 2/2
Not Used	MEA04 - 11	1018	Exponent	O	R 1/15
Not Used	MEA04 - 12	649	Multiplier	O	R 1/10
Not Used	MEA04 - 13	355	Unit or Basis for Measurement Code	O	ID 2/2
Not Used	MEA04 - 14	1018	Exponent	O	R 1/15
Not Used	MEA04 - 15	649	Multiplier	O	R 1/10
Not Used	MEA05	740	Range Minimum	C	R 1/20
Not Used	MEA06	741	Range Maximum	C	R 1/20
Not Used	MEA07	935	Measurement Significance Code	O	ID 2/2
Not Used	MEA08	936	Measurement Attribute Code	C	ID 2/2
Not Used	MEA09	752	Surface/Layer/Position Code	O	ID 2/2
Not Used	MEA10	1373	Measurement Method or Device	C	ID 2/4

Segment: TD1 Carrier Details (Quantity and Weight)
Level: Detail
Loop: HL
Usage: Optional
Max Use: 20
Purpose: To specify the transportation details relative to commodity, weight and quantity.
Syntax: 1. C0102 — If TD101 is present, then TD102 is required.
2. C0304 — If TD103 is present, then TD104 is required.
3. C0607 — If TD106 is present, then TD107 is required.
4. P0708 — If either TD107 or TD108 is present, then the other is required.

Implementation Note:
Use only in 2/HL/010 shipment loops.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Optional	TD101 103	Packaging Code Code identifying the type of packaging. Part 1. Packaging form. Part 2. Packaging Material.	O AN 3/5
Implementation Note: Use to identify the shipment unit type pack. (See the type pack code conversion guide in volume 1, chapter 10.)			
Not Used	TD102 80	Lading Quantity	C NO 1/7
Not Used	TD103 23	Commodity Code Qualifier	O ID 1/1
Not Used	TD104 22	Commodity Code	C AN 1/30
Not Used	TD105 79	Lading Description	O AN 1/50
Not Used	TD106 187	Weight Qualifier	O ID 1/2
Not Used	TD107 81	Weight	C R 1/10
Not Used	TD108 355	Unit or Basis for Measurement Code	C ID 2/2

Optional

Segment: TD5 Carrier Details (Routing Sequence/Transit Time)

Level: Detail

Loop: HL

Usage: Optional

Max Use: 12

Purpose: To specify the carrier, sequence of routing and to provide transit time information

Syntax: 1. R0204050612 — At least one of TD502, TD504, TD505, TD506 or TD512 is required.

2. C0203 — If TD502 is present, then TD503 is required.

3. C0708 — If TD507 is present, then TD508 is required.

4. C1011 — If TD510 is present, then TD511 is required.

Comment: When specifying a routing sequence to be used for the shipment movement in lieu of specifying each carrier within the movement: use TD502 to identify the party responsible for defining the routing sequence; use TD503 to identify the actual routing sequence, specified by the party identified in TD502.

Implementation Note:

Use only in 2/HL/010 shipment loops to identify the intended mode of shipment between the shipping activity and designated consignee.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Not Used	TD501	133 Routing Sequence Code	O ID 1/2
Not Used	TD502	66 Identification Code Qualifier	C ID 1/2
Not Used	TD503	67 Identification Code	C AN 2/20
Required	TD504	91 Transportation Method/Type Code Code specifying the method or type of transportation for the shipment.	C ID 1/2
Implementation Note: Use to identify the mode of shipment code. (See the mode of shipment code conversion table in volume 1, chapter 10.)			
Not Used	TD505	387 Routing	C AN 1/35
Not Used	TD506	368 Shipment/Order Status Code	C ID 2/2
Not Used	TD507	309 Location Qualifier	O ID 1/2
Not Used	TD508	310 Location Identifier	C AN 1/30
Not Used	TD509	731 Transit Direction Code	O ID 2/2
Not Used	TD510	732 Transit Time Direction Qualifier	O ID 2/2
Not Used	TD511	733 Transit Time	C R 1/4
Not Used	TD512	284 Service Level Code	C ID 2/2

Optional	Segment: REF Reference Numbers			
	Level: Detail			
	Loop: HL			
	Usage: Optional			
	Max Use: >1			
Mandatory	Purpose: To specify identifying numbers.			
	Syntax: R0203 — At least one of REF02 or REF03 is required.			
	Implementation Note: Use only in 2/HL/010 shipment loops to indicate the identification number controlling the shipment and in 2/HL/010 line item loops to identify the customer assigned transaction number and the serial or lot numbers associated with the material.			
	Data Element Summary			
	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Required	REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2
	Implementation Note: Use only one of codes LT or SE, as needed, to properly identify lot numbers or serial numbers assigned to material managed under lot or serial number control procedures.			
	K1 Foreign Military Sales Notice Number			
	Code Value Implementation Note: Use only in 2/HL/010 shipment loops to identify the number assigned to control the shipment between the shipper and consignee.			
	LT Lot Number			
Not Used	Code Value Implementation Note: Use to identify the manufacturer's lot number, batch number, or other number identifying the production run.			
	SE Serial Number			
	Code Value Implementation Note: Use to identify a unique item identifier.			
	TN Transaction Reference Number			
	Code Value Implementation Note: Use in every 2/HL/010 line item loop to identify the customer assigned transaction number for the requisition associated with the shipment unit.			
	W8 Suffix			
	Code Value Implementation Note: Use as needed to identify the suffix associated with the transaction number.			
	REF02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C AN 1/30
	REF03	352	Description	C AN 1/80

Segment: DTM Date/Time Reference

Level: Detail

Loop: HL

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:

Use only in 2/HL/010 shipment loops to identify dates associated with the NOA.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time. 169 Product Availability Date Code Value Implementation Note: Use in every 2/HL/010 shipment loop to identify the NOA preparation date. 601 First Submission Code Value Implementation Note: Use in the shipment loop to identify the original NOA preparation date when the original NOA contained items which the customer rejected.	M	ID	3/3
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Optional	Segment: N1 Name
	Level: Detail
	Loop: N1 Repeat: 200
	Usage: Optional
	Max Use: 1
	Purpose: To identify a party by type of organization, name and code
	Syntax: 1. R0203 — At least one of N102 or N103 is required. 2. P0304 — If either N103 or N104 is present, then the other is required.
	Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party. 2. N105 and N106 further define the type of entity in N101.
	Implementation Notes: 1. Use the 2/N1/220 loop in the 2/HL/010 address loop to identify the organization originating the transaction set and the organization to receive the transaction set. 2. Use the 2/N1/220 loop, as needed, in the 2/HL/010 shipment loop to identify the shipment unit consignor when different from the activity originating the transaction set.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98 Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		98 Freight Management Facilitator	
		Code Value Implementation Note: Use to identify the designated FF to receive the transaction set.	
		CI Consignor	
		Code Value Implementation Note: Use as needed to identify the shipping activity.	
		CY Country	
		Code Value Implementation Note: Use to identify the designated CR to receive the transaction set.	
Not Used	N102	93 Name	C AN 1/35
Required	N103	66 Identification Code Qualifier	C ID 1/2
		Code designating the system/method of code structure used for Identification Code (67).	
		10 Department of Defense Activity Address Code (DODAAC)	
		Code Value Implementation Note: Must use with code CI in N101.	
		A2 Military Assistance Program Address Code (MAPAC)	
		Code Value Implementation Note: Use to indicate the structured MAPAC which identifies the CR/FF to receive the NOA.	
		M4 Department of Defense Routing Identifier Code (RIC)	

Code Value Implementation Note: <i>Use with code CI in N101.</i>					
Required	N104	67	Identification Code	C AN	2/20
			Code identifying a party or other code.		
Not Used	N105	706	Entity Relationship Code	O ID	2/2
Optional	N106	98	Entity Identifier Code	O ID	2/2
			Code identifying an organizational entity, a physical location, or an individual		

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 2/N1/220 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2

LM02	822	Source Subqualifier	O	AN	1/15
------	-----	----------------------------	---	----	------

Mandatory

Segment: LQ Industry Code**Level:** Detail**Loop:** LM**Usage:** Mandatory**Max Use:** 100**Purpose:** Code to transmit standard industry codes**Syntax:** C0102 — If LQ01 is present, then LQ02 is required.**Implementation Note:***Use to identify codes, as appropriate, consistent with management information requirements.***Data Element Summary**

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3

Implementation Note:*Only codes 0 and DF may be used in address loops.***0 Document Identification Code****Code Value Implementation Note:***Use only in address loops to identify the DIC.***33 Air Commodity and Special Handling Code****Code Value Implementation Note:***Use for air shipments to identify material manifesting, customs, and special handling or reporting requirements.***34 Water Commodity and Special Handling Code****Code Value Implementation Note:***Use for water shipments to identify the predominant commodity within the shipment unit for ocean manifesting.***35 Air Dimension Code****Code Value Implementation Note:***Use for air shipments to identify the comparative dimensions of the largest piece and the minimum size cargo door opening of an aircraft.***69 Foreign Military Sales Country Code****Code Value Implementation Note:***Use to identify the FMS country.***71 Service and Agency Code****Code Value Implementation Note:***Must use in FMS transactions to identify the customer country's requisitioning Service code: B, D, or P.***78 Project Code****Code Value Implementation Note:***Use as needed to identify the special programs, exercises, project, operation, and other purposes.***95 Offer and Release Option Code****Code Value Implementation Note:***Use to identify the offer and release option code.*

A4 Case Designator Number

Code Value Implementation Note:

Must use in FMS transactions to identify the FMS case number. For CLSSAs, repeat up to two times to identify the FMS FMSO I and FMSO II case numbers. In this instance, the first occurrence will cite the FMSO I case number, and a second occurrence, if applicable, will reflect the FMSO II case number.

A5 Subcase Number

Code Value Implementation Note:

Use as needed in FMS transactions based on Service requirements.

A6 Freight Forwarder Number

Code Value Implementation Note:

Use to identify the CR/FF to receive shipments and documentation.

A9 Supplementary Address

BD Transportation Priority Code

Code Value Implementation Note:

Use to identify the transportation priority.

DF Media and Status Code

Code Value Implementation Note:

Use only in address loops to identify the media and status code.

Required

LQ02 1271 Industry Code
Code indicating a code from a specific industry code list

C AN 1/20

Mandatory

Segment: SE Transaction Set Trailer

Level: Summary

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 6G

TRANSACTION SET 856 IMPLEMENTATION CONVENTION SHIPMENT STATUS MATERIAL RETURNS

856 Ship Notice/Manifest

This Draft Standard for Trial Use contains the format and establishes the data contents of the Ship Notice/Manifest Transaction Set (856) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. The transaction set enables the sender to describe the contents and configuration of a shipment in various levels of detail and provides an ordered flexibility to convey information.

The sender of this transaction is the organization responsible for detailing and communicating the contents of a shipment, or shipments, to one or more receivers of the transaction set. The receiver of this transaction set can be any organization having an interest in the contents of a shipment or information about the contents of a shipment.

Implementation Notes

1. Organizations use this transaction set to provide shipment status to the wholesale distribution system for authorized material returns, including automatic returns.
2. Use a single occurrence of this transaction set to transmit shipment status to one IMM/ICP. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Table 1

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
20	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/010 The HL segment is the only mandatory segment within the HL loop, and by itself, the HL segment has no meaning.

3/010 Number of line items (CTT01) is the accumulation of the number of HL segments. If used, hash total (CTT02) is the sum of the value of units shipped (SN102) for each SN1 segment.

Segment: ST Transaction Set Header
Level: Header
Loop: ____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143 Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 856 X12.10 Ship Notice/Manifest	M	ID	3/3
Mandatory	ST02	329 Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Segment: **BSN** Beginning Segment for Ship Notice

Level: Header

Loop: ____

Mandatory **Usage:** Mandatory

Max Use: 1

Purpose: To transmit identifying numbers, dates and other basic data relating to the transaction set

Syntax: **C0706** — If BSN07 is present, then BSN06 is required.

Semantic: 1. BSN03 is the date the shipment transaction set is created.
2. BSN04 is the time the shipment transaction set is created.
3. BSN06 is limited to shipment related codes

Comment: BSN06 and BSN07 differentiate the functionality of use for the transaction set

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	BSN01 353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M ID 2/2
Mandatory	BSN02 396	Shipment Identification A unique control number assigned by the original shipper to identify a specific shipment. Implementation Note: <i>Place ZZ in this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The ZZ entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	M AN 2/30
Mandatory	BSN03 373	Date Date (YYMMDD).	M DT 6/6
		Implementation Note: <i>Express the originating activity's date in GMT.</i>	
Mandatory	BSN04 337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99) Implementation Notes: 1. Express the originating activity's time in GMT.	M TM 4/8

2. Express time in a four-position (HHMM) format.

Not Used	BSN05	1005	Hierarchical Structure Code	O	ID	4/4
----------	-------	------	-----------------------------	---	----	-----

Conditional	BSN06	640	Transaction Type Code	C	ID	2/2
			Code specifying the type of transaction.			

FT Material Returns

Code Value Implementation Note:

Use to indicate the transaction set provides shipment status information related to material returns transactions.

Optional	BSN07	641	Status Reason Code	O	ID	3/3
			Code indicating the status reason.			

W05 Order Discrepancy

Code Value Implementation Note:

Use to indicate when the shipment status is related to return of discrepant or deficient material.

Mandatory

Segment: HL Hierarchical Level

Level: Detail

Loop: HL **Repeat:** 200000

Usage: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments.

Comments: 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.

2. The HL segment defines a top-down/left-right ordered structure.

3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.

4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.

5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.

6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Implementation Notes:

1. The transaction set hierarchical data structure is address information followed by transaction shipment status.

2. Use the first 2/HL/010 loop iteration to provide transaction set addressee information.

3. Use the second and all subsequent 2/HL/010 loop iterations to identify individual transaction shipment status information.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
HL01	628	Hierarchical ID Number	M AN 1/12
		A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	

Implementation Note:

In the first 2/HL/010 loop iteration, cite 1. In each subsequent loop iteration, increase incrementally by 1.

Not Used

HL02 734 Hierarchical Parent ID Number O AN 1/12

Mandatory

HL03 735 Hierarchical Level Code M ID 1/2
Code defining the characteristic of a level in a hierarchical structure.

V Address Information

Code Value Implementation Note:

Use to identify the individual transaction set addressee loops.

W Transaction Reference Number

Code Value Implementation Note:

Use to identify the individual transaction material returns shipment status loops.

Not Used

HL04 736 Hierarchical Child Code

O ID 1/1

Optional

Segment: LIN Item Identification

Level: Detail

Loop: HL

Usage: Optional

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use only in 2/HL/010 transaction reference number loops to identify the material shipped.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

Not Used

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LIN01	350	Assigned Identification	O AN 1/11

Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
	Implementation Notes: 1. Use only one of codes A1, A2, A4, FB, FS, FT, MG, or YP to properly identify the material shipped. 2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE. 3. When citing the Federal Supply Classification (code FT), always use code CN to identify the commodity name or description. A1 Plant Equipment Number Code Value Implementation Note: Use to identify plant equipment. A2 Department of Defense Identification Code (DoDIC) Code Value Implementation Note: Use to identify ammunition items. A4 Subsistence Identification Number Code Value Implementation Note: Use to identify subsistence items. CN Commodity Name Code Value Implementation Note: Use only with code FT to identify the material name or description. FB Form Number Code Value Implementation Note: Use to identify the form stock number. FS National Stock Number Code Value Implementation Note: Must use the NSN when known. FT Federal Supply Classification Code Value Implementation Note: Use to identify nonstandard material when a part number is not available and material reported was identified by description (e.g., non-NSN lumber products). MG Manufacturer's Part Number Code Value Implementation Note: Use to identify nonstandard material. YP Publication Number Code Value Implementation Note: Use to identify the publication stock number. ZB Commercial and Government Entity (CAGE) Code Code Value Implementation Note: Use only with code MG to identify a manufacturer's part number.					
Mandatory	LIN03	234	Product/Service ID Identifying number for a product or service.	M	AN	1/40
Conditional	LIN04	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2

Not Used	LIN31	234	Product/Service ID	C	AN	1/40

Optional

Segment: SN1 Item Detail (Shipment)
Level: Detail
Loop: HL
Usage: Optional
Max Use: 1
Purpose: To specify line item detail relative to shipment
Syntax: P0506 — If either SN105 or SN106 is present, then the other is required.
Semantic: SN101 is the ship notice line item identification.
Comment: SN103 defines the unit of measurement for both SN102 and SN104.

Implementation Note:
Use only in 2/HL/010 transaction reference number loops to identify the number of units shipped.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	SN101	350	Assigned Identification	O	AN	1/11
Mandatory	SN102	382	Number of Units Shipped Numeric value of units shipped in manufacturer's shipping units for a line item or transaction set.	M	R	1/10
Implementation Notes:						
1. Use to identify the shipped quantity.						
2. Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.						
Mandatory	SN103	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	M	ID	2/2
Implementation Note:						
<i>Use to identify the unit of issue for the material shipped. (See the unit of issue conversion table in volume 1, chapter 10.)</i>						
Not Used	SN104	646	Quantity Shipped to Date	O	R	1/9
Not Used	SN105	330	Quantity Ordered	C	R	1/9
Not Used	SN106	355	Unit or Basis for Measurement Code	C	ID	2/2
Not Used	SN107	728	Returnable Container Load Make-Up Code	O	ID	1/2
Not Used	SN108	668	Line Item Status Code	O	ID	2/2

Optional

Segment: TD5 Carrier Details (Routing Sequence/Transit Time)**Level:** Detail**Loop:** HL**Usage:** Optional**Max Use:** 12**Purpose:** To specify the carrier, sequence of routing and to provide transit time information**Syntax:** 1. R0204050612 — At least one of TD502, TD504, TD505, TD506 or TD512 is required.

2. C0203 — If TD502 is present, then TD503 is required.

3. C0708 — If TD507 is present, then TD508 is required.

4. C1011 — If TD510 is present, then TD511 is required.

Comment: When specifying a routing sequence to be used for the shipment movement in lieu of specifying each carrier within the movement: use TD502 to identify the party responsible for defining the routing sequence; use TD503 to identify the actual routing sequence, specified by the party identified in TD502.**Implementation Note:***Use only in 2/HL/010 transaction reference number loops to identify the mode of shipment.***Data Element Summary**

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	TD501	133 Routing Sequence Code	O	ID	1/2
Not Used	TD502	66 Identification Code Qualifier	C	ID	1/2
Not Used	TD503	67 Identification Code	C	AN	2/20
Required	TD504	91 Transportation Method/Type Code Code specifying the method or type of transportation for the shipment.	C	ID	1/2
Implementation Note: <i>Use to identify the mode of shipment. (See the transportation mode of shipment code conversion guide in volume 1, chapter10.)</i>					
Not Used	TD505	387 Routing	C	AN	1/35
Not Used	TD506	368 Shipment/Order Status Code	C	ID	2/2
Not Used	TD507	309 Location Qualifier	O	ID	1/2
Not Used	TD508	310 Location Identifier	C	AN	1/30
Not Used	TD509	731 Transit Direction Code	O	ID	2/2
Not Used	TD510	732 Transit Time Direction Qualifier	O	ID	2/2
Not Used	TD511	733 Transit Time	C	R	1/4
Not Used	TD512	284 Service Level Code	C	ID	2/2

Optional

Segment: REF Reference Numbers**Level:** Detail**Loop:** HL**Usage:** Optional**Max Use:** >1**Purpose:** To specify identifying numbers.**Syntax:** R0203 — At least one of REF02 or REF03 is required.**Implementation Note:**

Use only in 2/HL/010 transaction reference number loops to identify the customer assigned transaction number, the shipment unit number, and serial or lot numbers associated with the shipment status transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Notes:

1. Use only one of codes 08, 97, AW, BL, BM, IZ, K2, K3, SI, or WY, as needed, to properly identify the shipment unit number. Code use supplements the cross reference between the TCN for intransit control procedures and the applicable shipment identification number associated with the mode of shipment.
2. Use only one of codes LT or SE, as needed, to properly identify lot numbers or serial numbers assigned to shipped material managed under lot or serial number control procedures.

08 Carrier Assigned Package Identification Number**Code Value Implementation Note:**

Use as needed to identify the shipment unit small package identification number when no other number is available.

97 Package Number**Code Value Implementation Note:**

Use as needed to identify the shipment unit package identification number.

AW Air Waybill Number**Code Value Implementation Note:**

Use as needed to identify the shipment unit air waybill number.

BL Government Bill of Lading**Code Value Implementation Note:**

Use as needed to identify the government bill of lading for direct shipments (e.g., not through a CONUS regional freight consolidation center) to a CONUS destination.

BM Bill of Lading Number**Code Value Implementation Note:**

Use as needed to identify the shipment unit commercial bill of lading number.

EH Financial Classification Code**Code Value Implementation Note:**

Use as needed to identify the treasury symbol number (e.g., consisting of departmental index, year, treasury symbol, and suffix/limit) against which a credit for the returned material will be provided; for example, 97X49305BC0.

IZ Insured Parcel Post Number

Code Value Implementation Note:

Use as needed to identify the shipment unit insured parcel post number.

K2 Certified Mail Number

Code Value Implementation Note:

Use as needed to identify the shipment unit certified mail number.

K3 Registered Mail Number

Code Value Implementation Note:

Use as needed to identify the shipment unit registered parcel post number.

LT Lot Number

Code Value Implementation Note:

Use to identify the manufacturer's lot number, batch number, or other number identifying the production run.

SE Serial Number

Code Value Implementation Note:

Use to identify a unique item identifier.

SI Shipper's Identifying Number for Shipment (SID)

Code Value Implementation Note:

Use as needed to identify the shipment unit express mail number.

TG Transportation Control Number (TCN)

Code Value Implementation Note:

Use to identify the content of all shipments as specified by intransit control procedures.

TN Transaction Reference Number

Code Value Implementation Note:

Use in every 2/HL/010 transaction reference number loop to identify the customer assigned transaction number associated with the shipment unit.

W8 Suffix

Code Value Implementation Note:

Use as needed to identify the suffix associated with the transaction number.

WY Waybill Number

Code Value Implementation Note:

Use as needed to identify the shipment unit waybill number.

Required	REF02	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
Not Used	REF03	352	Description	C	AN	1/80

Optional

Segment: DTM Date/Time Reference

Level: Detail

Loop: HL

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:

Use only in 2/HL/010 transaction reference number loops to identify dates associated with the shipment status.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time.	M	ID	3/3
			Implementation Note: Use only one of codes 011, 514 or 515 to identify the available shipment information.			
			011 Shipped			
			Code Value Implementation Note: Use as needed to identify the material shipment date, regardless of shipment method.			
			514 Transferred			
			Code Value Implementation Note: Use as needed to identify material transfer date to the carrier, if a delay occurs prior to actual shipment.			
			515 Notified			
			Code Value Implementation Note: Use as needed to identify the material tender date to the carrier for shipment.			
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	NO	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Optional

Segment: N1 Name

Level: Detail

Loop: N1 **Repeat:** 200

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. Use the 2/N1/220 loop in the 2/HL/010 address loop to identify the organization originating the transaction set and the organization to receive the transaction set.

2. Use the 2/N1/220 loop in every 2/HL/010 transaction reference number loop to identify the shipment unit consignor, consignee, and carrier.

3. Use the 2/N1/220 loop as needed in 2/HL/010 transaction reference number loops to identify the organization to receive credit when that organization varies from the organization originating the transaction set.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	M ID 2/2
		CA Carrier	
		Code Value Implementation Note: Use as needed to identify the shipment unit carrier.	
		CI Consignor	
		Code Value Implementation Note: Use as needed to identify the shipping activity (ship from).	
		CN Consignee	
		Code Value Implementation Note: Use as needed to identify the material consignee.	
		ZB Party to Receive Credit	
		Code Value Implementation Note: Use as needed to identify the organization to receive credit for the material when different from the organization originating the transaction set.	
Not Used	N102	93 Name	C AN 1/35
Required	N103	66 Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67).	C ID 1/2

			10 Department of Defense Activity Address Code (DODAAC)			
			2 Standard Carrier Alpha Code (SCAC)			
			Code Value Implementation Note: Use as needed to identify the commercial carrier when no DODAAC is assigned.			
			M4 Department of Defense Routing Identifier Code (RIC)			
Required	N104	67	Identification Code	C	AN	2/20
			Code identifying a party or other code.			
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code	O	ID	2/2
			Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 2/N101/220 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use only in 2/HL/010 transaction reference number loops.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2

APPENDIX 6H

TRANSACTION SET 846 IMPLEMENTATION CONVENTION LOGISTICS ASSET SUPPORT

846 Inventory Inquiry/Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Implementation Notes

1. Organizations use this transaction set to inquire about material availability for support of contingency operations, special projects, or other operational requirements. IMMs/ICPs use this transaction set to respond to material availability inquiries.
2. Use a single occurrence of this transaction set to exchange transactions between a single inquiring organization and a single or multiple IMMs/ICPs, or between a single IMM/ICP and a single or multiple inquiring organizations. Use one occurrence of this transaction set to transmit a single or multiple transactions.

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
25	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

Segment: **ST** Transaction Set Header
Level: Header
Loop: ____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).
Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
		846	X12.28 Inventory Inquiry/Advice			
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Segment: BIA Beginning Segment for Inventory Inquiry/Advice

Level: Header

Loop: ____

Mandatory

Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of an inventory inquiry/advice transaction set.

Semantic: 1. BIA03 identifies the number of the inquiry/advice that is transferred.

2. BIA04 identifies the date of the inquiry/advice that is transferred.

3. BIA05 identifies the time of the inquiry/advice that is transferred.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	BIA01	353 Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M ID 2/2
Mandatory	BIA02	755 Report Type Code Code indicating the title or contents of a document, report or supporting item TA Asset Support Inquiry Code Value Implementation Note: <i>Use to identify a LASE inquiry.</i> TB Asset Support Advice Code Value Implementation Note: <i>Use to identify a LASE response.</i>	M ID 2/2
Mandatory	BIA03	127 Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier. Implementation Note: <i>Use a Z for this data element. DLMS does not use this data element but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	M AN 1/30
Mandatory	BIA04	373 Date Date (YYMMDD). Implementation Note: <i>Express the originating activity's date of transaction set preparation in GMT.</i>	M DT 6/6

Optional	BIA05 337 Time <div style="text-align: right; margin-top: -10px;">O TM 4/8</div> <p>Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)</p>
----------	--

Implementation Notes:

1. Express the originating activity's time of transaction set preparation in GMT.
2. Express the time in a four-position (HHMM) format.

Not Used	BIA06 306 Action Code <div style="text-align: right; margin-top: -10px;">O ID 1/2</div>
----------	--

Optional	Segment: N1 Name
	Level: Header
	Loop: N1 Repeat: 5
	Usage: Optional
	Max Use: 1
	Purpose: To identify a party by type of organization, name and code
	Syntax: 1. R0203 — At least one of N102 or N103 is required.
	2. P0304 — If either N103 or N104 is present, then the other is required.
	Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
	2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/080 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/080 loop to indicate an organization when an N101 qualifier code (e.g., Z4) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/450 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/080 which does not apply to all the table 2 iterations. (Codes subject to override: 33 and Z4.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	M	ID	2/2
		33	Inquiry Address			
			Code Value Implementation Note: Use to indicate the activity submitting the asset support request.			
			Z4 Owning Inventory Control Point			
Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67).	C	ID	1/2
			10 Department of Defense Activity Address Code (DODAAC)			
			M4 Department of Defense Routing Identifier Code (RIC)			
	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2

Optional

N106 98 Entity Identifier Code

O ID 2/2

Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/080 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information**Level:** Header**Loop:** LM **Repeat:** 10**Usage:** Optional**Max Use:** 1**Purpose:** To transmit standard code list identification information**Comment:** LM02 identifies the applicable industry code list source information.**Implementation Note:**

Use this 1/LM/140 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., EU) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/260 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/150 that does not apply to all the table 2 iterations. (Codes subject to override: 0 and EU.)

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN **Repeat:** 10000

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/LIN/010 loop to identify the material, transaction number, and inventory information associated with the LASE.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

Not Used	LIN01	350	Assigned Identification	O	AN	1/11
Mandatory	LIN02	235	Product/Service ID Qualifier	M	ID	2/2

Code identifying the type/source of the descriptive number used in Product/Service ID (234).

Implementation Notes:

1. Use only one of codes A1, A2, A4, FB, FS, MG, or YP for LASE inquiries and responses when no substitute material is involved.
2. Use only one of codes SR, SW, XA, or XP, as needed, for LASE responses only, and only when providing a preferred item. Use the NSN (code XP) when known.
3. When citing a manufacturer's part number (code MG) or a preferred manufacturer's part number (code XA), always use code ZB to identify the manufacturer's CAGE.

A1 Plant Equipment Number

Code Value Implementation Note:

Use to identify plant equipment.

A2 Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use to identify ammunition items.

A4 Subsistence Identification Number

Code Value Implementation Note:

Use to identify subsistence items.

FB Form Number

Code Value Implementation Note:

Use to identify the form stock number.

FS National Stock Number

Code Value Implementation Note:

Must use the NSN when known.

MG Manufacturer's Part Number

Code Value Implementation Note:

Use to identify nonstandard material.

SR Substitute Product Number

Code Value Implementation Note:

Use as needed to identify a preferred ammunition item.

SW Stock Number

Code Value Implementation Note:

Use as needed to identify a preferred subsistence item.

XA Preferred Part Number

Code Value Implementation Note:

Use as needed to identify a preferred manufacturer's part number.

XP Preferred National Stock Number

Code Value Implementation Note:

Use as needed to identify the preferred NSN.

YP Publication Number

Code Value Implementation Note:

Use to identify the publication stock number.

ZB Commercial and Government Entity (CAGE) Code

Code Value Implementation Note:*Use with code MG or XA to identify a manufacturer's part number.*

Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Segment: REF Reference Numbers
Level: Detail
Loop: LIN
Usage: Optional
Max Use: >1
Purpose: To specify identifying numbers.
Syntax: R0203 — At least one of REF02 or REF03 is required.

Implementation Note:
Use to identify the transaction number.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M	ID	2/2
			TN Transaction Reference Number			
Required	REF02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Not Used	REF03	352	Description	C	AN	1/80

Optional

Segment: DD Demand Detail

Level: Detail

Loop: LIN

Usage: Optional

Max Use: >1

Purpose: To describe the type of demand and the intended use of material

Syntax:

1. C0201 — If DD02 is present, then DD01 is required.
2. P03040507 — If either DD03, DD04, DD05 or DD07 are present, then the others are required.
3. C0605 — If DD06 is present, then DD05 is required.
4. C1009 — If DD10 is present, then DD09 is required.

Semantic: DD08 transmits the stock level indicator. "Y" indicates that the material is normally carried in stock. "N" indicates that the material is not normally stocked

Implementation Note:

Use as needed for LASE inquiries only to identify the weapon system associated with the required material.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

Optional

Segment: N1 Name
Level: Detail
Loop: N1 **Repeat:** 200
Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. Use the 2/N1/450 loop to identify the organization to receive the transaction set. Use multiple iterations of the 2/N1/450 loop to identify all transaction set recipients, as required.
2. For any specific table 2 iteration use this 2/N1/450 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/080 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/080 loop with a different address specified in the 2/N1/450 loop when the same N101 qualifier is used in both loops, but the N104 code is different. (Codes subject to override: 33 and Z4.)

7 PHYSICAL INVENTORY CONTROL

7.1 GENERAL

This chapter provides procedures, performance objectives, and reporting requirements for maintaining accurate records of the physical inventory, conducting physical inventory counts, and reconciling record variance for material within the supply system of DoD.

This chapter also provides procedures relating to the following types of inventory control actions applicable to DFAMS reporting of DLA-owned bulk petroleum:

- Monthly DFSP physical inventory levels to maintain accurate owner/manager accounts.
- Physical inventory reconciliation review notices to identify missing data or out-of-tolerance conditions.
- Investigation/TDR notices to identify excessive intransit gains or losses.

7.1.1 APPLICABILITY

Basic elements of the physical inventory control program prescribed by this chapter apply to the Military Departments and Defense Agencies, hereafter referred to as DoD Components, and establish:

- Uniform procedures on existing DoD policy, for maintaining accurate records, conducting physical inventories and location surveys/reconciliations, researching inventory discrepancies and causes for adjustments, performance reporting, and for quality control of work processes prescribed by the DoD Physical Inventory Control Program.
- Management control of all DoD supply system material to include:
 - principal items
 - packaged petroleum, oil and lubricants
 - secondary items regardless of whether assets are purchased with stock fund or procurement appropriations
 - ammunition
 - forms and publications
 - subsistence
- Reporting procedures necessary to measure the effectiveness of physical inventory control in the DoD supply system.

7.1.2 EXCLUSIONS

- These procedures are not applicable to bulk petroleum; complete ships, aircraft, ballistic missiles, nuclear weapons, space vehicles; assets located at contractor-owned and/or contractor-operated facilities which are not maintained on the DoD wholesale property accountability records; Industrial Plant Equipment reportable to the Defense General

Supply Center; National Security Agency/Central Security Service assets; and National Defense Stock Pile assets. Loaned material and material intransit will be accounted for in accordance chapter 14, section 2.6.

- Physical inventory control procedures for bulk petroleum are contained in DoD 4140.25-M.
- Nuclear weapons for which DoD has custodial responsibility. Inventories are in accordance with JCS Pub 6, Volume II, Joint Reports; Part 4, Nuclear Weapons Reports; Section 5, Stockpile Inventories and Inventory Reports.

7.2 POLICY

DoD policy is contained in DoD 4140.1-R.

7.2.1 PURPOSE

The purpose of the DoD physical inventory control process is to:

- Ensure material accountability is properly executed within DoD;
- Ensure accurate property accountability records for the physical inventory are maintained in support of customer requirements and readiness by performing physical inventories and location surveys/reconciliations;
- Identify and help resolve problems in supply system work processes affecting property accountability records by performing quality control of the work processes; and
- Identify repetitive processing errors and maintain accurate records for supply system transactions generated within the supply system by researching and reconciling property accountability record imbalances and potential discrepancies.

7.2.2 PHILOSOPHY

The dynamic nature of the physical inventory control function and the cost of counting and reconciling records requires that the approach be more selective than the "100 percent wall-to-wall total item count" concept. Available inventory resources must be directed towards those potential and actual discrepancies, controlled inventory items, and weapon system critical items for which the maximum returns will be derived from the resources which are applied

A fundamental requirement of inventory integrity is to implement the technical capability that provides for the total item property record which includes a single shared asset balance maintained by the distribution depot.

7.2.3 SECURITY OF MATERIAL

Security of material is the first line of defense for physical inventory control; therefore, DoD components shall pay special attention to the safeguarding inventory items. This shall include analysis of loss rates through inventories, financial liability investigation of property loss (DD Form 200) reports, and criminal incident reports, to establish whether repetitive losses indicate criminal or negligent activity. Physical security procedures for supply system material are contained in DoD 5200.8-R.

7.2.4 ASSET MANAGEMENT

A single total item property record shall be shared to provide material asset information. The total item property record shall, as a minimum, include material that is due in, intransit, in organic maintenance facilities, in a contractor's custody, on loan, onhand in distribution centers, reported onhand at retail activities, and for reported assets in the custody of users. The record on record set shall identify the quantity, condition, and value of the item asset for each organizational entity having physical custody of these assets.

7.2.5 MAINTAINING PROPERTY ACCOUNTABILITY/RESPONSIBILITY

The property accountability responsibility for segments of the total item property record may be delegated to, but not shared by, one or more organizational entities. However, asset balance information for a particular segment (such as storage activity balance for an item) will be shared, duplicative records will not be maintained.

- The Distribution Depot maintains the property accountability record for all material in storage and is responsible, as a minimum, for material custody, care, receipt, storage, and issue; safeguarding and rewarehousing materials; physical inventory and research; location survey/reconciliation; quality control checks; supply discrepancy report initiation, research and resolution; investigating and assessing financial liability for loss, damage, and destruction of Government property; and appropriate actions necessary to ensure that the physical on hand quantity and the total item property record quantity are in agreement.
- The owning Service or Agency shall assume or assign the accountability for material not in the physical custody of a distribution depot, including material inducted for organic repair, test assembly/disassembly, conversion, modification, or reclamation; material in a contractor's hands (in accordance with provisions of the FAR); material intransit; material on loan, etc.
- The Integrated Material Manager is responsible for initiating and directing the conduct of physical inventories; discrepancy research and reports; resolving discrepancies, investigating, and assessing liability for loss, damage, and destruction of Government property; and take appropriate actions necessary to ensure that the onhand quantity and the total item property record quantity are in agreement for all DoD material that is not in the physical custody of DoD activities.

7.2.6 END OF THE DAY PROCESSING

(Use the following end of the day processing procedures pending the establishment of single shared asset balances.)

End of the day processing shall be accomplished as follows:

- Owners/managers and distribution depots shall match all active record (i.e., stock numbers which had any transaction affecting record balances) onhand balances daily. The distribution depot shall submit the daily closing balance to each affected owner/manager using the TS 846 IC - Location Reconciliation (appendix 7A) with Code List Qualifier Code FH citing Code 1 (End of the Day Processing).

- Distribution depots shall prepare asset status transactions by line item (stock number + supply condition code = line item), type of pack and date packed/expiration date for subsistence, for each record experiencing transaction affecting the balance (including zero balance) and for no physical inventory adjustment required via TS 947 IC - Inventory Adjustment as provided for in chapter 8.
- Owners shall match the distribution depot asset status to the affected records. Imbalances will be programmatically researched to assure consideration of infloat documents, delayed transactions, and duplicate transactions. For unresolved mismatched quantities, the owner/manager will update the affected record onhand balance with the distribution depot's closing onhand balance. The mismatched quantity (gains and losses) shall be adjusted with the TS 947 IC - Inventory Adjustment (appendix 8A) with Quantity or Status Adjustment Reason Code AB (Accounting Error Inventory Adjustment Increase/ Decrease).
- Owners/Managers will request assistance from the distribution depot to isolate causes of record imbalances to maintain transaction level integrity. The distribution depot assistance should focus on data transmission, e.g., lost transactions, etc.

7.2.7 RECONCILING TOTAL ITEM PROPERTY RECORDS WITH FINANCIAL RECORDS

Owning Services/Agencies shall reconcile total item property records and financial records as prescribed by DoD 7220.9-M, chapter 34, and DoD 7420.13-R to ensure compatibility of the total inventory value reflected by these records and associated reports.

7.2.8 ITEM MANAGEMENT/CONTROL

DoD material is managed and controlled by stock number and supply condition code and by type of pack and date of packed/expiration date for subsistence; therefore, physical inventories shall be conducted and the results reported to owners/managers by stock number and supply condition code and by date packed/expiration date for subsistence.

7.2.9 DISTRIBUTION DEPOT RECORD KEEPING

Distribution depots shall maintain quantitative balance records for all material onhand regardless of ownership. Distribution depots shall maintain transaction histories to support the balance records. Maintenance of these records shall provide the capability to detect theft or diversion of material and improve the ability to determine the cause of inventory variances for corrective action.

7.2.10 INVENTORY PRIORITIZATION

DoD Components shall select and prioritize items for inventory for which they are accountable as follows:

- Inventory Sampling. (DoD is in the process of developing a statistical sampling methodology to meet both the Chief Financial Officer Act of 1990 and the Department's requirement to validate the accuracy of property accountability records.)
- Complete inventories shall be accomplished as follows:

- Controlled Inventory Items that are top secret, narcotics, drug abuse items, alcohol, category I nonnuclear missiles and rockets (semiannually in accordance with DoD 5100.76-M), precious metals, small arms, radioactive items, inert nuclear ordnance material, or other items that may be designated by OSD or the DoD Component, require complete physical inventory and do not qualify for use of a random statistical sampling approach.
- If ammunition or subsistence is subjected to complete inventory, physical inventory and location survey may be conducted concurrently
- Controlled inventory items not subject to annual complete physical inventory must be subjected to annual random statistical sampling. Acceptable statistical sampling techniques are widely prescribed and may be used so long as every item included in the population has an equal probability of being selected in the sample. The statistical sampling technique must provide reasonable assurance (as a minimum) that the property accountability records are accurate with a 95 percent level of confidence, accuracy level of 85 percent, and a maximum margin of error of 2 percent. If the sample inventory results do not satisfy the above criteria, complete physical inventory of the population from which the sample was selected will, be performed.
- Inventories for items not designated for complete inventory under this subsection shall be accomplished as a result of:
 - Total or partial material release denials (spot inventory--see subsection 7.3.4.1 and Type of Physical Inventory/Transaction History Code E).
 - Location reconciliation variances
 - Location survey errors
 - Owner/manager request (special inventory); or
 - Selection based on a physical inventory prioritization system that considers characteristics such as weapon system significance; recorded inventory quantity and dollar value; demand quantity, value, and frequency; proximity of anticipated replenishment action; forecasted replenishment quantity and value; and period of time since last inventory. The prioritization system shall be run (as a minimum) quarterly and the results shall be used for scheduling items for physical inventory. Owners/managers shall provide quarterly updates to the variables on the second Thursday of the second month of each quarter. Updated variables will be provided in TS 846 IC - Physical Inventory/Transaction History. If no updates are received from the owners/managers, the storage activity will use the prior quarter's values. Items selected for inventory through the use of selection systems/models shall not be given priority over inventory sampling, complete inventories, total or partial denials, locations reconciliation variances, and location survey errors inventories.

7.2.11 POTENTIAL DISCREPANCIES

Potential discrepancies between the actual physical count of material and the property accountability record onhand balance shall be researched and resolved in accordance with

figure 7-1 either by:

- Correctly posting supply transactions (e.g., receipts, issues, adjustments, etc.) discovered during the research process that were previously incorrect or unposted in the record imbalance; and/or
- Posting an inventory adjustment to correct the imbalance

7.2.12 ACCURACY AND PERFORMANCE GOALS

The acceptable DoD accuracy and performance goals are as follows:

- Material Denial Goal: Not greater than 1 percent
- Receipt Processing Performance Goal: 90 percent stored and posted within time standards (see Chapter 14, section 2.1)
- Location Audit Program Goal:
 - Location Survey Accuracy:
 - 97 percent - General Supplies
 - 98 percent - Ammunition
 - Location Reconciliation Accuracy:
 - 97 percent - General Supplies
 - 98 percent - Ammunition
- Property Accountability Record Accuracy Goal: 95 percent - Ammunition

7.3 PHYSICAL INVENTORY PROCEDURES

7.3.1 INVENTORY PROGRAM ACCOMPLISHMENT

Distribution depots will monitor program accomplishment throughout the fiscal year to ensure that the requirements of subsection 7.2.10 are met.

7.3.2 PREINVENTORY PLANNING

The potential for count inaccuracies will be reduced by conducting preinventory planning to include:

- Actions to ensure location integrity by correcting such situations as unbinned/loose material; questionable identity of material in location; and single locations containing multiple supply condition codes or stock numbers, inadequately labeled shelf-life items (date of manufacture/assembly/pack or date of expiration/inspection/test, as appropriate); and/or material lots stored in a single location.
- Document cleanup to ensure to the extent possible that receipts, adjustments, transaction reversals, and other transactions are posted to the property accountability

record and that in-process receipts are stored in location prior to the established physical inventory cutoff date.

7.3.3 SCHEDULE INVENTORIES

7.3.3.1 ITEM CHARACTERISTICS

Distribution depots will initiate all scheduled inventories based on item characteristics, specifically the controlled inventory item code and any other category codes designated by DoD Components that require physical inventory not less than once each fiscal year, with the TS 846 IC - Physical Inventory/Transaction History (appendix 7B) using Type of Physical Inventory/Transaction History Code G.

7.3.3.2 SELECTION AND PRIORITIZATION MODEL

Distribution depots will initiate all scheduled inventories based on selection and prioritization model criteria with the TS 846 IC - Physical Inventory/Transaction History using Type of Physical Inventory/Transaction History Code I.

7.3.3.3 STATISTICAL INVENTORIES

Distribution depots will initiate the scheduled random statistical sample inventory to meet the Chief Financial Officers Act of 1990 and the Departments requirements to validate the accuracy of the supply records with the TS 846 IC - Physical Inventory/Transaction History using Physical Inventory/Transaction History Code N. The OSD will publish the quarter to conduct the annual statistical sample inventory.

Owners may initiate a scheduled random statistical sample inventory of lined items owned to determine the overall accuracy of their records with the TS 846 IC - Physical Inventory/Transaction History using Type of Physical Inventory/Transaction History Code L. Distribution depots may also initiate a scheduled random statistical sample inventory of line items in storage to determine the overall accuracy of their records with TS 846 IC - Physical Inventory/Transaction History using Type of Physical Inventory/Transaction History Code P.

7.3.3.4 LOCATOR/PROPERTY ACCOUNTABILITY ONHAND BALANCE MISMATCHES

Distribution Depots may initiate scheduled inventories as a result of onhand balance mismatches between the locator and property accountability records with the TS 846 IC - Physical Inventory/Transaction History using Type of Physical Inventory/Transaction History Code M.

7.3.4 UNSCHEDULED INVENTORIES

7.3.4.1 SPECIAL INVENTORY

Owners, AOs, and distribution depots will initiate special inventories using the TS 846 IC - Physical Inventory/Transaction History. If an inventory has not been taken within the past 90 calendar days, cite Type of Physical Inventory/Transaction History Code C, J, or K. If an inventory has been taken within the past 90 calendar days, an effort will be made to construct a transaction history and from it determine what the item balance should be or what discrepancy may have caused the imbalance. Only when these efforts fail to produce satisfactory results will special inventories be generated. In this case, cite Type of Physical

Inventory/Transaction History Code H in the TS 846 IC - Physical Inventory/Transaction History. The procedure for restricting special inventories may be waived when the inventory manager has recorded backorders for the item involved.

7.3.4.2 SPOT INVENTORY

Distribution depots will initiate spot inventories as a result of total or partial material denial on classified and sensitive items regardless of value, pilferable items when the value of the variance is greater than \$100, and for noncontrolled items variances greater \$5,000. The TS 846 IC - Physical Inventory/Transaction History requests will cite Type of Physical Inventory/Transaction History Code E. Distribution depots shall accomplish all requests for spot inventories.

7.3.5 CANCELING INVENTORIES

7.3.5.1 GENERAL

When conditions exist which preclude accurate completion of an inventory which has been established, the inventory will be canceled by the distribution depot or the owner/manager. Conditions which may require cancellation include, but are not limited to, catalog changes, rewarehousing of material under inventory, insufficient resources, insufficient time to meet established inventory timeframes to notify other affected owners/managers, and acts of God.

7.3.5.2 OWNER/MANAGER CANCELLATION

When an owner/manager cancels an inventory, the owner/manager will notify all affected distribution depots using the TS 846 IC - Physical Inventory/Transaction History with Type of Physical Inventory/Transaction History Code N.

7.3.5.3 DISTRIBUTION DEPOT CANCELLATION

When a distribution depot cancels an inventory, or when an owner/manager requests cancellation of an inventory, the distribution depot will notify the requesting owner/manager using TS 846 IC - Physical Inventory/Transaction History with Management Code N. When a canceled inventory is required to meet annual inventory schedule requirements, it must be rescheduled by the distribution depot within the current fiscal year. When a spot inventory (Type of Physical Inventory/Transaction History Code E) is canceled, it must be rescheduled within 15 calendar days.

7.3.6 CONDUCTING, RECORDING, AND REPORTING THE INVENTORY

7.3.6.1 GENERAL

Physical inventory procedures at distribution depots will provide the required asset-to-record accuracy with positive control of material and documentation which are in float, including material release orders, receipts, condition transfers, catalog and other data changes, etc.

7.3.6.2 INFLOAT DOCUMENT CONTROL

The distribution depot may reduce the volume of infloat accountable documents, during the period required for an item count, by suspending the issue of low priority material release

transactions from undergoing inventory. However, material will be released for items undergoing inventory when such release is necessary to meet the order/ship timeframes of DoD 4140.1-R, to include the recognition of the RDD. The distribution may also reduce the volume of infloat accountable documents by deferring routine supply condition code changes, providing the chapter 8 control requirements are complied with.

7.3.6.3 PHYSICAL INVENTORY TIMEFRAME

Distribution depots will complete physical inventories and transmit the appropriate TS 947 IC - Inventory Adjustment (appendix 8A) to the owner/manager within 30 calendar days subsequent to the PICD for scheduled inventories and within 15 calendar days subsequent to the PICD for unscheduled inventories.

7.3.6.4 POTENTIAL VARIANCE

The distribution depot will compare the adjusted count with the balance maintained by the distribution to determine the potential variance and initiate postcount validation and preadjustment research as required under section 7.4. Immediately upon completion of postcount validation and preadjustment research, the distribution depot will record the count and date of last inventory on the distribution depot quantitative balance record.

7.3.6.5 NO ADJUSTMENTS

When no adjustment is required (includes receipt of a TS 846 IC - Physical Inventory/Transaction History for an item with no positive balance on the distribution depot's quantitative balance record), the distribution depot will update the distribution depot record with the date of last inventory and transmit a TS 846 IC - Physical Inventory/Transaction History (appendix 8A) transaction with zero quantity for each line item to the owner/manager to indicate completion of the inventory. The owner/manager will update the date of last inventory using the TS 947 Inventory Adjustment adjustment transaction date.

7.3.6.6 PRORATING ADJUSTMENT

When the distribution depot record reflects more than one owner for commingled material, the distribution depot will apply all gains and losses to the wholesale manager. The distribution depot will prorate any losses that cannot be applied to the wholesale manager among all owners having balances. Distribution depots will not consider foreign owner balances in the prorating process. Foreign owner and SDAF balances will not be altered unless they are the only remaining balances for reporting a loss. Resolution of these losses will be in accordance with DoD Security Assistance Program policy.

7.3.6.7 PROCESSING INVENTORY ADJUSTMENTS

The distribution depot will process TS 947 IC - Inventory Adjustment application transaction by line item, and by each date packed/expiration date and type of pack for subsistence, to update the distribution depots quantitative balance record and each owner/manager record.

7.3.7 FOLLOWING UP FOR PHYSICAL INVENTORY

When the owner/manager has requested an unscheduled inventory and no adjustment or completion transaction has been received within 40 calendar days of the date of the request, the owner/manager will initiate a followup using TS 846 IC - Physical Inventory/Transaction History which cites Management Code CX and duplicates the

remaining date form the Transaction Set 846 application which established the inventory.

The distribution depot will respond to the owner/manager followup within 5 calendar days by providing the appropriate adjustment, completion, or cancellation transaction. If an adjustment or completion transaction was previously submitted and a followup is received, the distribution depot will reply submitting a TS 846 IC - Physical Inventory/Transaction History with Management Code CY to the owner/manager reflecting the actual physical inventory adjustment.

If the distribution depot does not have a record of the owner/manager original TS 846 IC - Physical Inventory/Transaction History request, the distribution depot shall process the TS 846 IC - Physical Inventory/Transaction History with Management Code CX as an original request for physical inventory.

7.3.8 RECONCILING MANUAL RECORDS FOR CONTROLLED ITEMS

When manual records are maintained for control of assets in secured storage, the distribution depot, as a minimum, will reconcile these records at the time of the inventory with the corresponding distribution depot records and physical counts of material.

7.4 RESEARCH OF POTENTIAL OR ACTUAL PHYSICAL INVENTORY ADJUSTMENTS

7.4.1 POLICY

DoD Components will ensure that potential or actual adjustments are researched in accordance with the value of the adjustment and type of item involved. The DoD criteria for this research are set forth in figure 7-1 and will be used as the basis for selective research for supply system material. A reduction of the volume of erroneous adjustments can only be achieved by conducting specified degrees of research before posting the adjustment transaction. More stringent research requirements may be imposed by DoD Components based upon the limits of resources available and upon specific asset control problems. However, in no case will adjustments be processed against items without required preadjustment research having been performed (see figure 7-1).

7.4.2 OBJECTIVES

Analysis of inventory adjustments is vital in order to:

- Identify failures in the control systems so improvements can be made.
- Reduce discrepancies in the future.
- Ensure that proper adjustment was made.
- Evaluate indicators of trends or system problems for corrective action.
- Detect negligence, abuse, or theft of material. Known or suspected negligence, abuse, or theft will be researched in accordance with DoD 7200.10-M and figure 7-1.

7.4.3 TIMELINESS OF RESEARCH

Timely completion of the research of potential adjustments is essential. Delay only

increases the complexities of adequate research and reduces the probability of conclusive findings.

- Distribution depot preadjustment research must be completed and the physical inventory adjustment/completion action posted to the owner/manager record within 30 days form the PICD for scheduled inventories and 15 calendar days from the PICD for unscheduled inventories.
- The distribution depot must complete mandatory causative research within 45 calendar days form the date the adjustment transaction was posted. Sample causative research must be completed within 45 calendar days from the date the sample causative research listing is created.

7.4.4 TRANSACTION HISTORY REQUEST

For intra-Service/Agency (or inter-Service/Agency, based on agreement of the DoD Components involved) reconciliation, the owner/manager may request transaction history for analyzing inventory discrepancies.

- The owner-manager will request the history using the TS 846 IC - Physical Inventory/Transaction History citing the appropriate Type of Physical Inventory/Transaction History Code. Transaction history will consist of all transactions affecting the balance for the requested timeframe.
- The distribution depot will provide the transaction history data using the TS 846 IC - Physical Inventory/Transaction History.

7.4.5 ERROR CLASSIFICATION CODING

Causes of potential/actual inventory adjustment are determined by research. Causes will be classified, analyzed, and evaluated so action may be taken to correct situations that are causing errors. Error classification codes will be entered in the TS 846 IC - Physical Inventory/Transaction History. For analysis and evaluation, error conditions will be identified to the operation in which they occurred (e.g., receiving, issues, etc.) and classified by type within each operation. For reporting purposes, each operation and each error type have been identified by an alphabetic or numeric code. The error classification system is structured to provide the Components the latitude to amplify the DoD defined error classifications; however, DoD Components will summarize internally defined error classifications to the appropriate DoD classification for all reports provided to higher authorities, auditors, etc.

7.4.6 ERROR CAUSE FEEDBACK AND CORRECTION

The distribution depot will provide a quarterly summary of the causative research results -- as reported by the error cause code -- and provide feedback to the commander of the distribution depot concerned. As a minimum, the activity will provide a summary of the number and value of adjustments by error cause codes.

Distribution depots will use this information in conjunction with local indicators to identify and correct recurring errors in their operations (e.g., though initiation of training, increased frequency of quality control checks, and other action as required).

7.4.7 CONTROLLED INVENTORY ITEM ADJUSTMENTS

Unresolved physical inventory adjustments for all classified and sensitive items regardless of value, and for pilferable items when the adjustment is in excess of \$2,500, as prescribed by DoD 7200.10-M, will be referred to security officials of the distribution depot at which the adjustment occurred to determine whether there is culpability or when fraud, waste, or abuse is suspected (see figure 7-1).

7.4.8 MATERIAL RELEASE DENIALS

Chapter 5 prescribes DoD standard document formats, data codes, and criteria for the preparation and processing of material release denial at distribution depots and by owners/managers.

Upon initiation of a material release denial citing Management Code C1, C2, C3 or C4, distribution depots:

- Reverse the issue, adjust the distribution depot record onhand quantitative balance to zero, and transmit a TS 947 IC - Inventory Adjustment for the adjusted quantity to the owner/manager citing Management Code C1, C2, C3, or C4.
- Initiate a spot inventory as required under subsection 7.3.4.2 of this section.
- If the inventory results in positive reporting of assets, reverse all or part of the loss that was taken prior to processing any inventory gain transaction and transmit a TS 947 IC - Inventory Adjustment reversal to the owner/ manager.
- If an inventory can be accomplished without delaying the processing of the Material Release Order beyond the prescribed UMMIPS timeframes (see DoD 4140.1-R) it may be conducted prior to processing the denial transaction.

7.5 REVERSAL OF INVENTORY ADJUSTMENTS

Reversal of TS 947 IC - Inventory Adjustment transactions is a required capability which must be implemented with proper controls and supported by proper documentation. Procedures for reversing adjustments will contain, as a minimum, the following control features:

7.5.1 POSTED/UNPOSTED SOURCE DOCUMENTS

Reversals required to correct inventory records when previously unposted or incorrectly posted supply transactions (e.g., receipts, issues, etc.), regardless of age, are limited to those transactions that can be properly documented to reference the specific transaction document number(s) that will be processed to offset the reversal.

7.5.2 INVENTORY ADJUSTMENTS CORRECTIONS

Reversals required to correct physical inventory adjustments which were based on incorrect/incomplete information are limited to 2 years from the date of the original adjustment unless the requirements of section 7.5.1 are met. All reversals must be properly documented.

7.5.3 LIMITATIONS

Reversals will not be processed solely on the basis of a previous offsetting physical inventory adjustment.

7.5.4 REPORTING REQUIREMENTS

Reversals against transactions processed within the adjustment reporting period will be separated and identified to report:

- Gross adjustment during the current period.
- Reversal of prior quarters' adjustment transactions,
- Reversals of current quarters' adjustment transactions, and
- Total value of net adjustments during the current period (i.e., value of net gains added to value of net losses).

7.6 LOCATION AUDIT PROGRAM

Each DoD Component will implement a location audit program which will consist of both a location survey and a location reconciliation. The DoD acceptable accuracy goals are provided in section 7.2.11. The DoD Components may impose more stringent standards internally. The location audit program is subject to the quality control checks delineated in section 7.8, Quality Control Program. Errors will be subject to validation and research before they are counted as an error. Location audit program results will be reported in the ICE Report as prescribed in section 7.9.2 and 7.9.3. Only one error per surveyed location and one error per location reconciliation line item with discrepancies is to be reported; however, DoD Components will collect and analyze all Type III errors (see subsection 7.6.1.2.3 and 7.6.2.2.3) by element.

7.6.1 LOCATION SURVEY

Use the TS 888 IC - Storage Item Correction (appendix 7C) to provide storage facilities with data record changes on items of supply. The code entered in the LQO1 segment of this transaction serves to provide information on the nature of the change, and actions to be taken.

7.6.1.1 REQUIREMENTS

Location survey requires a physical verification, other than actual count, between assets and recorded location data to ensure that all assets are properly recorded. When a discrepancy is identified during the location survey program (Type I or Type II error (see subsection 7.6.1.2.1 and 7.6.1.2.2)), the distribution depot will conduct prompt research and determine the need for a special inventory (TS 846 IC - Physical Inventory/Transaction History with Type of Physical Inventory/Transaction History Code K). In some instances, location survey and physical inventory will be conducted concurrently for ammunition and subsistence. When location survey and physical inventory are conducted concurrently, both the physical inventory and the location survey performance statistics will be reported separately in the ICE Report.

Location survey will be accomplished at each distribution depot not less than once each

fiscal year by (1) performing complete location survey of all locations; (2) using a statistical sampling methodology that ensures all locations are included in the sample and each has a probability of selection; or (3) a combination of complete and statistical sampling.

A location survey will be conducted in both the gaining and losing storage areas following the accomplishment of rewarehousing projects. A location survey conducted as a result of rewarehousing projects may be considered to have satisfied the annual survey requirement for the area surveyed.

The proper sequence of operating a location survey requires the comparing of assets in storage locations with locator records. This sequence of operation is important to detect assets in unrecorded locations. As an objective, it is desirable to identify items to inventory lots or segments. Lots/segments will be of a manageable size (number of items) to permit location survey in a minimum time period, to ensure maximum uninterrupted service to customers, and to obtain the greatest degree of accuracy for the location survey.

Items within a lot/segment which have been subject to a complete item inventory will be considered to have satisfied the annual survey requirement when the entire lot/segment is located in a clearly designated, conterminous warehouse space. These inventories lots/segments may be excluded from the complete survey for the fiscal year in which they were counted; however, the location survey performance statistics will be reported in the ICE Report.

When permanent locations are reserved for items, recorded location which are unoccupied will be identified and/or verified during the location survey.

7.6.1.2 ACCURACY MEASUREMENT

To measure the accuracy of the results of the location survey, discrepancies will be classified in one of the three categories listed below. Only one error per stock number per location is charged when locator delete, or locator establish, or locator record correction is required for the same location. When the stock number and actual assets differ, the discrepancy will be classified as a locator establish action only.

To ensure accuracy of property accountability records, special inventories should be performed when assets are found in an erroneous or unrecorded location or when there are mismatches in the unit of issue that may result in a quantity variance.

7.6.1.2.1 LOCATOR RECORD DELETED

The removal or change of a locator record when there is a recorded location but there are no physical assets -- unless the location is being held open for new receipts. (Type I location survey error.)

7.6.1.2.2 LOCATOR RECORD ESTABLISHED

The recording of locations when assets are physically found in storage and no locator records exist, or when the recorded stock number disagrees with the Material in the location. (Type II location survey error.)

7.6.1.2.3 LOCATOR RECORD CORRECTED

Changes to the locator record when physical Material characteristics differ from any of the following data elements (Type III location survey error):

- Unit of issue.
- Supply condition code.
- Controlled inventory item code (see DoD 4100.39-M, Volume 10, Table 61). Verification of the code will consist of ensuring that assets are stored in areas providing the degree of security commensurate with the assigned code.
- Type of pack code (for subsidence only). (See chapter 5.)
- Lot number or serial number (for ammunition only).
- Completeness and accuracy of magazine date card (for ammunition only).

7.6.2 LOCATION RECONCILIATION

Storage activities will use the TS 888 IC - Storage Item correction to update stock records, item locator records and bin tags.

7.6.2.1 REQUIREMENTS

Location reconciliation requires a match between distribution depots and owner/manager records in order to identify and to correct situations when there is: (1) an owner/manager record with no corresponding distribution depot record, (2) a distribution depot record with no corresponding owner/manager record, (3) common elements of data that do not match, and (4) quantity discrepancies. Mismatches will be researched and special inventories conducted when required to effect corrective action.

7.6.2.2 ACCURACY MEASUREMENT

To measure the accuracy of the results of the location reconciliation program, discrepancies will be classified in one of the four categories listed below (report only one error per location reconciliation error).

7.6.2.2.1 OWNER/MANAGER RECORD

Reflects balance for distribution depot; no location reconciliation transaction received. (Type I location reconciliation error.)

7.6.2.2.2 LOCATION RECONCILIATION TRANSACTION

Received from distribution depot; no corresponding owner/manager record. (Type II location reconciliation error.)

7.6.2.2.3 MISMATCH OF DATA ELEMENTS

Mismatch of any of the following: (Type III location reconciliation error):

- Unit of Issue
- Ownership/Manager Identifier.
- Controlled Inventory Item Code (see DoD 4100.39-M, Volume 10, Table 61).
- Type of pack code (subsistence only).
- Shelf-life code.
- Date packed/expiration date (subsistence only).

7.6.2.2.4 QUANTITY DISCREPANCY

(Type IV location reconciliation error.)

7.6.2.3 SCHEDULE

Location reconciliation will be accomplished by DoD Components in accordance with the following guidance:

- Owners/managers and distribution depots will reconcile all records annually. The annual reconciliation will be accomplished at the close of business on the second Tuesday of the month.
- Distribution depots will prepare location reconciliation request transactions by line item, and by type of pack and date packed/expiration date for subsistence, for each stock number regardless of the balance (including zero balances). The TS 846 IC - Location Reconciliation citing Code List Qualifier Code FH (Annual Location Reconciliation Request) will be transmitted to the owners/managers by the distribution depots.
- All owner/manager and distribution depot records (active and inactive records, including zero balances) will be reconciled not less than once each fiscal year. Location reconciliation requests will be prepared on the second Tuesday of the month indicated in the following schedule and transmitted prior to the 15th day of the scheduled month:

<u>SERVICE OF AGENCY</u>	<u>PREPARATION DATE</u>	<u>TRANSMISSION DATE</u>
Army	2nd Tues - Jan	15 Jan
Navy	2nd Tues - Mar	15 Mar
Marine Corps	2nd Tues - May	15 May
Air Force	2nd Tues - Jul	5 Jul
Defense Logistics Agency	2nd Tues - Sep	15 Sep

7.6.2.4 PROCESSING LOCATION RECONCILIATION REQUEST

In processing location reconciliation requests, owners/managers will match the requests to

the owner/managers records. When a mismatch is programmatically unresolved, TS 947 IC - Correction Adjustment (appendix 8A) with Quantity or Status Adjustment Reason Code AB will be processed to adjust the owner/manager records. All Type I, II, III, and IV mismatches will be resolved as follows:

- Research of owner/manager active and historical records.
- Research of distribution depot active/historical record (TS 846 IC - Physical Inventory/Transaction History with Type of Physical Inventory or Transaction History Code X).
- Request physical inventory (TS 846 IC - Physical Inventory/Transaction History with Type of Physical Inventory or Transaction History Code J).
- If the above actions fail to resolve the mismatch, the TS 947 IC - Inventory Adjustment with Quantity or Status Adjustment Reason Code AB will remain on the owner/manager records.

A physical inventory is not required under the following conditions, except when the mismatch involves classified or sensitive items, or pilferable items when the extended dollar value of the variance is greater than \$100.

- The owner/manager record may be adjusted without special inventory when the extended value of the variance is \$5,000 or less than 10 percent or less of the beginning value of the variant owner/manager record for Type IV, errors (see subsection 7.6.2.2.4).
- The owner/manager record may be adjusted without special inventory when the extended value of the variance is \$5,000 or less for Type I and Type II errors (see subsection 7.6.2.2.1 and 7.6.2.2.2).

When a discrepancy is identified during the location reconciliation, transmit the following transaction sets, as appropriate, to the submitting activity:

- TS 824 IC - Reject, as prescribed in Volume 1, chapter 7.
- TS 888 IC - Storage Item Correction application, as prescribed in this chapter.

7.7 RETENTION OF ACCOUNTABLE DOCUMENTATION

Audit capability is required for a period of time following the processing of documents and data and completion of the research effort. The following retention criteria will apply:

7.7.1 SOURCE DOCUMENTS

Retain original source documents or facsimiles, i.e., microform (microfilm, microfiche), Compact Disk-Read Only Memory (CD-ROM), etc., for at least 2 years. Where source documents are produced, these include only accountability change documents such as receipts, issues, shipments, transfers, supply condition code changes, and inventory and financial adjustments. Retain source documents providing evidence of shipment to Foreign Military Sales recipients for 2 years from date of material shipment.

7.7.2 TRANSACTION HISTORY

Retain registers, records, files, tapes, and data for at least 2 years in a format useful for audit trail purposes. Automated inventory control systems will be designed to facilitate the printout of transaction histories which indicate the date the last physical inventory was conducted for each item.

7.7.3 ADJUSTMENT RESEARCH

Retain backup documentation that directly pertains to individual cases of physical inventory adjustment research efforts for at least 2 years.

7.7.4 ANNUAL STATISTICAL INVENTORY

Retain the annual statistical sample inventory line item detail data for at least 2 years.

7.8 QUALITY CONTROL

7.8.1 GOALS AND OBJECTIVES

DoD Components will establish a quality control program at each owner/manager and distribution depot which encompasses the objectives of DoD Directive 5010.38, and the physical inventory objectives contained in DoD 4140.1-R. Portions of the program can be accomplished during ongoing practices within inventory processes. Quality control results will assist management in identifying those human, procedural, or system errors which adversely affect record accuracy and in achieving better control over physical material warehousing practices. Within the scope of this quality control program, those work processes directly related to the control of physical material will be monitored for attained quality levels and performance evaluated on improvements, not numerical goals. Accordingly, all quality control programs will include reviews to assess the accuracy/quality of the following work processes:

- Warehousing practices -- to include checks of storage practices, stock rotation, shelf-life management, identification of material in store, mixed stock, location accuracy and rewarehousing projects.
- Receiving practices -- to include checks of documentation, material identity, quantity, and supply condition code; checks for processing timeliness; and verification of daily input data to the location system.
- Issuing practices -- to include checks of legibility of issue documents; accuracy of stock selection as to identity, quantity, unit of issue, shelf life, supply condition code, and type of pack (subsistence only); marking of outgoing shipments; and release to carriers.
- Validity of automated data -- to include checks of receipt, issue, and adjustment transaction data entries against input documentation.
- Inventory practices -- to include checks of inventory counts, location surveys, location reconciliation corrective actions, causative research, and adjustments at both the owner/manager and distribution depot.
- Catalog practices -- to include checks of catalog change processing, accuracy, and

timeliness, using the affected recorded locations as the universe.

- Locator file updates -- to include checking the accuracy of changes to the locator file (e.g., all additions, deletions, and changes of unit of issue, supply condition code, shelf life, etc.).
- Report of discrepancy processing -- to include checks for processing timeliness and checking the accuracy of ROD initiation, followup and reply, investigation research including identification and correction of supply errors, adjustment of accountable and financial records, and preparation of financial liability investigation of property loss report (DD Form 200).
- Logistics reassignment processing -- checks to determine if the logistic reassignment action were completed; e.g., LIM/GIM records were changed to reflect decapitalization/transfer, LIM directed the distribution depot to change the decapitalized/transferred assets to GIM ownership, the distribution depot effected and advised the LIM of the change, and the LIM initiated action to resolve any quantity variances.
- Suspended asset processing -- to include checks of the timeliness in reclassifying suspended (Supply Condition Codes J, K, L, Q, and R) material.

7.8.2 ASSIGNMENT OF RESPONSIBILITY

Whenever possible, quality control checks of these work processes will include identification of the individual performing the tasks. This will facilitate the placement of responsibility for appraising and improving quality with each manager within the chain of command.

7.8.3 COMMAND EMPHASIS

Continued command management emphasis and review of performance are essential for the success of the quality control program. Command managers must ensure effective organizational interrelationships among the functional element concerned with the physical inventory control program such as: comptroller, data systems, transportation, warehousing, maintenance, quality control, and supply management. The quality control program will include provisions for initiation of corrective action when acceptable quality levels are not met.

7.9 INVENTORY CONTROL EFFECTIVENESS REPORTING

7.9.1 GENERAL

Each DoD Component will prepare an Inventory Control Effectiveness Report, as formatted in figure 7-2, for general supplies for each quarterly period ending December 31, March 31, June 30, and September 30 for all material for which the Component maintains the property accountability record. Army, Navy, and Air Force will also prepare an ICE Report, as formatted in figure 7-2, for their service peculiar ammunition. Army will prepare a separate report for the SMCA. DoD Components will:

- Include a narrative analysis identifying trends, accomplishments, significant comments on internal system performance, descriptions of problems, actions in

process or taken to correct the problem and "get well" dates if the problem is not corrected at the time the ICE Report is submitted. Problems in reporting ICE data should also be highlighted in the ICE Report until the problem(s) is corrected.

- Reflect inventory control performance for all DoD wholesale supply system assets of principal and secondary items, including package fuels, less all material exclusions in DoD 4140.1-R.
- Submit a signed copy and a floppy disk with report data formatted in Lotus 123 , Version 4, Spreadsheet, configured as outlined in paragraph 7.9.2. to the Director, Defense Logistics Management Standards Office (DLMSO), 8725 John J. Kingman Road, Suite 2533, Ft Belvoir VA 22060-6221, not later than 75 calendar days following the end of the reported quarter. The above reporting requirement has been assigned Report Control Symbol DD-P&L(Q) 935.

7.9.2 ICE REPORT PREPARATION INSTRUCTIONS FOR GENERAL SUPPLIES

(The formulas represent the line numbers on the ICE Report.) (Utilize Lotus 123 spreadsheet, version 4.)

The following instructions are provided for preparing the Inventory Control Effectiveness Report.

7.9.2.1 REPORT HEADING/COLUMNS

Reporting Organization. Enter the name of the reporting DoD Component. Quarter Ending. Enter the applicable fiscal quarter; 1st, 2nd, 3rd, 4th. Data entered for the report lines and subcolumns under this column heading reflect only activity occurring during the applicable quarter.

Fiscal Year to Date. Enter the applicable fiscal year.

Columnar Entries. Data entered for the report lines and subcolumns under this column heading reflect cumulative fiscal-year-to-date activity.

7.9.2.2 PART I. PERFORMANCE

7.9.2.2.1 MATERIAL DENIALS

Lines Directed for shipment. Enter the total number of line items directed for shipment (TS 940 IC - Material Release).

Enter the total material denials (sum of total and partial denials, and warehouse refusals (TS 945 IC - Material Release Advice)). Include denial transactions classified by denial Manage Codes A1, A2, A3 (subsistence only), A4, A5, A6, and A7 in the total.

Material Denial Rate. Compute this figure by dividing total denials by the line items directed for shipment and multiplying by 100. $\{(1)(b) / (1)(a) \times 100\}$ The DoD performance goal for the material release denial rate is not greater than one percent.

7.9.2.2.2 RECEIPT PROCESSING PERFORMANCE

Receipts Posted and Stored. Enter the total number of line item receipts posted and stored to the total item property record.

Receipts Posted and Stored on Time. Enter the total number of line item receipts which were effectively posted and stored within the timeframes. Both storing and posting actions are considered complete when the item is in the storage location or available for issue, and the quantity is posted to the total item property record.

On Time Receipt Rate. Compute this figure by dividing the total number of receipts posted and stored on time by the total number of receipts and multiplying by 100. $\{(2)(b) / (2)(a) \times 100\}$ The DoD performance goal for posting and storing receipts on time is 90 percent.

7.9.2.2.3 LOCATION AUDIT PROGRAM

Reflects the results of the location survey (ratio of accurate distribution depot locator records to distribution depot locations surveyed) and the location reconciliation (ratio of valid distribution depot records to owner/manager records).

7.9.2.2.4 LOCATIONS SURVEYED

Enter the number of distribution depot locations surveyed.

Survey Errors. Enter the total number of location discrepancies as defined in section 7.6.1.2.3 (report only one error per stock number per location).

Survey Accuracy. Compute this figure by dividing the locations with discrepancies by the total locations surveyed multiplying by 100, and subtracting the result from 100 percent. $\{100 - ((3)(b) / (3)(a) \times 100)\}$ The DoD goal for location survey accuracy is 97 percent.

7.9.2.2.5 LOCATIONS RECONCILED

Enter the total number of location records reconciled (i.e., the sum of line items on the owner's/manager's record and line items which were not on the owner's/manager's record but were on the distribution depots' records).

Reconciliation Errors. Enter the total number of discrepant location records as defined in sections 7.6.2.2.3 and 7.6.2.2.4 (count one error per location reconciliation request (line item) or unmatched owner's/manager's record).

Reconciliation Accuracy. Compute this figure by dividing the number of discrepancies by the number of records reconciled, multiplying by 100, and subtracting the result from 100 percent. $\{100 - ((3)(e) / (3)(d)) \times 100\}$ The DoD goal for location reconciliation is 97 percent.

7.9.2.3 PART II. PHYSICAL INVENTORY ADJUSTMENTS

7.9.2.3.1 PHYSICAL INVENTORIES

Number of Scheduled and Unscheduled Inventories Completed. Enter the total number of line items inventoried (scheduled and unscheduled). Each supply condition code for a stock number at each distribution depot is a line item.

Number of Inventories with Variances. Enter the total number of line items inventoried (scheduled and unscheduled) which had an inventory variance.

Inventory Variance Rate. Reflects the percent of line items inventoried which had an

inventory variance. Compute this figure by dividing the lines with inventory variances by the total line items inventoried and multiplying by 100. $\{((1)(b) / (1)(a)) \times 100\}$

7.9.2.3.2 NUMBER OF INVENTORIES WITH MAJOR VARIANCES

Enter the total number of line items inventoried (scheduled and unscheduled) which had a major inventory variance (overages or shortages exceeding \$5,000) and all variances on controlled items.

Major Variance Rate. Reflects the percent of line items inventoried which had major inventory variances. Compute this figure by dividing the lines with a major inventory variance by the total line items inventoried and multiplying by 100. $\{((1)(d) / (1)(a)) \times 100\}$

7.9.2.3.3 NUMBER OF ADJUSTMENTS FROM OTHER THAN PHYSICAL INVENTORIES

- Number of Location Reconciliation Adjustments. Enter the number of location reconciliation adjustments (TS 947 IC - Inventory Adjustment using Quantity or Status Adjustment Reason Code AB).
- Number of End of the Day Processing Adjustments. Enter the number of end of the day processing adjustments TS 947 IC - Inventory Adjustment using Quantity or Status Adjustment Reason Code AB).
- Total. Absolute total of adjustments from other than physical inventories. $\{(2)(a) + (2)(b)\}$
- Total Adjustments. Enter the sum of number of inventories with variances and the number of adjustment from other than physical inventories. $\{(1)(b) + (2)(c)\}$

7.9.2.3.4 NUMBER OF REVERSALS OF INVENTORY ADJUSTMENTS

Number of Gain Reversals. Enter the number of gain reversals of inventory adjustments.

Number of Loss Reversals. Enter the number of loss reversals of inventory adjustments.

Total. Absolute total of inventory reversals (gains and losses).

7.9.2.3.5 MONETARY VALUE

Average Value of Inventory. Enter the average value of onhand assets as reflected on financial records for the 12 months prior to the report cutoff date (i.e., current quarter plus last three quarters).

Record Value of Items Inventoried. Enter the extended value prior to actual inventory of line items inventoried (scheduled and unscheduled) during the reporting period.

7.9.2.3.6 VALUE OF INVENTORY ADJUSTMENTS

Physical Inventory Adjustments

- Gains. Enter monetary value of gains resulting from inventory less the monetary value of gain reversals (from current and prior quarters) processed during the report period.

- Losses. Enter monetary value of losses resulting from inventory less the monetary value of loss reversals (from current and prior quarters) processed during the report period.
- Gross Adjustments. $\{(5)(c)[1][a] + (5)(c)[1][b]\}$

Reversals -- Current Quarter

- Gains. Enter the total monetary value of decreases to the record balances as a result of reversing gain adjustments processed during the reporting period. Compute the FY to Date value for reversals of current quarter gains by adding the Quarter Ending value for reversal of current quarter gains to the prior quarter FY to Date value of reversal of current quarter gains.
- Losses. Enter the total monetary value of increases to the record balances as a result of reversing loss adjustments processed during the reporting period. Compute the FY to Date value for reversal of current quarter losses by adding the Quarter Ending value for reversal of current quarter losses to the prior quarter FY to Date value for reversal of current quarter losses.
- Total. Absolute total of reversals of current quarter gains and losses. $\{[2][a] + [2][b]\}$
Reversal -- Prior Quarters
- Gains. Enter total monetary value of decreases to record balances as a result of reversing gain adjustments reported in prior quarters. Compute the FY to Date value for reversal of prior quarters gains by adding the quarter ending value of reversal of current quarter gains to the prior quarter gains.
- Losses. Enter total monetary value of increases to record balances as a result of reversing loss adjustments reported in prior quarters. Compute the FY to Date value for reversal of prior quarters losses to the prior quarter FY to Date value for reversal of prior quarters losses.
- Total. Absolute total of reversals of prior quarter gains and losses. $\{[3][a] + [3][b]\}$
- Total Reversals. The total of reversals of current quarter and prior quarter gains and losses. $\{[2][c] + [3][c]\}$
- Total Record Imbalances. The total of gross adjustments and total reversals. $\{[1][c] + [4]\}$

7.9.2.3.7 GROSS ADJUSTMENTS as a percent of:

- Average value of Inventory. Divide the total value of gross adjustments by the average value of inventory and multiply by 100. $\{((5)(c)[1][c] / (5)(a)) \times 100\}$
- Value of Items Inventoried. Divide the total value of gross adjustments by the record value of items inventoried and multiply by 100. $\{((5)(c)[1][c] + (5)(b)) \times 100\}$

7.9.2.3.8 TOTAL RECORD IMBALANCES as a percent off:

- Average Value of Inventory. Divide the value of the total record imbalances by the

average value of inventory. $\{((5)(c)[5] / (5)(a)) \times 100\}$

- Value of Items Inventoried. Divide the value of the total record imbalances by the record value of items inventoried. $\{((5)(c)[5] / (5)(b)) \times 100\}$

7.9.2.3.9 MONETARY VALUE OF LOCATION RECONCILIATION

- Value of Line Items Reconciled. Enter the extended value of line items reconciled during the reporting period.
- Location Reconciliation Adjustments
 - Gains. Enter the monetary value of gains resulting from reconciliation during the period.
 - Losses. Enter the monetary value of losses resulting from reconciliation during the period.
 - Total. Absolute total of location reconciliation gains and losses. $\{(8)(b)[1] + (8)(b)[2]\}$
- Monetary Value of End of the Day Processing
 - Gains. Enter the value of gains resulting from end of the day processing.
 - Losses. Enter the value of losses resulting from end of the day processing.
 - Total. Absolute total of end of the day processing gains and losses. $\{(9)(a) + (9)(b)\}$

7.9.3 ICE REPORT PREPARATION INSTRUCTIONS FOR AMMUNITION

(The formulas represent the line numbers on the ICE Report.) (Utilize Lotus 123, Version 4, Spreadsheet.)

7.9.3.1 REPORT HEADING/COLUMNS

Reporting organization. Enter the name of the reporting DoD Component.

Quarter Ending. Enter the applicable fiscal quarter 1st, 2d, 3d, or 4th. Data entered for the report lines and subcolumns under this column heading reflect only activity occurring during the applicable quarter.

Fiscal Year To Date. Enter the applicable fiscal year. Data entered for the report lines and subcolumns under this column heading reflect cumulative fiscal year to date activity.

Columnar Entries. Report data separately for high-risk items (Controlled Inventory Item Codes 1, 2, 5, 6, and 8) and low-risk items (controlled Inventory Item Codes 3,4, U, and P).

7.9.3.2 PART I. PERFORMANCE

7.9.3.2.1 MATERIAL DENIALS

Complete as described in sections 7.9.2.2.1. For ammunition, include denial transactions classified by denial Manage Codes A1, A2, A5, A6, and A7 in the total. Components will

report denials separately for high-risk and low-risk items.

7.9.3.2.2 RECEIPT PROCESSING PERFORMANCE

Complete as described in section 7.9.2.2.2. The DoD goal for posting and storing ammunition receipt on-time is 90 percent.

7.9.3.2.3 LOCATION AUDIT PROGRAM

Complete as described in sections 7.9.2.2.4 and 7.9.2.2.5. The DoD goals for location survey and location reconciliation for ammunition are 98 percent.

7.9.3.3 PART II. PHYSICAL INVENTORY ADJUSTMENTS

7.9.3.3.1 PHYSICAL INVENTORIES

- Number of Scheduled and Unscheduled Inventories Completed. Enter the total number of line items inventoried (scheduled and unscheduled). Each supply condition code for a stock number at each distribution depot is a line item.
- Number of Inventories with Variances. Enter the total number of line items inventoried (scheduled and unscheduled) which had an inventory variance.
- Inventory Record Accuracy. Reflects the percent of lines inventoried without an inventory variance. Compute this figure by dividing the lines with an inventory variance by the total lines inventoried and multiplying by 100, and subtracting the result from 100 percent. $\{100 - ((1)(b) / (1)(a)) \times 100\}$ The DoD inventory record accuracy goal for ammunition is 95 percent.

7.9.3.3.2 NUMBER OF INVENTORY ADJUSTMENTS FROM OTHER THAN PHYSICAL INVENTORIES

Complete same as section 7.9.2.3.3

7.9.3.3.3 NUMBER OF REVERSALS OF INVENTORY ADJUSTMENTS

Complete same as paragraph 7.9.2.3.4.

7.9.3.3.4 MONETARY VALUE

Complete same as section 7.9.2.3.5 and 7.9.2.3.6.

7.9.3.3.5 GROSS ADJUSTMENTS as a percent of:

Complete same as sections 7.9.2.3.7.

7.9.3.3.6 TOTAL RECORD IMBALANCES as a percent of:

7.9.3.3.8 MONETARY VALUE OF END OF THE DAY PROCESSING

Complete same as section 7.9.2.3.9

7.10 BULK PETROLEUM PHYSICAL INVENTORY REPORT

It is mandatory that DFSP inventory of DLA-owned product be reported to DFSC on a monthly basis. This is accomplished using TS 846IC - Physical Inventory/Transaction History, as prescribed by DoD 4140.25-M and the implementation convention shown at appendix 7B. For this purpose, the report type code will indicate a Distributor Inventory Report (data element 755, code DD).

7.11 BULK PETROLEUM RECONCILIATION REVIEW

DFSC will reconcile accounts for DLA-owned product held at DFSPs on a monthly basis. If reconciliation cannot be completed due to missing transactions or an out-of-tolerance condition, DFSC will request a reconciliation review. This will be accomplished using TS 846 IC - Physical Inventory/Transaction History, as prescribed by DoD 4140.25-M and the implementation conventions shown at appendix 7B. For this purpose, the report type code will indicate a Report of Findings (data element 755, code S8).

7.12 BULK PETROLEUM INVESTIGATION/TDR NOTICES

DFSC will notify the receiving activity or its DICP whenever an excessive intransit gain or loss has been identified during processing of the receipt transaction. This will be accomplished using TS 846 IC - Physical Inventory/Transaction History application, as prescribed by DoD 4140.25-M and the implementation conventions shown at appendix 7B. For this purpose, the report type code will indicate a Variance Analysis (data element 755, code VA).

7.13 STORAGE ITEM CORRECTION

This section provides standard procedures required by the ICPs to provide for the correction and/or updating of storage activity records when:

- Reported transactions indicate that the ICP and storage activity records are inconsistent.
- A catalog/stock list change is processed against an ICP record which will affect stock control data maintained at the storage activities.

7.13.1 ITEM CORRECTION/CHANGE NOTIFICATION

Use the TS 888 IC - Storage Item Correction (appendix 7C) to provide storage facilities with data record changes on items of supply. The code entered in the LQO1 segment of this transaction serves to provide information on the nature of the change, and actions to be taken.

7.13.2 STORAGE ACTIVITY ACTION

Storage activities will use the TS 888 IC - Storage Item correction to update stock records, item locator records and bin tags.

7.13.3 LOGISTIC REASSIGNMENTS

When an LR occurs, process TS 846 IC - LR Storage Transfer Order/Reply (appendix 6C), in accordance with chapter 10.

MINIMUM RESEARCH REQUIREMENTS FOR POTENTIAL OR ACTUAL PHYSICAL INVENTORY ADJUSTMENTS

CONDITION OF DISCREPANCY	REQUIRED RESEARCH		
	Post Count Validation	Preadjustment Research	Causative Research
1. $\leq \$1,000$	NO	NO	NO
2. $> \$1,000$ but $\leq \$5,000$ and ≤ 10 percent unit variance	YES	NO	YES
3. $> \$1,000$ but $\leq \$5,000$ and > 10 percent unit variance	YES	YES	YES
4. $> \$5,000$ but $\leq \$16,000$ and ≤ 25 percent unit variance	YES	YES	SAMPLE
5. $> \$5,000$ but $\leq \$16,000$ and > 25 percent unit variance	YES	YES	YES
6. $> \$16,000$	YES	YES	YES
7. Controlled Inventory Item	YES	YES	YES ¹
8. Suspected Fraud, Waste, or Abuse	YES	YES	YES
9. Annual Statistical Sample for variances $> \$100$	YES	YES	YES

Figure 7-1

¹Sample causative research in lieu of complete causative research for pilferable item discrepancies with a value form \$.01 to \$2,500 may be accomplished to serve as a deterrent to fraud, waste or abuse and to identify systemic inventory and security problems. Causative research will be conducted on all adjustments (gains and losses) of classified and sensitive items regardless of dollar value of item or extended dollar value of adjustment. Causative research will be conducted on all adjustments (gains and losses) of pilferable items with an extended value, than \$2,500, and all adjustments with an extended value of greater that \$16,000 or greater than 25 percent unit variance and greater than \$5,000.

APPENDIX 7A

TRANSACTION SET 846 IMPLEMENTATION CONVENTION LOCATION RECONCILIATION

846 Inventory Inquiry/Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Implementation Notes

1. Distribution depots use this transaction set to transmit location reconciliation request transactions to owners/managers.
2. Use a single occurrence of this transaction set to transmit location reconciliation request transactions to one or more owners/managers. Use one occurrence of this transaction set to transmit a single or multiple transactions.

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
--------	--------	---------	------	-----------	---------	-------------

N/U	010	CTT	Transaction Totals	O	1
24	020	SE	Transaction Set Trailer	M	1

NOTES/COMMENTS:

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

Segment: **ST** Transaction Set Header

Level: Header

Loop: _____

Mandatory **Usage:** Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
		846	X12.28 Inventory Inquiry/Advice			
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Mandatory	Segment: BIA Beginning Segment for Inventory Inquiry/Advice					
	Level: Header					
	Loop: _____					
	Usage: Mandatory					
	Max Use: 1					
Mandatory	Purpose: To indicate the beginning of an inventory inquiry/advice transaction set.					
	Semantic: 1. BIA03 identifies the number of the inquiry/advice that is transferred.					
	2. BIA04 identifies the date of the inquiry/advice that is transferred.					
	3. BIA05 identifies the time of the inquiry/advice that is transferred.					
Data Element Summary						
Mandatory	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
	BIA01	353	Transaction Set Purpose Code Code identifying purpose of transaction set.	M	ID 2/2	
			00 Original			
			77 Simulation Exercise			
			Code Value Implementation Note: Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.			
Mandatory	BIA02	755	Report Type Code Code indicating the title or contents of a document, report or supporting item	M	ID 2/2	
			LC Location Inventory Report			
			Code Value Implementation Note: Use to identify location reconciliation request transactions.			
	Mandatory	BIA03	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	M	AN 1/30
				Implementation Note: Use a Z for this data element. DLMS does not use this data element, but is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.		
Mandatory		BIA04	373	Date Date (YYMMDD).	M	DT 6/6
				Implementation Note: Express the originating activity's date of transaction set preparation in GMT.		
		Required	BIA05	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	O
				Implementation Notes: 1. Express the originating activity's time of transaction set preparation in GMT.		

2. *Express time in a four-position (HHMM) format.*

Not Used

BIA06 306 Action Code

O ID 1/2

Segment: DTM Date/Time Reference
Level: Header
Loop: ____
Usage: Optional
Max Use: 10
Purpose: To specify pertinent dates and times
Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:

Use this 1/DTM/050 segment to indicate the date when a DTM01 qualifier code (e.g., 600) applies to ALL table 2 iterations and the same DTM02 date applies to all or most of the table 2 iterations. For any specific table 2 iteration where the date is to differ from the one indicated in table 1, use the 2/DTM/100 segment and specify the matching qualifier in DTM01 and the different date in DTM02. This date will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/DTM01/050 that does not apply to all the table 2 iterations. (Codes subject to override: 600.)

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374 Date/Time Qualifier Code specifying type of date or time, or both date and time. 600 As Of	M	ID	3/3
Code Value Implementation Note: Use to identify the close of business date (e.g., mutually agreed upon cutoff date) associated with the location reconciliation.					
Required	DTM02	373 Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337 Time	C	TM	4/8
Not Used	DTM04	623 Time Code	O	ID	2/2
Not Used	DTM05	624 Century	O	N0	2/2
Not Used	DTM06	1250 Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251 Date Time Period	C	AN	1/35

Optional

Segment: N1 Name

Level: Header

Loop: N1 **Repeat:** 5

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/080 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/080 loop to indicate the organization when an N101 qualifier code (e.g., TO) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/450 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/080 that does not apply to all the table 2 iterations. (Codes subject to override: KA and OW.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		KA Item Manager	
		Code Value Implementation Note:	
		Use to identify the IMM for the material reported.	
		OW Owner of Property or Unit	
		Code Value Implementation Note:	
		Use to identify the owner of the material reported.	
		SB Storage Area	
		Code Value Implementation Note:	
		Use to identify the depot or storage activity.	

Not Used

N102 93 Name C AN 1/35

Required

N103 66 Identification Code Qualifier C ID 1/2
Code designating the system/method of code structure used for Identification Code (67).

10 Department of Defense Activity Address Code (DODAAC)

M4 Department of Defense Routing Identifier Code (RIC)

Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/080 code to indicate the organizations sending and receiving the transaction set.

FR Message From**Code Value Implementation Note:**

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To**Code Value Implementation Note:**

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/140 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/260 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/150 that does not apply to all table 2 iterations. (Codes subject to override: 0.)

Data Element Summary

Mandatory

Not Used

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

			Code indicating a code from a specific industry code list			

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN **Repeat:** 10000

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/LIN/010 loop to identify the material, transaction number, and inventory information associated with the transaction.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

Not Used	LIN01	350	Assigned Identification	O	AN	1/11
Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
Implementation Notes: 1. Use only one of A1, A2, A4, FB, FS, MG, or YP to identify the item reported. 2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE.						
A1 Plant Equipment Number Code Value Implementation Note: Use to identify plant equipment.						
A2 Department of Defense Identification Code (DoDIC) Code Value Implementation Note: Use to identify ammunition items.						
A4 Subsistence Identification Number Code Value Implementation Note: Use to identify subsistence items.						
FB Form Number Code Value Implementation Note: Use to identify the form stock number.						
FS National Stock Number Code Value Implementation Note: Must use the NSN when known.						
MG Manufacturer's Part Number Code Value Implementation Note: Use to identify nonstandard material.						
YP Publication Number Code Value Implementation Note: Use to identify the publication stock number.						
ZB Commercial and Government Entity (CAGE) Code Code Value Implementation Note: Use only with code MG to identify a manufacturer's part number.						
Mandatory	LIN03	234	Product/Service ID Identifying number for a product or service.	M	AN	1/40
Conditional	LIN04	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2

Required

Segment: QTY Quantity**Level:** Detail**Loop:** QTY **Repeat:** 99**Usage:** Optional**Max Use:** 1**Purpose:** To specify quantity information.**Implementation Note:**

Use successive iterations of the 2/QTY/320 loop, as needed, to stratify the on hand quantity by material classification.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	QTY01	673	Quantity Qualifier Code specifying the type of quantity. 17 Quantity on Hand Code Value Implementation Note: Use to identify custodial record balance.	M	ID	2/2
Mandatory	QTY02	380	Quantity Numeric value of quantity.	M	R	1/15
			Implementation Note: Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.			
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID	2/2

Required

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use the 2/LM/375 loop to identify DoD unique coded data related to the characteristics and coding requirements for the transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2
LM02	822	Source Subqualifier	O	AN	1/15

Not Used

Mandatory

Segment: **LQ** Industry Code

Level: Detail

Loop: LM

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: **C0102** — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LQ01	1270	Code List Qualifier Code	O	ID	1/3
		Code identifying a specific industry code list			

Implementation Note:

Use only one of codes 99 or A1 (but not both) as appropriate.

83 Supply Condition Code

Code Value Implementation Note:

Use to identify the supply condition of the material.

87 Subsistence Type of Pack Code

Code Value Implementation Note:

Use as needed only for subsistence items to identify subsistence type of pack information.

99 Purpose Code

A1 Ownership Code

FE Shelf Life Code

Code Value Implementation Note:

Use as needed to identify the shelf-life code associated with the reported material.

Required

LQ02	1271	Industry Code	C	AN	1/20
		Code indicating a code from a specific industry code list			

Optional

Segment: N1 Name
Level: Detail
Loop: N1 **Repeat:** 200
Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/450 loop as needed: 1) to identify a receiving organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/080 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/080 loop with a different address specified in the 2/N1/450 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: KA and OW.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	M	ID	2/2
	Implementation Note: Use only one of codes KA or OW to identify the IMM or the owner of the material. KA Item Manager Code Value Implementation Note: Use to identify the IMM for the material reported. OW Owner of Property or Unit Code Value Implementation Note: Use to identify the owner of the material reported.					
Not Used	N102	93	Name	C	AN	1/35
Conditional	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C	ID	1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2

Optional

N106

98

Entity Identifier Code

O ID 2/2

Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use code TO in conjunction with the appropriate 2/N101/450 code to indicate the organization receiving the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Segment: **SE** Transaction Set Trailer

Level: Summary

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 7B

**TRANSACTION SET 846 IMPLEMENTATION CONVENTION
PHYSICAL INVENTORY/TRANSACTION HISTORY**

846 Inventory Inquiry/Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Implementation Notes

1. Owners/managers use this transaction set to request, inquire about, and cancel a physical inventory by a distribution depot. Owners/managers also use this transaction set to request transaction history. For bulk petroleum, owners/managers also use this transaction set to request an investigation/TDR resulting from excessive gain/loss variance and to request a reconciliation review.

2. Distribution depots use this transaction set to cancel and/or reschedule a physical inventory request by an owner/manager. Distribution depots also use this transaction set to respond to a request for transaction history and an inquiry about a request for a physical inventory. For bulk petroleum distribution depots also use this transaction set to provide a physical inventory report.

3. Use a single occurrence of this transaction set to exchange transactions between a single owner/manager and a single or multiple distribution depot, or between a single distribution depot and a single or multiple owners/managers. Use one occurrence of this transaction set to transmit a single or multiple transactions.

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
30	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
	846	X12.28 Inventory Inquiry/Advice			

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	--	---	----	-----

Segment: BIA Beginning Segment for Inventory Inquiry/Advice

Level: Header

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of an inventory inquiry/advice transaction set.

Semantic: 1. BIA03 identifies the number of the inquiry/advice that is transferred.
2. BIA04 identifies the date of the inquiry/advice that is transferred.
3. BIA05 identifies the time of the inquiry/advice that is transferred.

Mandatory

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
BIA01	353	Transaction Set Purpose Code Code identifying purpose of transaction set.	M ID 2/2
	00	Original	
	77	Simulation Exercise	
	Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>		

Mandatory

BIA02	755	Report Type Code Code indicating the title or contents of a document, report or supporting item	M ID 2/2
	DD	Distributor Inventory Report	
	Code Value Implementation Note: <i>For other than bulk petroleum, use to identify a response providing other than quantity information in answer to a request for a physical inventory. Use to identify a physical inventory report (bulk petroleum only).</i>		
	S8	Report of Findings	
	Code Value Implementation Note: <i>Use for bulk petroleum to identify a reconciliation review request.</i>		
	TC	Physical Inventory Request	
	Code Value Implementation Note: <i>Use to identify a physical inventory request.</i>		
	TF	Transaction History Request	
	Code Value Implementation Note: <i>Use to identify a transaction history request.</i>		
	VA	Variance Analysis	
	Code Value Implementation Note: <i>Use for bulk petroleum to identify an investigation/TDR request resulting from excessive gain/loss variance.</i>		

Mandatory	BIA03 127	Reference Number	M AN 1/30
		Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	

Implementation Note:

Use a Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.

Mandatory	BIA04 373	Date	M DT 6/6
		Date (YYMMDD).	

Implementation Note:

Express the originating activity's date of transaction set preparation in GMT.

Optional	BIA05 337	Time	O TM 4/8
		Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	

Implementation Notes:

1. Express the originating activity's time of transaction set preparation in GMT.
2. Express time in a four-position (HHMM) format.

Optional	BIA06 306	Action Code	O ID 1/2
		Code indicating type of action.	

2 Change (Update)

Code Value Implementation Note:

Use as needed for bulk petroleum transactions to identify changes to a previously accepted/recorded transaction.

W Reverse

Code Value Implementation Note:

Use as needed for bulk petroleum transactions to identify the complete reversal of the original transaction.

Optional

Segment: DTM Date/Time Reference**Level:** Header**Loop:** _____**Usage:** Optional**Max Use:** 10**Purpose:** To specify pertinent dates and times**Syntax:** 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.

2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. Use as needed for transaction history requests, reconciliation review requests, investigation/TDR requests and physical inventory reports, but only to identify pertinent dates.

2. Use this 1/DTM/050 segment to indicate the date when a DTM01 qualifier code (e.g., 090) applies to ALL table 2 iterations and the same DTM02 date applies to all or most of the table 2 iterations. For any specific table 2 iteration where the date is to differ from the one indicated in table 1, use the 2/DTM/100 segment and specify the matching qualifier in DTM01 and the different date in DTM02. This date will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/DTM01/050 that does not apply to all the table 2 iterations. (Codes subject to override: 090, 091, 146, 171, 184, and 306.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
DTM01	374	Date/Time Qualifier	M ID 3/3

Code specifying type of date or time, or both date and time.

090 Report Start

Code Value Implementation Note:

Use as needed for transaction history requests only to identify the transaction history reporting start date.

091 Report End

Code Value Implementation Note:

Use as needed for transaction history requests only to identify the transaction history reporting end date.

146 Closing Date

Code Value Implementation Note:

Use as needed for bulk petroleum reconciliation review requests only to identify the date of reconciliation.

171 Revision

Code Value Implementation Note:

Use as needed for bulk petroleum reconciliation review requests only to identify the date of reconciliation.

184 Inventory

Code Value Implementation Note:

Use for bulk petroleum physical inventory reports and reconciliation review requests only to identify the date of the physical inventory (cut-off date).

306 Adjustment Effective Date

Code Value Implementation Note:

Use for bulk petroleum investigation/TDR requests only to identify the gain/loss adjustment date.

Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Required

Segment: N1 Name

Level: Header

Loop: N1 Repeat: 5

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/080 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/N1/080 loop to indicate an organization when an N101 qualifier code (e.g., LG) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/450 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/080 that does not apply to all of the table 2 iterations. (Codes subject to override: KA, LG and SB.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual KA Item Manager LG Location of Goods Code Value Implementation Note: Use for bulk petroleum physical inventory reports only to identify the storage location when different from the FROM address. Use for bulk petroleum reconciliation review requests only to identify the storage location when different from the TO address. SB Storage Area Code Value Implementation Note: Use to indicate a depot or storage activity.	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2

Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Use codes FR and TO in conjunction with the appropriate 1/N101/080 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information**Level:** Header**Loop:** LM **Repeat:** 10**Usage:** Optional**Max Use:** 1**Purpose:** To transmit standard code list identification information**Comment:** LM02 identifies the applicable industry code list source information.**Implementation Notes:**

1. Use this 1/LM/140 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., FC) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/260 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/150 that does not apply to all the table 2 iterations. (Codes subject to override: 0, AK, and FC.)

2. Use the 1/LM/140 loop in bulk petroleum transactions only to identify the type of transaction, as needed.

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN **Repeat:** 10000

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/LIN/010 loop to identify the material, transaction number, and inventory information associated with the transaction.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

Not Used	LIN01	350	Assigned Identification	O	AN	1/11
Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
Implementation Notes:						
1. Use only one of codes A1, A2, A4, FS, or MG to identify the item of inventory.						
2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE.						
A1 Plant Equipment Number						
Code Value Implementation Note:						
Use to identify plant equipment.						
A2 Department of Defense Identification Code (DoDIC)						
Code Value Implementation Note:						
Use to identify ammunition items.						
A4 Subsistence Identification Number						
Code Value Implementation Note:						
Use to identify subsistence items.						
FS National Stock Number						
Code Value Implementation Note:						
Must use the NSN when known.						
MG Manufacturer's Part Number						
Code Value Implementation Note:						
Use to identify nonstandard material.						
ZB Commercial and Government Entity (CAGE) Code						
Code Value Implementation Note:						
Use only with code MG to identify a manufacturer's part number.

Optional

Segment: DTM Date/Time Reference

Level: Detail

Loop: LIN

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. Use as needed for transaction history requests, reconciliation review requests, investigation/TDR requests and physical inventory reports, but only to identify pertinent dates.
2. For any specific table 2 iteration use this 2/DTM/100 segment as needed: 1) to identify the date when a DTM01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/DTM/050 segment or 2) when the DTM01 qualifier applies to all table 2 iterations but the DTM02 date varies among most of them or 3) to override a date in the 1/DTM/050 segment with a different date in the 2/DTM/100 segment when the same DTM01 qualifier is used in both segments, but the DTM02 date is different. (Codes subject to override: 090, 091, 146, 171, 184, and 306.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time.	M ID 3/3
	036	Expiration Code Value Implementation Note: For subsistence items, use for physical inventory requests and physical inventory response transactions, but only to identify the expiration date.	
	090	Report Start Code Value Implementation Note: Use as needed for transaction history requests only to identify the transaction history reporting start date.	
	091	Report End Code Value Implementation Note: Use as needed for transaction history requests only to identify the transaction history reporting end date.	
	146	Closing Date Code Value Implementation Note: Use as needed for bulk petroleum reconciliation review requests only to identify the date of reconciliation.	
	171	Revision Code Value Implementation Note: Use as needed for bulk petroleum reconciliation review requests only to identify the date of reconciliation.	
	184	Inventory	

Code Value Implementation Note:

Use for bulk petroleum physical inventory reports and reconciliation review requests only to identify the date of the physical inventory (cut-off date).

306 Adjustment Effective Date**Code Value Implementation Note:**

Use for bulk petroleum investigation/TDR requests only to identify the gain/loss adjustment date.

510 Date Packed**Code Value Implementation Note:**

For subsistence items, use for physical inventory requests and physical inventory response transactions only to identify the date packed.

Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2

Required

Segment: REF Reference Numbers

Level: Detail

Loop: LIN

Usage: Optional

Max Use: >1

Purpose: To specify identifying numbers.

Syntax: R0203 — At least one of REF02 or REF03 is required.

Implementation Note:

Use to identify identification numbers associated with the transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2
	55	Sequence Number Code Value Implementation Note: Use for bulk petroleum only. Use as needed for reconciliation review requests to identify the TSN. Use multiple repetitions to identify more than one TSN. Use to identify the TSN assigned to physical inventory reports at intermediate and base level DFSPs.	
	C7	Contract Line Item Number Code Value Implementation Note: Use in conjunction with code CT for bulk petroleum investigation/TDR requests, but only to identify the CLIN, the CLIN including the SUBCLIN, or the ALIN, as applicable.	
	CT	Contract Number Code Value Implementation Note: Use as needed for bulk petroleum investigation/TDR requests, but only to identify the contract number or obligation authority number.	
	DO	Delivery Order Number Code Value Implementation Note: Use as needed for bulk petroleum investigation/TDR requests, but only to identify the order number.	
	SI	Shipper's Identifying Number for Shipment (SID) Code Value Implementation Note: Use as needed for bulk petroleum investigation/TDR requests, but only to identify the vendors shipment number.	
	TN	Transaction Reference Number Code Value Implementation Note: Use to identify the transaction number assigned to this transaction when responding to a response to a request for physical inventory, a physical inventory request, a transaction history request, or a physical inventory report. Use as needed for bulk petroleum investigation/TDR requests, but only to identify the transaction number.	
	W8	Suffix Code Value Implementation Note: Use as needed for bulk petroleum investigation/TDR requests, but only to identify the suffix.	
	XC	Cargo Control Number	

Code Value Implementation Note:

Use as needed for bulk petroleum investigation/TDR requests, but only to identify the cargo number.

Required	REF02	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
Not Used	REF03	352	Description	C	AN	1/80

Optional

Segment: **PCT** Percent Amounts
Level: Detail
Loop: LIN
Usage: Optional
Max Use: >1
Purpose: To qualify percent amounts, and supply percent amounts

Implementation Note:

Use as needed for physical inventory request transactions, but only to identify inventory prioritization information.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	PCT01	1004 Percent Qualifier Code to qualify percent. 21 Annual Demand Quantity Weighting Factor Code Value Implementation Note: Use as needed to identify the weighting factor applicable to the annual demand quantity expressed as a decimal (percentage) number, including the decimal. 22 Annual Demand Value Weighting Factor Code Value Implementation Note: Use as needed to identify the weighting factor applicable to the annual demand dollar value expressed as a decimal (percentage) number, including the decimal. 23 Essentiality Weighting Factor Code Value Implementation Note: Use as needed to identify the weighting factor applicable to the essentiality code value expressed as a decimal (percentage) number, including the decimal. 24 Procurement Leadtime Weighting Factor Code Value Implementation Note: Use as needed to identify the weighting factor applicable to the procurement lead time expressed as a decimal (percentage) number, including the decimal. 25 Months To Procurement Weighting Factor Code Value Implementation Note: Use as needed to identify the weighting factor applicable to the months-to-procurement expressed as a decimal (percentage) number, including the decimal. 26 Annual Demand Frequency Weighting Factor Code Value Implementation Note: Use as needed to identify the weighting factor applicable to the annual demand frequency expressed as a decimal (percentage) number, including the decimal.	M	ID	1/2
Mandatory	PCT02	954 Percent Percentage expressed as a decimal	M	R	1/10

Optional

Segment: LDT Lead Time
Level: Detail
Loop: LIN
Usage: Optional
Max Use: 12
Purpose: To specify lead time for availability of products and services.
Semantic: LDT04 is the effective date of lead time information.
Comment: LDT02 is the quantity of Unit of Time Periods.

Implementation Note:

Use as needed for physical inventory request transactions, but only to identify inventory prioritization information.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	LDT01	345	Lead Time Code Code indicating the time range. AS Before inventory is replenished based on stock check. Code Value Implementation Note: Use as needed to identify the months-to-procurement, e.g., the months until initiation of the next acquisition. BA From Date of Award to Expiration Date of Authorization Code Value Implementation Note: Use as needed to identify the procurement lead time.	M	ID	2/2
Mandatory	LDT02	380	Quantity Numeric value of quantity. Implementation Note: Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.	M	R	1/15
Mandatory	LDT03	344	Unit of Time Period or Interval Code indicating the time period or interval MO Month	M	ID	2/2
Not Used	LDT04	373	Date	O	DT	6/6

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

For any specific table 2 iteration use this 2/LM/060 loop as needed: 1) to identify a DoD code when the LQ01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/140 loop or 2) to identify a DoD code when the LQ01 qualifier applies to all table 2 iterations but the LQ02 DoD code varies among most of them or 3) to override an LQ02 DoD code in the 1/LM/140 loop with a different DoD code in the 2/LM/060 loop when the same LQ01 qualifier is used in both loops but the LQ02 DoD code is different. (Codes subject to override: 0, AK, and FC.)

Segment: N1 Name**Level:** Detail**Loop:** N1 **Repeat:** 200**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/450 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/080 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in 1/N1/080 with a different address specified in the 2/N1/450 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: KA, LG and SB.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		CN Consignee	
		Code Value Implementation Note:	
		Use for bulk petroleum investigation/TDR requests only to identify the consignee.	
		KA Item Manager	
		LG Location of Goods	
		Code Value Implementation Note:	
		Use for bulk petroleum reconciliation review requests only to identify the storage location when different from the TO address. Use for bulk petroleum physical inventory reports only to identify the storage location when different from the FROM address.	
		SB Storage Area	
Not Used	N102	93 Name	C AN 1/35
Required	N103	66 Identification Code Qualifier	C ID 1/2
		Code designating the system/method of code structure used for Identification Code (67).	
		10 Department of Defense Activity Address Code (DODAAC)	
		M4 Department of Defense Routing Identifier Code (RIC)	
Required	N104	67 Identification Code	C AN 2/20
		Code identifying a party or other code.	

Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code	O	ID	2/2
			Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

Use code TO in conjunction with the appropriate 2/N101/450 code to indicate the organization to receive the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Mandatory

Segment: SE Transaction Set Trailer

Level: Summary

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

------	-----	--	----------

APPENDIX 7C

TRANSACTION SET 888 IMPLEMENTATION CONVENTION STORAGE ITEM CORRECTION

888 Item Maintenance

This Draft Standard for Trial Use provides the format and establishes the data contents of the Item Maintenance Transaction Set (888) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to enable a manufacturer, supplier, broker, or agent to provide detailed finished goods product information to a partner in a consumer goods market. This transaction set can be used to provide information about new products or changes in existing product specifications. Price changes will not be sent with this transaction set, but can be sent with the Price Change Transaction Set (879).

Implementation Notes

1. Organizations use this transaction set to provide storage facilities with data record changes for items of supply.
2. Use a single occurrence of this transaction set to transmit record changes to one or more storage facilities. Use one occurrence of this transaction set to transmit a single or multiple transactions.

NOTES/COMMENTS:

1/020 One iteration of the N1 loop should be used to identify the buying party (BY) to establish the area or location for which the item maintenance applies.

2/020 The G62 segment is used to specify the effective date for the item maintenance action reflected in G5301.

Segment: ST Transaction Set Header
Level: Header
Loop: ____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 888 X12.269 - Item Maintenance (UCS)	M	ID	3/3
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Required

Segment: BGN Beginning Segment

Level: Header

Loop: _____

Usage: Optional

Max Use: 1

Purpose: To indicate the beginning of a transaction set.

Syntax: C0504 — If BGN05 is present, then BGN04 is required.

Semantic:

1. BGN02 is the transaction set reference number.
2. BGN03 is the transaction set date.
3. BGN04 is the transaction set time.
4. BGN05 is the transaction set time qualifier.
5. BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	BGN01	353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M	ID	2/2
Mandatory	BGN02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier. Implementation Note: <i>Use a code Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The code Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	M	AN	1/30
Mandatory	BGN03	373	Date Date (YYMMDD).	M	DT	6/6
			Implementation Note: <i>Express the originating activity's date of transaction set preparation in GMT.</i>

Not Used

BGN08 306 Action Code

O ID 1/2

Mandatory

Segment: N1 Name**Level:** Header**Loop:** 0100 **Repeat:** >1**Usage:** Mandatory**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/020 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/020 loop to indicate an organization when an N101 qualifier code (e.g., SA) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/156 loop and specify the matching qualifier, in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/020 that does not apply to all the table 2 iterations. (Codes subject to override: SB.)

Data Element Summary

Required

Segment: N1 Name

Level: Detail

Loop: 0311 Repeat: >1

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 1 iteration use this 2/N1/156 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/020 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/020 loop with a different address specified in the 2/N1/156 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: SB.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual KA Item Manager Code Value Implementation Note: Use to identify the inventory manager associated with the material. SB Storage Area Code Value Implementation Note: Use to identify the storage facility requiring data record changes.	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:

Must use code TO in conjunction with the appropriate 2/N101/156 code to indicate the organization receiving the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information**Level:** Detail**Loop:** 0313 **Repeat:** >1**Usage:** Optional**Max Use:** 1**Purpose:** To transmit standard code list identification information**Comment:** LM02 identifies the applicable industry code list source information.**Implementation Notes:**

1. Must use the 2/LM/180 loop if not using the 1/LM/090 loop.
2. For any specific table 2 iteration use this 2/LM/180 loop as needed: 1) to identify a DoD code when the LQ01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/090 loop or 2) to identify a DoD code when LQ01 qualifier applies to all table 2 iterations but the LQ02 DoD code varies among most of them or 3) to override a LQ02 DoD code in the 1/LM/090 loop with a different DoD code in 2/LM/180 when the same LQ01 qualifier is used in both loops, but the LQ02 DoD code is different. (Codes subject to override: 93, EF, EQ, FD, FE, and FG.)

Mandatory	SE02	329 Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

8 ADJUSTMENT TRANSACTIONS

8.1 GENERAL

This chapter provides procedures relating to the following types of adjustment and change actions:

- Adjustments caused by catalog change actions.
- Reidentification of improperly identified material.
- Offsetting changes and adjustments to purpose and supply condition codes.
- Discrepancies disclosed by physical inventory.
- Inventory gains and losses due to capitalization and decapitalization.
- Ownership changes and adjustments applicable to SMCA.
- Condition changes, identity changes, and inventory adjustments applicable to DFAMS reporting of DLA-owned bulk petroleum (see section 8.9).

This chapter also provides procedures for use of the TS 846 IC - Asset Reclassification (appendix 8B) as follows:

- Owners use to request that distribution depots effect asset reclassification of material to and from suspended SCCs, to inquire about the status of previous asset reclassification requests, and to respond to depot requests for asset reclassification extensions.
- Distribution depots use to request asset reclassification extensions and to respond negatively to asset reclassification requests.

8.1.1 TRANSACTION SET 947 IC - INVENTORY ADJUSTMENT

The TS 947 IC - Inventory Adjustment (appendix 8A) is designed for use as either a change and/or adjustment transaction.

- The first method accommodates those processing techniques which employ individual increase or decrease adjustment actions against the property accountability inventory records including ownership adjustments by the SMCA.
- The second method provides for offsetting adjustments to condition or purpose code and ownership changes.

8.1.2 OWNERSHIP/PURPOSE CODE CHANGES

Changes between ownership codes, from purpose code to ownership code, or from ownership code to purpose code will not be made by an adjustment action. Appropriate issue and receipt transactions will be processed to make the necessary accounting actions. An exception to this rule is the use of the ownership change and inventory adjustment increase/decrease transaction to effect ownership gain/loss under the SMCA concept. (See section 8.3 below.)

8.1.3 PROJECT CODE CHANGES

Adjustments to project codes will be accomplished with the TS 947 IC - Inventory Adjustment using Quantity or Status Adjustment Reason Code AH (Other).

8.1.4 CLERICAL/MECHANICAL ACCOUNTING ERRORS

TS 947 IC - Inventory Adjustment with Quantity or Status Adjustment Reason Code AB (Accounting Error) will be used to correct inventory adjustments resulting from clerical or mechanical accounting errors which cannot be corrected by reversing the original transaction.

8.1.5 NONSPECIFIC INVENTORY ADJUSTMENTS

TS 947 IC - Inventory Adjustment with Quantity or Status Adjustment Reason Code AH (Other) will be used to support inventory adjustments when a Quantity or Status Adjustment Reason Code is not otherwise provided. (Components will maintain detailed backup information as to the use and requirement for the transaction.)

8.1.6 SPECIFIC INVENTORY ADJUSTMENTS

TS 947 IC - Inventory Adjustment with Quantity or Status Adjustment Reason Code AJ (Survey) will be used to report inventory adjustments for losses resulting from shrinkage, theft, contamination, deterioration, and expired shelf-life (including subsistence items). Losses resulting from major disasters, fire, enemy action, acts of God, etc., will be identified by Quantity or Status Adjustment Report Code AI (Disaster).

8.2 CHANGES IN CONDITION OF MATERIAL

8.2.1 CONDITION RECLASSIFICATION OF ASSETS IN STORAGE

When inspection of stocks on hand reveals that a condition reclassification is required, distribution depots will report the variance to the owner within 3 calendar days using the TS 947 IC - Inventory Adjustment with Quantity or Status Adjustment Reason Code AC (Condition Change) and Inventory Transaction Type Code AD (Inventory Adjustment - Decrease) and AJ (Inventory Adjustment - Increase) for the affected condition codes.

When immediate reclassification of suspect stocks is beyond current capabilities, change the material to SCC J. The TS 947 IC - Inventory Adjustment must contain both the new and old SCC of the material and the offsetting inventory adjustments.

- With the exception of ammunition, complete the material reclassification within 90 calendar days after reporting the change to the owner. Complete the reclassification of ammunition within 270 calendar days after reporting the change.
- When the reclassification is complete, report the change to the owner using the TS 947 IC - Inventory Adjustment change and adjustment transaction. Use the same transaction reference number used to report the material in SCC J.

8.2.2 RECLASSIFICATION OF CONDITION L RECEIPTS

Distribution depots will report discrepant receipts from procurement and material held pending resolution of a transportation discrepancy in SCC L as prescribed by the chapter 14 receipt processing procedures. When directed by the owner (see subsection 8.2.7), distribution depots will also change material to SCC L and report the action using the inventory adjustment transaction following the subsection 8.2.1 procedures.

Owners are responsible for monitoring material suspended in SCC L and directing change of the material to its correct condition when litigation or other action to resolve the discrepancy is completed using TS 846 IC - Asset Reclassification (appendix 8B) request in accordance with subsection 8.2.9. If inspection or technical/engineering analysis confirms that a product quality deficiency prohibits further use of the material within DoD, the owner shall direct transfer of the material to SCC Q.

When directed by the owner, distribution depots will, within 3 calendar days from receipt of an asset reclassification request, reclassify the suspended material to its correct SCC. Report completion of the action with TS 947 IC - Inventory Adjustment using the same transaction reference number originally used to record the material in SCC L (i.e., the transaction reference number of the original receipt or inventory adjustment transaction). See subsection 8.2.9 for asset distribution depot reclassification denial procedures when the requested reclassification action cannot be accomplished.

8.2.3 RECLASSIFICATION OF CONDITION Q PRODUCT QUALITY DEFICIENCY RELATED MATERIAL

Distribution depots will report discrepant receipts in SCC Q as prescribed by the chapter 14. When directed by the owner, distribution depots will also change stored, including suspended, material to SCC Q and report the action using the TS 947 IC - Inventory Adjustment.

When inspection or technical/engineering analysis of material confirms a product quality deficiency, possibilities for other use of the material within DoD, as well as public health/safety and national security interests, must be considered. Owners will determine if the further use of the item can be made within DoD.

When inspection or technical/engineering analysis of material indicates that litigation action is required, the owner will direct transfer of the material to SCC L.

If the deficiency does not prohibit further DoD use (e.g., the defect is minor or the item meets specifications for another NSN), owners will direct distribution depots to reidentify and/or change the suspended SCC Q material to the appropriate SCC. Distribution depots will, within 3 calendar days from receipt of the owner's direction, reclassify the SCC Q material to the appropriate condition.

If the deficiency prohibits further DoD use, the material will remain in SCC Q and owners will direct transfer of the material to the DRMS.

8.2.4 RECLASSIFICATION OF CONDITION K AND R RECEIPTS

In accordance with the chapter 14 receipt processing procedures, distribution depots may suspend material in SCC K upon receipt for SCC determination. Distribution depots may also receive material identified as SCC R (suspended) from reclamation activities which do not have

the capability to determine the material condition.

Distribution depots will reclassify these suspended receipts to their correct condition within the timeframes prescribed in the following subparagraphs. When material has been reclassified to its correct condition, submit the TS 947 IC - Inventory Adjustment to the owner using the same transaction reference number cited in the original receipt transaction.

- With the exception of ammunition, reclassify material reported in SCC K within 10 calendar days after reporting the receipt; reclassify ammunition within 45 calendar days after reporting the receipt.
- When material identified as SCC R is received from reclamation activities, reclassify the material within 180 calendar days after reporting the receipt or prior to induction into maintenance facilities for repair/modification, whichever is sooner.
 - When the capability to test/check SCC R assets for actual condition does not exist, the material may be forwarded to a maintenance facility for condition determination.
 - The actual condition of the assets must be recorded on the property accountability record before the assets may be included in a scheduled maintenance program.

8.2.5 RECLASSIFICATION OF CONDITION W RECEIPTS

Distribution Depots will report discrepant receipts in SCC W as prescribed by the chapter 14 receipt processing procedures. When directed by the owner, distribution depots will also change material to SCC W.

When litigation action is initiated for SCC W material, the owner will direct the distribution depot to reclassify the assets to SCC L.

When directed by the owner, distribution depots will, within 3 calendar days from the receipt of the direction, reclassify SCC W material to SCC L.

8.2.6 AUTOMATIC DISPOSAL OF RECLASSIFIED STOCK

When material is reclassified to SCC H, distribution depots may also, based on criteria promulgated by the Components, automatically turn condemned and expired shelf-life material into reutilization and marketing or take other authorized automatic disposal action.

Advise the owner of such simultaneous reclassification and automatic disposal action by entering Management Code M (material condemned--excludes expired shelf-life material) or Management Code T (material condemned--expired shelf-life material) in the inventory adjustment transaction.

8.2.7 EXCEPTIONS TO PRESCRIBED TIMEFRAMES FOR CONDITION RECLASSIFICATION - REQUEST FOR RECLASSIFICATION EXTENSION

When additional time is required to reclassify material held in SCC J, K, or R, because of large quantities, lack of facilities, nonavailability of personnel and/or test equipment, or other circumstances considered justified by the distribution depot Commander, the distribution depot will forward a TS 846 IC - Asset Reclassification extension request to the owner.

- When appropriate, the owner will approve the extension request, and submit TS 846 IC - Asset Reclassification extension response to notify the distribution depot

specifying the revised date by which the distribution depot must complete the reclassification action. The owner will establish a suspense to ensure that classification action is taken within the specified timeframe.

- If the owner does not approve the request for extension, the owner will submit TS 846 IC - Asset Reclassification extension response transaction with the applicable negative code, the distribution depot will then make every effort to comply with the established timeframe.

Owners may submit TS 846 IC - Asset Reclassification transaction in accordance with the subsection 8.2.9 procedures to request expedited reclassification of SCC J, K, and R assets whenever it is deemed necessary based on their stock position and overall management responsibility.

8.2.8 MONITORING ASSETS RECORDED IN SUSPENDED SUPPLY CONDITION CODES

Owners will review property accountability records for all material suspended in SCC J, K, and R at least monthly and ensure that distribution depots accomplish reclassification actions within prescribed timeframes.

Although there is no prescribed timeframe for changing suspended material from SCC L, owners will review all records for material suspended in SCC L at least quarterly and will take necessary action to ensure expeditious litigation/negotiation with contractors or common carriers.

Although there is no prescribed timeframe for transferring material from SCC W, owners will review all SCC W material at least monthly to assure warranty action is executed before the warranty expires.

Although there is no prescribed timeframe for transferring suspended material from SCC Q, owners will review all records for material suspended in SCC Q at least monthly. Owners will take necessary action to ensure expeditious inspection or technical/engineering analysis of suspect assets.

8.2.9 ASSET RECLASSIFICATION REQUEST, INQUIRY, AND RESPONSE

This section prescribes standard procedures for use of the TS 846 IC - Asset Reclassification for asset reclassification request, inquiry and denial transactions. Procedures for using TS 846 IC - Asset Reclassification for extension request and response transactions are addressed in section 8.2.7.

As discussed in sections 8.2.4 and 8.2.6, owners are responsible for monitoring assets in suspended SCCs. Owners use the TS 846 IC - Asset Reclassification to request that the distribution depot effect reclassification of assets to and from suspended SCCs. Reasons for making a reclassification request include: a requirement to expedite reclassification action; resolution of a suspension (e.g., completion of litigation or technical inspection); and that the timeframe for reclassification action has expired and the owner did not receive a corresponding adjustment, reclassification denial, or request for an extension transaction from the depot.

In response to a reclassification request, the distribution depot will take action to reclassify the material in the timeframe specified and provide a TS 947 IC - Inventory Adjustment transaction to the owner. If the distribution depot is not able to effect the reclassification action, the depot will submit a TS 846 IC - Asset Reclassification denial citing the appropriate management code

to explain the reason for the denial. If the reclassification action cannot be accomplished in the timeframe specified, the depot will request an extension in accordance with section 8.2.7.

Owners use the TS 846 IC - Asset Reclassification Inquiry to the depot for the status of a previously submitted reclassification request when the owner did not receive a corresponding TS 947 IC - Inventory Adjustment transaction or TS 846 IC - Asset Reclassification denial. In response to an inquiry when the corresponding adjustment transaction was previously provided, the depot will resubmit the TS 947 IC - Inventory Adjustment citing Management Code 3P.

8.3 OWNERSHIP GAINS AND LOSSES

TS 947 IC - Inventory Adjustment is used to meet the requirements of change in ownership for the SMCA and the Services (authorized by DoD 5160.65) and permits:

- Retaining the integrity of the document number from the requisitioner's original demand throughout total processing, when payback actions are necessary.
- On-line recording and reconciliation of material debit and credit balances of the SMCA and affected Services.
- The Services to have an audit trail when their accountable/financial records are affected.

The TS 947 IC - Inventory Adjustment will effect paybacks of SMCA items from one owning Service to another Service, in accordance with DoD policy and inter-Service agreements. The SMCA initiates the TS 947 IC - Inventory Adjustment for processing internal adjustments to property accountability records and for notification of SMCA distribution depots.

8.4 PURPOSE TRANSFERS

Based on authorized programs, material may be reserved for specific purposes and retained on property accountability records until requisitioned. To effect the change of assets between purpose codes, the TS 947 IC - Inventory Adjustment will be processed against the property accountability records.

8.5 INVENTORY GAINS AND LOSSES

Procedures concerned with adjustments due to physical inventory losses or gains are contained in chapter 7.

8.6 CONDITION CHANGES FOR ITEM UNDER REPAIR

When one Component is repairing items for another Component, the repairing Component may, by mutual agreement, notify the owner of the other Component of condition changes upon:

- Induction of items into repair. The owner will be provided with a TS 947 IC - Inventory Adjustment to indicate change of items from SCC F or SCC W (Unserviceable - Repairable) to SCC M (Suspended (In Work)).
- Completion of Repair Action. The owner will be provided with a TS 947 UC - Inventory Adjustment to indicate change of items from SCC M (Suspended (In Work)) to the appropriate, ready for issue, condition.

When items are being repaired at a maintenance facility, reporting of induction into and return from repair will be accomplished in the following manner:

- Reporting of induction into repair will be accomplished by TS 947 IC - Inventory Adjustment changing the items from SCC F or SCC W (Unserviceable - Repairable) to SCC M (Suspended (In Work)).
- Return of items from repair will be accomplished by TS 947 IC - Inventory Adjustment changing the items from SCC M (Suspended (In Work)) to a ready for issue condition.

8.7 REIDENTIFICATION OF STOCK, STOCK NUMBER CHANGES, AND UNIT OF ISSUE CHANGES

8.7.1 REIDENTIFICATION OF STOCK

When inspection reveals that an item in stock has been misidentified, distribution depots will transmit TS 947 IC - Inventory Adjustment to the owner. The transaction will contain the misidentified stock number, the quantity misidentified (Quantity or Status Adjustment Reason Code AE (Reidentification)), and Suffix Code A.

When one new stock number is picked up due to reidentification, the TS 947 IC - Inventory Adjustment will contain the same transaction reference number as the original transaction, the identified stock number, the quantity of the identified stock number using (Quantity or Status Adjustment Reason Code AE (Reidentification)), and Suffix Code B.

When more than one new stock number is picked up due to reidentification, an additional TS 947 IC - Inventory Adjustment for each newly identified stock number will be prepared and transmitted. The additional inventory adjustment transaction(s) will be prepared in the same manner as the second transaction except that the suffix codes will progress to C, D, etc., as each transaction is prepared. The suffix codes in the second and ensuing transactions will serve to correlate the transactions to the misidentified stock number.

The owner will process the TS 947 IC - Inventory Adjustment against property accountable records to effect the decrease under the incorrectly identified stock number and increase(s) against the correct stock number(s).

8.7.2 STOCK NUMBER AND/OR UNIT OF ISSUE CHANGES

When only a stock number change occurs, owners will prepare and process the TS 947 IC - Inventory Adjustment containing the old and new stock numbers (Quantity or Status Adjustment Reason Code AF (Stock Number Change)) and the associated inventory adjustment increase and decrease .

When only a unit of issue change occurs, owners will prepare and process the TS 947 IC - Inventory Adjustment containing the old and new unit of issues (Quantity or Status Adjustment Reason Code AN (Unit of Issue Change)) and the associated inventory adjustment increase and decrease .

When a simultaneous stock number and unit of issue change occurs, owners will prepare and process the TS 947 IC - Inventory Adjustment containing the old and new stock numbers and unit of issues (Quantity or Status Adjustment Reason Code AF and AN), and the associated inventory adjustment increase and decrease.

8.8 CONDITION CHANGES FOR ITEMS REPORTED/TURNED IN TO REUTILIZATION AND MARKETING ACTIVITIES

When material is not identified by an NSN and is actually scrap, Components may prescribe that it be classified in SCC S for turn in to DRMOs. Otherwise, only material recorded on property accountability records in SCC A through H and SCC Q will be reported or turned in to the DRMO.

When excess, serviceable, or unserviceable material is classified in SCC J, K, L, M, N, P, Q, R, or W, Components must initiate action to reclassify the material to an acceptable supply condition code (A through H, S, or Q) before preparing the turn-in documentation. The turn-in document must also contain the reason for disposal code. Section 8.2 contains the material reclassification procedures.

Components not reporting or turning in material to DRMOs in an appropriate supply condition code will risk having the material rejected/returned by the DRMO for proper classification.

The DRMOs will use the disposal condition codes to accurately describe the physical condition of the material based on its inspection at time of receipt. The DRMOs will record the SCC, the disposal condition code, and reason for disposal code for the material and will reflect the codes as management data for reutilization program screening and review. Within the DRMO process, Disposal Condition Code S is assigned for "material that has no value except for its basic material content." Consequently, Disposal Condition Code S may be assigned by DRMOs to material with or without NSN identification.

8.9 BULK PETROLEUM PHYSICAL INVENTORY ADJUSTMENTS

It is mandatory that DFSPs or other authorized parties report adjustments involving gains, losses, condition changes, and identity changes of DLA-owned product to DFSC. In turn, DFSC will advise DFSPs of generated adjustments to book inventory resulting from the monthly reconciliation process. These functions will be accomplished using TS 947 IC - Inventory Adjustment as prescribed by DoD 4140.25-M and the implementation conventions shown at appendix 8A.

Report the following types of physical inventory adjustments as increases or decreases (not dual adjustments):

- **Book Adjustment Decrease.** Use for DFSC, i.e., owner-generated, operating loss reconciliation adjustment.
- **Book Adjustment Increase.** Use for DFSC, i.e., owner-generated, operating gain reconciliation adjustment.
- **Operating Variance.** Use to report DFSP operating gain or loss due to temperature and handling.
- **Nonrecoverable.** Use to report DFSP losses due to nonrecoverable tank bottoms.
- **Warehousing Damage.** Use to report DFSP spills, line breaks, or similar circumstance.
- **Disaster.** Use to report DFSP loss due to major disaster, fire, enemy action, act of God, or similar circumstance.

- **Recoup/Rework of Damaged Product.** Use to report DFSP reclamation loss.
- **Product Dumped or Destroyed.** Use to report abandonment of DFSP inventory.
- **Slop Fuel.** Use to report gain or loss of slop fuel. Use with NSN for slop fuel.
- **Replacement.** Use to report a DFSP gain from a previous spill/line break, e.g., replacement of line break loss at no cost to DLA per U.S./foreign government treaty. Use same transaction reference number as loss. Loss indicates suffix A; gain indicates suffix B.
- **Tariff Deduction.** Use to report a determinable loss tariff deduction reflecting the change in volume after receipt of product via a pipeline operation as covered in a tariff agreement.
- **Capitalization.** Use to report a DFSP increase due to capitalization of retail inventory.
- **Decapitalization.** Use to report a DFSP decrease due to decapitalization of wholesale inventory.

Report the following types of identity changes as balancing increases and decreases to inventory (not dual adjustments). Identify the old stock number with the associated decreased quantity and the new stock number with the associated increased quantity.

- **Downgrade.** Use to report DFSP inventory is approved for use at a lower grade of the same or similar product.
- **Regrade.** Use to report DFSP inventory is redesignated from one grade to another within the specifications it meets.
- **Additive Injection.** Use to report addition of additive, e.g., icing inhibitor, into DFSP inventory. Identify the additive as the old stock number and the type of fuel as the new stock number.

Report condition changes as dual adjustments. Cite both the original and the new condition of the inventory to be effected by a single quantity in offsetting adjustments.

- **Condition Change.** Use to report changes in supply condition of DFSP inventory.

APPENDIX 8A

**TRANSACTION SET 947 IC - IMPLEMENTATION CONVENTION
INVENTORY ADJUSTMENT**

947 Warehouse Inventory Adjustment Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Inventory Adjustment Advice Transaction Set (947) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to inform a warehouse/depositor of a quantity or status change to inventory records. This transaction set provides detail information concerning the internal adjustments which occur between a warehouse and a depositor.

Implementation Notes

1. ICPs/IMMs and storage organizations use this transaction set to exchange inventory adjustment information affecting accountable inventory records. All transactions are subject to transaction history submissions. Do not use transaction history submissions for bulk petroleum transactions.
2. Use a single occurrence of this transaction set to exchange inventory adjustment transactions between a single ICP/IMM and a single or multiple storage organizations, between a single ICP/IMM and a single or multiple ICPs/IMMs, or between a single storage organization and a single or multiple ICPs/IMMs. Use one occurrence of this transaction set to transmit a single or multiple transactions.
3. A single transaction set may contain a combination of transactions for different inventory adjustments.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
	947	X12.194 Warehouse Inventory Adjustment Advice			

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	---	---	----	-----

Mandatory

Segment: W15 Warehouse Adjustment Identification

Level: Header

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To provide identifying numbers and dates and other basic data for this transaction set

Syntax: **P0203** — If either W1502 or W1503 is present, then the other is required.

Semantic: 1. W1502 is the identification assigned to an inventory level or status adjustment by the warehouse.

2. W1503 is the identification assigned to an inventory level or status adjustment by the depositor.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
W1501	373	Date Date (YYMMDD).	M	DT	6/6

Implementation Note:

Express the originating activity's date of transaction set preparation in GMT.

Not Used

W1502	31	Adjustment Number	C	AN	1/22
-------	----	-------------------	---	----	------

Not Used

W1503	31	Adjustment Number	C	AN	1/22
-------	----	-------------------	---	----	------

Required

W1504	353	Transaction Set Purpose Code Code identifying purpose of transaction set.	O	ID	2/2
-------	-----	--	---	----	-----

00 Original

77 Simulation Exercise

Code Value Implementation Note:

Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.

Required

W1505	640	Transaction Type Code Code specifying the type of transaction.	O	ID	2/2
-------	-----	---	---	----	-----

NU Inventory Adjustment

Code Value Implementation Note:

Use to identify inventory adjustment transactions.

Optional

W1506	306	Action Code Code indicating type of action.	O	ID	1/2
-------	-----	--	---	----	-----

W1 Reconcile Historical Records

Code Value Implementation Note:

Use as needed to indicate the submission of historical information or previously reported adjustments.

Mandatory

Segment: N1 Name**Level:** Header**Loop:** 0100 **Repeat:** 100**Usage:** Mandatory**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/040 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/N1/040 loop to indicate an organization when an N101 qualifier code (e.g., SB) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/110 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any code in 1/N101/040 that does not apply to all of the table 2 iterations. (Code subject to override: SB and Z4.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual SB Storage Area Code Value Implementation Note: Use to indicate a depot or storage activity. Z4 Owning Inventory Control Point	M	ID	2/2
Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C	ID	1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/040 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: G61 Contact**Level:** Header**Loop:** _____**Usage:** Optional**Max Use:** 3**Purpose:** To identify a person or office to whom communications should be directed**Syntax:** P0304 — If either G6103 or G6104 is present, then the other is required.**Comment:** G6103 qualifies G6104.**Implementation Notes:**

1. Use only under exceptional circumstances when requiring direct communication with the party originating the transaction set.
2. Use multiple repetitions to identify a POC and multiple communications numbers. When using multiple repetitions to identify different communication numbers for a single point of contact, repeat the name cited in G6102.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
G6101	366	Contact Function Code Code identifying the major duty or responsibility of the person or group named.	M ID 2/2

Implementation Note:

Provide the in-the-clear name of the person to contact for additional information when voice/personal communication is necessary.

IC Information Contact**Code Value Implementation Note:**

Must use in the first repetition to identify the primary point of contact and their primary communication number.

Mandatory

G6102	93	Name Free-form name.	M AN 1/35
-------	----	-------------------------	-----------

Implementation Note:

Provide the last name, first name, middle initial, and rate/rank/title, as required, of the individual named as POC. Include blank spaces between name components and periods after initials. Do not include NMN when a middle initial is not available.

Conditional

G6103	365	Communication Number Qualifier Code identifying the type of communication number.	C ID 2/2
-------	-----	--	----------

Implementation Notes:

1. Use to identify the preferred method of communication in the first repetition. Use additional repetitions when identifying alternate communication methods.
2. Do not include blank spaces or dashes between numbers.

AU Defense Switched Network**Code Value Implementation Note:**

Use to identify the DSN telephone number.

DN Defense Data Network (DDN)

			FT Federal Telecommunications System (FTS)		
			Code Value Implementation Note: <i>Use to identify the FTS telephone number.</i>		
			FX Facsimile		
			Code Value Implementation Note: <i>Use to identify the facsimile DSN telephone number.</i>		
			IT International Telephone		
			Code Value Implementation Note: <i>Include country and city code as needed.</i>		
			TE Telephone		
			Code Value Implementation Note: <i>Use to identify the commercial telephone number. Include the area code and number.</i>		
Conditional	G6104	364	Communication Number	C AN	1/80
			Complete communications number including country or area code when applicable.		
Optional	G6105	443	Contact Inquiry Reference	O AN	1/20
			Additional reference number or description to clarify a contact number.		
			Implementation Note: <i>Use to indicate the office symbol or activity code, for the party identified.</i>		

Required

Segment: G62 Date/Time**Level:** Header**Loop:** ____**Usage:** Optional**Max Use:** 5**Purpose:** To specify pertinent dates and times

- Syntax:**
1. R0103 — At least one of G6201 or G6203 is required.
 2. P0102 — If either G6201 or G6202 is present, then the other is required.
 3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Notes:

1. Use this 1/G62/110 loop to indicate the date when a G6201 qualifier code (e.g., 07) applies to ALL table 2 iterations and the same G6202 date applies to all or most of the table 2 iterations. For any specific table 2 iteration where the date is to differ from the one indicated in table 1, use 2/G62/080 and specify the matching qualifier in G6201 and the different date in G6202. This will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any code in 1/G6201/110 that does not apply to all the table 2 iterations. (Codes subject to override: 07, 09, BS and TR.)
2. Use to identify the time of transaction set preparation.

Data Element Summary

Conditional

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
G6201	432	Date Qualifier Code specifying type of date. 07 Effective Date Code Value Implementation Note: Use as needed for bulk petroleum inventory adjustments resulting from regrade, downgrade, or additives to identify the effective date of change. 09 Process Date Code Value Implementation Note: Use as needed to identify the date on which the inventory adjustment is processed by the initiating activity. BS Product Receipt Date Code Value Implementation Note: Use as needed for bulk petroleum inventory adjustments resulting from capitalization/de-capitalization to identify the date of product receipt. TR Transfer Code Value Implementation Note: Use as needed for inventory adjustments resulting from logistics reassignment to identify the effective date of logistics transfer.	C	ID	2/2

Conditional

G6202	373	Date Date (YYMMDD).	C	DT	6/6
-------	-----	-------------------------------	---	----	-----

Conditional	G6203	176	Time Qualifier Code specifying the reported time.	C	ID	1/2
Implementation Notes:						
1. Use to identify the originating activity's time of transaction set preparation expressed in GMT.						
2. Express time in a four-position (HHMM) format.						
0 Original Transaction						
Conditional	G6204	337	Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	C	TM	4/8
Not Used	G6205	623	Time Code	O	ID	2/2
Not Used	G6206	624	Century	O	NO	2/2

Optional

Segment: LM Code Source Information**Level:** Header**Loop:** 0200 **Repeat:** 10**Usage:** Optional**Max Use:** 1**Purpose:** To transmit standard code list identification information**Comment:** LM02 identifies the applicable industry code list source information.**Implementation Note:**

Use this 1/LM/130 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/090 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/140 that does not apply to all table 2 iterations. (Codes subject to override: 0, 78, AK, and DG.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LM01	559	Agency Qualifier Code	M	ID	2/2
Code identifying the agency assigning the code values.					
DF Department of Defense (DoD)					

Not Used

LM02	822	Source Subqualifier	O	AN	1/15
------	-----	---------------------	---	----	------

Mandatory

Segment: LQ Industry Code

Level: Header

Loop: 0200

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Required	LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list 0 Document Identification Code 78 Project Code AK Distribution Code DG Fund Code	O	ID	1/3

Mandatory

Segment: W19 Warehouse Adjustment Item Detail

Level: Detail

Loop: 0300 **Repeat:** >1

Usage: Mandatory

Max Use: 1

Purpose: To designate those items that were adjusted.

- Syntax:**
1. R0405 — At least one of W1904 or W1905 is required.
 2. P0506 — If either W1905 or W1906 is present, then the other is required.
 3. P0708 — If either W1907 or W1908 is present, then the other is required.
 4. C101112 — If W1910 is present, then W1911 and W1912 are required.
 5. C131415 — If W1913 is present, then W1914 and W1915 are required.

Implementation Notes:

1. Use the 2/W19/020 loop to identify the adjustment reason, material, transaction number, and inventory information associated with the inventory adjustment.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
W1901	181	Quantity or Status Adjustment Reason Code Code indicating reason for change in level or status of inventory.	M	ID	2/2
		06 Book Adjustment Decrease			
		Code Value Implementation Note: Use as needed for bulk petroleum to identify inventory adjustment decrease due to owner-generated operating loss reconciliation adjustments.			
		07 Product Dumped or Destroyed			
		Code Value Implementation Note: Use as needed for bulk petroleum to identify inventory adjustment decrease due to abandoned material.			
		52 Recoup/Rework of Damaged Product			
		Code Value Implementation Note: Use as needed for bulk petroleum to identify inventory adjustment decrease due to reclamation loss under contract terms.			
		56 Book Adjustment Increase			
		Code Value Implementation Note: Use as needed for bulk petroleum to identify inventory adjustment increases due to owner-generated operating gain reconciliation adjustment.			
		AA Physical Count			

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to physical inventory.

AB Accounting Error

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to an accounting error.

AC Condition Change

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to supply condition transfers.

AD Purpose Change

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to purpose transfers.

AE Reidentification

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to material misidentifications.

AF Stock Number Change

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to stock number changes.

AG Ownership Change

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to ownership transfers.

AH Other

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to reasons not specified by any other code.

AI Disaster

Code Value Implementation Note:

Use as needed to identify inventory adjustment decreases due to major disaster, fire loss, enemy action, act of God, or similar circumstance.

AJ Survey

Code Value Implementation Note:

Use as needed to identify inventory adjustment decreases due to shrinkage, theft, contamination, deterioration, and expired shelf life.

AK Transfer

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to logistics transfers.

AL Capitalization

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to logistics transfers capitalization and decapitalization.

AN Unit of Issue Change

Code Value Implementation Note:

Use as needed to identify inventory adjustment increases and decreases due to unit of issue changes.

AU Damaged in Facility

Code Value Implementation Note:

Use needed for bulk petroleum to identify inventory adjustment decreases due to spills, line breaks, and other minor accidents.

BA Operating Variance

Code Value Implementation Note:

Use as needed for bulk petroleum to identify inventory adjustment increases and decreases due to routine operating conditions, e.g. temperature, handling, etc.

BD Nonrecoverable

Code Value Implementation Note:

Use as needed for bulk petroleum to identify inventory adjustment decreases due to nonrecoverable tank bottoms.

BK Off Specification

Code Value Implementation Note:

Use as needed for bulk petroleum to identify inventory adjustment increases and decreases due to gain/loss of slop fuel.

BM Replacement

Code Value Implementation Note:

Use as needed for bulk petroleum to identify inventory adjustment increases due to replacement of a previously recorded loss at no cost.

BN Tariff Deduction

Code Value Implementation Note:

Use as needed for bulk petroleum to identify inventory adjustment decreases due to change in volume after receipt via pipeline, as covered in a tariff.

BR Regrade

Code Value Implementation Note:

Use as needed for bulk petroleum to identify inventory adjustment increases and decreases due to regrading.

BS Downgrade

Code Value Implementation Note:

Use as needed for bulk petroleum to identify inventory adjustment increases and decreases due to downgrading.

BT Additive

Code Value Implementation Note:

Use as needed for bulk petroleum to identify inventory adjustment increases and decreases due to injection of an additive.

Mandatory

W1902 477 Credit/Debit Quantity **M R 1/10**
Number of supplier units credited or debited.

Implementation Notes:

1. To reverse all or part of an inventory adjustment transaction, use a minus sign in front of the quantity being reversed (See data element type discussion in volume 1, chapter 10).
2. Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.

Mandatory

W1903 355 Unit or Basis for Measurement Code **M ID 2/2**
Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken

Implementation Notes:

1. Use the unit of issue conversion table in volume 1, chapter 10.
2. Use to identify the new unit of issue for inventory adjustments caused by unit of issue changes.

		3. Use code UL for bulk fuels only to satisfy the X12 standards when the unit of issue is not available. The receiving application software does not use this data element.				
Not Used	W1904	438	U.P.C. Case Code	C	AN	12/12
Required	W1905	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Implementation Notes:						
1. Use only one of codes A1, A2, A4, FB, FS, MG, or YP to identify the material.						
2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE.						
3. When reporting an inventory adjustment resulting from a stock number change, cite codes BS, BT, AF, or BR in W1901, and use a second iteration of the 2/W19/020 loop to identify the new stock number under which the material is carried.						
A1 Plant Equipment Number						
Code Value Implementation Note: Use to identify plant equipment.						
A2 Department of Defense Identification Code (DoDIC)						
Code Value Implementation Note: Use to identify ammunition items.						
A4 Subsistence Identification Number						
Code Value Implementation Note: Use to identify subsistence items.						
FB Form Number						
Code Value Implementation Note: Use to identify the form stock number.						
FS National Stock Number						
Code Value Implementation Note: Must use the NSN when known.						
MG Manufacturer's Part Number						
Code Value Implementation Note: Use to identify nonstandard material.						
YP Publication Number						
Code Value Implementation Note: Use to identify the publication stock number.						
ZB Commercial and Government Entity (CAGE) Code						
Code Value Implementation Note: Use only with code MG to identify a manufacturer's part number.						
Required	W1906	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Conditional	W1907	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Conditional	W1908	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40

Not Used	W1913	81	Weight	O	R	1/10
Not Used	W1914	187	Weight Qualifier	C	ID	1/2
Not Used	W1915	188	Weight Unit Code	C	ID	1/1
Required	W1916	529	Inventory Transaction Type Code Code defining inventory activity.	O	ID	1/2

Implementation Note:

Use to identify the type of inventory adjustment transaction.

AD Inventory Adjustment - Decrease

Code Value Implementation Note:

Use as needed to indicate an inventory adjustment decrease transaction.

AJ Inventory Adjustments

Code Value Implementation Note:

Use as needed to indicate an inventory adjustment increase transaction.

DU Inventory Adjustment - Dual

Code Value Implementation Note:

Use as needed with W1901 codes AC, AD, AG, and AK only to indicate a dual inventory adjustment transaction, e.g., both an inventory decrease and increase. Use requires that W1902 quantity be expressed as a positive number.

Optional

Segment: G69 Line Item Detail - Description

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 5

Purpose: To describe an item in free-form format

Implementation Note:

Use only when W1901 cites code AH to identify the reason for the inventory adjustment.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

Optional

Segment: CS Contract Summary

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 1

Purpose: To provide information about a contract

Syntax: **P0405** — If either CS04 or CS05 is present, then the other is required.

Semantic: **1.** CS09 is the permissible overage as a percentage of the total contract line item number (CLIN) quantity.

2. CS10 is the permissible shortage as a percentage of the total contract line item number (CLIN) quantity.

3. CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.

4. CS14 is the Unit of Measure stipulated in the contract.

5. CS15 is the contract line item number (CLIN) unit price specified in the contract.

6. CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract. A "N" indicates that no Critical Application Indicator is specified in the contract.

7. CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract. A "N" indicates that no Special Requirements Indicator is specified in the contract.

Comments: **1.** CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).

2. CS07 and CS13 (DE 560) can be used to indicate two different types of special services required.

Implementation Note:

Use as needed with W1901 code AC inventory adjustment transactions only to identify the contract number and CLIN, or the CLIN, including the SUBCLIN, associated with the transaction, when available.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES

Optional

Segment: G62 Date/Time

Level: Detail

Loop: 0300

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

- Syntax:**
1. R0103 — At least one of G6201 or G6203 is required.
 2. P0102 — If either G6201 or G6202 is present, then the other is required.
 3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Notes:

1. Must use 2/G62/080 if not using 1/G62/110.
2. For any specific table 2 iteration use 2/G62/080 as needed: 1) to identify a date when a G6202 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in 1/G62/110 or 2) when the G6201 qualifier applies to all table 2 iterations but the G6202 date varies among most of them or 3) to override a G6202 date in 1/G62/110 loop with a different date in 2/G62/080 when the same G6201 qualifier is used in both loops, but the G6202 date is different. (Codes subject to override: 07, 09, BS and TR.)

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
G6201	432	Date Qualifier Code specifying type of date.	C ID 2/2
		07 Effective Date	
		Code Value Implementation Note: Use as needed for bulk petroleum inventory adjustments resulting from regrade, downgrade, or additives to identify the effective date of change.	
		09 Process Date	
		Code Value Implementation Note: Use as needed to identify the date on which the inventory adjustment is processed by the initiating activity.	
		36 Expiration Date	
		Code Value Implementation Note: For subsistence items, use as needed to identify the expiration date for the reported material.	
		BF Pack Date	
		Code Value Implementation Note: For subsistence items, use as needed to identify the date packed for the reported material.	
		BS Product Receipt Date	
		Code Value Implementation Note: Use as needed for bulk petroleum inventory adjustments resulting from capitalization/de-capitalization to identify the date of product receipt.	
		TR Transfer	

Code Value Implementation Note:

Use as needed for inventory adjustments resulting from logistics reassignment to identify the effective date of logistics transfer.

Required	G6202	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	G6203	176	Time Qualifier	C	ID	1/2
Not Used	G6204	337	Time	C	TM	4/8

Mandatory

Segment: **LQ** Industry Code

Level: Detail

Loop: 0310

Usage: Mandatory

Max Use: 100

Purpose: Code to transmit standard industry codes

Syntax: **C0102** — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3

Implementation Note:

Use two occurrences, as needed, of codes 83 and either 99 or A1 (but not both) in conjunction with W1916 code DU to identify dual inventory adjustment information. The first occurrence of each code identifies the current categorization associated with the reported material. The second occurrence of each code identifies the categorization to which the reported material should be reclassified.

0 Document Identification Code

78 Project Code

80 Advice Code

Code Value Implementation Note:

Use as needed to convey information considered essential to processing the transaction.

83 Supply Condition Code

Code Value Implementation Note:

Use as needed to identify the supply condition of the material.

84 Management Code

Code Value Implementation Note:

Use as needed to provide supplemental management information associated with the transaction.

Use with W9101 code BA to identify an inventory adjustment that is outside the prescribed inventory adjustment tolerance limitations.

87 Subsistence Type of Pack Code

Code Value Implementation Note:

Use as needed for subsistence items only to identify type of pack information.

92 Reason for Disposal Code

Code Value Implementation Note:

Use as needed for inventory adjustment decrease transactions only to identify the reason that an item is transferred to a DRMO.

99 Purpose Code

A1 Ownership Code

AK Distribution Code

DG Fund Code

EL Error Classification Code

Code Value Implementation Note:

Use as needed to identify the causes of potential/actual inventory adjustment errors and the processing operations under which the errors occurred.

FC Type Physical Inventory or Transaction History Code

Code Value Implementation Note:

Use as needed to identify the appropriate type of physical inventory/transaction history code.

GA Action Code

Code Value Implementation Note:

Use as needed for bulk petroleum only to identify submission of change(s) or reversal of a previously accepted/recorded transaction.

Optional

Segment: N1 Name**Level:** Detail**Loop:** 0320 **Repeat:** 50**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code

- Syntax:** 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/110 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/040 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/040 loop with a different address specified in the 2/N1/110 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: SB and Z4.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		LG Location of Goods	
		Code Value Implementation Note: Use as needed for logistics transfer inventory adjustment and bulk petroleum transactions only to identify the material storage location.	
		SB Storage Area	
		Code Value Implementation Note: Use to indicate a depot or storage activity.	
		Z4 Owning Inventory Control Point	
		ZD Party to Receive Reports	
		Code Value Implementation Note: Use as needed for bulk petroleum to identify the additional organization to receive a report of an inventory adjustment transaction.	
		ZN Losing Inventory Manager	
		Code Value Implementation Note: Use as needed for logistics transfer inventory adjustment and ownership transfer inventory adjustment transactions, but only to identify the LIM.	
		ZP Gaining Inventory Manager	

Code Value Implementation Note:

Use as needed for logistics transfer adjustment and ownership transfer inventory adjustment transaction, but only to identify the GIM.

Not Used	N102	93	Name	C	AN	1/35

			Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

Use code TO in conjunction with the appropriate 2/N101/110 code to indicate the organization to receive the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LX Assigned Number

Level: Detail

Loop: 0330 **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To reference a line number in a transaction set.

Implementation Notes:

1. Use as a counter to identify the number of 2/LX/150 loop iterations in the transaction set.
2. Use the 2/LX/150 loop, as needed, to provide UUI or lot number information for controlled material.
3. Do not use the 2/LX/150 loop for bulk petroleum transactions.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LX01	554	Assigned Number	M	NO	1/6
Number assigned for differentiation within a transaction set.					

Implementation Note:

In the first 2/LX/150 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.

Required

Segment: N9 Reference Number

Level: Detail

Loop: 0330

Usage: Optional

Max Use: >1

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.
2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

APPENDIX 8B

TRANSACTION SET 846 IC - IMPLEMENTATION CONVENTION ASSET RECLASSIFICATION

846 Inventory Inquiry/Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Implementation Notes

1. Owners use this transaction set to request that distribution depots reclassify inventory items, to inquire about the status of previously submitted reclassification requests, and to reply to distribution depot extension requests. Distribution depots use this transaction set to request reclassification extensions and deny reclassification requests.

2. Use a single occurrence of this transaction set to exchange transactions between a single owner and a single or multiple distribution depots, or between a single distribution depot and a single or multiple owners. Use one occurrence of this transaction set to transmit a single or multiple transactions.

NOTES/COMMENTS:

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

Segment: **ST** Transaction Set Header
Level: Header
Loop: ____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).
Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 846 X12.28 Inventory Inquiry/Advice	M	ID	3/3
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Segment: **BIA** Beginning Segment for Inventory Inquiry/Advice
Level: Header
Loop: _____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the beginning of an inventory inquiry/advice transaction set.
Semantic: 1. BIA03 identifies the number of the inquiry/advice that is transferred.
 2. BIA04 identifies the date of the inquiry/advice that is transferred.
 3. BIA05 identifies the time of the inquiry/advice that is transferred.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	BIA01	353 Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M ID 2/2
Mandatory	BIA02	755 Report Type Code Code indicating the title or contents of a document, report or supporting item AR Asset Reclassification Extension Request Code Value Implementation Note: <i>Distribution depots use for asset reclassification extension request transactions.</i> AX Asset Reclassification Extension Response Code Value Implementation Note: <i>Owners use for asset reclassification extension response transactions.</i> TD Asset Reclassification Response Code Value Implementation Note: <i>Distribution depots use for reclassification denial transactions.</i> TE Asset Reclassification Request Code Value Implementation Note: <i>Owners use for reclassification request and reclassification inquiry transactions.</i>	M ID 2/2
Mandatory	BIA03	127 Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier. Implementation Note: <i>Use a Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	M AN 1/30

Mandatory	BIA04 373 Date Date (YYMMDD).	M DT 6/6
Optional	BIA05 337 Time Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99) Implementation Note: Express the originating activity's date of transaction set preparation in GMT. Implementation Notes: 1. Express the originating activity's time of transaction set preparation in GMT. 2. Express time in a four-position (HHMM) format.	O TM 4/8
Not Used	BIA06 306 Action Code	O ID 1/2

Optional

Segment: DTM Date/Time Reference

Level: Header

Loop: _____

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Note:

Use this 1/DTM/050 segment to indicate the date when a DTM01 qualifier code (e.g., 106) applies to ALL table 2 iterations and the same DTM02 date applies to all or most of the table 2 iterations. For a specific table 2 iteration where the date is to differ from the one indicated in table 1, use the 2/DTM/100 segment and specify the matching qualifier in DTM01 and the different date in DTM02. This date will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/DTM01/050 that does not apply to all the table 2 iterations. (Codes subject to override: 104, 106, 171, and 508.)

Data Element Summary

Mandatory

Optional

Segment: N1 Name**Level:** Header**Loop:** N1 **Repeat:** 5**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/080 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/N1/080 loop to indicate an organization when an N101 qualifier code (e.g., SB) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/450 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/080 that does not apply to all the table 2 iterations. (Codes subject to override: SB and Z4.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual SB Storage Area Code Value Implementation Note: Use to identify a depot or storage activity. Z1 Party to Receive Status Code Value Implementation Note: Use to identify the organization to receive an information copy of the transaction. Z4 Owning Inventory Control Point	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2

Optional

N106

98

Entity Identifier Code

O ID 2/2

Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/080 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN **Repeat:** 10000

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use the 2/LIN/010 loop to identify the type of transaction, material, transaction number, and inventory information associated with the reclassification transaction.
2. Use data element 235/234 pairs to identify data pertinent to the transaction. Present the information in any sequential order. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

Optional	LIN01	350	Assigned Identification Alphanumeric characters assigned for differentiation within a transaction set.	O	AN	1/11
			Implementation Note: <i>Must use with asset reclassification request transactions to differentiate between a request and an inquiry; must use with asset reclassification extension response transactions only when disapproving an extension request; otherwise do not use. Cite one of the following codes:</i> 1 - Owner asset reclassification request 2 - Owner asset reclassification inquiry 3 - Disapproval for asset reclassification extension request			
Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
			Implementation Notes: 1. Use only one of codes A1, A2, A4, FB, FS, MG, or YP to identify the reclassification item. 2. When citing a manufacturer's part number (code MG), always use code ZB to identify the manufacturer's CAGE. A1 Plant Equipment Number Code Value Implementation Note: Use to identify plant equipment. A2 Department of Defense Identification Code (DoDIC) Code Value Implementation Note: Use to identify ammunition items. A4 Subsistence Identification Number Code Value Implementation Note: Use to identify subsistence items. FB Form Number Code Value Implementation Note: Use to identify the form stock number. FS National Stock Number Code Value Implementation Note: Must use the NSN when known. MG Manufacturer's Part Number Code Value Implementation Note: Use to identify nonstandard material. YP Publication Number Code Value Implementation Note: Use to identify the publication stock number. ZB Commercial and Government Entity (CAGE) Code Code Value Implementation Note: Use only with code MG to identify a manufacturer's CAGE code.			
Mandatory	LIN03	234	Product/Service ID Identifying number for a product or service.	M	AN	1/40
Conditional	LIN04	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2

Conditional	LIN05	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Not Used	LIN06	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN07	234	Product/Service ID	C	AN	1/40
Not Used	LIN08	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN09	234	Product/Service ID	C	AN	1/40
Not Used	LIN10	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN11	234	Product/Service ID	C	AN	1/40
Not Used	LIN12	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN13	234	Product/Service ID	C	AN	1/40
Not Used	LIN14	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN15	234	Product/Service ID	C	AN	1/40
Not Used	LIN16	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN17	234	Product/Service ID	C	AN	1/40
Not Used	LIN18	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN19	234	Product/Service ID	C	AN	1/40
Not Used	LIN20	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN21	234	Product/Service ID	C	AN	1/40
Not Used	LIN22	235	Product/Service ID Qualifier	C	ID	2/2

Not Used	LIN26	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN27	234	Product/Service ID	C	AN	1/40
Not Used	LIN28	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN29	234	Product/Service ID	C	AN	1/40
Not Used	LIN30	235	Product/Service ID Qualifier	C	ID	2/2
Not Used	LIN31	234	Product/Service ID	C	AN	1/40

Optional

Segment: DTM Date/Time Reference

Level: Detail

Loop: LIN

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.

2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. Use multiple repetitions as needed to identify dates associated with the transaction set.
2. For any specific table 2 iteration use this 2/DTM/100 segment as needed: 1) to identify the date when a DMT01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/DTM/050 segment or 2) when the DTM01 qualifier applies to all table 2 iterations but the DTM02 date varies among most of them or 3) to override a date in the 1/DTM/050 segment with a different date in the 2/DTM/100 segment when the same DTM01 qualifier is used in both segments, but the DTM02 date is different. (Codes subject to override: 106, 140, 171, and 508.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
DTM01	374	Date/Time Qualifier	M	ID	3/3
		Code specifying type of date or time, or both date and time.			

Implementation Note:

Use two occurrences of code 036, as needed, for the reclassification request transaction only. The first occurrence identifies the current categorization associated with the suspended or suspected material. The second occurrence identifies the categorization to which the suspended or suspected material should be reclassified.

036 Expiration

Code Value Implementation Note:

Use only to identify the expiration date for subsistence items.

106 Required By

Code Value Implementation Note:

Use only in reclassification request transactions to identify the date by which reclassification action must be completed.

140 Actual

Code Value Implementation Note:

Use to identify the date the transaction was prepared.

171 Revision

Code Value Implementation Note:

Use only in extension request transactions to identify the date by which the reclassification action can be completed.

508 Extended

Code Value Implementation Note:

Use only for extension response transactions to identify the approved revision to the date by which the reclassification action must be completed.

510 Date Packed

Code Value Implementation Note:

For subsistence items use for reclassification request transactions only to identify the date packed for the reported material.

Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	NO	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Required

Segment: REF Reference Numbers

Level: Detail

Loop: LIN

Usage: Optional

Max Use: >1

Purpose: To specify identifying numbers.

Syntax: R0203 — At least one of REF02 or REF03 is required.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Note:

Use two occurrences of code C7, as needed, for the reclassification request only. The first occurrence identifies the current categorization associated with the suspended or suspected material. The second occurrence identifies the categorization to which the suspended or suspected material should be reclassified.

C7 Contract Line Item Number

Code Value Implementation Note:

Use as needed to identify the CLIN, or the CLIN including the SUBCLIN, associated with the material.

F8 Original Reference Number

Code Value Implementation Note:

Use as needed for reclassification request transactions only to identify the transaction number previously assigned to the non-procurement receipt for which reclassification is requested. For suspended receipts, cite the transaction number of the material receipt. For suspended material previously transferred to a suspended condition as a result of an inventory adjustment, cite the transaction number of the adjustment.

PH Priority Rating

Code Value Implementation Note:

Use as needed for reclassification request transactions only to identify the urgency associated with the reclassification action. Cite one of the following codes in REF02:

- 1-High priority
- 2-Normal priority
- 3-Low priority

SI Shipper's Identifying Number for Shipment (SID)

Code Value Implementation Note:

Use as needed for reclassification request transactions only to identify the vendor assigned shipment number (e.g., to distinguish between multiple shipments for a single CLIN) for a previously reported procurement receipt that has been suspended, if applicable.

TN Transaction Reference Number

Code Value Implementation Note:

For suspected items in a non-suspended condition, cite the ICP assigned transaction number controlling the reclassification action.

W8 Suffix

Code Value Implementation Note:

Use as needed for reclassification request transactions only to identify the suffix code assigned to the original reference number.

Required	REF02	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
Not Used	REF03	352	Description	C	AN	1/80

Optional

Segment: CS Contract Summary

Level: Detail

Loop: LIN

Usage: Optional

Max Use: 1

Purpose: To provide information about a contract

Syntax: P0405 — If either CS04 or CS05 is present, then the other is required.

- Semantic:**
1. CS09 is the permissible overage as a percentage of the total contract line item number (CLIN) quantity.
 2. CS10 is the permissible shortage as a percentage of the total contract line item number (CLIN) quantity.
 3. CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.
 4. CS14 is the Unit of Measure stipulated in the contract.
 5. CS15 is the contract line item number (CLIN) unit price specified in the contract.
 6. CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract. A "N" indicates that no Critical Application Indicator is specified in the contract.
 7. CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract. A "N" indicates that no Special Requirements Indicator is specified in the contract.

- Comments:**
1. CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).
 2. CS07 and CS13 (DE 560) can be used to indicate two different types of special services required.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Required	CS01	367	Contract Number Contract number.	O	AN	1/30
Implementation Note: <i>Use only for reclassification request transactions to identify the contract number previously assigned to the procurement receipt for which classification is requested. For suspended procurement receipts, cite the contract number of the material receipt. For material previously transferred to a suspended condition as a result of an inventory adjustment, cite the adjustment contract number. For suspect assets in a non-suspended condition, cite the applicable contract number.</i>						
Not Used	CS02	327	Change Order Sequence Number	O	AN	1/8
Optional	CS03	328	Release Number Number identifying a release against a Purchase Order previously placed by the parties involved in the transaction.	O	AN	1/30

Implementation Note:

Use as needed to identify the call number or order serial number, or the call or order serial number including the respective call or order modification, associated with the contract number, if applicable.

Conditional	CS04	128	Reference Number Qualifier Code qualifying the Reference Number.	C	ID	2/2
		83	Extended (or Exhibit) Line Item Number (ELIN)			
			Code Value Implementation Note: Use to identify the ELIN, or the ELIN including the SUBELIN, as appropriate.			
		C7	Contract Line Item Number			
			Code Value Implementation Note: Use as needed to identify the CLIN, or the CLIN including the SUBCLIN, associated with the contract number, if applicable.			
Conditional	CS05	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Not Used	CS06	324	Purchase Order Number	O	AN	1/22
Not Used	CS07	560	Special Services Code	O	ID	2/10
Not Used	CS08	433	F.O.B. Point Code	O	ID	2/2
Not Used	CS09	954	Percent	O	R	1/10
Not Used	CS10	954	Percent	O	R	1/10
Not Used	CS11	782	Monetary Amount	O	R	1/15
Not Used	CS12	336	Terms Type Code	O	ID	2/2
Not Used	CS13	560	Special Services Code	O	ID	2/10
Not Used	CS14	355	Unit or Basis for Measurement Code	O	ID	2/2
Not Used	CS15	212	Unit Price	O	R	1/17
Not Used	CS16	336	Terms Type Code	O	ID	2/2
Not Used	CS17	1073	Yes/No Condition or Response Code	O	ID	1/1
Not Used	CS18	1073	Yes/No Condition or Response Code	O	ID	1/1

Optional	Segment: QTY Quantity				
	Level: Detail				
	Loop: QTY Repeat: 99				
	Usage: Optional				
	Max Use: 1				
Purpose: To specify quantity information.					
Implementation Note:					
Use successive iterations of the 2/QTY/320 loop, as needed, to stratify quantity on hand by material classification. Use only in material reclassification requests.					
Data Element Summary					
	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES	
Mandatory	QTY01	673	Quantity Qualifier Code specifying the type of quantity. QH Quantity on Hold	M	ID 2/2
Code Value Implementation Note:					
Use only for reclassification request transactions to identify the quantity for which reclassification is requested.					
Mandatory	QTY02	380	Quantity Numeric value of quantity.	M	R 1/15
Implementation Note:					
Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20					
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID 2/2

Segment: LM Code Source Information
Level: Detail
Loop: LM Repeat: >1
Usage: Optional
Max Use: 1
Purpose: To transmit standard code list identification information
Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use the 2/LM/375 loop to identify DoD unique coded data related to the characteristics and coding requirements for the transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M ID 2/2
Not Used	LM02	822	Source Subqualifier	O AN 1/15

Mandatory	Segment: LQ Industry Code Level: Detail Loop: LM Usage: Mandatory Max Use: 100 Purpose: Code to transmit standard industry codes Syntax: C0102 — If LQ01 is present, then LQ02 is required. Implementation Note: Use this segment to identify codes, as appropriate, consistent with management information requirements.				
	Data Element Summary				
Required	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES	
	LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O	ID 1/3
Required	Implementation Notes: 1. Use a single occurrence of code 84 for reclassification requests. 2. Use two occurrences of codes 83, 87, and either 99 or A1 (but not both) as needed for reclassification requests. The first occurrence identifies the current categorization associated with suspended or suspected material. The second occurrence of each code identifies the categorization to which the suspended or suspected material should be reclassified. 83 Supply Condition Code Code Value Implementation Note: Use to identify the supply condition of the material. 84 Management Code Code Value Implementation Note: Use to identify supplemental management information associated with processing the transaction. 87 Subsistence Type of Pack Code Code Value Implementation Note: Use as needed for subsistence items only to identify subsistence type of pack information. 99 Purpose Code A1 Ownership Code				
	LQ02	1271	Industry Code Code indicating a code from a specific industry code list	C	AN 1/20

Optional

Segment: LS Loop Header

Level: Detail

Loop: QTY

Usage: Optional

Max Use: 1

Purpose: To indicate that the next segment begins a loop

Semantic: One loop may be nested contained within another loop, provided the inner nested loop terminates before the outer loop. When specified by the standard setting body as "mandatory", this segment in combination with "LE", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

Comment: See Figures Appendix for an explanation of the use of the LS and LE segments.

Implementation Note:

Use as needed in each 2/QTY/320 loop for reclassification request transactions, but only to prevent a syntax error in the use of the 2/REF/390 loop.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LS01	447	Loop Identifier Code	M AN 1/4
		The loop ID number given on the transaction set diagram is the value for this data element in segments LS and LE	

Implementation Note:

Cite REF to indicate the 2/REF/390 loop.

Optional	Segment: REF Reference Numbers			
	Level: Detail			
	Loop: REF Repeat: >1			
	Usage: Optional			
	Max Use: >1			
Mandatory	Purpose: To specify identifying numbers.			
	Syntax: R0203 — At least one of REF02 or REF03 is required.			
	Implementation Note:			
	<i>Use the 2/REF/390 loop for reclassification request transactions when the item identified in LIN03 of the 2/LIN/010 segment is subject to tracking under a UIT program. May also use to provide the lot number for medical and ammunition commodities.</i>			
	Data Element Summary			
Mandatory	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
	REF01	128	Reference Number Qualifier	M ID 2/2
			Code qualifying the Reference Number.	
			LT Lot Number	
			Code Value Implementation Note:	
Required			<i>Use for the manufacturer's lot number, batch number or other number identifying the production run.</i>	
			SE Serial Number	
			Code Value Implementation Note:	
			<i>Use to identify the UII assigned to an item for a NUII or LUII program.</i>	
	REF02	127	Reference Number	C AN 1/30
Not Used			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	
	REF03	352	Description	C AN 1/80

Optional

Segment: N1 Name**Level:** Detail**Loop:** REF**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:*Use to identify the manufacturer of the UIT item.***Data Element Summary**

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual MF Manufacturer of Goods	M	ID	2/2
Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 33 Commercial and Government Entity (CAGE)	C	ID	1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Not Used	N106	98	Entity Identifier Code	O	ID	2/2

Optional

Segment: LE Loop Trailer

Level: Detail

Loop: QTY

Usage: Optional

Max Use: 1

Purpose: To indicate that the loop immediately preceding this segment is complete

Semantic: One loop may be nested contained within another loop, provided the inner nested loop terminates before the other loop. When specified by the standards setting body as "mandatory", this segment in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop beginning segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

Comment: See Figures Appendix for an explanation of the use of the LE and LS segments.

Implementation Note:

Use as needed in each 2/QTY/320 loop to annotate the conclusion of all 2/REF/390 loop iterations.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LE01	447	Loop Identifier Code	M AN 1/4
		The loop ID number given on the transaction set diagram is the value for this data element in segments LS and LE	

Implementation Note:

Repeat the content of 2/LS/380.

Optional

Segment: N1 Name**Level:** Detail**Loop:** N1 **Repeat:** 200**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code**Syntax:** 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/450 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/080 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/080 loop with a different address specified in the 2/N1/450 loop when the same N101 qualifier is used in both loops but the N104 address is different. (Codes subject to override: SB and Z4.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual SB Storage Area Code Value Implementation Note: Use to identify a depot or storage activity. Z4 Owning Inventory Control Point	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:

Use code TO in conjunction with the appropriate 2/N101/450 code to indicate the organization to receive the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Segment: **SE** Transaction Set Trailer

Level: Summary

Loop: ____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96 Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329 Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

9 MATERIAL OBLIGATION VALIDATION

9.1 SECTION ONE - SUPPORT OF UNITED STATES FORCES

9.1.1 GENERAL

This chapter prescribes policies and procedures for the validation by organizations of the continuing need for overage requisitioned requirements and for the reconciliation of supply source material/obligation records with the due-in records of requisitioning activities. The MOV process is twofold: (1) validation of need and (2) reconciliation of records.

A material obligation is that unfilled portion of a requisition (for a stocked or nonstocked item) that is not immediately available for issue but is recorded as a commitment for future issue, either by DVD or backordered from stock. This includes both NSN and non-NSN items. MOV pertains to those requisitioned items assigned BB, BC, BD, BV, and BZ status. These procedures exclude DVD requisitions assigned BV and BZ status from the automatic MOV cancellation process; however, organizations must submit requisition cancellations for material no longer required. See chapter 5 for the requisition cancellation procedures.

Supply sources use the TS 517 IC - Material Obligation Validation (appendix 9A) to generate MOV requests to organizations for a comparison and validation of the continued requirement of outstanding requisitions held as material obligations by the supply source with those carried as due-in by the organization.

Organizations use the TS 517 IC - Material Obligation Validation to generate MOV responses to advise the supply source: (1) to hold a material obligation until supplied, or (2) to cancel all or a portion of a material obligation.

Supply sources must provide an MOV notification of non-response to organizations for each non-response to an MOV cycle for requisitions assigned BZ status. The organization must conduct an item-by-item review and respond with a requisition cancellation if the material is not required. Organizations are advised that procurement action is in process and that the material will be shipped and billed unless a requisition cancellation is submitted.

A supply source is defined as any S/A organization which maintains material obligation records, and includes, but is not limited to, those organizations commonly referred to as ICPs, IMMs, requisition processing points, stock points, and SCAs.

An organization is defined as requisitioners, control offices, and/or monitoring activities having the responsibility to validate and/or reconcile material obligation records between the requisitioning activity and the supply source requesting the validation.

9.1.1.1 MATERIAL OBLIGATION REINSTATEMENT REQUEST

This is a request by an organization to reinstate requisition(s) previously canceled due to that organization's nonresponse to an MOV request. Use the TS 517 IC - Material Obligation Validation.

9.1.1.2 EXCLUSIONS FROM SECTION ONE

These procedures exclude FMS transactions; however, the Services should reconcile FMS material obligation records at the supply source with those of the organizations required to

maintain FMS case control. See section two of this chapter for MOV procedures for Grant Aid transactions.

OSD may exclude specific project codes and DoDAACs from the MOV process.

These procedures exclude Civil Agencies from the MOV process unless covered by interagency agreements.

9.1.1.3 MATERIAL OBLIGATION AGE CRITERIA

Consider material obligations overaged and subject to this procedure when PD 01-08 requisitions have aged 30 days past the requisition date or PD 09-15 requisitions have aged 75 days past the requisition date.

Supply sources may order special validations without regard to the age of the material obligations involved.

These procedures also apply to long production lead time items since requirements for such items may also change as a result of unit/force movements, deactivation, and other population changes; however, only item managers may elect to establish longer intervals for the validation of long production lead time items.

9.1.1.4 SCHEDULE FOR CYCLIC VALIDATION OF MATERIAL OBLIGATIONS

See figure 9-1 for the annual schedule of cyclic validations in support of U.S. Forces and the prescribed MOV response times.

Deployed units, afloat units, and CONUS/OCONUS locations which are unable to respond by the prescribed date, may request the DAASC to provide responses to MOV requests. Use TS 517 IC - Material Obligation Validation with Transaction Type Code AN and Action Code 9 to notify the DAASC of the organizations authorized for the MOV exemption. The theater/fleet commander or major command must approve the MOV exemption request before it is transmitted. The exemption request is only authorized for the current MOV cycle. The DAASC will not generate MOV responses for any subsequent MOV cycle unless a separate exemption request is received.

Each S/A headquarters must provide a quarterly consolidated report to the ADUSD(L)MDM using the appendix 9B format. Submit this report within 30 days after the close of each MOV cycle. The RCS for this report is DD-P&L(Q)1064. The supply source will review the history file, prior to preparing the report, for those transactions in which the quantity response was different from the quantity requested. This review will determine if the quantity difference resulted from a shipment, a cancellation, or if the requisitioner actually requested cancellation of the obligation. Only cancellations actually requested by the requisitioner using the MOV response will be included in the MOV report. Do not report a difference in quantity resulting from any other cause and/or process.

The IMM may initiate a special validation requests. For example, the IMM may need to validate requirements for high dollar value, critical items, or for those NSNs which have the largest number of material obligations on record or account for certain percentages of the total material obligations. These special validations should be selective in approach and may be made regardless of whether the material obligations were previously validated. The IMM may determine and define critical items as those essential items which are in short supply or expected to be in short supply for an extended period.

9.1.1.5 PREPARATION OF SPECIAL VALIDATION REQUESTS

Use the appendix 9A to request a special MOV at times other than the normal MOV cycles indicated in figure 9-1. Organizations will validate the special MOV and use the appendix 9A format in response to the special MOV request.

The MOV request must identify the transaction reference number of the demand which is held as a material obligation, the unfilled quantity, and a response due date which is always 15 days from the date of the MOV request.

Due to the urgency of demands for critical items, IMMs may determine that supply of current demands should be accomplished from stocks due-in, against which there are material obligations of lesser or equal priorities. In these instances, the IMMs would initiate a special MOV request.

9.1.1.6 PERFORMANCE OF THE VALIDATION AND RECONCILIATION

It is mandatory that the recipient of validation requests (either scheduled or special) conduct an item-by-item review with the user to determine the continued need for each item, the quantity involved, and the PD of the requirement. A perfunctory review, or a routine response that all material obligations are still required, is a waste of time and effort on the part of all organizations. Such cursory reviews do not improve supply support. Items which are identified in the requests but are not contained on the records of the recipient of the request will also be furnished to the user for validation. Items which are contained on the records of recipients of the validation requests and which meet the overage criteria but are not covered by a request will, likewise, be validated with the user.

The recipient of validation requests will match the items recorded as material obligations at the supply source with the records of unfilled demands to determine and take action to bring the two records into agreement.

Organizations may request status of any outstanding items, having met the age criteria, and not included with the scheduled validation requests. When such status is desired, the organization will submit a TS 869 IC - Requisition Inquiry/Supply Assistance, to the supply source. (See chapter 5 for the requisition inquiry procedures.)

9.1.1.7 RESPONSES TO MATERIAL OBLIGATION VALIDATION REQUESTS

Use the TS 517 IC - Material Obligation Validation format to respond to special MOV requests. The MOV responses will contain the transaction reference number of the demand as contained in the MOV request, the quantity required for continuation as a material obligation, and the suffix, if applicable. The MOV responses will serve to advise the supply source whether material obligations should be canceled or requirements still exist (and the item should be continued as a material obligation). Respond to the special MOV requests in time to meet the requested MOV response due date.

Upon completing the validation/reconciliation process, organizations must provide an MOV response for each MOV request received to the supply source which submitted the MOV request. Submit the MOV response by the MOV response due date cited in the MOV request. Use the MOV response to advise the supply source of the quantity still required for supply action. If total cancellation is desired, do not include the quantity segment in the MOV response.

Whenever a requirement is to be retained as a material obligation and the PD or RDD/RDP changes due to reassessment of requirements, submit a TS 511 IC - Modification requisition modifier to indicate the revised PD/RDD/RDP. (See chapter 5 for the requisition modifier procedures.)

9.1.1.7.1 DEFENSE AUTOMATIC ADDRESSING SYSTEM INITIATED RESPONSES

The DAASC use the TS 517 IC - Material Obligation Validation to provide MOV responses for authorized activities exempted from participating in an MOV cycle.

The DAASC provide appropriate MOV responses to the respective supply source for each MOV exemption received. The DAASC will transmit the MOV response no earlier than 7 days after receipt of the MOV exemption, but no later than the last day of the cycle.

The DAASC utilizes the MOV history file to generate appropriate MOV responses for the activity(ies) identified in the MOV exemption.

9.1.1.7.2 RECEIPT OF CONFIRMED CANCELLATIONS

Organizations in receipt of confirmed cancellations, may request reinstatement of their canceled requisitions for a period not to exceed 60 days after the BS status transaction date. Use the TS 517 IC - Material Obligation Validation to request the reinstatement of canceled requisitions and indicate the quantity required. The quantity reinstated may be equal to or less than the quantity canceled; however, the quantity reinstated shall not exceed the quantity canceled.

9.1.1.8 SUPPLY SOURCE CANCELLATION OF MATERIAL OBLIGATIONS

Supply sources must use the chapter 5 procedures to initiate efforts to stop storage and transportation actions when accomplishing cancellations resulting from the MOV program.

Supply sources will cancel material obligations when an organization has not responded to the scheduled MOV request by the MOV response due date, except for requisitions in BV or BZ status. Requisitions being filled by DVD (BV and BZ status) are excluded from automatic cancellation of the MOV process. When a response to an MOV request has not been received by the response cutoff date for a requisition in BZ status, the supply source will generate a TS 517 IC - Material Obligation Validation with Transaction Type Code AN and Action Code 9 to the validating organization. The organization must validate the requirement and respond with a requisition cancellation if the material is not required. See chapter 5 for the requisition cancellation procedures.

Supply sources will cancel material obligations upon receipt of requisition cancellation requests from organizations. When there is no record of the item as a material obligation, match the MOV response with the RHF to determine the current status of the item. If the item is in an inprocess state, take effective action to stop the flow of the unneeded material. All supply sources will strive to attain the DoD objective of taking all feasible action to preclude shipment from the depot, the POE, or the vendor (in the instance of purchase actions). Based on action taken, the supply source will provide the requisitioning organization with appropriate supply or shipment status.

Supply sources will furnish TS 870 IC - Supply Status (appendix 6B) with BR or BS status to the organizations for which MOV requests were submitted for each item canceled as a result of the validation actions.

Supply sources may contact requisitioning organizations to determine desired actions applicable to erroneous response transactions, if time permits. Should time not permit the supply source

to contact the requisitioning activities, the items concerned with the erroneous transactions will be retained as a material obligation, until clarification is obtained.

The S/A of the organization initiating a cancellation request or failing to respond to MOV requests will be charged with (1) transportation costs for returning the material to depot storage and (2) procurement and termination costs when it is determined that termination is in the best interest of the Government. Specific instructions concerning material transportation charges are contained in Volume 3, Transportation, and credit allowances are contained in Volume 7, Finance.

9.1.1.9 SUPPLY SOURCE MATERIAL OBLIGATION REINSTATEMENT

Supply sources will reinstate supply action on requisition(s) when organizations submit MOV reinstatement requests within 60 days of requisition cancellation with BS status. Reinstatement requests for the quantity equal to or less than the original canceled quantity. If the reinstatement quantity is greater than the quantity canceled by the BS status, only reinstate the quantity in the BS status. Reject the quantity exceeding the BS quantity. Use the BS status to prepare the MOV reinstatement request to ensure identification of the correct suffix.

Supply sources will use DK, DL, and DM status to reject MOV reinstatement requests received over 60 days after the BS status transaction date when there is no record of the BS status or when the MOV reinstatement request is for a quantity larger than the canceled quantity.

9.2 SECTION TWO - MILITARY ASSISTANCE PROGRAM/GRANT AID

9.2.1 GENERAL

Section two prescribes policies and procedures for the validation of ICP material obligation records with the records of Service ILCO maintaining SAO program control and for the validation of the continuing need at the MAP/GA country level for overage demands. The purpose is twofold: (1) the reconciliation of records and (2) the validation of need.

The annual schedule of cyclic validation in support of MAP/GA material obligations is shown in figure 9-2.

Supply sources will provide the ILCO with MOV requests applicable to aged material obligations for MAP/GA requirements. The MOV requests will be provided to the ILCO by the supply sources using schedules for validating aged MAP/GA material obligations established by the DUSD(L).

Material obligations are defined as that portion of the quantity requisitioned which is not immediately available for issue to the requisitioners and/or is recorded as a commitment for future issue of stocked items. This includes commitments for DVDs. The supply source will produce MOV requests from their records of material obligations for which the requisition transaction reference number dates are aged to 180 days or more at the time of the established validation cutoff. Material obligations selected for validation meeting the 180-day age criterion are those assigned BB, BC, BD, and BV status. The quantities identified in the MOV requests reflect the unfilled quantities only of items maintained as material obligations at the supply sources. Use appendix 9A to prepare MOV requests.

Supply sources will transmit the scheduled MOV requests not later than 10 days after the established cutoff date.

9.2.2 ACCOMPLISHING MATERIAL OBLIGATION VALIDATION BY THE ARMY AND AIR FORCE INTERNATIONAL LOGISTICS CONTROL OFFICES

The ILCO receiving the MOV requests will match the items indicated as being on record at the supply source with its records of unfilled demands and provide the MOV requests to the SAOs which represent quantities/items:

- In the MOV requests received from the supply source. (The ILCO will not attempt to adjust quantity differences between the ILCO record and the supply source record.)
- On the ILCO record, having reached the validation age criterion and not included with MOV requests furnished by the supply source. The ILCO will adjust their records based upon the MOV responses received from the SAOs.

The Services may elect to have their ILCO identify the program originator code in the MOV requests transmitted to SAOs for validation. The identification of this code will enable the SAO to determine the specific section to which to direct the MOV requests. In these instances, use the following codes:

<u>CODE</u>	<u>PROGRAM ORIGINATOR</u>
B	SAO (Army)
P	SAO (Navy)
D	SAO (Air Force)
K	SAO (Marine Corps)

(Do not include these codes in MOV responses which are transmitted to the supply source.)

Transmit the MOV requests to the appropriate SAO not later than 45 days after the scheduled cutoff date. The time between the cutoff date and the 45 days for transmitting the MOV requests to the SAOs allows:

- Transmission of the MOV requests from the supply source to the ILCO.
- The ILCO establishment of suspense records of the supply source request quantities and preparation of MOV requests for transmission to the SAOs. The SAOs will provide MOV response to the ILCO within 90 days after the cutoff date for the validation cycle.

9.2.3 ACCOMPLISHING MATERIAL OBLIGATION VALIDATION BY THE NAVY INTERNATIONAL LOGISTICS CONTROL OFFICE

The NAVILCO will match the items indicated as being on record at the supply source with its records of unfilled demands and effect a file reconciliation. The NAVILCO will transmit MOV responses for each MOV request received to the supply source having submitted the validation requests. The supply source will use the MOV response to determine whether the items should be canceled or requirements still exist and the items should be continued as material obligations.

Provide MOV responses to validation requests to supply sources by 15 March for the first cycle and 15 September for the second cycle.

Indicate the quantity still required in the MOV response. If total cancellation is desired, do not include the quantity segment in the MOV response.

Submit a requisition inquiry for items outstanding on NAVILCO records for which no MOV reconciliation request was received from the supply source. See chapter 5 for the requisition inquiry procedures

9.2.4 NAVY INTERNATIONAL LOGISTICS CONTROL OFFICE INITIATION OF RECONCILIATION AND/OR VALIDATION WITH SECURITY ASSISTANCE ORGANIZATIONS

Annually, on 16 September, the NAVILCO will prepare MOV reconciliation requests which represent unfilled requisitions with dates of 31 July or earlier.

The NAVILCO will identify the program originator code in the MOV reconciliation requests transmitted to SAOs for validation. The SAO will use this code to determine the specific section to which to direct the requests. See subsection 9.2.2 for a listing of the program originator codes.

The NAVILCO will transmit the MOV reconciliation requests to the appropriate SAO not later than 26 September and indicate 31 October as the response due date.

9.2.5 VALIDATION OF REQUIREMENTS BY THE SECURITY ASSISTANCE ORGANIZATIONS

The SAOs receiving the MOV requests will determine whether requirements for the items and quantities still exist. The SAOs will also determine whether requirements exist for items/quantities, having reached the age criteria and not included with the MOV requests. Once the validation of requirements is completed, the SAOs will adjust their records to reflect the need of the country for the items/quantities.

The SAO will request status of any items which are outstanding, having met the age criteria and not included in the MOV requests. When such status is required, the SAO will submit a requisition inquiry to the appropriate ILCO. See chapter 5 for the requisition inquiry procedures.

The SAO will provide an MOV response for each MOV reconciliation request, as appropriate, to indicate the remaining quantity of each item still required.

The SAO will transmit MOV responses to the appropriate ILCO. For USASAC and AFMC, transmit these responses to arrive no later than the date specified in the transmittal which is 35 days prior to the response due date contained in the requests. For NAVILCO, these responses must be received no later than 31 October.

9.2.6 RESPONSE TO MATERIAL OBLIGATION VALIDATION REQUESTS BY THE ARMY AND AIR FORCE INTERNATIONAL LOGISTICS CONTROL OFFICES

Upon receipt of the responses from the SAOs, the ILCO will adjust its records to agree with the country's requirements indicated by the MOV responses. The ILCO will then transmit MOV responses for each MOV request received from the supply source having submitted the validation requests. The supply source will use the MOV response to determine whether the

TRANSACTION SET 517 IC - IMPLEMENTATION CONVENTION MATERIAL OBLIGATION VALIDATION

517 Material Obligation Validation

This Draft Standard for Trial Use provides the format and establishes the data contents of the Material Obligation Validation Transaction Set for use within the context of an Electronic Data Interchange (EDI) environment. The material obligation validation transaction set may be used to: (1) verify the continued need for open orders, (2) confirm open order quantities and order priority, (3) request reinstatement of erroneously cancelled open orders, and (4) validate Government Furnished Material (GFM) orders. The transaction set may convey a description of the material, the urgency of need associated with the transaction and quantity of required material. This transaction set is bidirectional between trading partners.

Implementation Notes

1. Organizations use this transaction set to validate the continued need and priority of requirements held in backorder status (e.g., MOV), provide responses to MOV requests, notify organizations of failures to respond to MOV requests, notify organizations of exemptions from validation cycles, and request reinstatements of requirements erroneously cancelled due to failures to respond to validation cycles. Organizations also use this transaction set to validate apparent excessive requisition quantities and respond to excessive quantity validations.

2. Use a single occurrence of this transaction set to transmit MOV requests, MOV responses, notifications of non-response to MOV cycles, MOV exemptions, MOV reinstatement requests, excessive quantity verification inquiries, or excessive quantity verification responses to one or more organizations. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Optional

Segment: G62 Date/Time**Level:** Header**Loop:** ____**Usage:** Optional**Max Use:** 10**Purpose:** To specify pertinent dates and times

- Syntax:**
1. R0103 — At least one of G6201 or G6203 is required.
 2. P0102 — If either G6201 or G6202 is present, then the other is required.
 3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Notes:

1. Use this 1/G62/030 segment to indicate the date when a G6201 qualifier code (e.g., 64) applies to ALL table 2 iterations and the same G6202 date applies to all or most of the table 2 iterations. For any specific table 2 iteration where the date is to differ from the one indicated in table 1, use the 2/G62/040 segment and specify the matching qualifier in G6201 and the different date in G6202. This date will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/G6201/040 which does not apply to all table 2 iterations. (Codes subject to override: 64 and CA.)

2. Use to identify dates applicable to the MOV request and excessive quantity verification inquiries.

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Notes:

1. Use this 1/LM/040 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 81) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/070 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/050 that does not apply to all the table 2 iterations. (Code subject to override: 0, 81, AK, DE, DF, and DG.)

2. The 1/LM/040 loop will, as a minimum, identify the type of transaction.

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/060 loop will, as a minimum, cite the organization originating the transaction set.

2. Use this 1/N1/060 loop to indicate an organization when an N101 qualifier code (e.g., OB) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/090 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/060 which does not apply to all of the table 2 iterations. (Code subject to override: OB and Z4.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	

97 Party Waiving Requirements

Code Value Implementation Note:

Use multiple iterations, as needed, for MOV exemption transactions to identify those organizations exempt from the current MOV cycle.

OB Ordered By

Code Value Implementation Note:

Use to indicate the requisitioning activity.

Z4 Owning Inventory Control Point

Not Used

N102	93	Name	C AN 1/35
------	----	-------------	-----------

Required

N103	66	Identification Code Qualifier	C ID 1/2
		Code designating the system/method of code structure used for Identification Code (67).	

10 Department of Defense Activity Address Code (DODAAC)

M4 Department of Defense Routing Identifier Code (RIC)

Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/060 code to indicate the organizations sending and receiving the transaction set.

FR Message From**Code Value Implementation Note:**

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To**Code Value Implementation Note:**

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: G61 Contact
Level: Header
Loop: N1
Usage: Optional
Max Use: 5
Purpose: To identify a person or office to whom communications should be directed
Syntax: P0304 — If either G6103 or G6104 is present, then the other is required.
Comment: G6103 qualifies G6104.

Implementation Notes:

1. Use only under exceptional circumstances when requiring direct communication with the party originating the transaction set.
2. Use multiple repetitions as needed to identify a POC and multiple communication numbers. When using multiple repetitions to identify different communication numbers for a single POC, repeat the name cited in G6102.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	G6101	366	Contact Function Code Code identifying the major duty or responsibility of the person or group named. IC Information Contact Code Value Implementation Note: Must use in the first repetition to identify the primary POC and their primary communication number.	M ID 2/2
Mandatory	G6102	93	Name Free-form name.	M AN 1/35
			Implementation Note: Provide the last name, first name, middle initial, and rate/rank/title, as required, of the individual named as POC. Include blank spaces between name components and periods after initials. Do not include NMN when a middle initial is not available.	
Conditional	G6103	365	Communication Number Qualifier Code identifying the type of communication number.	C ID 2/2
			Implementation Notes: 1. Use to identify the preferred method of communication in the first repetition. Use additional repetitions when identifying alternate communication methods. 2. Do not include blank spaces or dashes between numbers. AU Defense Switched Network Code Value Implementation Note: Use to identify the DSN telephone number. EM Electronic Mail FT Federal Telecommunications System (FTS) Code Value Implementation Note: Use to identify the FTS telephone number.	

FX Facsimile

Code Value Implementation Note:

Use to identify the facsimile DSN telephone number.

IT International Telephone

Code Value Implementation Note:

Include country and city code as needed.

TE Telephone

Code Value Implementation Note:

Use to identify the commercial telephone number. Include the area code and number.

TL Telex

TX TWX

Conditional

G6104

364

Communication Number

C AN

1/80

Complete communications number including country or area code when applicable.

Optional

G6105

443

Contact Inquiry Reference

O AN

1/20

Additional reference number or description to clarify a contact number.

Implementation Note:

Use to indicate the office symbol or activity code for the party identified.

Optional

Segment: N9 Reference Number

Level: Detail

Loop: QTY

Usage: Optional

Max Use: 30

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.

2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Note:

Use multiple repetitions as needed to identify the transaction number and material identification associated with the transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N901	128	Reference Number Qualifier Code qualifying the Reference Number.	M ID 2/2

Implementation Notes:

1. Use only one of codes 1I, EQ, FQ, MF, NS, S6 or XD to properly identify the material requisitioned.
2. When citing a manufacturer's part number (code MF), always use code W7 to identify the manufacturer's CAGE.
3. Always use code PG to identify the commodity name or description when citing the Federal Supply Classification (code 87).

1I Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use to identify ammunition items.

87 Functional Category

Code Value Implementation Note:

Use to identify the Federal Stock Classification for nonstandard material when a part number is not available and material can only be ordered by description (e.g., non-NSN lumber products).

EQ Equipment Number

Code Value Implementation Note:

Use to identify the plant equipment.

FQ Form Number

Code Value Implementation Note:

Use to identify the form stock number.

MF Manufacturers Part Number

Code Value Implementation Note:

Use to identify nonstandard material.

NS National Stock Number

Code Value Implementation Note:

Must use the NSN when known.

PG Product Group

Code Value Implementation Note:

Use only with code 87 to identify the material name or description.

S6 Stock Number

Code Value Implementation Note:

Use to identify the publication stock number.

TN Transaction Reference Number

Code Value Implementation Note:

Use to identify the transaction number for each transaction.

W7 Commercial and Government Entity (CAGE) Code

Code Value Implementation Note:

Use only with code MG to identify a manufacturer's part number.

W8 Suffix

Code Value Implementation Note:

Use as needed to identify the transaction number suffix.

XD Subsistence Identification Number

Code Value Implementation Note:

Use to identify subsistence items.

Conditional	N902	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			

Implementation Note:

Conditional	N903	369	Free-form Description	C	AN	1/45
			Free-form descriptive text.			

Implementation Note:

Use only with code 87 to identify the material name or description.

Not Used	N904	373	Date	O	DT	6/6
Not Used	N905	337	Time	C	TM	4/8
Not Used	N906	623	Time Code	O	ID	2/2

Optional

Segment: G62 Date/Time**Level:** Detail**Loop:** QTY**Usage:** Optional**Max Use:** 30**Purpose:** To specify pertinent dates and times**Syntax:** 1. R0103 — At least one of G6201 or G6203 is required.

2. P0102 — If either G6201 or G6202 is present, then the other is required.

3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Notes:

1. Use 2/G62/040 to identify dates related to the transaction.

2. Use to identify dates applicable to the MOV request and excessive quantity verification inquiries.

3. For any specific table 2 iteration use this 2/G62/040 segment as needed: 1) to identify the date when a G6201 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/G62/030 segment or 2) when the G6201 qualifier applies to all table 2 iterations but the G6202 date varies among most of them or 3) to override a date in the 1/G62/030 segment with a different date specified in the 2/G62/040 segment when the same G6201 qualifier is used in both segments, but the G6202 date is different. (Codes subject to override: 64 and CA.)

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
G6201	432	Date Qualifier Code specifying type of date. 17 Estimated Delivery Date Code Value Implementation Note: Use only for MOV requests to identify the ESD. 64 Must Respond By Code Value Implementation Note: Use to indicate the response due date. CA Cutoff Date Code Value Implementation Note: Use only for MOV requests to identify the last date of record against which the open orders were obtained from the supply source's records.	C	ID	2/2
Required	G6202	373 Date Date (YYMMDD).	C	DT	6/6

²¹ Express all dollar values in thousands.

²² Express all dollar values in thousands.

10 LOGISTICS REASSIGNMENT

10.1 GENERAL

This chapter provides procedures designed to ensure successful LR of both consumable and nonconsumable items, provide adequate management control of items in a transitional situation, assure uninterrupted supply support of items during the transition period.

To facilitate the comprehension of this chapter, the LR process has been divided into three periods of time based upon the ETD. These periods are identified as pre-ETD, ETD, and post-ETD. The pre-ETD period commences on the date the GIM assignment/ETD is disseminated to the GIM/LIM and terminates at ETD. The ETD is the date of the LR. Although the ETD is a specific point in time, for the purpose of this manual, any actions involving data requirements that reflect conditions as of the ETD will be discussed as if such actions took place on the ETD, even though they may have been taken immediately before or after the actual ETD. The post-ETD period begins immediately following the ETD and includes all actions that do not specifically involve data requirements that reflect conditions as of the ETD. The specific events required to take place during the LR are delineated under the appropriate period.

The LIM will use the TS 536 IC - LR Management Data (appendix 10A) to provide the GIM with general management information, backorder and demand data, onhand data, due-in data, contract history data, and PQDR history data for consumable assets being logistically reassigned.

The LIM will use the TS 846 IC - LR Transfer/Decapitalization (appendix 10B) to notify the GIM of the transfer and decapitalization quantities for the item being logistically reassigned. The GIM will use the TS 846 IC - LR Transfer/Decapitalization to inquire for LR transfer/decapitalization quantities when none was received.

The LIM will use the TS 846 IC - LR Storage Ownership Transfer Order/Reply (appendix 10C) to issue an LR storage ownership transfer order to the distribution depot to notify them to transfer ownership of wholesale stocks to the GIM and of the quantity which the LIM is retaining. Distribution depots use to send the TS 846 IC - LR Storage Ownership Transfer Reply to the LIM to notify the LIM of the quantities actually transferred to GIM ownership and those retained in LIM ownership.

10.2 POLICY

DoD policy for LR of consumable items is contained in DoD 4140.26-M. DoD policy for LR of nonconsumable items is contained in AMC-R 700-99 et. al..

10.3 REQUIREMENTS

The LIM, GIM, and distribution depots will effect the actions required by this manual to reassign asset management to the GIM in a timely manner to assure uninterrupted supply support. Resolution of problems affecting supply operation requires direct communication, coordination and assistance.

The GIM will accept, as of the ETD, those items and book balances submitted by the LIM. (The following policy covering transfer of assets for LR is implemented from DoD 4140.26-M and AMC-R 700-99 et al., respectively.) The LIM will transfer all onhand wholesale balances, in place, except:

- Assets committed to the support of special projects, programs, and/or plans including the ILP, e.g., staged shipments, packaged shipments. Onhand wholesale assets in support of the ILP will not be transferred to the GIM nor will any ongoing procurement action in support of the ILP be terminated.
- Consumable assets in SCCs F, H, J, K, L, M, P, Q, R, S and W. (See DoD 4140.26-M for complete criteria.)
- Nonconsumable assets in SCCs G, H, J, K, L, M, P, Q, and W. SCCs H and P material will never be decapitalized. (See AMC-R 700-99 et al. for complete criteria.)

On an expedited basis the LIM will decapitalize to the GIM wholesale assets, other than the SCCs shown above, generated during the first year subsequent to the ETD. The LIM will report assets generated after 1 year of ETD under the chapter 12 material returns program procedures. Except for the decapitalization of procurement receipts, the GIM will reject assets decapitalized more than 1 year after the ETD using Reject Advice Code AW.

10.4 PRE-ETD ACTIONS

10.4.1 GENERAL

The LIM procurement office will provide the GIM with contractual status on contracts either retained by the LIM or assigned to DCMC for contract administration. Contract status includes, but is not limited to, delivery status, acceleration of delivery, follow-up status requests, contract warranty provisions, and executing appropriate modifications to basic contracts.

For nonconsumable items, the LIM will furnish the GIM listings of all purchase requests (procurement actions that have not reached the award stage) throughout the pre-ETD period. For consumable items, the LIM will furnish listings of all purchase requests to the GIM forty-five days prior to the ETD in the format established by DoD 4140.26-M. The GIM will, within 15 calendar days subsequent to the receipt of the purchase request listing from the LIM, annotate required changes and return one copy to the LIM.

The LIM will reclassify consumable assets, in SCCs Q and R, to the appropriate SCC before the LIM provides the GIM TS 536IC - LR Management Data.

For assets in Supply Condition Code H, the LIM will either forward the assets to DRMO or reclassify the item to its true condition as authorized by chapter 8.

10.4.2 ONE HUNDRED AND FIFTY DAYS PRIOR TO ETD.

One hundred and fifty days prior to ETD or upon notification if less than 150 days:

- The LIM will advise the GIM of assets being held for litigation action.
- The LIM will perform physical inventories under the chapter 7 procedures, as stated in DoD 4140.26-M for consumable items, and AMC-R 700-99 et al. for nonconsumable items, as follows:
 - For consumables, inventory stock on hand for wholesale assets designated as classified or sensitive.
 - For nonconsumables, inventory onhand wholesale assets.

10.4.3 ONE HUNDRED AND TWENTY DAYS PRIOR TO ETD

One hundred and twenty days prior to ETD or upon notification if less than 120 days, for consumable items being transferred, the LIM will furnish the GIM with TS 536 IC - LR Management Data containing backorder and demand data, onhand data, due-in data, and contract history data. Do not provide PQDR history data at this time.

10.4.4 SIXTY DAYS PRIOR TO ETD

The LIM will process excess reports received for LR items for which DRMO action is appropriate, in accordance with the chapter 12 procedures.

10.4.5 FORTY-FIVE DAYS PRIOR TO ETD

By mutual agreement between the GIM and the LIM, the LIM will initiate action to amend existing LR item contracts/purchase orders which are not reassigned to the GIM to provide for diversion of stock by quantities into distribution depots of the GIM. The GIM will provide addresses of the shipping destinations to the LIM, as appropriate. The LIM will retain the due-in.

For consumable items, the LIM will furnish listings of all purchase requests in accordance with the guidance in DOD 4140.26-M.

10.4.6 THIRTY DAYS PRIOR TO ETD

The LIM will take the following actions:

- Mail the GIM a WMR data listing sequenced by NSN and DoD component (and DODAAC within component when the requirements have been allocated), major to minor, reflecting the current computed data. Include the quantity and value of the forecasted reparable return data, if applicable; PWR; Balance War Reserves; dollar value subtotals for FSC, DODAAC if allocated, and DoD component; and grand total dollar value. Additionally, transmit a TS 830 IC - to the GIM to reflect the original input from which the WMR computed data as generated. The GIM will process TS 830 IC - to recompute the WMR data as described in chapter 4, section 4.2.
- For consumable items, furnish the GIM updated TS 536IC - LR Management Data containing backorder and demand data, onhand data, due-in data, and contract history data. Do not provide PQDR history data at this time.
- Furnish the GIM the latest status of assets being held for litigation action.

10.5 ETD PERIOD ACTION

The LIM will accomplish the following actions at ETD:

- Provide a TS 846 IC - LR Storage Transfer Order/Reply (appendix 10C) to the distribution depots which serves as a notification that wholesale stocks stored are now under the ownership of the GIM.
- Process inventory adjustments to decrease the inventory control record using the TS 947 ic - Inventory Adjustment (appendix).

- Prepare and transmit to the GIM a TS 846 IC - LR Transfer/Decapitalization (appendix 10C) by SCC and location. Telephone communication between the GIM and LIM is authorized to resolve transactions that reject from the validation process. To preclude inquiries when there are no onhand assets available for transfer, the LIM will submit a TS 846 IC - LR Transfer/Decapitalization to the GIM for a zero quantity as either a transfer or a decapitalization, based on the following:
 - LR transfers are used for permanent transfers, without reimbursement of cost, of inventory within the same fund division (the LIM has a transfer-out and the GIM has a corresponding transfer-in).
 - LR decapitalizations are used for permanent transfers, without reimbursement of cost, of inventory between different fund divisions or chartered subdivisions within the fund (the LIM has a decapitalization and the GIM has a corresponding capitalization).
- Furnish memorandum due-in information to the GIM and ARI to the distribution depot in accordance with chapter 13.
- For consumable items, furnish the GIM TS 536 IC - LR Management Data containing PQDR history data. Furnish data for completed PQDRs only and include all PQDRs completed up to 3 years prior to the ETD. Do not provide backorder and demand data, onhand data, due-in data, or contract history data at this time.
- Transfer funded backorders to the GIM in accordance with DoD 4140.26-M.
- For items with SPR, prepare and transmit TS 830 IC - SPR/LASE Status (appendix 3B) to the forecasting activity as outlined in chapter 3.
- Advise the GIM of the latest data available on assets being held for litigation action.

10.6 POST-ETD ACTIONS

10.6.1 DISTRIBUTION DEPOT ACTION

The distribution depot will prepare a TS 846 IC - LR Storage Transfer Reply within 5 working days of receipt of the LR Storage Transfer Order advising the LIM of the quantity transferred to the GIM ownership. In the event the distribution depot does not receive an LR storage ownership Transfer Order, the distribution depot will prepare and transmit to the LIM a TS 846 IC - LR Storage Transfer Order/Reply reflecting each balance by SCC.

10.6.2 GIM ACTIONS

The GIM will convert valid TS 846 IC - LR Transfer/Decapitalization received from the LIM to inventory adjustments using the TS 947IC - (appendix) Inventory Adjustment application, to establish or increase the inventory balances. (This action is not required upon receipt of an LR transfer/decapitalization with a zero quantity.) The GIM may automatically reject invalid LR transfer/decapitalization transactions. Telephone communication between the GIM and LIM is authorized to resolve LR transfer/decapitalization transactions that reject from the validation process.

The GIM will process valid memorandum due-in transactions, received from the LIM in accordance with chapter 13 procedures.

If the GIM receives a TS 846 IC - LR Transfer/Decapitalization or memorandum due-in for an item not involved in an LR, the GIM shall reject the incorrectly reported transactions back to the initiator using TS 824 IC - Reject citing Reject Advice Code AY.

The GIM, when appropriate, will furnish reconsignment instructions to the LIM for items due-in from undelivered contracts of the LIM. Reporting of receipts from these contracts subsequent to the ETD will be in accordance with chapter 14.

The GIM will accept and process reversals of TS 846 IC - LR Transfer/Decapitalization transactions, adjust their management and financial records, and discontinue processing any other transactions against the LR assets until the GIM processes new LR transfer/decapitalization transactions from the LIM.

10.6.3 LIM ACTIONS

The LIM will update the memorandum due-in and ARI in accordance with chapter 13 procedures as necessary to include the following:

- The LIM takes action to change the destination of undelivered purchases upon request of the GIM.
- The LIM makes an award for an unawarded purchase request.

The LIM will enter litigation proceedings on all items in SCC L which are either on hand at ETD or subsequently received by either the GIM or LIM on LIM negotiated contracts. The LIM will notify the GIM of actions being taken to resolve the litigation actions.

10.6.3.1 LIM PROCESSING OF TS 846 IC - LR STORAGE TRANSFER/ORDER REPLY

Upon receipt of the LR storage transfer reply, the LIM will review the quantity. When the transfer quantity in the reply is greater than the transfer quantity reflected in the order the LIM will take action to transfer/decapitalize the additional quantity to the GIM on a new LR transfer/decapitalization transaction. When the transfer quantity in the reply is less than the transfer quantity in the order, the LIM shall:

- Within 24 hours of receipt of the reply, initiate action to reverse the TS 846 IC - LR Transfer/Decapitalization, previously submitted for that location and SCC, by the difference between the LR storage transfer order and reply transfer quantities.
- Conduct research, and/or request a special inventory when deemed appropriate.
- Determine whether the quantity reported by the distribution depot is correct (based on the best data available after research/inventory). If research reveals that the quantity reported was not correct the LIM will process a partial reversal, or TS 846 - IC LR Transfer/Decapitalization transaction and TS 846 IC - LR Storage Transfer Order/Reply, as needed.
- The LIM shall complete these actions within 30 calendar days after the ETD to prevent a long time lag between the ETD and corrective action. If extenuating circumstances

prevent an LIM from accomplishing this task within 30 calendar days, the LIM shall notify the GIM of the problem and expected date when the problem should be resolved (not to exceed 60 calendar days past the ETD).

If the TS 846 IC - LR Storage Transfer Order/Reply contains a transferable quantity on an item for which the LIM provided a LR Transfer/Decapitalization transaction with a zero balance, the LIM shall provide an LR Storage Transfer Order/Reply to the distribution depot and a new TS 846 IC - LR Transfer Decapitalization to the GIM reflecting the appropriate quantity, SCC, and location; in this situation, the LIM will not prepare a TS 846 IC - LR Transfer/Decapitalization reversal.

10.6.3.2 NINETY DAYS AFTER ETD

For consumable items, the LIM will furnish the GIM updated TS 536 IC - LR Management Data containing contract history and PQDR history data. Furnish data for PQDRs completed between the ETD and the ETD plus 90 days only. Do not provide backorder and demand, onhand, or due-in data at this time.

10.6.3.3 ONE HUNDRED AND EIGHTY DAYS AFTER ETD

For consumable items, the LIM will furnish the GIM updated TS 536 IC - LR Management Data containing PQDR history data. Furnish data for PQDRs completed between the ETD plus ninety days and the ETD plus 180 days only. Do not provide backorder and demand, onhand, due-in, or contract history data at this time.

10.6.3.4 TWO HUNDRED AND SEVENTY DAYS AFTER ETD

For consumable items, the LIM will furnish the GIM updated TS 536 IC - LR Management Data containing contract history and PQDR history data. Furnish data for PQDRs completed between the ETD plus 180 days and the ETD plus 270 days only. Do not provide backorder and demand, onhand, or due-in data at this time.

10.7 RECEIPT PROCESSING AFTER ETD

Distribution depots will process receipts after the ETD in accordance with the procedures in chapter 14.

10.7.1 LIM PROCESSING OF RECEIPTS AFTER ETD

When the LIM receives a receipt transaction from the distribution depot for an item that was logistically reassigned, the LIM will:

- Process the receipt to reduce the due-in record, record the assets on the LIM owner record.
- Decrease the LIM owner record using the TS 947 IC - Inventory Adjustment in accordance with chapter 8.
- Transmit a TS 846 IC - LR Transfer/Decapitalization to the GIM in accordance with section 10.5 and include in it the transaction number or contract number (and related data: CLIN, ELIN and call or order number) from the associated receipt transaction to establish an audit trail between the receipt and its subsequent transfer/ decapitalization.

- Transmit a TS 846 IC - LR Storage Transfer Order/Reply to the distribution depot in accordance with section 10.5.
- Process receipts for which litigation is required in accordance with chapter 14, section 14.2.7.

10.7.2 GIM PROCESSING OF RECEIPTS AFTER ETD

The GIM will:

- Use a TS 846 IC - LR Transfer/Decapitalization to record the assets on the GIM owner record and to reduce the memorandum due-in record in accordance with chapter 14, section 14.2.7.
- If a TS 846 IC - LR Transfer/Decapitalization is received for an item not involved in an LR, the GIM shall reject the transaction back to the initiator using TS 824IC - Reject citing Reject Advice Code AY.

10.8 INQUIRY FOR LOGISTICS REASSIGNMENT ASSET DATA AND RESPONSE

The GIM will transmit an inquiry to the LIM, using a TS 846 IC - LR Transfer/Decapitalization, for all assets logistically reassigned for which they received no TS 846 IC - LR Transfer/Decapitalization transaction.

In response, the LIM will generate the necessary TS 846 IC LR Transfer/Decapitalization or a duplicate thereof.

10.9 DUE-IN VALIDATION

See chapter 13, section 13.7, for due-in inquiry and reconciliation procedures.

APPENDIX 10A

TRANSACTION SET 536 IMPLEMENTATION CONVENTION LOGISTICS REASSIGNMENT MANAGEMENT DATA

536 Logistics Reassignment

This Draft Standard for Trial Use contains the format and establishes the data contents of the Logistics Reassignment Transaction Set for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set is used to provide information necessary to transfer management responsibility between an old and new managing organization. This transaction set may be used to convey a description and quantity of the transferred material, specific inventory locations, product quality information, technical data, open contract information, demand data, procurement history, and other information necessary for the new managing organization to evaluate and meet the material needs of customers.

Implementation Notes

1. LIMs use this transaction set to provide the GIM with general management information, backorder and demand data, onhand data, due-in data, contract history data, and PQDR history data in conjunction with the transfer of inventory management responsibility during logistics reassignment.
2. Use a single occurrence of this transaction set to transmit logistics reassignment management data to one or more GIMs. Use one occurrence of this transaction set to transmit a single or multiple transactions.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 536 X12.243 Logistics Reassignment	M	ID	3/3

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	--	---	----	-----

Segment: BR Beginning Segment for Material Management
Level: Header
Loop: ____
Mandatory **Usage:** Mandatory
Max Use: 1
Purpose: To indicate the beginning of a material management transaction and to transmit identifying numbers and dates
Syntax: 1. C0504 — If BR05 is present, then BR04 is required.
2. P0708 — If either BR07 or BR08 is present, then the other is required.
3. P1011 — If either BR10 or BR11 is present, then the other is required.
Semantic: 1. BR03 is the date of the transaction set preparation.
2. BR09 is the time of the transaction set preparation

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	BR01	353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M	ID	2/2
Mandatory	BR02	640	Transaction Type Code Code specifying the type of transaction. LR Logistics Reassignment Code Value Implementation Note: <i>Use to indicate this transaction set provides logistics reassignment management information.</i>	M	ID	2/2
Mandatory	BR03	373	Date Date (YYMMDD).	M	DT	6/6
			Implementation Note: <i>Express the originating activity's date in GMT.</i>			
Not Used	BR04	67	Identification Code	C	AN	2/20
Not Used	BR05	66	Identification Code Qualifier	O	ID	1/2
Not Used	BR06	306	Action Code	O	ID	1/2
Not Used	BR07	128	Reference Number Qualifier	C	ID	2/2
Not Used	BR08	127	Reference Number	C	AN	1/30

Required	BR09 337 Time	O TM 4/8
	Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	

Implementation Notes:

1. Express the originating activity's time in GMT.
2. Express time in a four-position (HHMM) format.

Not Used	BR10 128 Reference Number Qualifier	C ID 2/2
Not Used	BR11 127 Reference Number	C AN 1/30

Optional

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** 20

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/050 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/170 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. The code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ/060 that does not apply to all the table 2 iterations. (Code subject to override : 0.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2

Not Used

LM02	822	Source Subqualifier	O	AN	1/15
------	-----	----------------------------	---	----	------

Mandatory

Segment: LQ Industry Code
Level: Header
Loop: LM
Usage: Mandatory
Max Use: 100
Purpose: Code to transmit standard industry codes
Syntax: C0102 — If LQ01 is present, then LQ02 is required.

Implementation Note:

Use to identify codes, as appropriate, consistent with management information requirements.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Required	LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list 0 Document Identification Code	O	ID	1/3
Required	LQ02	1271	Industry Code Code indicating a code from a specific industry code list	C	AN	1/20

Required

Segment: N1 Name
Level: Header
Loop: N1 **Repeat:** 20
Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/070 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/070 loop to indicate an organization when an N101 qualifier code (e.g., ZP) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/190 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/070 that does not apply to all the table 2 iterations. (Codes subject to override: ZP.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual ZN Losing Inventory Manager ZP Gaining Inventory Manager	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:

Must used codes FR and TO in conjunction with the appropriate 1/N101/070 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: G61 Contact

Level: Header

Loop: N1

Usage: Optional

Max Use: 10

Purpose: To identify a person or office to whom communications should be directed

Syntax: P0304 — If either G6103 or G6104 is present, then the other is required.

Comment: G6103 qualifies G6104.

Implementation Notes:

1. Use as needed in the 1/N1/070 From loop only to identify the LIM point of contact when direct communications are required.
2. Use multiple repetitions to identify the POC and multiple communication numbers. When using multiple repetitions to identify different communication numbers for a single POC, repeat the name cited in G6102.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
G6101	366	Contact Function Code Code identifying the major duty or responsibility of the person or group named. MG Manager Code Value Implementation Note: Use to identify the LIM point of contact.	M ID 2/2

Mandatory

G6102	93	Name Free-form name.	M AN 1/35
-------	----	--------------------------------	-----------

Implementation Note:
Provide the last name, first name, middle initial, and rate/rank/title, as needed, of the individual named as POC. Include blank spaces between name components and periods after initials. Do not include NMN when a middle initial is not available.

Required

G6103	365	Communication Number Qualifier Code identifying the type of communication number. Implementation Notes: 1. Use to identify the preferred method of communication in the first repetition. Use additional repetitions when identifying alternate communication methods. 2. Do not include blank spaces or dashes between numbers. AU Defense Switched Network Code Value Implementation Note: Use to identify the DSN telephone number. EM Electronic Mail FT Federal Telecommunications System (FTS) Code Value Implementation Note: Use to identify the FTS telephone number. FX Facsimile	C ID 2/2
-------	-----	---	----------

Code Value Implementation Note:

Use to identify the facsimile DSN telephone number.

IT International Telephone

Code Value Implementation Note:

Include country and city code as needed.

TE Telephone

Code Value Implementation Note:

Use to identify the commercial telephone number. Include the area code and number.

TL Telex

TX TWX

Required

G6104 364 Communication Number C AN 1/80
Complete communications number including country or area code when applicable.

Optional

G6105 443 Contact Inquiry Reference O AN 1/20
Additional reference number or description to clarify a contact number.

Implementation Note:

Use to indicate the office symbol or activity code for the party identified.

Mandatory

Segment: HL Hierarchical Level

Level: Detail

Loop: HL **Repeat:** >1

Usage: Mandatory

Max Use: 1

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments.

Comments: 1. The HL Segment is used to identify levels of detail information using a Hierarchical Structure, such as relating line item data to shipment data, and packaging data to line item data.

2. The HL segment defines a top-down/left-right ordered structure.

3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment, and would be incremented by one in each subsequent HL segment within the transaction.

4. HL02 identifies the Hierarchical ID Number of the HL segment to which the current HL segment is subordinate.

5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order or item level information.

6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

Implementation Notes:

1. The transaction set hierarchical data structure is general management and material description information (product description) followed by subordinate backorder and demand (quantity), onhand inventory (item), due-in resources (order), historical contract (contract), and product quality deficiency report (quality characteristics) information loops. The product quality deficiency report loop is followed by subordinate PQDR complaint (line detail) loops.

2. Use a single 2/HL/010 product description loop iteration to identify each item of supply (e.g., NSN) for which subsequent logistics reassignment information is furnished.

3. Use a single 2/HL/010 quantity loop, as needed, for each 2/HL/010 product description loop to identify backorder and demand quantities associated with each NSN undergoing logistics reassignment.

4. Use multiple 2/HL/010 item loops, as needed, for each 2/HL/010 product description loop to identify the onhand quantity information associated with each NSN undergoing logistics reassignment.

5. Use multiple 2/HL/010 order loops, as needed, for each 2/HL/010 product description loop to identify due-in quantity information associated with each NSN undergoing logistics reassignment.

6. Use up to 25 2/HL/010 contract loops, as needed, for each 2/HL/010 product description loop to identify contract history information associated with each NSN undergoing logistics reassignment.

7. Use multiple 2/HL/010 quality characteristics loops, as needed, for each 2/HL/010 product description loop to identify the summary contents of PQDRs associated with each NSN undergoing logistics reassignment.

8. Use multiple 2/HL/010 line detail loops, as needed, for each quality characteristics loop to identify each complaint cited on each PQDR.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	HL01	628	Hierarchical ID Number A unique number assigned by the sender to identify a particular data segment in a hierarchical structure.	M AN 1/12
			Implementation Note: In the first 2/HL/010 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.	
Optional	HL02	734	Hierarchical Parent ID Number Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to.	O AN 1/12
			Implementation Notes: 1. Use in every 2/HL/010 quantity, item, order, contract, and quality characteristics loop iteration to identify the product description loop with which the current loop is associated. Data element content is the sequential number assigned to the 2/HL/010 product description loop iteration and serves as the cross-reference between the item of supply and all other information provided in the transaction set. 2. Use in every 2/HL/010 line detail loop iteration to identify the quality characteristics loop with which the current loop is associated. Data element content is the sequential number assigned to the applicable 2/HL/010 quality characteristics loop iteration and serves as the cross-reference between the PQDR and the various complaints cited in the PQDR.	
Mandatory	HL03	735	Hierarchical Level Code Code defining the characteristic of a level in a hierarchical structure.	M ID 1/2
			9 Line Detail Code Value Implementation Note: Use to identify the individual complaints for each PQDR.	
			D Product Description Code Value Implementation Note: Use to identify the individual item of supply (e.g., NSN) and all general management/descriptive information.	
			G Quality Characteristics Code Value Implementation Note: Use to identify the individual completed PQDRs associated with the item of supply.	
			I Item Code Value Implementation Note: Use to identify the onhand asset data stratified by storage location, ownership, and material condition for the item of supply.	
			IB Contract Code Value Implementation Note: Use to identify contract history data for the item of supply.	
			O Order	

Code Value Implementation Note:

Use to identify the due-in asset data stratified by storage location, type of due-in, and date due for the item of supply.

R Quantity

Code Value Implementation Note:

Use to identify the backorder and demand data for the item of supply.

Not Used

HL04 736 Hierarchical Child Code

O ID 1/1

Optional

Segment: LIN Item Identification

Level: Detail

Loop: HL

Usage: Optional

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Notes:

1. Use in every 2/HL/010 product description loop.
2. Must use in every 2/HL/010 product description loop to identify the item of supply.
3. Use data element 235/234 pairs to identify data pertinent to the transaction. Unless otherwise specified, the multiple codes listed for a single qualifier data element identify the range of possible data requirements. When needed, use the next available combination of data element 235/234 pairs to provide the necessary data.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

Not Used	LIN01	350	Assigned Identification	O	AN	1/11
Mandatory	LIN02	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	M	ID	2/2
Implementation Notes:						
1. Use codes EQ, F7, MN, or SW only during review periods 1 and 2.						
2. Use only one of codes EQ, F7, MN, or SW to describe the end item application associated with the item of supply.						
3. Use up to five repetitions of the data element 235/234 pairs to describe multiple end item applications for the item of supply. Cite applications in descending order of critical priority.						
EQ Equipment Type						
Code Value Implementation Note:						
Use as needed to identify the end item type associated with the item of supply.						
F7 End-Item Description						
Code Value Implementation Note:						
Use as needed to identify the end item name associated with the item of supply.						
FS National Stock Number						
MN Model Number						
Code Value Implementation Note:						
Use as needed to identify the end item model number associated with the item of supply.						
SW Stock Number						
Code Value Implementation Note:						
Use as needed to identify the end item NSN associated with the item of supply.						
Mandatory	LIN03	234	Product/Service ID Identifying number for a product or service.	M	AN	1/40
Conditional	LIN04	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Conditional	LIN05	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Conditional	LIN06	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Conditional	LIN07	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Conditional	LIN08	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2
Conditional	LIN09	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40
Conditional	LIN10	235	Product/Service ID Qualifier Code identifying the type/source of the descriptive number used in Product/Service ID (234).	C	ID	2/2

Conditional	LIN11	234	Product/Service ID Identifying number for a product or service.	C	AN	1/40

Optional

Segment: CS Contract Summary

Level: Detail

Loop: HL

Usage: Optional

Max Use: 1

Purpose: To provide information about a contract

Syntax: **P0405** — If either CS04 or CS05 is present, then the other is required.

Semantic:

1. CS09 is the permissible overage as a percentage of the total contract line item number (CLIN) quantity.
2. CS10 is the permissible shortage as a percentage of the total contract line item number (CLIN) quantity.
3. CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.
4. CS14 is the Unit of Measure stipulated in the contract.
5. CS15 is the contract line item number (CLIN) unit price specified in the contract.
6. CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract. A "N" indicates that no Critical Application Indicator is specified in the contract.
7. CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract. A "N" indicates that no Special Requirements Indicator is specified in the contract.

Comments:

1. CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).
2. CS07 and CS13 (DE 560) can be used to indicate two different types of special services required.

Implementation Notes:

1. Use as needed in the 2/HL/010 product description loop to identify the place of inspection established for the item of supply.
2. Use in every 2/HL/010 contract loop to identify historical contract information for the item of supply.
3. Use in every 2/HL/010 quality characteristics loop to identify PQDR contract information for the item of supply.

Data Element Summary

Optional

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
CS01	367	Contract Number Contract number.	O AN 1/30

Implementation Note:

Use in every 2/HL/010 contract and quality characteristics loop to identify the contract number.

Not Used	CS02	327	Change Order Sequence Number	O	AN	1/8
Optional	CS03	328	Release Number Number identifying a release against a Purchase Order previously placed by the parties involved in the transaction.	O	AN	1/30
Implementation Note: Use as needed in the 2/HL/010 contract loop to identify the call or order number, or the call or order number including the respective call or order modification, as applicable.						
Conditional	CS04	128	Reference Number Qualifier Code qualifying the Reference Number.	C	ID	2/2
C7 Contract Line Item Number						
Code Value Implementation Note: Use in every 2/HL/010 contract loop to identify the line item number consisting of the CLIN, or the CLIN including the respective SUBCLIN, as applicable.						
Conditional	CS05	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Not Used	CS06	324	Purchase Order Number	O	AN	1/22
Not Used	CS07	560	Special Services Code	O	ID	2/10
Not Used	CS08	433	F.O.B. Point Code	O	ID	2/2
Optional	CS09	954	Percent Percentage expressed as a decimal	O	R	1/10
Implementation Note: Use as needed in the 2/HL/010 contract loop to identify the percentage of positive quantity variance permitted.						
Optional	CS10	954	Percent Percentage expressed as a decimal	O	R	1/10
Implementation Note: Use as needed in the 2/HL/010 contract loop to identify the percentage of negative quantity variance permitted.						
Not Used	CS11	782	Monetary Amount	O	R	1/15
Not Used	CS12	336	Terms Type Code	O	ID	2/2
Optional	CS13	560	Special Services Code Code identifying the special service.	O	ID	2/10
Implementation Note: Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify the inspection location; otherwise, do not use.						
IM Inspect at Destination						
Code Value Implementation Note: Use to indicate that inspection will take place at destination.						
IO Inspect at Origin						
Code Value Implementation Note: Use to indicate that inspection will take place at origin.						

Optional	CS14	355	Unit or Basis for Measurement Code	O	ID	2/2
			Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken			
			Implementation Note:			
			<i>Use in every 2/HL/010 contract loop to identify the contract unit of issue. (See the unit of issue conversion table in volume 1, chapter 10.)</i>			
Not Used	CS15	212	Unit Price	O	R	1/17
Not Used	CS16	336	Terms Type Code	O	ID	2/2
Not Used	CS17	1073	Yes/No Condition or Response Code	O	ID	1/1
Not Used	CS18	1073	Yes/No Condition or Response Code	O	ID	1/1

Optional

Segment: QTY Quantity**Level:** Detail**Loop:** HL**Usage:** Optional**Max Use:** >1**Purpose:** To specify quantity information.**Implementation Notes:**

1. Use as needed in the 2/HL/010 product description loop to identify the total number of resources available (onhand and on order) for the item of supply.
2. Use multiple repetitions in the 2/HL/010 quantity loop to identify demand and backorder data for the item of supply.
3. Use in the 2/HL/010 item loop, in conjunction with the 2/LM/170 and 2/N1/190 loops, to stratify the onhand inventory quantity (QTY01 code 17) by material condition, ownership/purpose, and storage location.
4. Use in the 2/HL/010 order loop, in conjunction with 2/G62/080, and the 2/LM/170 and 2/N1/190 loops, to stratify the due-in inventory quantity (QTY01 code 63) by due date, storage location, and type of due-in.
5. Use in every 2/HL/010 contract loop to identify the contract quantity (QTY01 code YX) for the item of supply.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
QTY01	673	Quantity Qualifier Code specifying the type of quantity.	M ID 2/2
		17 Quantity on Hand	
		Code Value Implementation Note: Use in every 2/HL/010 item loop to identify the on hand wholesale inventory.	
		63 On Order Quantity	
		Code Value Implementation Note: Use in every 2/HL/010 order loop to identify the wholesale due-in inventory.	
		BA Due-In	
		Code Value Implementation Note: Use in the first 2/HL/010 order loop only to identify the total due-in wholesale inventory quantity without regard to due date, receiving storage location or type of due-in.	
		BQ Backorder Quantity	
		Code Value Implementation Note: Use as needed in the 2/HL/010 quantity loop to identify the total backorder quantity.	
		XA Total of Issuable Assets	
		Code Value Implementation Note: Use in the first 2/HL/010 item loop only to identify the total on hand wholesale assets without regard to ownership/purpose or storage location.	
		XG On Hand and Due-In	
		Code Value Implementation Note: Use in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify the total number of onhand plus on order wholesale inventory assets; otherwise, do not use.	

XJ Other War Reserve Material Requirements Protectable (OWRMRP) Quantity

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the OWRMRP quantity.

XZ Backorder Lines

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the number of backorder requisitions.

YA Total Demand Quantity

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the total recurring plus nonrecurring demand quantities for the past four quarters.

YB Total Demand Orders

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the total recurring plus nonrecurring demand frequencies for the past four quarters.

YC First Quarter Recurring Demand

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly recurring demand quantity.

YD First Quarter Recurring Orders

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly recurring demand frequency.

YE First Quarter Non-recurring Demand

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly nonrecurring demand quantity.

YF First Quarter Non-recurring Orders

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly nonrecurring demand frequency.

YG Second Quarter Recurring Demand

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly recurring demand quantity.

YH Second Quarter Recurring Orders

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly recurring demand frequency.

YJ Second Quarter Non-recurring Demand

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly nonrecurring demand quantity.

YK Second Quarter Non-recurring Orders

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly nonrecurring demand frequency.

YL Third Quarter Recurring Demand

Code Value Implementation Note:

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly recurring demand quantity.

YM Third Quarter Recurring Orders**Code Value Implementation Note:**

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly recurring demand frequency.

YN Third Quarter Non-recurring Demand**Code Value Implementation Note:**

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly nonrecurring demand quantity.

YP Third Quarter Non-recurring Orders**Code Value Implementation Note:**

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly nonrecurring demand frequency.

YQ Fourth Quarter Recurring Demand**Code Value Implementation Note:**

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly recurring demand quantity.

YR Fourth Quarter Recurring Orders**Code Value Implementation Note:**

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly recurring demand frequency.

YS Fourth Quarter Non-recurring Demand**Code Value Implementation Note:**

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly nonrecurring demand quantity.

YT Fourth Quarter Non-recurring Orders**Code Value Implementation Note:**

Use as needed in the 2/HL/010 quantity loop to identify the appropriate quarterly nonrecurring demand frequency.

YW Reorder Point Quantity**Code Value Implementation Note:**

Use as needed in the 2/HL/010 quantity loop to identify the computed reorder point quantity.

YX Contract Line Item Quantity**Code Value Implementation Note:**

Use as needed in the 2/HL/010 contract loop to identify the total quantity delivered on the CLIN/SUBCLIN.

Mandatory	QTY02	380	Quantity Numeric value of quantity.	M	R	1/15
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID	2/2

Optional

Segment: RCD Receiving Conditions

Level: Detail

Loop: HL

Usage: Optional

Max Use: 1

Purpose: To report receiving conditions and specify contested quantities

Syntax: 1. R020406 — At least one of RCD02, RCD04 or RCD06 is required.

2. P0203 — If either RCD02 or RCD03 is present, then the other is required.

3. P0405 — If either RCD04 or RCD05 is present, then the other is required.

4. P060708 — If either RCD06, RCD07 or RCD08 are present, then the others are required.

5. P091011 — If either RCD09, RCD10 or RCD11 are present, then the others are required.

6. P121314 — If either RCD12, RCD13 or RCD14 are present, then the others are required.

7. P151617 — If either RCD15, RCD16 or RCD17 are present, then the others are required.

8. P181920 — If either RCD18, RCD19 or RCD20 are present, then the others are required.

Semantic: 1. RCD01 is the receiving advice line item identification.

2. RCD21 is the cumulative quantity of goods received for a specific time period.

Comments: 1. See the Data Dictionary for a complete list of receiving condition ID's.

2. RCD06 through RCD20 provide for five (5) different quantities whose condition upon receipt is under question.

Implementation Note:

Use in every 2/HL/010 quality characteristics loop only to identify quantity information associated with each PQDR.

Data Element Summary

Not Used

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
RCD01	350	Assigned Identification	O	AN	1/11
RCD02	663	Quantity Units Received or Accepted Number of Units Received or Accepted	C	R	1/9

Implementation Note:

Use to identify the total quantity received as reported on the PQDR. Express as a whole number with no decimal. For example, if the quantity received was 20, cite only 20.

Required	RCD03	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	C	ID	2/2
<i>Implementation Note:</i> See the unit of issue conversion table in volume 1, chapter 10.						
Not Used	RCD04	664	Quantity Units Returned	C	R	1/9
Not Used	RCD05	355	Unit or Basis for Measurement Code	C	ID	2/2
Required	RCD06	667	Quantity in Question Number of units contested because of physical condition or status of units.	C	R	1/9
<i>Implementation Note:</i> Use to identify the total quantity reported as deficient. Express as a whole number with no decimal. For example if the quantity is 20, cite only 20.						
Required	RCD07	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken	C	ID	2/2
<i>Implementation Note:</i> Use to identify the unit of issue for the deficient material. (See the unit of issue conversion table in volume 1, chapter 10.)						
Required	RCD08	412	Receiving Condition Code Code designating physical condition or status of units received in a specific shipment. 04 Quality Problem	C	ID	2/2
Not Used	RCD09	667	Quantity in Question	C	R	1/9
Not Used	RCD10	355	Unit or Basis for Measurement Code	C	ID	2/2
Not Used	RCD11	412	Receiving Condition Code	C	ID	2/2
Not Used	RCD12	667	Quantity in Question	C	R	1/9
Not Used	RCD13	355	Unit or Basis for Measurement Code	C	ID	2/2
Not Used	RCD14	412	Receiving Condition Code	C	ID	2/2

Not Used	RCD18	667	Quantity in Question	C	R	1/9
Not Used	RCD19	355	Unit or Basis for Measurement Code	C	ID	2/2
Not Used	RCD20	412	Receiving Condition Code	C	ID	2/2
Not Used	RCD21	380	Quantity	O	R	1/15

Optional

Segment: N9 Reference Number

Level: Detail

Loop: HL

Usage: Optional

Max Use: >1

Purpose: To transmit identifying numbers and descriptive information as specified by the reference number qualifier

Syntax: 1. R0203 — At least one of N902 or N903 is required.
2. C0605 — If N906 is present, then N905 is required.

Semantic: N906 reflects the time zone which the time reflects.

Implementation Notes:

1. Use as needed in the 2/HL/010 product description loop to identify general logistics reassignment information associated with the item of supply.
2. Use in every 2/HL/010 contract loop to identify the material ordered.
3. Use in every 2/HL/010 quality characteristics loop to identify the control numbers associated with the PQDR.
4. Use with every 2/HL/010 line detail loop to distinguish between complaints cited on each PQDR.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
N901	128	Reference Number Qualifier Code qualifying the Reference Number.	M	ID	2/2

Implementation Note:

Use only one of codes MF or ZM in every 2/HL/010 contract loop to identify the manufacturer's part or reference number for the material supplied.

55 Sequence Number

Code Value Implementation Note:

Use in every 2/HL/010 line detail loop to identify the complaint sequence number for each complaint cited on the PQDR. In the first 2/HL/010 line detail loop iteration, cite numeric 1. In each subsequent 2/HL/010 loop iteration, increase incrementally by 1.

MF Manufacturers Part Number

Code Value Implementation Note:

Use in the 2/HL/010 contract loop to identify the manufacturer's part or reference number being supplied.

NZ Critical Application

Code Value Implementation Note:

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to indicate that the item has a critical application as defined by DLAR 3200.1, et al; otherwise, do not use. Cite one of the following codes in N902, as appropriate:

- 1 - Item is essential to a weapon system.
- 2 - Item is essential to the preservation of life in emergencies.
- 3 - Item is essential to the safety of operating personnel.

QR Quality Report Number

Code Value Implementation Note:

Use in every 2/HL/010 quality characteristics loop, to identify the PQDR report control number assigned by the originator.

TP Test Specification Number

Code Value Implementation Note:

Use as needed in the 2/HL/010 product description loop only for review periods 1 and 2, to identify the first article testing requirement for the item of supply; otherwise, do not use. Cite one of the following codes in N902, as appropriate:

U - Undetermined.

Y - First article testing is required.

N - First article testing is not required.

WC Contract Option Number

Code Value Implementation Note:

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify the number of option years available, past the current expiration date for the term or requirement contract identified in 2/CON/070; otherwise, do not use. Express N902 as a whole number beginning with 0 (e.g., 0 indicating that no contract extension is possible, 1 indicating a one year extension).

Required	N902	127	Reference Number	C	AN	1/30
			Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.			
Not Used	N903	369	Free-form Description	C	AN	1/45
Not Used	N904	373	Date	O	DT	6/6
Not Used	N905	337	Time	C	TM	4/8
Not Used	N906	623	Time Code	O	ID	2/2

Optional

Segment: CON Contract Number Detail

Level: Detail

Loop: HL

Usage: Optional

Max Use: >1

Purpose: To specify contract or reference number and status.

Implementation Note:

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify any current term or requirement contract number that is available for placement of stock replenishment and or direct delivery orders for requisitioners; otherwise, do not use.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	CON01	128	Reference Number Qualifier Code qualifying the Reference Number. CT Contract Number Code Value Implementation Note: <i>Use to identify the term or requirements contract number.</i>	M	ID	2/2
Mandatory	CON02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	M	AN	1/30
Mandatory	CON03	846	Contract Status Code Code designating the current status of the contract. VA Valid Open Contract	M	ID	2/2

Optional

Segment: G62 Date/Time

Level: Detail

Loop: HL

Usage: Optional

Max Use: 50

Purpose: To specify pertinent dates and times

- Syntax:**
1. R0103 — At least one of G6201 or G6203 is required.
 2. P0102 — If either G6201 or G6202 is present, then the other is required.
 3. P0304 — If either G6203 or G6204 is present, then the other is required.

Implementation Notes:

1. Use multiple repetitions as needed in the 2/HL/010 product description loop to identify unique general management dates associated with the item of supply.
2. Use in the 2/HL/010 order loop in conjunction with 2/G62/080, and the 2/LM/170 and 2/N1/190 loops, to stratify the due-in inventory quantity by due date, storage location, and type of due-in.
3. Use multiple repetitions in every 2/HL/010 contract loop to identify date information related to contract history for the item of supply.
4. Use in every 2/HL/010 quality characteristics loop to identify dates associated with a PQDR.

Data Element Summary

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
G6201	432	Date Qualifier Code specifying type of date.	C	ID	2/2
		02 Delivery Requested on This Date			
		Code Value Implementation Note: Use in every 2/HL/010 contract loop to identify the original CLIN delivery date.			
		11 Shipped on This Date			
		Code Value Implementation Note: Use in every 2/HL/010 contract loop to identify the date the last shipment was made.			
		17 Estimated Delivery Date			
		Code Value Implementation Note: Use in every 2/HL/010 order loop to identify the due-in date for the due-in quantity reported.			
		36 Expiration Date			
		Code Value Implementation Note: Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify the expiration date of the term or requirement contract cited in 2/CON/070; otherwise, do not use.			
		40 Original Purchase Order Date			
		Code Value Implementation Note: Use in every 2/HL/010 contract loop to identify the date of contract award.			
		BM Contract Physically Completed			

Code Value Implementation Note:

Use as needed in the 2/HL/010 contract loop to indicate the physical completion of the contract.

BS Product Receipt Date

Code Value Implementation Note:

Use in every 2/HL/010 contract loop to indicate the last receipt date.

BX Action

Code Value Implementation Note:

Use in every 2/HL/010 quality characteristics loop to identify the closing date of the PQDR investigation.

CA Cutoff Date

Code Value Implementation Note:

Use in every 2/HL/010 product description loop to identify the extract date of logistics reassignment data from LIMs' files.

LA Last Acquisition

Code Value Implementation Note:

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify the most recent purchase request date; otherwise, do not use.

LD Last Demand

Code Value Implementation Note:

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2; to identify the most recently recorded demand date; otherwise, do not use.

Required	G6202	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	G6203	176	Time Qualifier	C	ID	1/2
Not Used	G6204	337	Time	C	TM	4/8
Not Used	G6205	623	Time Code	O	ID	2/2
Not Used	G6206	624	Century	O	NO	2/2

Optional	Segment: CTP Pricing Information		
	Level: Detail		
	Loop: HL		
	Usage: Optional		
	Max Use: 10		
	Purpose: To specify pricing information		
	Syntax: 1. P0405 — If either CTP04 or CTP05 is present, then the other is required.		
	2. C0607 — If CTP06 is present, then CTP07 is required.		
	3. C0902 — If CTP09 is present, then CTP02 is required.		
	4. C1002 — If CTP10 is present, then CTP02 is required.		
	Semantic: 1. CTP07 is a multiplier factor to arrive at a final discounted price. A multiplier of .90 would be the factor if a 10% discount is given.		
	2. CTP08 is the rebate amount.		
	Comments: 1. See Figures Appendix for an example detailing the use of CTP03 and CTP04.		
	2. See Figures Appendix for an example detailing the use of CTP03, CTP04 and CTP07		

Implementation Note:

Use in every 2/HL/010 contract loop to identify the CLIN unit price from the award.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	CTP01	687	Class of Trade Code	O	ID	2/2
Required	CTP02	236	Price Identifier Code	C	ID	3/3
			Code identifying pricing specification.			
		ACT	Actual			
		EST	Estimated Price			
		FCH	Flat Charge			
		Code Value Implementation Note:				
		Use to indicate that the item of supply is not separately priced.				
		FGP	Free Goods Price			
		Code Value Implementation Note:				
		Use to indicate that the unit price is not applicable.				
		OAP	Optional to Advise Unit Price			
		Code Value Implementation Note:				
		Use to indicate that the unit price is not available.				
Required	CTP03	212	Unit Price	O	R	1/17
			Price per unit of product, service, commodity, etc.			

Implementation Note:

Express the contract unit price in dollars and cents, including the decimal.

Not Used	CTP04	380	Quantity	C	R	1/15
Not Used	CTP05	355	Unit or Basis for Measurement Code	C	ID	2/2
Not Used	CTP06	648	Price Multiplier Qualifier	O	ID	3/3
Not Used	CTP07	649	Multiplier	C	R	1/10
Not Used	CTP08	782	Monetary Amount	O	R	1/15
Not Used	CTP09	639	Basis of Unit Price Code	O	ID	2/2
Not Used	CTP10	499	Condition Value	O	AN	1/10

Optional

Segment: G69 Line Item Detail - Description

Level: Detail

Loop: HL

Usage: Optional

Max Use: 30

Purpose: To describe an item in free-form format

Implementation Notes:

1. Use multiple repetitions as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify the clear text purchase description; otherwise, do not use.
2. Use in every 2/HL/010 quality characteristics loop to identify item nomenclature as reported on the PQDR.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
G6901	369	Free-form Description Free-form descriptive text.	M AN 1/45

Optional	Segment: LDT Lead Time				
	Level: Detail				
	Loop: HL				
	Usage: Optional				
	Max Use: 3				
	Purpose: To specify lead time for availability of products and services.				
	Semantic: LDT04 is the effective date of lead time information.				
	Comment: LDT02 is the quantity of Unit of Time Periods.				
	Implementation Note: Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify production leadtimes for the item of supply; otherwise, do not use.				
	Data Element Summary				
Mandatory	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES	
	LDT01	345	Lead Time Code	M	ID 2/2
	Code indicating the time range.				
Mandatory	AE From date of PO receipt to shipment.				
	Code Value Implementation Note: Use to indicate the production leadtime, defined as the time between the letting of a contract and material receipt into the supply system.				
	LDT02	380	Quantity	M	R 1/15
Mandatory	Numeric value of quantity.				
	Implementation Note: Use to identify the numeric value of production leadtime days.				
	LDT03	344	Unit of Time Period or Interval	M	ID 2/2
Not Used	Code indicating the time period or interval				
	DY Day				
	LDT04	373	Date	O	DT 6/6

Optional

Segment: MEA Measurements**Level:** Detail**Loop:** HL**Usage:** Optional**Max Use:** 5**Purpose:** To specify physical measurements or counts, including dimensions, tolerances, variances, and weights

(See Figures Appendix for example of use of C001.)

Syntax: 1. R03050608 — At least one of MEA03, MEA05, MEA06 or MEA08 is required.

2. C0504 — If MEA05 is present, then MEA04 is required.

3. C0604 — If MEA06 is present, then MEA04 is required.

4. L07030506 — If MEA07 is present, then at least one of MEA03, MEA05 or MEA06 are required.

5. E0803 — Only one of MEA08 or MEA03 may be present.

Semantic: MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.**Comment:** When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed use MEA05 as the negative (-) value and MEA06 as the positive (+) value.**Implementation Note:***Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify measurements associated with the item of supply; otherwise, do not use. Use two repetitions to identify the maximum unit pack weight and cube.***Data Element Summary**

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Not Used	MEA01	737	Measurement Reference ID Code	O	ID	2/2
Required	MEA02	738	Measurement Qualifier Code identifying a specific product or process characteristic to which a measurement applies G Gross Weight	O	ID	1/3
			Code Value Implementation Note: <i>Use to identify the maximum gross weight of the unit pack.</i> UCB Cube			
			Code Value Implementation Note: <i>Use to identify the maximum cube of the unit pack.</i>			
Required	MEA03	739	Measurement Value The value of the measurement.	C	R	1/20

Implementation Note:*Express both the unit pack weight and cube values as a whole number with decimal positions, as needed.*

Required	MEA04	C001	COMPOSITE UNIT OF MEASURE To identify a composite unit of measure	C		
			(See Figures Appendix for examples of use.)			
Mandatory	MEA04 - 1	355	Unit or Basis for Measurement Code Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken CF Cubic Feet <i>Code Value Implementation Note:</i> <i>Use to indicate the unit pack cube in cubic feet.</i> LB Pound <i>Code Value Implementation Note:</i> <i>Use to indicate the unit pack weight in pounds.</i>	M	ID	2/2
Not Used	MEA04 - 2	1018	Exponent	O	R	1/15

Optional

Segment: PWK Paperwork**Level:** Detail**Loop:** HL**Usage:** Optional**Max Use:** 1**Purpose:** To identify the type and transmission of paperwork or supporting information**Syntax:** **P0506** — If either PWK05 or PWK06 is present, then the other is required.**Comments:** 1. PWK05 and PWK06 may be used to identify the addressee by a code number.

2. PWK07 may be used to indicate special information to be shown on the specified report.

3. PWK08 may be used to indicate action pertaining to a report.

Implementation Notes:

1. Use as needed in the 2/HL/010 product description loop to identify general logistics reassignment information associated with the item of supply.

2. Use in every 2/HL/010 quality characteristics loop to identify the PQDR report type and originator.

3. If either PWK04, PWK05, or PWK06 is present, then the others are required.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
PWK01	755	Report Type Code	M ID 2/2
		Code indicating the title or contents of a document, report or supporting item	

Implementation Note:

Use one of codes S5 or S6 in every 2/HL/010 quality characteristics loop to identify the PQDR as either a category I or II report.

PG Packaging Specification**Code Value Implementation Note:**

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to indicate that specific preservation, packaging, packing and marking data is available; otherwise, do not use. Cite the following codes in PWK07 as applicable:

Y - Specifications are available.

N - Requirements are not yet available.

QR Quality Report**Code Value Implementation Note:**

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to indicate that PQDRs are on file with the LIM; otherwise, do not use. Cite the following codes in PWK07, as appropriate:

Y - Reports are available.

N - No reports are available.

S5 Product Quality Deficiency Report Category I**S6** Product Quality Deficiency Report Category II

Optional	PWK02	756	Report Transmission Code Code defining timing, transmission method or format by which reports are to be sent	O	ID	1/2
Optional	PWK03	757	Report Copies Needed The number of copies of a report that should be sent to the addressee.	O	NO	1/2
Optional	PWK04	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2
Implementation Note: <i>Use in every 2/HL/010 quality characteristics loop only to identify the PQDR originator.</i> 41 Submitter						
Conditional	PWK05	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC)	C	ID	1/2
Conditional	PWK06	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Optional	PWK07	352	Description A free-form description to clarify the related data elements and their content.	O	AN	1/80
Implementation Note: <i>Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2, to identify coded information defined in PWK01 codes PG and QR; otherwise, do not use.</i>						
Not Used	PWK08	C002	ACTIONS INDICATED	O		

Optional

Segment: MSG Message Text

Level: Detail

Loop: HL

Usage: Optional

Max Use: 10

Purpose: To provide a free form format that would allow the transmission of text information.

Comment: MSG02 is not related to the specific characteristics of a printer, but identifies top of page, advance a line, etc.

Implementation Note:

Use multiple repetitions, as needed, in the 2/HL/010 line detail loop only to identify the PQDR deficiency description, investigation results, and disposition.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	MSG01	933	Free-Form Message Text Free-form message text.	M	AN	1/264
Not Used	MSG02	934	Printer Carriage Control Code	O	ID	2/2

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 20

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Notes:

1. Use in the 2/HL/010 product description loop to identify the type of transaction and general management and material description information associated with the item of supply.
2. Use in every 2/HL/010 item loop, in conjunction with 2/QTY/040 and the 2/N1/190 loop, to stratify the onhand inventory quantity by material condition, ownership, and storage location.
3. Use in every 2/HL/010 order loop in conjunction with 2/G62/080, and the 2/LM/170 and 2/N1/190 loops, to stratify the due-in inventory quantity by due date, storage location, and type due-in.
4. Use in every 2/HL/010 contract loop to identify coded information associated with the contract.
5. For any specific table 2 iterations use this 2/LM/170 loop as needed 1) to identify a DoD code when the LQ01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/060 loop or 2) to identify a DoD code when the LQ01 qualifier applies to all table 2 iterations but the LQ02 DoD code varies among most of them or 3) to override an LQ02 DoD code in the 1/LM/060 loop with a different DoD code in the 2/LM/170 loop when the same LQ01 qualifier is used in both loops but the LQ02 DoD code is different. (Code subject to override: 0.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	LM01	559	Agency Qualifier Code Code identifying the agency assigning the code values. DF Department of Defense (DoD)	M	ID	2/2

Purpose: Code to transmit standard industry codes

Syntax: **C0102** — If LQ01 is present, then LQ02 is required.**Implementation Note:***Use to identify codes, as appropriate, consistent with management information requirements.***Data Element Summary**

Required

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
LQ01	1270	Code List Qualifier Code Code identifying a specific industry code list	O ID 1/3

Implementation Note:*Use code 99 or A1 (but not both), as needed, in every 2/HL/010 item loop.*

0 Document Identification Code

2 Type of Business Code

Code Value Implementation Note:*Use as needed in the 2/HL/010 contract loop.*

4 Type of Contract Code

Code Value Implementation Note:*Use as needed in the 2/HL/010 contract loop.*

5 Criticality Designator Code

Code Value Implementation Note:*Use as needed in the 2/HL/010 contract loop.*

83 Supply Condition Code

Code Value Implementation Note:*Use in every 2/HL/010 item loop to identify the material condition of the on hand quantity reported.*

99 Purpose Code

Code Value Implementation Note:*Use as needed in 2/HL/010 item loops to identify the purpose of the onhand quantity reported.*

A1 Ownership Code

Code Value Implementation Note:*Use as needed in the 2/HL/010 item loops to identify the ownership of the onhand quantity reported.*

AH Acquisition Method Suffix Code

Code Value Implementation Note:*Use as needed in the 2/HL/010 contract loop.*

AI Acquisition Method Code

Code Value Implementation Note:*Use as needed in the 2/HL/010 contract loop.*

EH Type Due-In Indicator

Code Value Implementation Note:

Use in every 2/HL/010 order loop to identify the type due-in indicator code for the due-in quantity reported.

EV Review Period Indicator Code

Code Value Implementation Note:

Use in every 2/HL/010 product description loop.

EZ Type Inspection Code

Code Value Implementation Note:

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2; otherwise do not use.

FF Essentiality Code

Code Value Implementation Note:

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2; otherwise, do not use.

FG Source Maintenance and Recoverability Code

Code Value Implementation Note:

Use as needed in the 2/HL/010 product description loop, only for review periods 1 and 2; otherwise, do not use.

Required

LQ02

1271

Industry Code

Code indicating a code from a specific industry code list

C AN 1/20

Optional

Segment: N1 Name**Level:** Detail**Loop:** N1 **Repeat:** 50**Usage:** Optional**Max Use:** 1**Purpose:** To identify a party by type of organization, name and code

- Syntax:** 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. For any specific table 2 iteration use this 2/N1/090 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/070 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/070 loop with a different address specified in the 2/N1/190 loop when the same N101 qualifier is used in both loops but the N104 address is different. (Codes subject to override: ZP).
2. Use in the 2/HL/010 item loop, in conjunction with 2/QTY/040 and the 2/LM/170 loop, to stratify the onhand inventory quantity by material condition, ownership, and storage location.
3. Use in the 2/HL/010 order loop, in conjunction with 2/G62/080 and the 2/LM/170 and 2/N1/190 loops, to stratify the due-in inventory quantity by due date, storage location, and type due-in.
4. Use as needed in every 2/HL/010 contract loop to identify organizations associated with the contract.
5. Use as needed in every 2/HL/010 quality characteristics loop to identify organizations associated with the PQDR.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual C4 Contract Administration Office Code Value Implementation Note: Use as needed in the 2/HL/010 contract loop to identify the applicable contract administration services component identifier (see DoD 4140.59H). DG Design Engineering Code Value Implementation Note: Use as needed in the 2/HL/010 contract loop to identify the original equipment manufacturer or design control activity. LG Location of Goods Code Value Implementation Note: Use in every 2/HL/010 item loop to identify the storage location of the on hand quantity reported.	M ID 2/2

			MF Manufacturer of Goods			
			Code Value Implementation Note: Use in every 2/HL/010 quality characteristics loop to identify the manufacturer or prime contractor for the material reported on the PQDR.			
			PL Party to Receive Purchase Order			
			Code Value Implementation Note: Use in every 2/HL/010 contract loop to identify the contract awardee.			
			RC Receiving Location			
			Code Value Implementation Note: Use in every 2/HL/010 order loop to identify the receiving storage location for the due-in quantity reported.			
			ZP Gaining Inventory Manager			
			ZQ Screening Point			
			Code Value Implementation Note: Use in the 2/HL/010 quality characteristics loop to identify the designated screening point for the PQDR.			
Not Used	N102	93	Name	C	AN	1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67).	C	ID	1/2
			1 D-U-N-S Number, Dun & Bradstreet			
			Code Value Implementation Note: Use as needed 2/HL/010 contract loop to identify the contract awardee (N101 code PL) when no DODAAC or CAGE is available.			
			10 Department of Defense Activity Address Code (DODAAC)			
			33 Commercial and Government Entity (CAGE)			
			Code Value Implementation Note: Use as needed with N101 codes DG, MF, and PL when no DODAAC is assigned.			
			M4 Department of Defense Routing Identifier Code (RIC)			
Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20

Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2
			Implementation Note: Use code TO in conjunction with the appropriate 2/N101/190 code to indicate the organization to receive the transaction set.			
			TO Message To			
			Code Value Implementation Note: Use to indicate that the organization cited in N104 is to receive the transaction set.			

Mandatory

Segment: SE Transaction Set Trailer

Level: Detail

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01	96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

APPENDIX 10B

**TRANSACTION SET 846 IMPLEMENTATION CONVENTION
LR TRANSFER/DECAPITALIZATION**

846 Inventory Inquiry/Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Implementation Notes

1. LIMs use this transaction set to provide the GIM with LR transfer and decapitalization quantities. GIMs use this transaction set to inquire for LR transfer decapitalization data when none was received.
2. Use a single occurrence of this transaction set to exchange transactions between a single LIM and a single or multiple GIMs, or between a single GIM and a single or multiple LIMs. Use one occurrence of this transaction set to transmit a single or multiple transactions.

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
27	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

Mandatory

Segment: ST Transaction Set Header

Level: Header

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of a transaction set and to assign a control number

Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set.	M	ID	3/3
	846	X12.28 Inventory Inquiry/Advice			

Mandatory

ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9
------	-----	---	---	----	-----

Segment: BIA Beginning Segment for Inventory Inquiry/Advice
Level: Header
Loop: ____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the beginning of an inventory inquiry/advice transaction set.
Semantic: 1. BIA03 identifies the number of the inquiry/advice that is transferred.
 2. BIA04 identifies the date of the inquiry/advice that is transferred.
 3. BIA05 identifies the time of the inquiry/advice that is transferred.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	BIA01	353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as actions documents which affect accountable records.	M ID 2/2
Mandatory	BIA02	755	Report Type Code Code indicating the title or contents of a document, report or supporting item TK Logistics Transfer Inquiry Code Value Implementation Note: Use to identify an inquiry for LR transfer/decapitalization data. TL Logistics Transfer Advice Code Value Implementation Note: Use to identify an LR transfer/decapitalization transaction.	M ID 2/2
Mandatory	BIA03	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier. Implementation Note: Use Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.	M AN 1/30
Mandatory	BIA04	373	Date Date (YYMMDD). Implementation Note: Express the originating activity's date of transaction set preparation in GMT.	M DT 6/6

Required

BIA05 337

Time

O TM 4/8

Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)

Implementation Notes:

1. Express the originating activity's time of transaction set preparation in GMT.
2. Express time in a four-position (HHMM) format.

Not Used

BIA06 306

Action Code

O ID 1/2

Optional

Segment: DTM Date/Time Reference**Level:** Header**Loop:** _____**Usage:** Optional**Max Use:** 10**Purpose:** To specify pertinent dates and times**Syntax:** 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.

2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. Use this 1/DTM/050 segment to indicate the date when a DTM01 qualifier code (e.g., 007) applies to ALL table 2 iterations and the same DTM02 date applies to all or most of the table 2 iterations. For any specific table 2 iteration where the date is to differ from the one indicated in table 1, use the 2/DTM/100 segment and specify the matching qualifier in DTM01 and the different date in DTM02. This date will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/DTM01/050 that does not apply to all the table 2 iterations. (Codes subject to override: 007.)

2. Do not use 1/DTM/050 when reversing a previously submitted transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time. 007 Effective Code Value Implementation Note: Use to identify the ETD.	M	ID	3/3
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Required

Segment: N1 Name

Level: Header

Loop: N1 **Repeat:** 5

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/080 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/080 loop to indicate an organization when an N101 qualifier code (e.g., ZN) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/450 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/080 that does not apply to all the table 2 iterations. (Codes subject to override: ZN and ZP.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual ZN Losing Inventory Manager ZP Gaining Inventory Manager	M ID 2/2
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67). 10 Department of Defense Activity Address Code (DODAAC) M4 Department of Defense Routing Identifier Code (RIC)	C ID 1/2
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20
Not Used	N105	706	Entity Relationship Code	O ID 2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O ID 2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/080 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/140 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/260 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/150 that does not apply to all table 2 iterations. (Codes subject to override: 0 and AK.)

Data Element Summary

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN Repeat: 10000

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Note:

Use the 2/LIN/010 loop to identify the NSN, transaction number, and inventory information associated with logistics transfer/decapitalization data.

Data Element Summary

Not Used

Not Used	LIN31	234	Product/Service ID	C	AN	1/40

Segment: **DTM** Date/Time Reference

Level: Detail

Loop: LIN

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. For any specific table 2 iteration use this 2/DTM/100 segment as needed 1) to identify the date when a DTM01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/DTM/050 segment or 2) when the DTM01 qualifier applies to all table 2 iterations but the DTM02 date varies among most of them or 3) to override a date in the 1/DTM/050 segment with a different date in the 2/DTM/100 segment when the same DTM01 qualifier is used in both segments, but the DTM02 date is different. (Codes subject to override: 007.)
2. Use multiple repetitions as needed to define other dates associated with the transaction.
3. Do not use 2/DTM/100 when reversing a previously submitted transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time. 007 Effective Code Value Implementation Note: Use to identify the ETD. 036 Expiration Code Value Implementation Note: Use only for subsistence items in logistics transfer/decapitalization report transactions to identify the expiration date. 510 Date Packed Code Value Implementation Note: Use only for subsistence items in logistics transfer/decapitalization report transactions to identify the date packed.	M	ID	3/3
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Optional

Segment: CTP Pricing Information**Level:** Detail**Loop:** LIN**Usage:** Optional**Max Use:** 25**Purpose:** To specify pricing information**Syntax:** 1. P0405 — If either CTP04 or CTP05 is present, then the other is required.

2. C0607 — If CTP06 is present, then CTP07 is required.

3. C0902 — If CTP09 is present, then CTP02 is required.

4. C1002 — If CTP10 is present, then CTP02 is required.

Semantic: 1. CTP07 is a multiplier factor to arrive at a final discounted price. A multiplier of .90 would be the factor if a 10% discount is given.

2. CTP08 is the rebate amount.

Comments: 1. See Figures Appendix for an example detailing the use of CTP03 and CTP04.

2. See Figures Appendix for an example detailing the use of CTP03, CTP04 and CTP07.

Implementation Note:*Must use with LR transfer/decapitalization transactions. Do not use with inquiries for LR transfer/decapitalization data or when reversing a previously submitted transaction.***Data Element Summary**

Required

Segment: REF Reference Numbers**Level:** Detail**Loop:** LIN**Usage:** Optional**Max Use:** >1**Purpose:** To specify identifying numbers.**Syntax:** R0203 — At least one of REF02 or REF03 is required.**Implementation Note:**

Use up to 2 repetitions. Must use the first repetition to identify the controlling transaction number for this transaction. Use a second repetition only when processing an LR transfer/decapitalization transaction for a nonprocurement source receipt processed after the ETD, to identify the transaction number of the receipt thereby establishing an audit trail between the receipt of the item and its subsequent transfer/decapitalization.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
REF01	128	Reference Number Qualifier	M	ID	2/2

Code qualifying the Reference Number.

43 Supporting Document Number

Code Value Implementation Note:

Must use to identify the transaction number from the associated receipt transaction when applicable.

TN Transaction Reference Number

Code Value Implementation Note:

Must use to identify the controlling transaction number for this transaction.

Required

REF02	127	Reference Number	C	AN	1/30
-------	-----	------------------	---	----	------

Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.

Not Used

REF03	352	Description	C	AN	1/80
-------	-----	-------------	---	----	------

Optional

Segment: CS Contract Summary

Level: Detail

Loop: LIN

Usage: Optional

Max Use: 1

Purpose: To provide information about a contract

Syntax: P0405 — If either CS04 or CS05 is present, then the other is required.

Semantic: 1. CS09 is the permissible overage as a percentage of the total contract line item number (CLIN) quantity.

2. CS10 is the permissible shortage as a percentage of the total contract line item number (CLIN) quantity.

3. CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.

4. CS14 is the Unit of Measure stipulated in the contract.

5. CS15 is the contract line item number (CLIN) unit price specified in the contract.

6. CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract. A "N" indicates that no Critical Application Indicator is specified in the contract.

7. CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract. A "N" indicates that no Special Requirements Indicator is specified in the contract.

Comments: 1. CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).

2. CS07 and CS13 (DE 560) can be used to indicate two different types of special services required.

Implementation Note:

Use only for LR transfer/decapitalization transactions for items received from a procurement source by the LIM after the ETD, to establish an audit trail between the receipt and its subsequent transfer/decapitalization. The control number for this transaction is identified in the 2/REF/140 segment.

Data Element Summary

	Numeric value of quantity.				
	Implementation Note:				
	Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.				
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID 2/2

Required

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use the 2/LM/375 loop to identify DoD unique coded data related to the characteristics and coding requirements for the transaction.

Data Element Summary

Mandatory

Optional

Segment: N1 Name
Level: Detail
Loop: N1 **Repeat:** 200
Usage: Optional
Max Use: 1
Purpose: To identify a party by type of organization, name and code
Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.
Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/450 loop as needed 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/080 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/080 loop with a different address specified in the 2/N1/450 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: ZP and ZN.)

Data Element Summary

------	-----	--	----------

APPENDIX 10C

TRANSACTION SET 846 IMPLEMENTATION CONVENTION LR STORAGE TRANSFER ORDER/REPLY

846 Inventory Inquiry/Advice

This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Implementation Notes

1. ICPs/IMMs (LIM) use this transaction set to notify the distribution depot that ownership of stored wholesale assets has transferred to the GIM and to request asset information. Distribution depots use this transaction set to report asset information to the LIM.
2. Use a single occurrence of this transaction set to exchange transactions between a single LIM and a single or multiple distribution depots, or between a single distribution depot and a single or multiple LIMs. Use one occurrence of this transaction set to transmit a single or multiple transactions.

PAGE #	POS. #	SEG. ID	NAME	REQ. DES.	MAX USE	LOOP REPEAT
N/U	010	CTT	Transaction Totals	O	1	
24	020	SE	Transaction Set Trailer	M	1	

NOTES/COMMENTS:

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

Segment: **ST** Transaction Set Header
Level: Header
Loop: _____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).

Implementation Note:

See control structure discussion in volume 1, chapter 6.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code Code uniquely identifying a Transaction Set. 846 X12.28 Inventory Inquiry/Advice	M	ID	3/3
Mandatory	ST02	329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M	AN	4/9

Segment: **BIA** Beginning Segment for Inventory Inquiry/Advice
Level: Header
Loop: _____
Usage: Mandatory
Max Use: 1
Purpose: To indicate the beginning of an inventory inquiry/advice transaction set.
Semantic: 1. BIA03 identifies the number of the inquiry/advice that is transferred.
 2. BIA04 identifies the date of the inquiry/advice that is transferred.
 3. BIA05 identifies the time of the inquiry/advice that is transferred.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	BIA01	353 Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions do not process as action documents which affect accountable records.</i>	M ID 2/2
Mandatory	BIA02	755 Report Type Code Code indicating the title or contents of a document, report or supporting item PK Storage Information Inquiry Code Value Implementation Note: <i>Use to identify an LR storage ownership transfer order.</i> TQ Storage Information Advice Code Value Implementation Note: <i>Use to identify an LR storage ownership transfer reply.</i>	M ID 2/2
Mandatory	BIA03	127 Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier. Implementation Note: <i>Use a Z for this data element. DLMS does not use this data element, but it is mandatory in the X12 standards. The Z entry satisfies the X12 usage requirements; the receiving application software shall not process it.</i>	M AN 1/30
Mandatory	BIA04	373 Date Date (YYMMDD). Implementation Note: <i>Express the originating activity's date of transaction set preparation in GMT.</i>	M DT 6/6

Optional	BIA05 337 Time	O TM 4/8
	Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)	

Implementation Notes:

1. Express the originating activity's time of transaction set preparation in GMT.
2. Express time in a four-position (HHMM) format.

Not Used	BIA06 306 Action Code	O ID 1/2
----------	-----------------------------	--------------

Optional

Segment: DTM Date/Time Reference

Level: Header

Loop: _____

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. Use this 1/DTM/050 segment to indicate the date when a DTM01 qualifier code (e.g., 007) applies to ALL table 2 iterations and the same DTM02 date applies to all or most of the table 2 iterations. For any specific table 2 iteration where the date is to differ from the one indicated in table 1, use the 2/DTM/100 segment and specify the matching qualifier in DTM01 and the different date in DTM02. This date will override the table 1 date for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/DTM01/050 that does not apply to all of the table 2 iterations. (Codes subject to override: 007.)
2. Do not use 1/DTM/050 when reversing a previously submitted transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time. 007 Effective Code Value Implementation Note: <i>Must use for LR storage ownership transfer transactions to identify the ETD; otherwise, do not use.</i>	M	ID	3/3
Required	DTM02	373	Date Date (YYMMDD).	C	DT	6/6
Not Used	DTM03	337	Time	C	TM	4/8
Not Used	DTM04	623	Time Code	O	ID	2/2
Not Used	DTM05	624	Century	O	N0	2/2
Not Used	DTM06	1250	Date Time Period Format Qualifier	C	ID	2/3
Not Used	DTM07	1251	Date Time Period	C	AN	1/35

Optional

Segment: N1 Name

Level: Header

Loop: N1 **Repeat:** 5

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. Use the 1/N1/080 loop to cite the organization originating the transaction set.

2. Use this 1/N1/080 loop to indicate an organization when an N101 qualifier code (e.g., ZP) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/450 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/080 that does not apply to all of the table 2 iterations. (Codes subject to override: SB and ZP.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		SB Storage Area	
		Code Value Implementation Note:	
		Use to identify a depot or other storage activity.	
		ZN Losing Inventory Manager	
		ZP Gaining Inventory Manager	
		Code Value Implementation Note:	
		Use only for LR storage ownership transfer order transactions to identify the GIM. Do not use when reversing a previously submitted transaction.	
N102	93	Name	C AN 1/35
N103	66	Identification Code Qualifier	C ID 1/2
		Code designating the system/method of code structure used for Identification Code (67).	
		10 Department of Defense Activity Address Code (DODAAC)	
		M4 Department of Defense Routing Identifier Code (RIC)	

Not Used

Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/080 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

Use this 1/LM/140 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/260 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ01/150 that does not apply to all the table 2 iterations. (Code subject to override: 0.)

Required

Mandatory

Segment: LIN Item Identification

Level: Detail

Loop: LIN **Repeat:** 10000

Usage: Mandatory

Max Use: 1

Purpose: To specify basic item identification data.

- Syntax:**
1. P0405 — If either LIN04 or LIN05 is present, then the other is required.
 2. P0607 — If either LIN06 or LIN07 is present, then the other is required.
 3. P0809 — If either LIN08 or LIN09 is present, then the other is required.
 4. P1011 — If either LIN10 or LIN11 is present, then the other is required.
 5. P1213 — If either LIN12 or LIN13 is present, then the other is required.
 6. P1415 — If either LIN14 or LIN15 is present, then the other is required.
 7. P1617 — If either LIN16 or LIN17 is present, then the other is required.
 8. P1819 — If either LIN18 or LIN19 is present, then the other is required.
 9. P2021 — If either LIN20 or LIN21 is present, then the other is required.
 10. P2223 — If either LIN22 or LIN23 is present, then the other is required.
 11. P2425 — If either LIN24 or LIN25 is present, then the other is required.
 12. P2627 — If either LIN26 or LIN27 is present, then the other is required.
 13. P2829 — If either LIN28 or LIN29 is present, then the other is required.
 14. P3031 — If either LIN30 or LIN31 is present, then the other is required.

Semantic: LIN01 is the line item identification

- Comments:**
1. See the Data Dictionary for a complete list of ID's.
 2. LIN02 through LIN31 provide for fifteen (15) different product/service ID's for each item. For Example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Implementation Note:

Use the 2/LIN/010 loop to identify the NSN, transaction number, and inventory information.

Optional

Segment: DTM Date/Time Reference

Level: Detail

Loop: LIN

Usage: Optional

Max Use: 10

Purpose: To specify pertinent dates and times

Syntax: 1. R020306 — At least one of DTM02, DTM03 or DTM06 is required.
2. P0607 — If either DTM06 or DTM07 is present, then the other is required.

Implementation Notes:

1. For any specific table 2 iteration use this 2/DTM/100 segment as needed: 1) to identify the date when a DTM01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/DTM/050 segment or 2) when the DTM01 qualifier applies to all table 2 iterations but the DTM02 date varies among most of them, or 3) to override a date in the 1/DTM/050 segment with a different date in the 2/DTM/100 segment when the same DTM01 qualifier is used in both segments, but the DTM02 date is different. (Codes subject to override: 007.)
2. Use multiple repetitions of this segment as needed to define unique dates associated with the transaction.
3. Do not use 2/DTM/100 when reversing a previously submitted transaction.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	DTM01	374	Date/Time Qualifier Code specifying type of date or time, or both date and time. 007 Effective Code Value Implementation Note: Must use for LR storage ownership transfer order transactions to identify the ETD; otherwise, do not use. 036 Expiration Code Value Implementation Note: Use for LR storage ownership transfer order transactions for subsistence items to identify the expiration date; otherwise, do not use. 510 Date Packed Code Value Implementation Note: Use for LR storage ownership transfer order transactions for subsistence items to identify the date packed; otherwise, do not use. DTM07 1251 Date Time Period

C AN 1/35

Segment: REF Reference Numbers
Level: Detail
Loop: LIN
Usage: Optional
Max Use: >1
Purpose: To specify identifying numbers.
Syntax: R0203 — At least one of REF02 or REF03 is required.

Implementation Note:
Must use to identify the transaction number.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M	ID	2/2
			TN Transaction Reference Number			
Required	REF02	127	Reference Number Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.	C	AN	1/30
Not Used	REF03	352	Description	C	AN	1/80

Optional

Segment: LM Code Source Information

Level: Detail

Loop: LM **Repeat:** 10

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Note:

For any specific table 2 iteration use this 2/LM/260 loop as needed: 1) to identify a DoD code when the LQ01 qualifier code does not apply and therefore was NOT indicated in the 1/LM/140 loop or 2) to identify a DoD code when the LQ01 qualifier applies to all table 2 iterations but the LQ02 DoD code varies among most of them or 3) to override an LQ02 DoD code in the 1/LM/140 loop with a different DoD code in the 2/LM/260 loop when the same LQ01 qualifier is used in both loops but the LQ02 DoD code is different. (Codes subject to override: 0.)

Data Element Summary

Required

Segment: QTY Quantity

Level: Detail

Loop: QTY Repeat: 99

Usage: Optional

Max Use: 1

Purpose: To specify quantity information.

Implementation Note:

Use successive iterations of the 2/QTY/320 loop, as needed, when exchanging asset status information to stratify quantities by material classification.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	QTY01	673	Quantity Qualifier	M	ID 2/2
			Code specifying the type of quantity.		
			V1 Retention Quantity		
Code Value Implementation Note:					
Use to identify the retention quantity. For LR storage ownership transfer order transactions this represents the quantity scheduled to be retained by the LIM. For LR storage ownership transfer reply transactions this represents the quantity actually retained by the LIM. Do not use in reply transactions if no corresponding order transaction was received.					
V2 Available Quantity					
Code Value Implementation Note:					
Use for LR ownership transfer reply transactions to identify the quantity transferred to GIM ownership; otherwise, do not use. To reverse all or part of a previously submitted LR ownership transfer reply, use a minus sign in front of the quantity to be reversed (See data element type discussion in volume 1, chapter 10).					
V3 Transfer Quantity					
Code Value Implementation Note:					
Use for LR storage ownership transfer order transactions to identify the quantity to be transferred to GIM ownership; otherwise, do not use. To reverse all or part of an LR storage ownership transfer order, use a minus sign in front of the quantity to be reversed (see data element type discussion in volume 1, chapter 10).					
Mandatory	QTY02	380	Quantity	M	R 1/15
			Numeric value of quantity.		
Implementation Note:					
Express as a whole number with no decimals. For example, if the quantity is 20, cite only 20.					
Not Used	QTY03	355	Unit or Basis for Measurement Code	O	ID 2/2

Required

Segment: N1 Name

Level: Detail

Loop: N1 **Repeat:** 200

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.

2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/450 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/N1/080 loop or 2) when the N101 qualifier applies to all table 2 iterations but the N104 address varies among most of them, or 3) to override an address in the 1/N1/080 loop with a different address specified in the 2/N1/450 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: SB and ZP.)

Data Element Summary

Optional

N106

98

Entity Identifier Code

O ID 2/2

Code identifying an organizational entity, a physical location, or an individual

Implementation Note:

Must use code TO in conjunction with the appropriate 2/N101/450 code to indicate the organization to receive the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Segment: **SE** Transaction Set Trailer

Level: Summary

Loop: _____

Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Comment: SE is the last segment of each transaction set.

Implementation Note:
See control structure discussion in volume 1, chapter 6.

Data Element Summary

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	SE01 96	Number of Included Segments Total number of segments included in a transaction set including ST and SE segments.	M NO 1/10
Mandatory	SE02 329	Transaction Set Control Number Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set	M AN 4/9

11 DEMAND TRANSACTIONS

11.1 DEMAND TRANSACTIONS

The TS 867 IC - Demand (appendix 11A) may be used between supported organizations and owner/managers to report the establishment or cancellation of supply system demands, or may be used by owner/managers as a technique for recording and accumulating demands for NSN items resulting from processing requisitions.

- The TS 867 IC - Demand may be used by the material manager to determine whether the demand is a recurring/nonrecurring or has been previously recorded.
- The TS 867 IC - Demand may identify Weapon System or other management information requirements.
- The submitter will indicate in the BPT segment when the TS 867 IC - Demand is used in a Simulation Exercise.

APPENDIX 11A

TRANSACTION SET 867 IMPLEMENTATION CONVENTION DEMAND

867 Product Transfer and Resale Report

This Draft Standard for Trial Use contains the format and establishes the data contents of the Product Transfer and Resale Report Transaction Set (867) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to: (1) report information about product that has been transferred from one location to another; (2) report sales of product from one or more locations to an end customer; or (3) report sales of a product from one or more locations to an end customer, and demand beyond actual sales (lost orders). Report may be issued by either buyer or seller.

Implementation Notes

1. Organizations use this transaction set to record demand for items that are obtained locally.
2. Use a single occurrence of this transaction set to transmit demand transactions to one or more activities. Use one occurrence of this transaction set to transmit a single or multiple transactions.
3. A single transaction set may contain a combination of demand transactions for standard and nonstandard material.

NOTES/COMMENTS:

2/280 The LX loop conveys serial number, lot number, and inventory data.

3/010 The number of line items (CTT01) is the accumulation of the number of LIN segments. If used, hash total (CTT02) is the sum of the value of quantities (QTY02) for each QTY segment.

Mandatory	Segment: ST Transaction Set Header
	Level: Header
	Loop: ____
	Usage: Mandatory
	Max Use: 1
	Purpose: To indicate the start of a transaction set and to assign a control number
	Semantic: The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the invoice transaction set).
	Implementation Note: <i>See control structure discussion in volume 1, chapter 6.</i>

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	ST01	143	Transaction Set Identifier Code	M	ID	3/3
			Code uniquely identifying a Transaction Set.			
		867	X12.33 Product Transfer and Resale Report			
Mandatory	ST02	329	Transaction Set Control Number	M	AN	4/9
			Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set			

Segment: BPT Beginning Segment for Product Transfer and Resale

Level: Header

Loop: _____

Mandatory

Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of the product transfer and/or resale report and transmit identifying data.**Syntax:** P0506 — If either BPT05 or BPT06 is present, then the other is required.**Semantic:** 1. BPT02 identifies the transfer/resale number.

2. BPT03 identifies the transfer/resale date.

3. BPT08 identifies the transfer/resale time.

4. BPT09 is used when it is necessary to reference a Previous Report Number.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
Mandatory	BPT01	353	Transaction Set Purpose Code Code identifying purpose of transaction set. 00 Original 77 Simulation Exercise Code Value Implementation Note: <i>Use to identify a simulated mobilization exercise transaction set. Activities initiating simulated mobilization exercises must ensure complete coordination with all activities involved. All transaction set recipients must use extreme caution to ensure that individual transactions are not processed as action documents which affect accountable records.</i>	M	ID	2/2
Not Used	BPT02	127	Reference Number	O	AN	1/30
Mandatory	BPT03	373	Date Date (YYMMDD).	M	DT	6/6
			Implementation Note: <i>Express the originating activity's date of transaction set preparation in GMT.</i>			
Required	BPT04	755	Report Type Code Code indicating the title or contents of a document, report or supporting item TO Demand Report Code Value Implementation Note: <i>Use to indicate that the transaction set contains demand transactions for standard or nonstandard material.</i>	O	ID	2/2
Not Used	BPT05	648	Price Multiplier Qualifier	C	ID	3/3
Not Used	BPT06	649	Multiplier	C	R	1/10
Not Used	BPT07	306	Action Code	O	ID	1/2
Not Used	BPT08	337	Time	O	TM	4/8
Not Used	BPT09	127	Reference Number	O	AN	1/30

Required

Segment: N1.Name

Level: Header

Loop: N1 **Repeat:** 5

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Notes:

1. The 1/N1/080 loop will, as a minimum, cite the organization originating the transaction set.
2. Use this 1/N1/080 loop to indicate an organization when an N101 qualifier code (e.g., Z4) applies to ALL table 2 iterations and the same address (N104 value) applies to all or most of the table 2 iterations. For any specific table 2 iteration where the address is to differ from the one indicated in table 1, use the 2/N1/050 loop and specify the matching qualifier in N101 and the different address in N104. This address will override the table 1 data for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/N101/080 that does not apply to all of the table 2 iterations. (Codes subject to override: Z4.)

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	N101	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	M ID 2/2
			OB Ordered By	
			QB Purchase Service Provider	
			Code Value Implementation Note: Use to indicate a procurement contracting office or other purchasing activity.	
			SB Storage Area	
			Code Value Implementation Note: Use to identify the depot or storage activity.	
			Z4 Owning Inventory Control Point	
Not Used	N102	93	Name	C AN 1/35
Required	N103	66	Identification Code Qualifier Code designating the system/method of code structure used for Identification Code (67).	C ID 1/2
			10 Department of Defense Activity Address Code (DODAAC)	
			M4 Department of Defense Routing Identifier Code (RIC)	
Required	N104	67	Identification Code Code identifying a party or other code.	C AN 2/20

Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code	O	ID	2/2
			Code identifying an organizational entity, a physical location, or an individual			

Implementation Note:

Must use codes FR and TO in conjunction with the appropriate 1/N101/080 code to indicate the organizations sending and receiving the transaction set.

FR Message From

Code Value Implementation Note:

Use to indicate that the organization cited in N104 transmitted the transaction set.

TO Message To

Code Value Implementation Note:

Use to indicate that the organization cited in N104 is to receive the transaction set.

Optional

Segment: PER Administrative Communications Contact

Level: Header

Loop: N1

Usage: Optional

Max Use: 3

Purpose: To identify a person or office to whom administrative communications should be directed

Syntax: 1. P0304 — If either PER03 or PER04 is present, then the other is required.
2. P0506 — If either PER05 or PER06 is present, then the other is required.
3. P0708 — If either PER07 or PER08 is present, then the other is required.

Implementation Notes:

1. Use only under exceptional circumstances when requiring direct communication with the party originating the transaction set. Do not use when reversing a transaction.
2. Use multiple iterations as needed to identify a POC and multiple communications numbers. When using multiple repetitions to identify different communication numbers for a single POC, repeat the name cited in PER02.

Data Element Summary

	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
Mandatory	PER01	366	Contact Function Code Code identifying the major duty or responsibility of the person or group named. IC Information Contact	M ID 2/2
			Code Value Implementation Note: Use to identify the primary point of contact and their communication numbers.	
Required	PER02	93	Name Free-form name.	O AN 1/35
			Implementation Note: Provide the last name, first name, middle initial, and rate/rank/title, as required, of the individual named as point of contact. Include blank spaces between name components and periods after initials. Do not include NMN when a middle initial is not available.	
Required	PER03	365	Communication Number Qualifier Code identifying the type of communication number.	C ID 2/2
			Implementation Notes: 1. Use to identify the preferred method of communication in the first repetition. Use PER05/6 and PER07/8 to identify additional communication numbers. Use additional repetitions of the PER segment to identify more than three communication numbers. 2. Do not include blank spaces or dashes between numbers.	
			AU Defense Switched Network Code Value Implementation Note: Use to identify the DSN telephone number.

Optional	PER09	443	Contact Inquiry Reference Additional reference number or description to clarify a contact number.	O	AN	1/20
Implementation Note: Use as needed to indicate the office symbol or activity code for the identified party.						

Optional

Segment: LM Code Source Information

Level: Header

Loop: LM **Repeat:** >1

Usage: Optional

Max Use: 1

Purpose: To transmit standard code list identification information

Comment: LM02 identifies the applicable industry code list source information.

Implementation Notes:

1. Use this 1/LM/140 loop to identify DoD unique data when any specific LQ01 qualifier code (e.g., 79) applies to ALL table 2 iterations and the same LQ02 DoD code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the DoD code is to differ from the one indicated in table 1, use the 2/LM/260 loop and specify the matching qualifier in LQ01 and the different DoD code in LQ02. This code will override the table 1 DoD code for the current table 2 iteration (see override discussion in volume 1, chapter 10). Do not cite any qualifier code in 1/LQ/150 that does not apply to all the table 2 iterations. (Codes subject to override: 74, 79, and EN.)

2. Must use the 1/LM/140 loop to identify the type of transaction.

Required	REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES	
	LQ01	1270	Code List Qualifier Code	O	ID 1/3
			Code identifying a specific industry code list		
			0 Document Identification Code		
			74 Demand Code		
			Code Value Implementation Note:		
			Use as needed to identify the demand code.		
			79 Priority Designator Code		
			Code Value Implementation Note:		
			Recommend using in all demand transactions.		
Required			EN Local Source Code		
			Code Value Implementation Note:		
			Use to identify the method/source for satisfying material requirement at the local level.		
	LQ02	1271	Industry Code	C	AN 1/20
			Code indicating a code from a specific industry code list		

Mandatory

Segment: PTD Product Transfer and Resale Detail

Level: Detail

Loop: PTD **Repeat:** >1

Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of detail information relating to the transfer/resale of a product and provide identifying data.

Syntax: 1. P0203 — If either PTD02 or PTD03 is present, then the other is required.
2. P0405 — If either PTD04 or PTD05 is present, then the other is required.

Implementation Note:

Use to indicate that the transaction is for demand reporting only.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
PTD01	521	Product Transfer Type Code Code identifying the type of product transfer.	M	ID	2/2
		BB Demand Information Only			
PTD02	648	Price Multiplier Qualifier	C	ID	3/3
PTD03	649	Multiplier	C	R	1/10
PTD04	128	Reference Number Qualifier	C	ID	2/2
PTD05	127	Reference Number	C	AN	1/30
PTD06	486	Product Transfer Movement Type Code	O	ID	2/2

Not Used

Not Used

Not Used

Not Used

Not Used

Required

Segment: REF Reference Numbers

Level: Detail

Loop: PTD

Usage: Optional

Max Use: 20

Purpose: To specify identifying numbers.

Syntax: R0203 — At least one of REF02 or REF03 is required.

Implementation Note:

Use the 2/REF/030 segment to identify the material and other data pertinent to the transaction.

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES		
REF01	128	Reference Number Qualifier Code qualifying the Reference Number.	M	ID	2/2

Implementation Notes:

1. Use only one of codes 1I, 87, EQ, FQ, MF, NS, S6, or XD to properly identify the material provided.
2. When citing the Federal Supply Classification (code WL), always use code PG to identify the commodity name or description.
3. When citing a manufacturer's part number (code MF), always use code W7 to identify the manufacturer's CAGE.

1I Department of Defense Identification Code (DoDIC)

Code Value Implementation Note:

Use to identify ammunition items.

EQ Equipment Number

Code Value Implementation Note:

Use to identify plant equipment.

FQ Form Number

Code Value Implementation Note:

Use to identify the form stock number.

MF Manufacturers Part Number

Code Value Implementation Note:

Use as needed to identify the manufacturer's part number for nonstandard material actually obtained locally.

NS National Stock Number

Code Value Implementation Note:

Must use the NSN when known.

PG Product Group

Code Value Implementation Note:

Use in conjunction with code 87 to identify the material name or description.

S6 Stock Number

Code Value Implementation Note:

Use to identify the publication stock number.

TN Transaction Reference Number

Code Value Implementation Note:

Use to identify the transaction number of the associated transaction.

W7 Commercial and Government Entity (CAGE) Code

Code Value Implementation Note:

Use only with code MF to identify the manufacturer's part number.

W8 Suffix

Code Value Implementation Note:

Use to identify the suffix of the associated transaction number.

WL Federal Supply Classification Code

Code Value Implementation Note:

Use to identify the Federal Supply Classification of nonstandard material when a part number is not available and material can only be identified by description (e.g., non-NSN lumber products).

XD Subsistence Identification Number

Code Value Implementation Note:

Use to identify subsistence items.

Conditional

REF02	127	Reference Number	C AN	1/30
Reference number or identification number as defined for a particular Transaction Set, or as specified by the Reference Number Qualifier.				

Conditional

REF03	352	Description	C AN	1/80
A free-form description to clarify the related data elements and their content.				

Implementation Note:

Use only with code PG to identify the nonstandard material name or description.

Optional

Segment: N1 Name

Level: Detail

Loop: N1 **Repeat:** 5

Usage: Optional

Max Use: 1

Purpose: To identify a party by type of organization, name and code

Syntax: 1. R0203 — At least one of N102 or N103 is required.
2. P0304 — If either N103 or N104 is present, then the other is required.

Comments: 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2. N105 and N106 further define the type of entity in N101.

Implementation Note:

For any specific table 2 iteration use this 2/N1/050 loop as needed: 1) to identify an organization when the N101 qualifier code does not apply to all the table 2 iterations and therefore was NOT indicated in the 1/N1/080 loop or 2) when the N101 qualifier applies to all of the table 2 iterations but the N104 address varies among most of them or 3) to override an address in the 1/N1/080 loop with a different address specified in the 2/N1/050 loop when the same N101 qualifier is used in both loops, but the N104 address is different. (Codes subject to override: Z4.)

Data Element Summary

Mandatory

REF. DES.	DATA ELEMENT	NAME	ATTRIBUTES
--------------	-----------------	------	------------

N101	98	Entity Identifier Code	M ID 2/2
		Code identifying an organizational entity, a physical location, or an individual	
		SU Supplier/Manufacturer	

Code Value Implementation Note:

Use to identify the supplier of the item when different from the manufacturer. The manufacturer is identified in 2/REF/030 in conjunction with the manufacturer's part number.

Z4 Owing Inventory Control Point

ZE End Item Manufacturer

Code Value Implementation Note:

Use as needed to identify the manufacturer of the end item (Make). When using, N102 will cite the actual name of the end item manufacturer.

Not Used

N102	93	Name	C AN 1/35
------	----	-------------	-----------

Required

N103	66	Identification Code Qualifier	C ID 1/2
		Code designating the system/method of code structure used for Identification Code (67).	

10 Department of Defense Activity Address Code (DODAAC)

33 Commercial and Government Entity (CAGE)

Code Value Implementation Note:

Use when the activity is a contractor not assigned a DoDAAC.

M4 Department of Defense Routing Identifier Code (RIC)

Required	N104	67	Identification Code Code identifying a party or other code.	C	AN	2/20
Not Used	N105	706	Entity Relationship Code	O	ID	2/2
Optional	N106	98	Entity Identifier Code Code identifying an organizational entity, a physical location, or an individual	O	ID	2/2

Implementation Note:
